A scolytid, *Pelicerus* sp., at Washington, D. C., with *Garcinia spicata* seeds in mail from Okinawa.

Phenacoccus sp. (Coccidae), an undescribed species, at New York, N. Y., on galanthus bulbs and twinleaf squill bulbs in cargo from Turkey.

Phloeosinus sp. (Scolytidae) at Portland, Oreg., in *Cryptomeria* sp. bark in air cargo from Japan.

Phyllotreta sp., probably *flexuosa* (Ill.) (Chrysomelidae), at Philadelphia, Pa., on cabbage in stores from England.

Pieris sp. (Pieridae) at Charleston, S. C., on cabbage in stores from Belgium and New Zealand; at Philadelphia, Pa., on Chinese cabbage in stores from Japan; and at Port Arthur, Tex., on cauliflower in stores from England.

A chrysomelid, *Plagiodesa* sp., probably *jucunda* (Klug), at Miami, Fla., on a bromeliad leaf in air baggage and air cargo from Paraguay.

An ant, *Plagiolepis* sp., very probably *alluaudi* Emery, at Charlotte Amalie, St. Thomas on gladiolus in baggage from St. Kitts.

Podothrips sp., near *longiceps* J.-G. (Phlaeothripidae), at Boston, Mass., on semi-dry grass in baggage from the Union of South Africa.

Prays sp. (Hyponomeutidae) at Boston, Mass., in pomelo in stores from Indonesia.

A curculionid, *Premnotrypes* sp., at Philadelphia, Pa., on *Solanum tuberosum* var. in stores from Ecuador.

Psammodyus sp. (Scarabaeidae) at Honolulu, Hawaii with grapes in air stores from Eniwetok; and at New York, N. Y., with soil in mail from Israel.

Rhynchites sp. (Curculionidae) at Boston, Mass., in cherry in air stores from France.

Tingis sp. (Tingidae) at Washington, D. C. with fescue in mail from Iran.

A tortricid, not represented in the National Museum collection, at Honolulu, Hawaii in air baggage from Japan; and a tortricid at Laredo, Tex., on an orchid plant in cargo from Mexico.

A curculionid, *Zeugorygma* sp., probably *orangiae* Mshl. or a new species, at Washington, D. C., with *Selaria perennis* seed head in mail from the Union of South Africa.

DISEASES

Incompletely determined pathogens worthy of mention were:

Ascochyta sp. at Laredo, Tex., on *Yucca elephantipes* in cargo from Mexico.

Cercospora sp. at Brownsville, Tex., on *Chamaedorea* sp. leaf in baggage from Mexico; at Houston, Tex., on palm fronds in air cargo from Mexico; at San Juan, P. R., on *Clerodendron thomsonae* leaf for export to the mainland.

Corynespora sp., probably *cassicola* (Berk. & Curt.) Wei, on *Chamaedorea* sp. in air cargo from Mexico.

Cytospora sp. at Nogales Ariz., on orchid stem in cargo from Mexico; and at San Francisco, Calif., on tree peony in cargo and mail from Japan.

Cytosporina sp. at Nogales, Ariz., on orchid in cargo from Mexico.

Didymosphaeria sp. at Laredo, Tex., on an orchid plant in cargo from Mexico.

Pestalotia sp. at Miami, Fla., on *Pinanga kuhli* seed in air mail from Ceylon; at San Juan, P. R., on a kalanchoe leaf in cargo for export to the mainland; and at Washington, D. C., on an oak leaf in mail from Japan.

Phomopsis sp. at El Paso, Tex., on seeds of sandbaxtree in baggage from Mexico.

Septoria sp. at Hoboken, N. J., on an aster leaf in cargo from England; at Laredo, Tex., on philodendron leaf in baggage from Mexico; and at Washington, D. C., on leaf of *Boissiera bromoides* in mail from Iran.

Probably *Sphenospora* sp. at Miami, Fla. on a leaf of *Catasetum* sp. in air cargo from the Canal Zone; and at San Pedro, Calif., on *Oncidium macranthum* and *Oncidium* sp. plants in air cargo from Ecuador.

Uredo sp. at Miami, Fla., on leaves of *Ornithocephalus* sp. and *Schomburgkia* sp. in air cargo from Ecuador.

NEMATODES

Incompletely determined nematodes worthy of mention were:

Aphelenchoides sp. at Boston, Mass., in soil with burdock, carrots, and potatoes in stores from Japan; in soil with carrots in stores from Norway; in soil with lettuce in stores from Egypt; in soil with roots of Liliaceae in air baggage from Greece; with parsnips in stores from Denmark; and with rutabagas in stores from the Netherlands; at Hoboken, N. J., in roots of *Helleborus niger* hybrid in air mail from England; at New York, N. Y., in narcissus bulbs in cargo from France and Italy; at Philadelphia, Pa., in lily bulb in cargo from Japan; at Port Everglades, Fla., in potatoes in stores from Belgium; at San Francisco, Calif., in lily bulb in mail from New Zealand and in magnolia plant in mail from Japan; at San Juan, P. R., in tobacco stump in air baggage from the Dominican Republic; and at Washington, D. C., in *Boehmeria* sp., in mail from Martinique.

Aphelenchus sp. at Boston, Mass., in soil with potatoes in stores from New Zealand; at Hoboken, N. J., in *Oreocereus trollii* in mail from Canada; at San Francisco, Calif., in peony in baggage from Japan; at San Juan, P. R., in tobacco stump in air baggage from the Dominican Republic; and at Tampa, Fla., in soil with samples of ore in cargo from Belgium.

Ditylenchus sp., closely related to *dipsaci* (Kuhn) Filip. at Hoboken, N. J., in *Polianthes* sp. tuber in cargo from Italy.

Ditylenchus sp. at Boston, Mass., in iris in cargo from the Netherlands; at El Paso, Tex., in garlic in cargo from Mexico; and at Philadelphia, Pa., in garlic in cargo from Mexico.

Heterodera sp., possibly *avenae*, at New York, N. Y., in soil with potatoes in stores from Iceland; at St. Thomas and St. John in soil with beets in stores from England.

Heterodera sp., possibly *fici* at New York, N. Y., in soil with roots of *Ficus* sp. in baggage from Italy.

Other members of the genus *Heterodera* were intercepted 351 times at 18 ports from the following countries: Argentina, Australia, Austria, Azores, Belgium, Canada, Chile, Denmark, Egypt, England, Finland, France, Germany, Greece, Ireland, Italy, Japan, Korea, Liberia, Luxembourg, Mexico, Morocco, Netherlands, New Zealand, Poland, Portugal, Scotland, Spain, Sweden, Switzerland, Tasmania, Tunisia, Venezuela, and Yugoslavia. These interceptions were made from soil ballast, soil samples, soil on private automobiles, soil on army automobiles, soil with sweepings from railway car, and soil with potatoes in railway car; soil with bulbs and tubers in baggage, cargo, and mail; soil with plant material in baggage, cargo, mail, and quarters; soil with vegetables in cargo and stores; and in soil with snails in cargo.

Meloidogyne sp., probably *arenaria* (Neal) Chitwood var. *thamesi* Chitwood, at New York, N. Y., in gladiolus bulb in cargo from Japan.

Meloidogyne sp., possibly *hapla* Chitwood, at Hoboken, N. J., in *Achimenes* sp. tuber in air mail from India.

Meloidogyne sp., possibly a new species, at Brownsville, Tex., in begonia root in baggage from Mexico.

Meloidogyne sp. at Brownsville, Tex., in begonia root in cargo from Mexico; at El Paso, Tex., in turnip in baggage from Mexico; at Hoboken, N. J., in tubers of *Achimenes* spp. in air cargo from India and in cargo and mail from the Netherlands; in anemone roots in air mail from Japan and in mail from Germany; in caladium tubers in air cargo from Belgium; in calla lily rhizomes in cargo from France and Italy; in roots of *Callopsiopsis* sp. in air mail from England; in roots of *Cimicifuga foetida simplex* in cargo from the Netherlands; in roots of *Cissus amazonica* in air cargo from Germany; in clematis roots in air cargo and cargo from the Netherlands; in roots of *Corytholoma bulbosum* in air cargo from Brazil and in roots of *C. cardinalis* in air mail from the Netherlands; in roots of *Curcuma petiolata* and *C. roscoeana* in cargo from the Netherlands; in roots of *Epimedium* sp. in air mail from Japan; in tubers of *Gesneria umbellata* in mail from the Netherlands; in iris roots in cargo and mail from Japan; in roots of *Isoloma pictum* in air mail and *Isoloma* sp. in mail from the Netherlands; in roots of *Kaempferia galanga* in cargo and air mail from India and in *Kaempferia* spp. in cargo from the Netherlands; in tubers of *Naegelia* hybrids in cargo, air mail, and mail from the Netherlands; in roots of tuberose in air mail from Israel and in mail from Italy; in roots of *Primula sieboldi* var. in mail from the Netherlands; in roots of *Reichsteineria macropoda* in air mail and mail from the Netherlands; and in tuber of *Thomsonia nepalensis* in mail from India; at Laredo, Tex., in *Mammillaria* sp. roots in mail from Mexico; at New York, N. Y., in hyacinth bulb in cargo from Bermuda; and in tuberose roots in cargo from Italy.

Paraphelenchus sp. at San Francisco, Calif., in roots of *Magnolia conspicua* and *Magnolia* sp. in mail from Japan.

Pratylenchus sp., near *vulnus* Allen & Jensen, at Tampa, Fla., in soil with a potted plant in air baggage from Cuba.

Pratylenchus sp. at Hoboken, N. J., in astilbe roots in cargo from the Netherlands; in *Clematis* spp. roots in mail from England and in cargo from the Netherlands; in roots of *Helleborus niger* and *H. viridis* in air mail from England and in *H. niger* and *Helleborus* sp. in air cargo from the Netherlands; in roots of *Pulmonaria saccharata* in cargo from the Netherlands; at New York, N. Y., in lily-of-the-valley pips in baggage from France; and at Washington, D. C., in roots of *Boehmeria* sp. in mail from Martinique.

Rotylenchus sp. at Brownsville, Texas, in soil with begonia and mint plants in baggage from Mexico; and at San Francisco, Calif., in peony roots in baggage from Japan.

Tylencholaimus sp. at Honolulu, Hawaii in soil samples in air baggage from Japan.

Tylenchus sp. at Boston, Mass., in soil with artemesia plant in baggage from Italy; at Honolulu, Hawaii in soil in quarters from Okinawa; and at Miami, Fla., in soil with coffee plants in air baggage from Salvador.

Xiphinema sp. at San Francisco, Calif., in peony roots in baggage from Japan.

Summary of Numbers of Interceptions Listed in Main Table

Country	Insect	Disease	Country	Insect	Disease
	Number	Number		Number	Number
Africa:			Europe—Continued:		
Algeria.....	1	2	Portugal.....	37	15
Anglo-Egyptian Sudan.....	1	0	Scotland.....	40	2

Northern Ireland.....	1	0	Total disease interceptions.....		1,798
Norway.....	4	0	Grand total.....		16,081

¹ This total represents only pests of known or potential plant-quarantine importance. The total of all interceptions made during the year was 17,504.

NOTE.—Interceptions were also made from Afghanistan, Bahrein Island, East Africa, Eritrea, Ethiopia, Finland, French West Africa, French West Indies, Korea, Luxembourg, Malta, Marshall Islands, Norfolk Island, Poland, Ponape, Samoa, Saudi Arabia, Sierra Leone, Tanganyika, Tasmania, Uganda, Uruguay, and West Africa.

Pests collected and reported from July 1, 1955, through June 30, 1956

[An asterisk indicates State inspection]

Pest and host	Country of origin	Number of interceptions in—			Collected in—
		Consumption	Non-entry	Propagation	
" <i>Acanthoscelides</i> " <i>spinipes</i> (Er.) (Bruchidae):					
Acacia sp.	Italy			1	N. Y.
Mimosa sp.	France	1			N. Y.
<i>Achatina fulica</i> Fer. (Mollusca):					
<i>Hedycheium</i> sp. (torch ginger)	Hawaii	1			Hawaii.
<i>Acrolepia assectella</i> (Zell.) (Hyponomeutidae):					
Allium porrum (leek)	France, Netherlands, Spain		6		N. Y., Pa.
<i>Adetus mucoreus</i> Bates (Cerambycidae):					
<i>Copaifera hemilomophylla</i> ("cativo")	Colombia	1			Ga.
<i>Adoretus sinicus</i> Burm. (Scarabaeidae):					
Airplane	Hawaii, Japan, unknown		12		Hawaii.
Baggage	Hawaii	2			Hawaii.
<i>Cordyline terminalis</i> (ti)	do.	1			Hawaii.
Flowers	do.	1			Hawaii.
Orchid	do.	1			Hawaii.
Personal effects	Hawaii, Japan	3			Hawaii.
<i>Zingiber officinale</i> (ginger)	Hawaii	1			Hawaii.
<i>Agrocnota propinqua</i> (Boh.) (Chrysomelidae):					
Ananas comosus (pineapple)	Dominican Republic		1		P. R.
<i>Suretania mahagoni</i> (mahogany)	do.		1		Fla.
<i>Agrotis ypsilon</i> (Rott.) (Phalaenidae):					
Airplane	Bermuda		1		Va.
<i>Aleurocanthus woglumi</i> (Ashby) (Aleyrodidae):					
<i>Citrus aurantifolia</i> (sour lime)	Mexico	1			Ariz.
<i>Citrus sinensis</i> (orange)	do.	2			Calif., Tex.
<i>Citrus</i> sp.	do.	5			Tex.
<i>Aleurothrixus floccosus</i> (Mask.) (Aleyrodidae):					
Leaf—unknown	Cuba	1			Fla.*
<i>Alpheias conspirata</i> Hein. (Galleriidae):					
Ananas comosus (pineapple)	Mexico	1			Tex.
<i>Allypiodes geronimo</i> (Barnes) (Phalaenidae):					
Cactus	Mexico			1	Ariz.
<i>Amorbia emigratella</i> Busck (Tortricidae):					
<i>Alpinia purpurata</i>	Hawaii	1			Hawaii.
<i>Delonix regia</i> (flamboyant tree)	do.		1		Hawaii.
<i>Gardenia augusta</i> (gardenia)	do.	1			Hawaii.
<i>Gladiolus</i> sp.	Mexico	1			Calif.*
<i>Jasminum multiflorum</i>	Hawaii	1			Hawaii.
<i>Nerium oleander</i> (oleander)	Midway Island	1			Hawaii.
<i>Pilea</i> sp.	Mexico	1			Tex.
<i>Plumeria</i> sp.	Hawaii	1			Hawaii.
<i>Psidium guajava</i> (guava)	Mexico	1			Calif.
<i>Punica granatum</i> (pomegranate)	do.	2			Ariz., Tex.
<i>Vanda</i> sp. (orchid)	Hawaii	2		4	Hawaii.
<i>Anaphothrips orchidaceus</i> Bagn. (Thripidae):					
Orchid	Mexico			1	Tex.
<i>Anastrepha distincta</i> Greene (?) (Tephritidae):					
<i>Inga</i> sp.	Guatemala	2			La.
<i>Anastrepha fraterculus</i> (Wied.) (Tephritidae):					
<i>Achras zapota</i> (sapodilla)	Venezuela	1			N. Y.
<i>Citrus paradisi</i> (grapefruit)	Brazil		1		N. Y.
<i>Citrus sinensis</i> (orange)	do.		2		Pa.
<i>Anastrepha fraterculus</i> (Wied.) (?) (Tephritidae):					
<i>Citrus paradisi</i> (grapefruit)	do.		1		Tex.
<i>Citrus sinensis</i> (orange)	Argentina, Brazil		2		Tex., Va.
<i>Anastrepha ludens</i> (Loew) (Tephritidae):					
<i>Citrus aurantifolia</i> (sweet lime)	Mexico	7			Ariz., Tex.
<i>Citrus limon</i> var. <i>ponderosa</i> (ponderosa lemon)	do.	1			Tex.
<i>Citrus paradisi</i> (grapefruit)	Mexico, Nicaragua	8	1		Calif., Tex.
<i>Citrus reticulata</i> (Mandarin orange)	Mexico	2			Tex.
<i>Citrus sinensis</i> (orange)	Guatemala, Mexico	83	13		Ariz., Calif., La., Md., N. Y., Tex.
<i>Cydonia oblonga</i> (quince)	Mexico	4			Tex.
<i>Malus sylvestris</i> (apple)	do.	3			Tex.
<i>Mangifera indica</i> (mango)	do.	40	2		Ariz., Calif., La., Tex.
<i>Punica granatum</i> (pomegranate)	do.	3			Tex.
<i>Pyrus communis</i> (pear)	do.	18			Tex.
Sapote	do.	1			Tex.

Pests collected and reported from July 1, 1955, through June 30, 1956—Continued

Pest and host	Country of origin	Number of interceptions in—			Collected in—
		Consumption	Non-entry	Propagation	
<i>Aphanus umbrosus</i> (Dist.) (Lygaeidae): With bromeliad and orchid plants	Mexico			1	Ariz.
<i>Aphthona nanyoensis</i> Chujo (Chrysomelidae): Airplane	Unknown		1		Hawaii.
<i>Apion griseum</i> Sm. (Curculionidae): <i>Phaseolus vulgaris</i> var. (string bean)	Mexico	8			Tex.
<i>Apion pomonae</i> F. (Curculionidae): <i>Vicia sativa</i> (vetch)	Azores, Madeira Islands	2			Mass.
<i>Aplocnemus aerosus</i> (Schilsky) (Melyridae): <i>Themeda triandra</i>	Union of South Africa			1	D. C.
<i>Araecerus villardii</i> Montr. (Anthribidae): <i>Operculina tuberosa</i> (wood-rose)	Hawaii	1			Hawaii.
<i>Arcte caerulea</i> (Guen.) (Phalaenidae): Airplane	Japan (?)		1		Hawaii.
<i>Argyresthia conjugella</i> Zell. (Hyponomeutidae): <i>Malus sylvestris</i> (apple)	Norway, Sweden	2			Mass., N. Y.
<i>Aspidiotus destructor</i> Sign. (Coccidae): <i>Annona squamosa</i> (sugar-apple)	Tortola	2			St. Thomas and St. John, Calif.* , Tex.
<i>Cocos nucifera</i> (coconut)	Colombia, Guatemala, Mexico, Trinidad	8	1		P. R.
<i>Aspidiotus herculeanus</i> (Ckll. & Hadd.) (Coccidae): <i>Mammea americana</i> (mamey)	Mexico		1		Calif.*
<i>Asterolecanium epidendri</i> (Bouche) (Coccidae): <i>Oncidium</i> sp. (orchid)	Trinidad			1	Fla.
Orchid	Brazil, Costa Rica, Ecuador, Jamaica			4	Calif.* , Fla.
<i>Stanhopea</i> sp. (orchid)	Ecuador			1	Calif.*
<i>Asterolecanium pustulans</i> (Ckll.) (Coccidae): <i>Ficus carica</i> (fig)	Mexico	1			Tex.
<i>Athesapeuta cyperi</i> Mshl. (Curculionidae): Airplane	Hawaii		1		Hawaii.
With <i>Cyperus</i> sp. and <i>Lycopodium</i> sp.	do	1			Hawaii.
<i>Aufesius impressicollis</i> Stal (Coreidae): <i>Capsicum frutescens</i> (pepper)	Mexico	1			Ariz.
<i>Aulacaspis mangiferae</i> Newst. (Coccidae): <i>Mangifera indica</i> (mango)	Nicaragua, Salvador	2			Calif.* , Tex.
Plant	Venezuela	1			Calif.*
<i>Austrotortrix postvittana</i> (Wlk.) (Tortricidae): <i>Malus sylvestris</i> (apple)	New Zealand	1			N. Y.
<i>Barbara tessulatana</i> (Stdgr.) (Olethreutidae): <i>Cupressus</i> sp. (cypress)	Greece		1		N. Y.
<i>Bephrata maculicollis</i> Cam. (Eurytomidae): <i>Annona muricata</i> (soursop)	Venezuela	1			P. R.
<i>Blissus leucopterus</i> (Say) (Lygaeidae): <i>Lycopersicon esculentum</i> (tomato)	Mexico	1			Tex.
<i>Sorghum vulgare</i> (sorghum)	do	1			Tex.
<i>Bouhelia maroccana</i> Balachowsky (Coccidae): <i>Muscari comosum</i> (cipollino)	Morocco	1			N. Y.
<i>Brachygerus albidentatus</i> Gyll. (Curculionidae): <i>Allium sativum</i> (garlic)	Italy	1			Tex.
<i>Brachygerus algeris</i> (F.) (Curculionidae): <i>Allium sativum</i> (garlic)	Italy, Spain	5			N. Y., P. R.
<i>Brachyrhinus ovalis</i> (L.) (Curculionidae): Plants—miscellaneous	Netherlands			1	Wash.
On box containing <i>Rhododendron indicum</i>	Belgium			1	N. J.
<i>Brachyrhinus singularis</i> (L.) (Curculionidae): Forest litter packing for cut heather	Scotland	1			Ill.
<i>Bradybaena similis</i> (Fer.) (Mollusca): <i>Ananas comosus</i> (pineapple)	Brazil	1			P. R.
<i>Anthurium andraeanum</i>	Hawaii	1			Hawaii.
<i>Anthurium</i> sp.	do	6	1		Hawaii.
<i>Anthurium</i> and bird-of-paradise flowers	do	1			Hawaii.
<i>Colocasia</i> sp.	do	1			Hawaii.
<i>Cordyline terminalis</i> (ti)	do	3	1		Hawaii.
[<i>Cordyline</i> sp.	do	1			Hawaii.
<i>Dieffenbachia</i> sp.	do	1			Hawaii.
<i>Gardenia augusta</i> (gardenia)	do	1			Hawaii.
<i>Hedychium</i> sp. (torch ginger)	do	1			Hawaii.
<i>Heliconia</i> sp.	do	1			Hawaii.

- ABIES:**
Megastigmus pinuspinus (Hymenoptera)
Megastigmus rafni (Hymenoptera)
- ACACIA:**
"Acanthoscelides" spinipes (Coleoptera)
Mimosestes sallaei (Coleoptera)
- ACER:**
Periphylus californiensis (Homoptera)
- ACHRAS:**
Anastrepha fraterculus (Diptera)
Anastrepha serpentina (Diptera)
- ADESMIA:**
Frankliniella cestrum (Thysanoptera)
- AGARICUS:**
Nemapogon granella (Lepidoptera)
- AGAVE:**
Euschistus comptus (Hemiptera)
Scyphophorus acupunctatus (Coleoptera)
- ALLIUM CEPA:**
Prodenia eridania (Lepidoptera)
Taeniothrips allium (Thysanoptera)
- ALLIUM PORRUM:**
Acrolepis assectella (Lepidoptera)
- ALLIUM SATIVUM:**
Brachycerus albidentatus (Coleoptera)
Brachycerus algirus (Coleoptera)
Dyspessa ulula (Lepidoptera)
Frankliniella tenuicornis (Thysanoptera)
- ALOPECURUS:**
Macroplox fasciata (Hemiptera)
- ALPINIA:**
Amorbia emigratella (Lepidoptera)
Ceroplastes rubens (Homoptera)
Pentalonia nigronervosa (Homoptera)
Pulvinaria psidii (Homoptera)
Taeniothrips hawaiiensis (Thysanoptera)
- ALYXIA:**
Ceroplastes rubens (Homoptera)
Phenacaspis sandwicensis (Homoptera)
- ANANAS:**
Agrocineta propinqua (Coleoptera)
Alpheias conspirata (Lepidoptera)
Bradybaena similis (Mollusca)
Chalcodermus dentiferus (Coleoptera)
Ereunetes flavistriata (Lepidoptera)
Eutheola bidentata (Coleoptera)
Exptochiamera oblonga (Hemiptera)
Heterobostrychus aequalis (Coleoptera)
Pyroderces stigmatophora (Lepidoptera)
Ribua innoxia (Lepidoptera)
"Targonia" bromiliae (Homoptera)
Thecla ziba (Lepidoptera)
- ANNONA:**
Anastrepha serpentina (Diptera)
Aspidiotus destructor (Homoptera)
Bephrata maculicollis (Hymenoptera)
Cerconota anonella (Lepidoptera)
Pheidole megacephala (Hymenoptera)
Talponia batesi (Lepidoptera)
- ANTHURIUM:**
Bradybaena similis (Mollusca)
Ceroplastes rubens (Homoptera)
Chlorophorus annularis (Coleoptera)
Hyaloepelus pellucidus (Hemiptera)
Iridomyrmex humilis (Hymenoptera)
Metamasius sericeus (Coleoptera)
Pheidole megacephala (Hymenoptera)
- APIUM:**
Limax flavus (Mollusca)
Tyrophagus infestans (Acarina)
- ARACHIS:**
Caryedon fuscus (Coleoptera)
Trogoderma granarium (Coleoptera)
- ARCTOTIS:**
Microcephalothrips abdominalis (Thysanoptera)
- AROID:**
Chrysomphalus umboniferus (Homoptera)
- ASPARAGUS:**
Crioceris asparagi (Coleoptera)
- ASPASIA:**
Vinsonia stellifera (Homoptera)
- ASTER:**
Frankliniella intonsa (Thysanoptera)
- ASTRAGALUS:**
Bruchidius picipes (Coleoptera)
- AVERRHOA:**
Ceratitis capitata (Diptera)
- BAUHINIA:**
Protopulvinaria pyriformis (Homoptera)
Sybra alternans (Coleoptera)
- BETA:**
Gnorimoschema ocellatella (Lepidoptera)
Hypera postica (Coleoptera)
- BRASSAVOLA:**
Diorymerellus laevimargo (Coleoptera)
Furcaspis biformis (Homoptera)
- BRASSIA:**
Diorymerellus laevimargo (Coleoptera)
Valtissius diversus (Hemiptera)
Vinsonia stellifera (Homoptera)
- BRASSICA CHINENSIS:**
Listroderes costirostris obliquus (Coleoptera)
- BRASSICA OLERACEA BOTRYTIS:**
Evergestia forficatis (Lepidoptera)
Phytomyza rufipes (Diptera)
- BRASSICA OLERACEA CAPITATA:**
Deroceras reticulatum (Mollusca)
Evergestia forficatis (Lepidoptera)
Frankliniella tenuicornis (Thysanoptera)
Limax marginatus (Mollusca)
Mamestra brassicae (Lepidoptera)
Phytomyza rufipes (Diptera)
Sitona lineata (Coleoptera)
Tyrophagus infestans (Acarina)
- BRASSICA RAPA:**
Metamasius sericeus (Coleoptera)
Phytomyza rufipes (Diptera)
Psylliodes chrysocephala (Coleoptera)
- BROMELIA:**
Thecla ziba (Lepidoptera)
- BROMELIACEAE:**
Deroceras reticulatum (Mollusca)
Helix aspersa (Mollusca)
Limax marginatus (Mollusca)
Limothrips cerealium (Thysanoptera)
Plagioderma thymaloides (Coleoptera)
- BROUGHTONIA:**
Vinsonia stellifera (Homoptera)
- BRYOPHYLLUM:**
Coccus viridis (Homoptera)
- BUDDLEIA:**
Frankliniella formosae (Thysanoptera)
- BUXUS:**
Eriophyes canestrinii (Acarina)
- CACTUS:**
Alysiodes geronimo (Lepidoptera)
Lygaeus pusio (Hemiptera)
Nysius raphanus (Hemiptera)
Oxygryllus ruginasus (Coleoptera)
Paromius longulus (Hemiptera)
Prodenia ornithogalli (Lepidoptera)
- CAJANUS:**
Ancylostoma stercorea (Lepidoptera)
Callosobruchus maculatus (Coleoptera)
Fundella pellucens (Lepidoptera)
Monomorium destructor (Hymenoptera)
Nezara viridula (Hemiptera)
Platynota rostrana (Lepidoptera)
- CALADIUM:**
Pheidole megacephala (Hymenoptera)
- CALAMUS (?):**
Micrapate mexicana (Coleoptera)
- CALLUNA:**
Frankliniella intonsa (Thysanoptera)
Limothrips cerealium (Thysanoptera)
Livia junceorum (Homoptera)
Micrelus ericae (Coleoptera)
Platythrips tunicatus (Thysanoptera)
Taeniothrips atratus (Thysanoptera)
Taeniothrips ericae (Thysanoptera)
Thrips flavus (Thysanoptera)
Thrips fuscipennis (Thysanoptera)
Thrips major (Thysanoptera)
- CALOCARPUM:**
Anastrepha serpentina (Diptera)

Hosts and Insects—Continued

CAMELLIA:

- Brevipalpus inornatus* (Acarina)
- Chrysomphalus personatus* (Homoptera)
- Parlatoria camelliae* (Homoptera)
- Pinnaspis uniloba* (Homoptera)

CANAVALLA:

- Lampides boeticus* (Lepidoptera)
- Maruca testulalis* (Lepidoptera)
- Sybra alternans* (Coleoptera)
- Taeniothrips vitticornis* (Thysanoptera)

CAPSICUM:

- Aufeius impressicollis* (Hemiptera)
- Gnorimoschema gudmannella* (Lepidoptera)
- Nysius raphanus* (Hemiptera)
- Paragonatus divergens* (Hemiptera)
- Platynota rostrana* (Lepidoptera)
- Pyrausta nubilalis* (Lepidoptera)
- Theba pisana* (Mollusca)
- Trogoderma ornatum* (Coleoptera)

CARICA:

- Dacus dorsalis* (Diptera)
- Toxotrypana curvicauda* (Diptera)

CASTANEA:

- Curculio elephas* (Coleoptera)
- Curculio nucum* (Coleoptera)
- Laspeyresia splendana* (Lepidoptera)

CATTLEYA:

- Eurytoma orchidearum* (Hymenoptera)
- Furcaspis bififormis* (Homoptera)
- Lygaeus guatemalanus* (Hemiptera)
- Pseudischnaspis alienus* (Homoptera)
- Vinsonia stellifera* (Homoptera)

CELOSIA:

- Tetranychus cinnabarinus* (Acarina)

CENTAUREA:

- Taeniothrips atratus* (Thysanoptera)
- Thrips fuscipennis* (Thysanoptera)

CHAMAEDOREA:

- Calypsocephala gerstaeckeri* (Coleoptera)
- Chaetocnema ectypa* (Coleoptera)
- Charidotis seminulum* (Coleoptera)
- Clerada apicicornis* (Hemiptera)
- Ctenochira aspersa* (Coleoptera)
- Deloyala guttata* (Coleoptera)
- Epicaerus fallax* (Coleoptera)
- Metriona crucipennis* (Coleoptera)
- Tapinaspis wesmaeli* (Coleoptera)

CHRYSANTHEMUM:

- Frankliniella formosae* (Thysanoptera)
- Frankliniella tritici* (Thysanoptera)
- Haplothrips gowdeyi* (Thysanoptera)
- Homoeosoma electellum* (Lepidoptera)
- Limothrips cerealium* (Thysanoptera)
- Microcephalothrips abdominalis* (Thysanoptera)
- Phytomyza atricornis* (Diptera)
- Plautia fimbriata* (Hemiptera)
- Pyrausta nubilalis* (Lepidoptera)
- Taeniothrips atratus* (Thysanoptera)
- Taeniothrips hawaiiensis* (Thysanoptera)
- Tetranychus telarius* (Acarina)
- Thrips flavus* (Thysanoptera)

CHRYSOPHYLLUM:

- Anastrepha serpentina* (Diptera)

CICHORIUM:

- Phytomyza rufipes* (Diptera)

CITRUS AURANTIFOLIA:

- Aleurocanthus woglumi* (Homoptera)
- Anastrepha ludens* (Diptera)
- Ceratitis capitata* (Diptera)
- Leucaspis cockerelli* (Homoptera)
- Parlatoria cinerea* (Homoptera)
- Parlatoria zizyphus* (Homoptera)
- Pseudischnaspis longissima* (Homoptera)

CITRUS AURANTIUM:

- Dialeurodes citri* (Homoptera)
- Unaspis yanonensis* (Homoptera)

CITRUS DEPRESSA:

- Parlatoria zizyphus* (Homoptera)

CITRUS GRANDIS:

- Unaspis yanonensis* (Homoptera)

CITRUS HYSTRIX:

- Unaspis citri* (Homoptera)

CITRUS LIMON:

- Ceratitis capitata* (?) (Diptera)
- Leucaspis cockerelli* (Homoptera)
- Parlatoria cinerea* (Homoptera)
- Parlatoria zizyphus* (Homoptera)
- Pseudococcus gahani* (Homoptera)
- Unaspis yanonensis* (Homoptera)

CITRUS LIMON VAR. PONDEROSA:

- Anastrepha ludens* (Diptera)

CITRUS PARADISI:

- Anastrepha fraterculus* (Diptera)
- Anastrepha ludens* (Diptera)
- Anastrepha mombinpraeoptans* (Diptera)
- Ceratitis capitata* (Diptera)
- Leucaspis cockerelli* (Homoptera)
- Olethreutes leucotreta* (Lepidoptera)
- Parlatoria cinerea* (Homoptera)
- Unaspis citri* (Homoptera)
- Unaspis yanonensis* (Homoptera)

CITRUS RETICULATA:

- Anastrepha ludens* (Diptera)
- Ceratitis capitata* (Diptera)
- Chrysomphalus bifasciculatus* (Homoptera)
- Dialeurodes citri* (Homoptera)
- Parlatoria zizyphus* (Homoptera)
- Unaspis citri* (Homoptera)
- Unaspis yanonensis* (Homoptera)

CITRUS SINENSIS:

- Aleurocanthus woglumi* (Homoptera)
- Anastrepha fraterculus* (Diptera)
- Anastrepha ludens* (Diptera)
- Ceratitis capitata* (Diptera)
- Chrysomphalus personatus* (Homoptera)
- Cryptoblabes gnidiella* (Lepidoptera)
- Leucaspis cockerelli* (Homoptera)
- Myelois ceratoniae* (Lepidoptera)
- Olethreutes leucotreta* (Lepidoptera)
- Parlatoria cinerea* (Homoptera)
- Parlatoria zizyphus* (Homoptera)
- Unaspis citri* (Homoptera)
- Unaspis yanonensis* (Homoptera)

CITRUS SP.

- Aleurocanthus woglumi* (Homoptera)
- Glycyphagus domesticus* (Acarina)
- Parlatoria zizyphus* (Homoptera)
- Pulvinaria aurantii* (Homoptera)
- Unaspis yanonensis* (Homoptera)

CLADOBIUM:

- Eurytoma orchidearum* (Hymenoptera)

COCOS:

- Aonidiella inornata* (Homoptera)
- Aspidiotus destructor* (Homoptera)
- Diocalandra taitensis* (Coleoptera)
- Ereunetis flavistriata* (Lepidoptera)
- Furcaspis oceanica* (Homoptera)
- Kaloterms immigrans* (Isoptera)
- Parlatoria crotonis* (Homoptera)
- Pseudococcus palmarum* (Homoptera)
- Pseudococcus saipanensis* (Homoptera)

CODIAEUM:

- Lepidosaphes tokionis* (Homoptera)
- Parlatoria crotonis* (Homoptera)

COFFEA:

- Ceratitis capitata* (Diptera)
- Coccus viridis* (Homoptera)
- Dacus dorsalis* (Diptera)
- Stephanoderes hampei* (Coleoptera)

COLOCASIA:

- Bradybaena similis* (Mollusca)
- Tarophagus proserpina* (Homoptera)

COLUTEA:

- Bruchophagus coluteae* (Hymenoptera)

CONVOLVULUS:

- Spermophagus cardui* (Coleoptera)

COPAIFERA:

- Adetus mucoreus* (Coleoptera)
- Dysdercus rusticus* (Hemiptera)
- Platypus rugulosus* (Coleoptera)

CORDYLINAE:

- Adoretus sinicus* (Coleoptera)
- Bradybaena similis* (Mollusca)

CORDYLINE—Continued

- Dacus dorsalis* (Diptera)
Deroceras reticulatum (Mollusca)
Parthenothrips dracaenae (Thysanoptera)
Pheidole megacephala (Hymenoptera)
Phenacaspis sandwicensis (Homoptera)
Pinnaspis buxi (Homoptera)
Plusia chalcites (?) (Lepidoptera)
Sybra alternans (Coleoptera)
Xyleborus semigranosus (Coleoptera)
Zonitoides arboreus (Mollusca)

CORTADERIA:

- Haplothrips gowdeyi* (Thysanoptera)
Pseudococcus boninensis (Homoptera)

CRATAEGUS:

- Ceratitis capitata* (Diptera)

CUCUMIS:

- Dacus cucurbitae* (Diptera)
Ezptochiomeria confusa (Hemiptera)
Loxostege similalis (Lepidoptera)
Theba pisana (Mollusca)

CUPRESSUS:

- Barbara tessulata* (Lepidoptera)
Dactylotrypes uytenboogaarti (Coleoptera)
Orsillus depressus (Hemiptera)

CYCAD:

- Cryphula apicatus* (Hemiptera)

CYCLAMEN:

- Frankliniella intonsa* (Thysanoptera)

CYDONIA:

- Anastrepha ludens* (Diptera)

- Ceratitis capitata* (Diptera)

CYMBIDIUM:

- Pseudosaphes tuberculata* (Homoptera)
Orycaenus bicolor (Hemiptera)

CYNARA:

- Anuraphis cardui* (Homoptera)
Gortyna flavago (Lepidoptera)

CYPRIPEDIUM:

- Vinsonia stellifera* (Homoptera)

CYRTOSTACHYS:

- Pinnaspis buxi* (Homoptera)

DAHLIA:

- Frankliniella bispinosa* (Thysanoptera)
Frankliniella formosae (Thysanoptera)
Frankliniella intonsa (Thysanoptera)
Haplothrips gowdeyi (Thysanoptera)
Microcephalothrips abdominalis (Thysanoptera)
Odontotermes wallonensis (Isoptera)
Sitona lineata (Coleoptera)
Taeniothrips atratus (Thysanoptera)
Taeniothrips vulgatissimus (Thysanoptera)

DAISY:

- Haplothrips gowdeyi* (Thysanoptera)
Microcephalothrips abdominalis (Thysanoptera)
Thrips flavus (Thysanoptera)
Thrips fuscipennis (Thysanoptera)
Thrips major (Thysanoptera)

DELONIX:

- Amorbia emigratella* (Lepidoptera)

DELPHINIUM:

- Diaprepes abbreviata* (Coleoptera)

DIANTHUS:

- Frankliniella formosae* (Thysanoptera)
Frankliniella schultzei (Thysanoptera)
Haplothrips cotti (Thysanoptera)
Haplothrips gowdeyi (Thysanoptera)
Microcephalothrips abdominalis (Thysanoptera)
Taeniothrips atratus (Thysanoptera)
Taeniothrips dianthi (Thysanoptera)
Taeniothrips hawaiiensis (Thysanoptera)
Tetranychus cinnabarinus (Acarina)
Tetranychus telarius (Acarina)
Thrips fuscipennis (Thysanoptera)
Thrips major (Thysanoptera)

DIEFFENBACHIA:

- Bradybaena similis* (Mollusca)

DIOSCOREA:

- Pheidole megacephala* (Hymenoptera)
 "Targionia" hartii (Homoptera)

DIOSPYROS:

- Ceratitis capitata* (?) (Diptera)
Cryptoblabes gnidiella (Lepidoptera)

- Dacus dorsalis* (Diptera)

DOLICHOS:

- Callosobruchus maculatus* (Coleoptera)
Callosobruchus phaseoli (Coleoptera)

EPIDENDRUM:

- Eurytoma orchidearum* (Hymenoptera)
Furcaspis biformis (Homoptera)
Vinsonia stellifera (Homoptera)

ERICA:

- Oxychilus allarius* (Mollusca)
Taeniothrips ericae (Thysanoptera)

ERIOBOTRYA:

- Ceratitis capitata* (Diptera)

EUGENIA:

- Anastrepha mombinpraepotans* (Diptera)
Ceratitis capitata (?) (Diptera)

FATSIA:

- Ceroplastes rubens* (Homoptera)
Chrysomphalus bifasciculatus (Homoptera)
Haplothrips aculeatus (Thysanoptera)

FERN:

- Deroceras reticulatum* (Mollusca)

FICUS:

- Asterolecanium pustulans* (Homoptera)
Ceratitis capitata (Diptera)
Dacus dorsalis (Diptera)

FOENICULUM:

- Systole geniculata* (Hymenoptera)

FRAGARIA:

- Tetranychus telarius* (Acarina)

GARDENIA:

- Amorbia emigratella* (Lepidoptera)
Bradybaena similis (Mollusca)
Coccus viridis (Homoptera)
Dialeurodes citri (Homoptera)
Eucalymnatus tessellatus (Homoptera)
Iridomyrmex humilis (Hymenoptera)
Monomorium destructor (Hymenoptera)
Pealius hibisci (Homoptera)
Protopulvinaria pyrifomis (Homoptera)
Pulvinaria psidii (Homoptera)
Taeniothrips hawaiiensis (Thysanoptera)

GENTIANA:

- Frankliniella intonsa* (Thysanoptera)
Taeniothrips picipes (Thysanoptera)

GESNERIA:

- Deroceras reticulatum* (Homoptera)

GLADIOLUS:

- Amorbia emigratella* (Lepidoptera)
Anuraphis tulipae (Homoptera)
Frankliniella formosae (Thysanoptera)
Limothrips cerealium (Thysanoptera)
Taeniothrips ericae (Thysanoptera)

GLEDITSIA:

- Bruchidius dorsalis* (Coleoptera)

GLYCINE:

- Callosobruchus maculatus* (Coleoptera)

GLYCYRRHIZA:

- Bruchophagus glycyrrhizae* (Hymenoptera)

GOSSYPIUM:

- Orycaenus bicolor* (Hemiptera)
Pectinophora gossypiella (Lepidoptera)
Pectinophora scutiger (Lepidoptera)
Tetranychus desertorum (Acarina)
Trogoderma sternale (Coleoptera)

GYPSOPHILA:

- Frankliniella bispinosa* (Thysanoptera)

HEDYCHIUM:

- Achatina fulica* (Mollusca)
Bradybaena similis (Mollusca)
Pentalonia nigronervosa (Homoptera)

HELICHRYSUM:

- Microcephalothrips abdominalis* (Thysanoptera)

HELICONIA:

- Bradybaena similis* (Mollusca)
Vinsonia stellifera (Homoptera)

HIBISCUS:

- Crocosema plebeiana* (Lepidoptera)
Pectinophora gossypiella (Lepidoptera)
Pheidole megacephala (Hymenoptera)
Tetranychus atlanticus (Acarina)

HOHERIA:

- Tyrophagus infestans* (Acarina)

Hosts and Insects—Continued

HORDEUM:

Trogoderma boron (Coleoptera)

ILEX:

Thrips fuscipennis (Thysanoptera)

INGA:

Anastrepha distincta (?) (Diptera)

IPOMOEAE:

Cylas formicarius (Coleoptera)

Cylas formicarius elegantulus (Coleoptera)

Cylas formicarius formicarius (Coleoptera)

Eusepes postfasciatus (Coleoptera)

IRIS:

Anuraphis tulipae (Homoptera)

Bregmatothrips iridis (Thysanoptera)

Taeniothrips atratus (Thysanoptera)

IXORA:

Coccus viridis (Homoptera)

Protopulvinaria pyriformis (Homoptera)

Pulvinaria psidii (Homoptera)

JASMINUM:

Amorbia emigratella (Lepidoptera)

Dialeurodes kirkaldyi (?) (Homoptera)

JUGLANS:

Rhagoletis completa (Diptera)

JUNIPERUS:

Oligonychus perditus (Acarina)

Zonitoides arboreus (Mollusca)

LABURNUM:

Sparteus villosus (Coleoptera)

LACTUCA:

Cnephasia longana (Lepidoptera)

Deroceras reticulatum (Homoptera)

Nysius californicus (Hemiptera)

Theba pisana (Mollusca)

Thrips angusticeps (Thysanoptera)

Thrips nigropilosus (Thysanoptera)

LAELIA:

Chrysomphalus umboniferus (Homoptera)

Pseudoschnaspis alienus (Homoptera)

Puto ulter (Homoptera)

LANSIUM:

Pachybrachius neitneri (Hemiptera)

Pseudococcus halli (tentative) (Homoptera)

LATHYRUS:

Bruchus brachialis (Coleoptera)

Bruchus tristis (Coleoptera)

Frankliniella bispinosa (Thysanoptera)

Frankliniella intonsa (Thysanoptera)

Haplothrips gowdeyi (Thysanoptera)

Taeniothrips atratus (Thysanoptera)

Taeniothrips vulgarissimus (Thysanoptera)

LAURUS:

Trialeurodes lauri (Homoptera)

LAVANDULA:

Thrips fuscipennis (Thysanoptera)

LENS:

Bruchus ervi (Coleoptera)

Bruchus lentis (Coleoptera)

Bruchus signaticornis (Coleoptera)

Bruchus ulicis (Coleoptera)

Callosobruchus analis (Coleoptera)

LEUCAENA:

Ereunetis flavistriata (Lepidoptera)

Stator pruvinus (Coleoptera)

LILIUM:

Bradybaena similis (Mollusca)

Frankliniella formosae (Thysanoptera)

Lilioceris lili (Coleoptera)

Liliothrips vaneckei (Thysanoptera)

Nysius californicus (Hemiptera)

LONICERA:

Monomorium destructor (Hymenoptera)

LYCOPERSICON:

Blissus leucopterus (Hemiptera)

Dacus cucurbitae (Diptera)

Heliothis subflexa (Lepidoptera)

Nysius raphanus (Hemiptera)

Plagiometriona diversicollis (Coleoptera)

Platynota rostrana (Lepidoptera)

Prodenia eridania (Lepidoptera)

MACADAMIA:

Cryptophlebia illepidia (Lepidoptera)

MALUS:

Anastrepha ludens (Diptera)

Argyresthia conjugella (Lepidoptera)

Austrotortrix postvittana (Lepidoptera)

Brevipalpus oudemansi (Acarina)

Carposina sasakii (Lepidoptera)

Ceratitis capitata (Diptera)

Deroceras reticulatum (?) (Mollusca)

Glycyphagus domesticus (Acarina)

Grapholitha molesta (Lepidoptera)

Lepidosaphes conchiformis (Homoptera)

Rhagoletis pomonella (Diptera)

Tetranychus telarius (Acarina)

MAMMEA:

Aspidiotus herculeanus (Homoptera)

Chrysomphalus odontoglossi (Homoptera)

MANGIFERA:

Anastrepha ludens (Diptera)

Anastrepha mombinpraepians (Diptera)

Anastrepha striata (Diptera)

Aulacaspis mangiferae (Homoptera)

Ceratitis capitata (?) (Diptera)

Dacus dorsalis (Diptera)

Dacus passiflorae (?) (Diptera)

Phenacaspis sandwicensis (Homoptera)

Sternonchetus mangiferae (Coleoptera)

Xylobiops sextuberculatus (Coleoptera)

MESEMBRYANTHEMUM:

Frankliniella sulphurea (Thysanoptera)

Haplothrips gowdeyi (Thysanoptera)

MESPILUS:

Ceratitis capitata (Diptera)

MIMOSA:

Acanthoscelides spinipes (Coleoptera)

MONSTERA:

Pinnaspis buxi (Homoptera)

MUSA:

Cosmopolites sordidus (Coleoptera)

Epilachna paenulata (Coleoptera)

Metamasius sericeus (Coleoptera)

Polytus mellerborgii (Coleoptera)

MUSCARI:

Bouhelia maroccana (Homoptera)

NARCISSUS:

Limothrips cerealium (Thysanoptera)

Steneotarsonemus laticepes (Acarina)

NERIUM:

Amorbia emigratella (Lepidoptera)

Haplothrips gowdeyi (Thysanoptera)

NYMPHAEA:

Taeniothrips gracilis (Thysanoptera)

OLEA:

Dacus oleae (Diptera)

ONCIDIUM:

Asterolecanium epidendri (Homoptera)

Furcaspis biformis (Homoptera)

Vinsonia stellifera (Homoptera)

ONOBRYCHIS:

Bruchidius gibbus (Coleoptera)

Bruchophagus onobrychidis (Hymenoptera)

ONONIS:

Bruchophagus ononis (Hymenoptera)

OPERCULINA:

Araecerus vieillardii (Coleoptera)

Megacerus alternatus (Coleoptera)

Pantomorus godmani (Coleoptera)

Sybra alternans (Coleoptera)

OPUNTIA:

Ceratitis capitata (Diptera)

ORCHID:

Adoretus sinicus (Coleoptera)

Anaphothrips orchidaceus (Thysanoptera)

Anchastus flavovittatus (Coleoptera)

Anthonomus ruficollis (Coleoptera)

Aphanus umbrus (Hemiptera)

Asterolecanium epidendri (Homoptera)

Chrysomphalus umboniferus (Homoptera)

Crophius dirupta (Hemiptera)

Cryphula apicatus (Hemiptera)

Deloyala guttata (Coleoptera)

Deloyala lecontei (Coleoptera)

ORCHID—Continued

- Dendrocoris variegatus* (Hemiptera)
Deroceras reticulatum (Mollusca)
Diorymerellus laevimargo (Coleoptera)
Exptochiomera confusa (Hemiptera)
Exptochiomera formosa (Hemiptera)
Farinococcus guatemalensis (Homoptera)
Ferrisia virgata (Homoptera)
Furcaspis bifurmis (Homoptera)
Galgupha punctifer (Hemiptera)
Galgupha quadrisignata (Hemiptera)
Galgupha texana (Hemiptera)
Helix aspersa (Mollusca)
Heraeus guttatus (Hemiptera)
Heterotermes aureus (Isoptera)
Hyperparachma rhodalis (Lepidoptera)
Iridomyrmex iniquus (Hymenoptera)
Limax marginatus (Mollusca)
Listroderes costirostris obliquus (Coleoptera)
Macropygium reticulatus (Hemiptera)
Mecolaemus carvalhoi (?) (Hemiptera)
Monanthia monotropidia (Hemiptera)
Mormidea pictiventris (Hemiptera)
Neuroctenus litigiosus (Hemiptera)
Nysius raphanus (Hemiptera)
Oedionychis atroguttata (Coleoptera)
Oedionychis pannonia (Coleoptera)
Ogdocosta biannularis (Coleoptera)
Paromius longulus (Hemiptera)
Pheidole megacephale (Hymenoptera)
Phelypera distigma (Coleoptera)
Physonota citrinella (Coleoptera)
Physonota picticollis (Coleoptera)
Plagioderma congesta (Coleoptera)
Plagioderma semivittata (Coleoptera)
Plagioderma thymaloides (Coleoptera)
Praeblyssus albofasciatus (Hemiptera)
Puto ulter (Homoptera)
Rejectaria pharusalis (Lepidoptera)
Scotinophara lurida (Hemiptera)
Stilodes atromaculata (Coleoptera)
Tenthecoris angustimarginatus (Hemiptera)
Tenthecoris bicolor (Hemiptera)
Tenthecoris confusus (Hemiptera)
Tenthecoris distinguendus (Hemiptera)
Tenuirostritermes cinereus (Isoptera)
Vinsonia stellifera (Homoptera)
Zonitoides arboreus (Mollusca)

ORNITHOGALUM:

- Epichorista ionephala* (Lepidoptera)
Frankliniella schultzei (Thysanoptera)
Haplothrips gowdeyi (Thysanoptera)
Leptidiella brevipennis (Coleoptera)

ORYZA:

- Chilo suppressalis* (Lepidoptera)
Monomorium destructor (Hymenoptera)
Trogoderma granarium (Coleoptera)

PACHIRA:

- Coccus viridis* (Homoptera)

PACHYCEREUS:

- Pseudodiaspis yuccae* (Homoptera)

PALM:

- Aspidiotus destructor* (Homoptera)
Eucalymnatus tessellatus (Homoptera)
Metriona crucipennis (Coleoptera)

PASPALUM:

- "*Targionia*" *sacchari* (Homoptera)

PELARGONIUM:

- Exptochiomera confusa* (Hemiptera)
Frankliniella occidentalis (Thysanoptera)
Iridomyrmex humilis (Hymenoptera)

PERSEA:

- Conotrachelus aguacatae* (Coleoptera)
Helipus lauri (Coleoptera)
Stenomacra catenifer (Lepidoptera)
Tyrophagus infestans (Acarina)

PHAEOMERIA:

- Bradybaena similis* (Mollusca)

PHAJUS:

- Vinsonia stellifera* (Homoptera)

PHALAEENOPSIS:

- Tenuipalpus pacificus* (Acarina)

PHASEOLUS:

- Apion griseum* (Coleoptera)
Callosobruchus maculatus (Coleoptera)
Caulophilus latinasus (Coleoptera)
Epinotia aporema (Lepidoptera)
Everes comyntas (Lepidoptera)
Lampides boeticus (Lepidoptera)
Laspeyresia leguminis (Lepidoptera)
Maruca testulalis (Lepidoptera)
Tyrophagus infestans (Acarina)

PHILADELPHUS:

- Frankliniella sulphurea* (Thysanoptera)
Taeniothrips hawaiiensis (Thysanoptera)

PHILODENDRON:

- Bradybaena similis* (Mollusca)
Eucalymnatus tessellatus (Homoptera)
Lamellaxis gracilis (Mollusca)
Neoleucon rubrotylus (Hemiptera)

PHYSALIS:

- Heliothis subflexa* (Lepidoptera)

PILEA:

- Amorbia emigratella* (Lepidoptera)

PINUS:

- Dichocrocis punctiferalis* (Lepidoptera)
Dryocetes autographus (Coleoptera)
Ernobius mollis (Coleoptera)
Hylurgops palliatus (Coleoptera)
Leucaspis pusilla (Homoptera)

PIPER:

- Aonidiella inornata* (Homoptera)

PISUM:

- Bruchus emarginatus* (Coleoptera)
Callosobruchus maculatus (Coleoptera)
Lampides boeticus (Lepidoptera)
Laspeyresia nigricana (Lepidoptera)
Maruca testulalis (Lepidoptera)
Tetranychus cinnabarinus (Acarina)
Trogoderma granarium (Coleoptera)

PITTIOSPORUM:

- Brevipalpus inornatus* (Acarina)

PLUMERIA:

- Amorbia emigratella* (Lepidoptera)
Bradybaena similis (Mollusca)
Deroceras reticulatum (Mollusca)
Orchidophilus peregrinator (Coleoptera)
Pantomorus godmani (Coleoptera)
Taeniothrips hawaiiensis (Thysanoptera)

PONCIRUS:

- Parlatoria zizyphi* (Homoptera)
Unaspis yanonensis (Homoptera)

POTENTILLA:

- Frankliniella intonsa* (Thysanoptera)
Limothrips cerealis (Thysanoptera)
Limothrips denticornis (Thysanoptera)
Thrips flavus (Thysanoptera)
Thrips fuscipennis (Thysanoptera)
Thrips major (Thysanoptera)

PRIMULA:

- Phytomyza atricornis* (Diptera)
Taeniothrips picipes (Thysanoptera)

PROTEA:

- Glycyphagus domesticus* (Acarina)

PRUNUS AMYGDALUS:

- Anastrepha mombinpraepians* (Diptera)
Ceratitis capitata (?) (Diptera)

PRUNUS ARMENIACA:

- Ceratitis capitata* (Diptera)
Ischnodemus diplopterus (Hemiptera)

PRUNUS DOMESTICA:

- Eulia auraria* (Lepidoptera)
Grapholitha molesta (Lepidoptera)
Pseudococcus gahani (Homoptera)

PRUNUS NIPPONICA:

- Anthonomus rectirostris* (Coleoptera)

PRUNUS PERSICA:

- Ceratitis capitata* (Diptera)
Grapholitha molesta (Lepidoptera)
Pseudococcus comstocki (Homoptera)

Pests collected and reported from July 1, 1955, through June 30, 1956—Continued

Pest and host	Country of origin	Number of interceptions in—			Collected in—
		Consumption	Non-entry	Propagation	
<i>Citrus paradisi</i> (grapefruit)	Japan, Straits Settlements ..	---	4	---	Calif.*, Pa.
<i>Citrus reticulata</i> (Mandarin orange)	China, Japan, Philippines ..	5	9	---	Calif.*, Hawaii, Wash.
<i>Citrus sinensis</i> (orange)	China, Japan	32	38	---	Calif.*, Hawaii, Md., N. Y., Pa.
<i>Citrus sinensis junos</i>	Japan	---	2	---	Md., Pa.
<i>Xanthomonas citri</i> (Hase) Dows. (?):					
<i>Citrus aurantifolia</i> (sour lime)	do	---	1	---	Wash.
<i>Citrus limon</i> (lemon)	do	---	1	---	Wash.
<i>Citrus reticulata</i> (Mandarin orange)	do	1	---	---	Hawaii.
<i>Citrus sinensis</i> (orange)	do	1	---	---	Hawaii.
<i>Citrus</i> sp.	China	1	---	---	N. Y.
<i>Xanthomonas phaseoli</i> (F. M. Sm.) Dows. (?):					
<i>Phaseolus vulgaris</i> var. (string bean)	Japan	---	1	---	Calif.*
<i>Xanthomonas</i> sp. (Cancrosis B):					
<i>Citrus limon</i> (lemon)	Brazil	---	2	---	Pa.
<i>Citrus paradisi</i> (grapefruit)	Brazil (?)	---	1	---	Pa.
<i>Zygosporium oscheoides</i> Mont.:					
Palm	Mexico	2	---	---	Tex.
<i>Zygosporium oscheoides</i> Mont. (?):					
<i>Citrus</i> sp.	do	---	1	---	Tex.

An asterisk (*) indicates State inspection.

A dagger (†) indicates a first interception from the country named.

A double dagger (‡) indicates first record of its interception by Branch inspectors.

UNITED STATES DEPARTMENT OF AGRICULTURE

AGRICULTURE RESEARCH SERVICE

PLANT QUARANTINE DIVISION

LIST OF INTERCEPTED PLANT PESTS, 1957

(List of Pests Recorded from July 1, 1956, through June 30, 1957 as Intercepted in, on, or with Plants and Plant Products Entering United States Territory.)

Compiled by
Judith Hunt
Plant Quarantine Aid

INTRODUCTION

This forty-fourth report of interceptions summarizes the records of insect pests, plant pathogens, and certain other organisms found in, on, or with plant products (1) imported, (2) offered for but refused entry, (3) held as ships' stores, etc., and hence not offered for entry through customs, (4) offered for entry for immediate transportation and exportation in bond, and (5) in domestic shipments between the American Virgin Islands, Hawaii, and Puerto Rico and the mainland.

This report is largely a compilation of insects and plant diseases of known or potential plant quarantine significance to the United States. Some common organisms are included if they are (1) new to the country of origin, or (2) new to the host plant, or (3) are of such limited distribution in the United States that they are worthy of mention.

The data for this list, which includes some for the previous year, are largely obtained from identifications made by specialists of the Entomology Research Division and Plant Quarantine Division, supplemented by information supplied by State officials. Some, however, represent critical studies and determinations made by specialists of the Crops Research Division who also identified many of the host plants cited.

All scientific names are reviewed by specialists in the Department to assure conformance to the International Rules of Nomenclature.

Every effort is made to give the correct origin for all collections listed, questionable cases are omitted or the origin is listed as unknown.

INTERCEPTIONS FROM AIRBORNE MATERIAL

The rapid growth of air transportation continues to increase the danger of foreign plant pests being introduced by this means. In addition to international air travel, commerce in plants and plant products by air is developing steadily. The speed with which pests may now be brought

from all parts of the world makes conditions more favorable for their survival and necessitates constant vigilance to apprehend them at ports of entry.

Pests were intercepted on plant material arriving by airborne baggage, express, freight, mail, and stores. During the year 3,024 interceptions were made of insects on imported plant parts or as stowaways, and 559 interceptions of plant diseases.

Some important insect interceptions in airborne material were:

Adoxophyes orana on lilac in cargo from the Netherlands.

The Citrus blackfly (*Aleurocanthus woglumi*) on citrus leaves in baggage from Mexico and Nicaragua.

Anastrepha fraterculus in peach in baggage from Peru.

The Mexican fruit fly (*Anastrepha ludens*) in grapefruit in baggage from Mexico; in mango in baggage from Guatemala; in orange in baggage from Mexico; and in white sapote in cargo from Mexico.

The West Indian fruit fly (*Anastrepha mombinpraeoptans*) in bitter-almond in baggage from the Dominican Republic; in guava in baggage from Guatemala; in mango in baggage from Antigua, British Honduras, Costa Rica, Cuba, Dominican Republic, Guatemala, Haiti, Honduras, Jamaica, Mexico, Nicaragua, Puerto Rico, St. Kitts, and Salvador; in mango in quarters from an unknown origin; in yellow mombin in baggage from Central America (country (?)), the Dominican Republic, Guatemala, Nicaragua, and Salvador.

Anastrepha serpentina in mamey in baggage from Mexico; and in mamey sapote and sapodilla in baggage from Nicaragua.

Anastrepha striata in guava in baggage from Guatemala and Salvador.

Anastrepha suspensa in guava in baggage from Puerto Rico; and in guava in cargo from Jamaica.

A rose stem borer, *Ardis sulcata*, in rose stem in quarters from Germany.

The Mediterranean fruit fly (*Ceratitis capitata*) in apricot in stores from France; in avocado in preflight inspection of baggage leaving Hawaii for the mainland; in cherimoya in baggage from South America (country (?)); in coffee berry in preflight inspection of baggage leaving Hawaii for the mainland; in fig in baggage from Italy; in grapefruit in baggage from Bermuda; in loquat in baggage from Italy; in orange in baggage from Iraq; in orange in stores from the Azores, France, and an unknown origin; in peach in baggage from Argentina, Azores, and Italy; in pear in baggage from Italy and an unknown origin; in pear in stores from an unknown origin (Mediterranean region); in plum in baggage from Germany and Italy. *C. capitata* (?) in coffee berry in preflight inspection of baggage leaving Hawaii for the mainland; in guava in baggage from the Azores; in orange in baggage from the Madeira Islands; and in orange in stores from Israel (?).

Cylas formicarius var. in sweetpotato in cargo from the Philippines.

Palaeopus costicollis in yam in baggage from Jamaica.

The pink bollworm (*Pectinophora gossypiella*) in cottonseed in baggage from the Bahamas and Cuba; in cotton boll in preflight inspection of baggage leaving Hawaii for the mainland; in cotton lock in baggage from Cuba; and in okra in baggage from the Dominican Republic.

The gypsy moth (*Porthetria dispar*) in apricot in stores from France.

The European corn borer (*Pyrausta nubilalis*) in samples of broomcorn in mail from Yugoslavia.

Rhagoletis cerasi in cherries in baggage from France, Germany, and Greece; in cherries in quarters from Germany; and in cherries in stores from France, Italy, Portugal, and Spain.

Rhagoletis cingulata in cherries in stores from France.

Interceptions of airborne plant pathogens of interest were:

Alternaria dauci on coriander leaf in cargo from Puerto Rico.

Cercospora panacis (?) on *Nothopanax* sp. in quarters from Australia.

Chrysomya ledi var. *rhododendri* on rhododendron leaves in baggage from Austria and Switzerland; on rhododendron leaves in mail from Germany and Switzerland; and on rhododendron leaves in quarters from Germany.

Corynespora cassiicola on palm fronds in cargo from Mexico.

Hypocrella sloaneae on leaf of *Chamaedorea oblongata* in cargo from Mexico.

Leptosphaeria culmifraga on rice straw in baggage from Japan.

Meliola acervata on *Physalis peruviana* in preflight inspection of baggage leaving Hawaii for the mainland.

Mycosphaerella cattleyae on a leaf of *Epidendrum* sp. in cargo from Ecuador; and on an orchid leaf in cargo from New Guinea.

Phoma citricarpa on *Citrus* sp. peel in baggage from Japan; on grapefruit in baggage from Pakistan; on lemon in stores from Australia; on Mandarin orange in baggage from China, Hong Kong, Japan, and the Philippines; on orange in baggage from Hong Kong, Japan, and the Union of South Africa; on orange in quarters from Mozambique and the Union of South Africa; and on orange in stores from Australia, Brazil, Mozambique, and the Union of South Africa.

Phyllosticta coccolobae on seagrape in baggage from Kwajalein.

Phyllosticta fusco-zonata (?) on leaves of *Rubus* sp. in stores from Italy.

Pseudopeziza ribis on leaves of European black currant in baggage from Germany.

Septoria petroselinii on parsley in stores from the Azores.

Sphaceloma fawcettii var. *scabiosa* on *Citrus hystrix*, lemon, and lime in stores from Australia.

Uredo scabies on leaf and stem of *Vanilla* sp. in baggage from Panama.

Citrus canker (*Xanthomonas citri*) on orange in quarters and stores from Japan; and on satsuma orange in baggage from Hong Kong.

Xanthomonas malvacearum on cotton leaf in baggage from the Bahamas.

Xanthomonas sp. (Cancrosis B) on lemon in stores from Argentina.

The following nematodes were found in airborne material:

Helicotylenchus erythrinae in soil with amaryllis bulbs in baggage from Portugal; in soil with dahlia roots in baggage from Scotland; in soil with gladiolus corms and lily bulbs in baggage from Italy; and in soil with plants in baggage from Canada.

Helicotylenchus multicinctus in soil around roots of bloodleaf in baggage from Costa Rica.

Helicotylenchus nannus in soil with begonia and Crassulaceae plants in baggage from the Azores; in soil with cuttings of begonias and fuchsias in baggage from Greece; in soil with heather in baggage from Scotland; in soil with rhododendron plants in baggage from Scotland; in soil with mint plants in baggage from Cuba; in soil with sansevieria plants in baggage from Haiti; and with soil around roots of an unknown plant in baggage from Jamaica.

The oat nematode (*Heterodera major*) in soil with geranium plants in baggage from England.

The golden nematode (*Heterodera rostochiensis*) in soil with amaryllis, euonymus, geranium, and oxalis plants in baggage from Ireland; in soil on a pair of boots in baggage from Ireland; in soil with heather in baggage from Scotland; in soil with lily-of-the-valley plants, hyacinth, lily, and tulip bulbs in baggage from England; and in soil with shamrock plants in mail from England.

Rotylenchus erythrinae (?) in soil with aloe plants in baggage from Jamaica.

Rotylenchus reniformis in soil with unidentified bulbs in baggage from Cuba.

Rotylenchus robustus in soil with carnation and primrose plants and tuberose bulbs in baggage from England.

Tylenchorhynchus brevidens with primrose plants in baggage from Ireland.

Tylenchorhynchus dubius in soil with plants in baggage from Canada.

Tylenchus filiformis in soil with cactus plant in baggage from Greece; and in soil with *Sedum* sp. in baggage from Italy.

NOTES ON INSECTS INTERCEPTED

FRUIT FLIES

The following fruit flies were intercepted:

Acidia heraclei (?) in celery in stores from France.

Anastrepha fraterculus in peach in air baggage from Peru.

The Mexican fruit fly (*Anastrepha ludens*) in apple in baggage from Mexico; in grapefruit in stores from British Honduras and Mexico; in grapefruit in baggage from Mexico; in Mandarin orange in baggage from Mexico; in mango in air baggage from Guatemala; in mango in baggage and stores from Mexico; in orange in stores from Guatemala; in orange in air baggage, baggage, quarters, and stores from Mexico; in peach, pear, ponderosa lemon, quince, and sweet lime in baggage from Mexico; and in white sapote in baggage and air cargo from Mexico. *A. ludens* (?) in mamey sapote and mango in baggage from Mexico.

The West Indian fruit fly (*Anastrepha mombinpraeoptans*) in bitter-almond in air baggage from the Dominican Republic; in guava in air baggage from Guatemala; in guava in baggage from Cuba and Mexico; in guava and guava berry in cargo from

Tortola; in mango in air baggage from Antigua, British Honduras, Costa Rica, Cuba, Dominican Republic, Guatemala, Haiti, Honduras, Jamaica, Mexico, Nicaragua, Puerto Rico, St. Kitts, and Salvador; in mango in baggage from Mexico, Puerto Rico, Salvador, and Tortola; in mango in cargo from Cuba and Tortola; in mango in mail from Cuba and Panama; in mango in air quarters from an unknown origin; in mango in quarters from Cuba, Puerto Rico, and Trinidad; in mango in stores from Panama; in mombin (*Spondias* sp.) in air baggage from British Honduras, Guatemala, and Salvador; in purple mombin in air baggage from Guatemala, Mexico, and Nicaragua; in yellow mombin in air baggage from Central America (country (?)), Dominican Republic, Guatemala, Nicaragua, and Salvador; and in yellow mombin in baggage from St. Martin; *A. mombinpraepotans* (?) in mango in baggage from Ecuador; and in mango in stores from Venezuela.

Anastrepha serpentina in mamey in air baggage from Mexico; in mamey sapote in air baggage from Nicaragua; in mamey sapote in baggage from Mexico; in mamey sapote in stores from Colombia; and in sapodilla in air baggage from Nicaragua.

Anastrepha striata in guava in air baggage from Guatemala and Salvador; in guava in baggage from Mexico; and in guava in mail from Puerto Rico.

Anastrepha suspensa in guava in air baggage from Puerto Rico; and in guava in air cargo from Jamaica.

The Mediterranean fruit fly (*Ceratitis capitata*) in apricot in air stores from France; in avocado in baggage from Hawaii; in cherimoya in air baggage from South America; in cherry in mail from Italy; in coffee in preflight inspection of baggage leaving Hawaii for the mainland; in coffee in baggage from Hawaii; in *Cralaegus* sp. in baggage from Italy; in fig in air baggage from Italy; in grape in cargo from the Union of South Africa; in grapefruit in air baggage from Bermuda; in grapefruit in stores from Argentina, Israel, and Italy; in lemon in stores from Italy; in loquat in air baggage from Italy; in Mandarin orange in baggage from Italy; in Mandarin orange in stores from Algeria, Italy, and Spain; in orange in air baggage from Iraq; in orange in air stores from Azores, France, and an unknown origin; in orange in stores from Brazil, Egypt, and Italy; in peach in air baggage from the Azores and Italy; in peach in cargo from the Union of South Africa; in peach in air stores from Argentina; in peach in stores from Italy; in pear in air baggage from Italy and an unknown origin; in pear in baggage from Italy; in pear in air stores from an unknown origin; in persimmon in baggage from Italy; in plum in air baggage from Germany and Italy; in pricklypear in baggage from Greece and Italy. *C. capitata* (?) in Arabian coffee in mail leaving Hawaii for the mainland; in coffee in preflight inspection of baggage leaving Hawaii for the mainland; in guava in air baggage from the Azores; in orange in air baggage from the Madeira Islands; in orange in quarters from Brazil and Gibraltar; in orange in air stores from Israel (?); in orange in stores from Brazil; and in pomegranate in baggage from Italy.

Dacus ciliatus (?) in squash in stores from French West Africa.

The melon fly (*Dacus cucurbitae*) in bell pepper and tomato in stores from Hawaii. *D. cucurbitae* (?) in cucumber in stores from Hawaii.

The oriental fruit fly (*Dacus dorsalis*) in *Actinophloeus macarthurii* (palm) in baggage from Hawaii; an adult on an airplane from Guam; an adult in package containing anthurium and orchid flowers in mail from Hawaii; in coffee in air baggage and mail from Hawaii; in guava in air baggage from Hawaii; in Malay-apple in baggage from Hawaii. *D. dorsalis* (?) in *Calophyllum inophyllum* in mail from Hawaii; in Arabian coffee in air baggage and mail from Hawaii; in coffee in mail from Hawaii; and in fig in air baggage from Hawaii.

The olive fruit fly (*Dacus oleae*) in olive in baggage from Greece and Italy; in olive in air baggage from Italy and Lebanon; and in olive in stores from Italy.

Rhagoletis basiola in rose hips in mail from Canada.

Rhagoletis cerasi in apple in air stores from Italy (?); in cherry in air baggage from France, Germany, Greece, Italy, and an unknown origin; in cherry in baggage from Italy; in cherry in air stores from France, Germany, Italy, Portugal, Spain, and an unknown origin; in cherry in stores from Spain; *R. cerasi* (?) in apple in air stores from an unknown origin; and in cherry in air stores from Italy and the Netherlands.

The cherry maggot (*Rhagoletis cingulata*) in air stores from France.

INSECTS OTHER THAN FRUIT FLIES

The following miscellaneous insects of unusual interest were intercepted:

Acrolepia assectella (Hyponomeutidae) in leek in stores from France, Morocco, and Spain.

The citrus blackfly (*Aleurocanthus woglumi*) on *Citrus* sp. leaf in baggage from Mexico; on decorative greens in cargo from Mexico; on an unknown plant in soil from Mexico; and on sour lime leaf in cargo from Mexico.

Arge ochropa (Argidae) on roses in air baggage from Germany.

Bruchophagus coluteae (Eurytomidae) in *Colutea arborescens* seeds in cargo from Italy.

A carposinid, *Carposina sasakii*, in apple in air baggage, air stores, and quarters from Japan.

The banana root borer (*Cosmopolites sordidus*) in banana in cargo from Mexico.

A phycitid, *Cryptoblabes gnidiella*, in pomegranate in air baggage and baggage from Israel, Italy, and Libya.

Dichrocrocis punctiferalis (Pyraustidae) on *Pinus pentaphylla* foliage in cargo from Japan.

Epicaerus cognatus (Curculionidae) in potato in stores from Mexico.

The oriental fruit moth (*Grapholitha molesta*) in peach in air quarters from Japan.

A hydrophilid, *Helophorus rugosus*, in turnip in stores from England.

Hemimene juliana (Olethreutidae) in chestnut in cargo from Italy; and in chestnut in stores from Europe (?).

Lixus junci (Curculionidae) in beet in stores from Egypt.

Mamestra brassicae (Noctuidae) in cabbage in stores from Belgium; in cauliflower in stores from Germany; in celery in stores from England; and in lettuce in stores from Belgium.

A curculionid, *Naupactus xanthographus*, in grape in cargo from Chile.

A scolytid, *Scolytus multistriatus*, in elm bark in cargo from Canada.

The durra stem borer (*Sesamia cretica*) in broomcorn in cargo and quarters from Italy; and in broomcorn in mail from Greece.

Stephanoderes hampei (Scolytidae) in Arabian coffee in mail from Liberia; in *Coffea canephora* in mail from French West Africa; in *Coffea ugandae* in mail from French Equatorial Africa; and in coffee in stores from Angola.

Trogoderma granarium (Dermestidae) with mung beans and sorghum seed in mail from Pakistan; in rice in stores from Brazil, Formosa, Hong Kong, India, Kuwait, and Straits Settlements; and with wheat in stores from Formosa.

SNAILS

Bradybaena similaris, an injurious snail not established in the United States, was intercepted 115 times with plant material in baggage, cargo, and mail leaving Hawaii for the mainland and once with lily bulbs in baggage from Bermuda.

Lamellaris gracilis, injurious in greenhouses and not established in the United States, was found with roots of *Cattleya* sp. in preflight inspection of mail leaving Hawaii for the mainland.

Porphyrobapha iostoma, not injurious under normal conditions and not established in the United States, was taken with bananas in cargo from Ecuador and Honduras.

Theba pisana, an injurious snail not known to be established in the United States, was intercepted with beets in stores from Belgium, on a conex box in air cargo from Morocco, with dunnage in quarters from Morocco, with military cargo from Morocco and Tripoli, and with Swiss chard in stores from Venezuela.

Other snails of economic importance but of limited distribution in the United States and worthy of mention were: *Arion circumscriptus*, *Deroceras reticulatum*, *Limax marginatus*, *L. maximus*, and *Zonitoides orboreus*.

NOTES ON DISEASES INTERCEPTED

The sweet orange scab (*Elsinoe australis*) was intercepted 59 times; 18 of these interceptions came from Argentina on lemon and oranges; 41 from Brazil on grapefruit, lemon, orange, and sweet lime.

Citrus canker (*Xanthomonas citri*) was intercepted 66 times; 58 of these came from Japan, 4 from China, one each from Formosa, Hong Kong, Philippines, and Thailand. These interceptions were made from the following hosts: Grapefruit, lemon, lime, Mandarin orange, orange, pummelo, satsuma orange and sour orange.

Cancrosis B (*Xanthomonas* sp.), another bacterial disease of citrus, producing symptoms similar to citrus canker, was intercepted twice from Argentina on lemon.

The black spot of citrus (*Phoma citricarpa*) was intercepted 132 times; 49 of these came from the Union of South Africa, 26 from Hong Kong, 23 from China, 11 from Australia, 10 from Japan, 3 each from Brazil, Mozambique, and an unknown origin, and one each from Africa, Macao, Pakistan, and the Philippines. These interceptions

were made on the following hosts: *Citrus* sp., grapefruit, lemon, Mandarin orange, orange, and valencia orange.

Other interceptions were:

Corynespora cassiicola on palm in cargo from Mexico.

Heterosporium echinulatum on carnation in baggage from Colombia.

Heterosporium iridis on iris leaf in cargo from Canada.

"Leprosis" on lemon in stores from Peru.

Mainsia variabilis on *Rubus* sp. plant in baggage from Colombia.

Melampsora populnea on European aspen in mail from Germany.

Phyllosticta fusco-zonata (?) on *Rubus* sp. leaf in stores from Italy.

Puccinia allii on garlic in stores from Israel.

Septoria antirrhini on snapdragon in mail from France.

Septoria astericola on an aster leaf in mail from England.

Stemphylium botryosum on pepper in stores from Liberia.

Uredo scabies on *Vanilla* sp. leaf and stem in baggage from Panama.

Urocystis cepulae on onion in stores from Israel.

Uromycladium tepperianum on a seed pod of *Acacia aneura* in mail from Australia.

NEMATODES

The oat nematode (*Heterodera major*) was intercepted 15 times from the following countries: Belgium, Denmark, England, Ireland, Italy, Netherlands, Scotland, Spain, and Sweden. These interceptions were taken in soil with *Cymbalaria* sp. plants, soil with garlic, soil with geranium plants, soil with horseradish, soil with jute bagging, soil with surplus military equipment, soil with potatoes, soil with potted plants, and soil with shallots.

The golden nematode (*Heterodera rostochiensis*) was intercepted 85 times from the following countries: Argentina, Belgium, Ecuador, England, Germany, Greece, Iceland, Ireland, Mexico, Netherlands, Peru and Scotland. These interceptions were taken in soil with automobiles, soil on a pair of boots, and in soil with bulbs, plant material, and vegetables.

Other nematodes of special interest were:

Heterodera carotae (?) in soil with carrots in stores from Germany.

Helicotylenchus erythrinae in soil with amaryllis bulbs in air baggage from Portugal; in soil with dahlia roots in air baggage from Scotland; in soil with gladiolus corms and lily bulbs in air baggage from Italy; and in soil with plants in air baggage from Canada.

Pratylenchus minyus in roots of oleander plant in baggage from Austria.

Rotylenchus erythrinae (?) in soil with aloe plants in air baggage from Jamaica.

Rotylenchus reniformis in soil with unidentified bulbs in air baggage from Cuba.

Rotylenchus robustus in soil with carnation and primrose plants and tuberose bulbs in air baggage from England.

Tylenchorhynchus brevidens in soil with primrose plants in air baggage from Ireland.

Other nematodes of possible concern were several species of *Meloidogyne* intercepted from the following countries: Australia, Bahamas, Belgium, Brazil, Canada, Canal Zone, Chile, Costa Rica, Cuba, Dominican Republic, Ecuador, England, France, French West Africa, Germany, Guatemala, Hawaii, India, Jamaica, Japan, Martinique, Mexico, Netherlands, Peru, Thailand, and the Union of South Africa with various plant materials and vegetables.

INCOMPLETELY DETERMINED PESTS

Frequently complete determinations as to species are impossible or impracticable due to the stage or condition of the insects or pathogens on arrival. Some of these pests may be of economic importance, hitherto unreported from the United States, unknown for the host plant, or they may come from a new country of origin. As a matter of record they are included in this separate list but not in the table form.

INSECTS

Among the incompletely determined insects were the following fruit flies:

Anastrepha sp. probably *fraterculus*, at Houston, Tex., in orange in quarters from Brazil; at Jacksonville, Fla., in orange in stores from Brazil; at Miami, Fla., in coffee berry in air baggage from Colombia; at Mobile, Ala., in orange in stores from Brazil;

at New York, N. Y., in orange in air stores from Argentina; and at San Juan, P. R., in sapodilla in air baggage from Brazil.

Anastrepha sp., possibly *ludens*, at Laredo, Tex., in mango and pear in baggage from Mexico; at Miami, Fla., in quince in air baggage from Peru; at New Orleans, La., in orange in baggage and in plum in air baggage from Mexico; at Nogales, Ariz., in orange in baggage from Mexico; and at San Diego, Calif., in orange in air baggage and baggage from Mexico.

Anastrepha sp., possibly *mombinpracoctans*, at Miami, Fla. in mango in air baggage from Cuba; at Norfolk, Va., in mango in baggage from Puerto Rico; at New Orleans, La., in mombin in baggage from Salvador; and at San Pedro, Calif., in yellow mombin in air baggage from Colombia.

Anastrepha sp., probably *serpentina*, at Brownsville, Tex., Del Rio, Tex., El Paso, Tex., and Laredo, Tex., in mamey sapote in baggage from Mexico; at Houston, Tex., in mamey sapote in air baggage from Mexico and in sapodilla in air baggage from Colombia; and at Miami, Fla., in sapodilla in air baggage from Nicaragua.

Anastrepha sp., probably *striata*, at Brownsville, Tex., in guava in air baggage from Colombia and Salvador; at New York, N. Y., in guava in air baggage from the Dominican Republic; at Nogales, Ariz., in guava in baggage from Mexico; and at San Pedro, Calif., in guava in air baggage from Nicaragua.

Anastrepha sp., probably *suspensa*, at Chicago, Ill., in guava in mail from Puerto Rico; at New York, N. Y., in guava in air cargo from Jamaica.

Anastrepha sp. at Baltimore, Md., in orange in stores from Brazil and Peru; at Boston, Mass., in orange in stores from Peru; at Brownsville, Tex., in mango in air baggage from Salvador; in orange and plum in baggage from Mexico; and in star-apple in air baggage from Colombia; at Calexico, Calif., in mango in baggage from Mexico; at Charleston, S. C. in orange in stores from Brazil; at Eagle Pass, Tex., in mamey in baggage from Mexico; at El Paso, Tex., in mamey sapote, sapote, and sweet lime in baggage from Mexico; at Galveston, Tex., in grapefruit in quarters from Brazil and in orange in stores from Argentina and Peru; at Laredo, Tex., in mamey sapote and pear in baggage from Mexico; at Miami, Fla., in guava in air baggage from Salvador; in mamey in air baggage from Mexico; in mango in air baggage from Haiti, Jamaica, and an unknown origin; in mango in air stores from Salvador; and in purple mombin in air baggage from Venezuela; at New Orleans, La., in grapefruit in stores from Jamaica; in guava in mail from Salvador; in mamey sapote in baggage from Guatemala; in purple mombin in air baggage from Guatemala and Mexico; in orange in stores from Argentina and Brazil; in orange in quarters from Brazil; in white sapote in air baggage from Guatemala; and in star-apple in air baggage from Mexico; at New York, N. Y., in *Annona* sp. in air baggage from Brazil; in grapefruit in stores from Argentina; in guava in air baggage from Brazil; in mango in air stores from Colombia; in orange in baggage from Argentina; in sapodilla in air baggage from Colombia and Trinidad; and in sapodilla in mail from Trinidad; at Philadelphia, Pa., in cucurbit in stores from Venezuela; at Port Arthur, Tex., in orange in stores from Peru; at Charlotte Amalie, St. Thomas in grapefruit in stores from Brazil; at San Juan, P. R. in guava in air baggage from Trinidad; in guava in air cargo from the Dominican Republic; in mango in air quarters from Brazil and in air baggage from the Dominican Republic; in nispero in air baggage from Trinidad; and in rose-apple in air baggage from the Dominican Republic; at San Ysidro, Calif., in mango in baggage from Mexico; and at Savannah, Ga., in lemon in stores from Brazil.

Ceratitis sp. at Philadelphia, Pa., in Mandarin orange in stores from Belgian Congo.

Dacus sp. at Honolulu, Hawaii in mango in air baggage from the Philippines and an unknown origin.

Rhagoletis sp., probably *cerasi*, at Boston, Mass., in cherry in air stores from France.

Rhagoletis sp. at Nogales, Ariz., in *Crataegus* sp. in baggage from Mexico; and at Washington, D. C., in rose hips in mail from Iran and Sweden.

An adult *Tephritis* sp. on an airplane leaving Honolulu, Hawaii for the mainland.

Thirty-five interceptions identified to family only, Tephritidae, were intercepted at the following ports: Baltimore, Md., in orange in stores from Brazil; at Boston, Mass., in apple in air baggage from the Azores; in grapefruit in stores from the Union of South Africa; in orange in air stores from Brazil and Spain (?); in peach in cargo from the Union of South Africa; and in pomegranate in air baggage from Greece; at Chicago, Ill., in *Crataegus* sp. in air mail from Germany; in orange in air stores from an unknown origin; at Eagle Pass, Tex., in apple in baggage from Mexico; at El Paso, Tex., in orange in baggage from Mexico; at Galveston, Tex., in vegetable marrow in stores from West Africa; at Hidalgo, Tex., in apple in baggage from Mexico; at Honolulu, Hawaii in coffee berry and in coconut in baggage in preflight inspection of airplanes leaving Hawaii for the mainland; in *Sesbania grandiflora* flower in preflight inspection of mail

leaving Hawaii for the mainland; and in guava in air cargo from the Straits Settlements; at New Orleans, La., in orange in stores from Spain; at New York, N. Y., (pupa) with banana in cargo from Guatemala; in chestnut in baggage from Italy; in European grape in cargo from Argentina; in fig in air baggage from Lebanon; in orange in air stores from the Union of South Africa; and 5 pupae attached to paper in basket of fruit in air baggage from Italy; at Nogales, Ariz., in avocado in baggage from Mexico; and in *Crataegus* sp. in baggage from Mexico; at Port Arthur, Tex., (pupa) on floor of ice box where oranges from Spain had been stored; at San Juan, P. R., in grapefruit in stores from Brazil; at Washington, D. C., (pupae) with *Arnica cordifolia* flower and seed in mail from Canada; in *Ilex mutchagara* berry and in *Meliosma rigida* in mail from Japan; and in rose hips in mail from Sweden.

Other incompletely determined insects worthy of mention were:

Acrolophus sp. (Acrolophidae), presumably a new species, at Nogales, Ariz., with bulbstem yucca in cargo from Mexico.

Aleurocerus sp. (Aleyrodidae), undescribed, at Jacksonville, Fla., on decorative greenery in cargo from Mexico.

An aleyrodid, Aleyrodicinae, a new genus near *Aleurodicus*, at Laredo, Tex., on *Epidendrum mariae* plant in cargo; and on an orchid leaf in baggage from Mexico.

An aleyrodid, *Aleurodicus* sp., a new species near *coccolobae* Q. & B., at Miami, Fla., on bauhinia leaf in air baggage from Costa Rica.

Apsychomyrmex sp., a rather rare genus of ants, at Honolulu, Hawaii with orchids in air cargo from Costa Rica.

A tortricid, *Archips* sp., at Houston, Tex., in an apple in air baggage from Mexico.

Aspidiotus sp. (Coccidae), an undescribed species, at Hoboken, N. J., on *Odontoglossum pulchellum* leaf in air cargo from England.

Asterolecaniidae, "pretty surely a new genus and species, superficially, closest to *Mycetococcus*; an interesting collection," at Brownsville, Tex., on cycad in cargo from Mexico.

Baris sp., probably *lepidii* Germ., (Curculionidae) at Houston, Tex., in turnip in stores from France.

Baris sp. at New York, N. Y., in horseradish in air cargo from Poland; in horseradish in cargo from Yugoslavia; and in radish in air stores from Sweden.

A blastobasid, new to the National Museum collection, at Nogales, Ariz., with bulbstem yucca in cargo from Mexico.

Blastodacna sp. (Cosmopterygidae) at Washington, D. C., in *Malus* sp. in mail from France.

A curculionid, *Brachycerus* sp., at New York, N. Y., in *Pancreatium* sp. bulb in cargo from Turkey.

A curculionid, *Brachyrhinus* sp., at Hoboken, N. J., in soil with miscellaneous bulbs in mail from Switzerland.

Epicaerus sp. (Curculionidae) at Brownsville, Tex., in potatoes in stores from Mexico; at Eagle Pass., Tex., El Paso, Tex., and Hidalgo, Tex., in potatoes in baggage from Mexico; at Galveston, Tex., and Mobile, Ala., in potatoes in stores from Mexico.

"*Eulia*" sp. (Tortricidae) at New York, N. Y., in grape, nectarine, peach, and plum in cargo from Chile.

A scarabaeid, *Euphoria* sp., new to the National Museum collection, at New Orleans, La., on a bale of sisal in cargo from Mexico.

Euscepes sp. (Curculionidae) at Charleston, S. C., and Houston, Tex., in sweetpotato in stores from Brazil; and in sweetpotato at Honolulu, Hawaii in air baggage from Okinawa.

Furcaspis sp. (Coccidae), an undescribed species, at Brownsville, Tex., on *Chamaedorea* sp. leaf in air cargo from Mexico.

Gelechiid, new to the National Museum collection, at Boston, Mass., in pistache seed in air baggage from Italy.

Grapholitha sp., presumably *molesta* (Olethreutidae), at Philadelphia, Pa., in apple in stores from Japan.

Grapholitha sp., near or = *packardi* Zell. (Olethreutidae), at El Paso, Tex., on *Crataegus* sp. in baggage from Mexico.

An olethreutid, *Gymnandrosoma* sp., near or = *aurantianum* Costa Lima, at Laredo, Tex., in mango in baggage from Mexico; at Houston, Tex., in orange in stores from Argentina; and at New Orleans, La., in purple mombin in air baggage from Mexico.

Lema sp., probably *lichensis* Voet. (Chrysomelidae), at Chicago, Ill., with cut asters in air baggage from Germany.

A curculionid, *Lixus* sp. at Philadelphia, Pa., in stores from Egypt and Italy; and at New York, N. Y., in *Cynara* sp. bud in cargo from Italy.

Mediolata sp. (Stigmaeidae), a unique specimen, at Honolulu, Hawaii on Mandarin orange in air stores from Japan.

A chrysomelid, *Omoplatia* sp., new to the National Museum collection, at Galveston, Tex., in banana debris in cargo from Ecuador.

Palaeopus sp. (Curculionidae) at New York, N. Y., in yam in air baggage from British West Indies; and in yam in air cargo from Jamaica.

A coccid, "*Phenacoccus*" sp.—*Phenacoccus* series but not characteristic for the genus and not placed as described—at Hoboken, N. J., on *Ornithogalum* sp. in mail from the Union of South Africa.

Prays sp. (Hyponomeutidae) at Honolulu, Hawaii in *Pelea* sp. in mail leaving Hawaii for the mainland.

A curculionid, *Premnotrypes* sp., at Galveston, Tex., in potato in stores from Peru; and at Mobile, Ala., in potato in stores from Colombia.

Procryptotermes sp. (Kalotermitidae), a new species, at Christiansted, St. Croix in dry tamarind wood in stores from the French West Indies.

Procumbitermes sp. (Termitidae) at New York, N. Y., in nest built of mud in air cargo from Belgian Congo.

Pseudococcus sp. (Coccidae), not placed as a described species, was intercepted 41 times at 13 different ports on various plant material from the following countries: Barbados, Brazil, Canal Zone, Canary Islands, Chile, Costa Rica, Ecuador, Guatemala, India, Indo-China, Japan, Mexico, Peru, Philippines, Spain, and Tortola.

Pseudoparlatoria sp. (Coccidae), not placed as any of the described species, at Hoboken, N. J., on anthurium leaf in air cargo from Colombia.

Puto sp. (Coccidae), probably undescribed, at Brownsville, Tex., and at Laredo, Tex., on anthurium and philodendron in cargo from Mexico; and at Miami, Fla., on an orchid leaf in air cargo from Mexico.

A scolytid, *Scolytus* sp., at New York, N. Y., in unidentified wood in cargo from Sweden.

Steatococcus sp. (Coccidae), not placed as one of the described species but a North American relative of *Icerya*, at Nogales, Ariz., on jumping bean in cargo from Mexico.

DISEASES

Incompletely determined pathogens worthy of mention were:

Ascochyta sp. at Washington, D. C., on a leaf of *Araujia* sp. in mail from Portugal.

Cercospora sp., close to *panacis* Thrum. & Chupp, at Honolulu, Hawaii on *Nothopanax* sp. in air stores from the Fiji Islands.

Cercospora sp. at Miami, Fla., on a leaf of *Cassia moschata* in air mail from the Canal Zone; and at Houston, Tex., on *Chamaedorea* sp. fronds in air cargo from Mexico.

Coniothecium sp. at Laredo, Tex., on *Oncidium* sp. in cargo from Mexico; and at Nogales, Ariz., on cactus in cargo from Mexico.

Coniothyriopsis sp. at Nogales, Ariz., on agave and *Lemaireocerus* sp. in baggage from Mexico and organpipe-cactus in cargo from Mexico.

Coniothyrium sp. at Nogales, Ariz., on orchid in mail from Mexico.

Echidnodes sp. at San Francisco, Calif., on *Laelia superbiens* in cargo from Guatemala.

Helminthosporium sp. at Nogales, Ariz., on cantaloupe in cargo from Mexico.

Hendersonia sp. at Honolulu, Hawaii on *Nothopanax* sp. in air stores from the Fiji Islands.

Hysterographium sp., close to *mori* (Schw.) Rehm, on organpipe-cactus in cargo from Mexico.

Isaria sp. at San Antonio, Tex., on *Chamaedorea oblongata* leaf in air cargo from Mexico.

Leptographium sp. at Nogales, Ariz., on guava in baggage from Mexico.

Leptosphaeria sp. at Laredo, Tex., on agave in baggage from Mexico; at New York, N. Y., on a leaf of *Erythrophleum guineense* in air cargo from Gold Coast; at Philadelphia, Pa., on a leaf of Musaceae in air baggage from Denmark; and at San Pedro, Calif., on Jobs-tears in cargo from Japan.

Lophodermium sp. at Brownsville, Texas, on an orchid leaf in cargo from Mexico.

Microstroma sp. at Hoboken, N. J., on *Pelargonium* sp. leaf in mail from France; and at Philadelphia, Pa., on apple in stores from Egypt.

Neohoeheia sp. at Washington National Airport, Arlington, Va., on tangerine in air stores from Africa.

Ophiostoma sp. at Hoboken, N. J., on gladiolus in mail from Czechoslovakia.

Pestalotia sp. at Laredo, Tex., on mamey in baggage from Mexico; at San Pedro, Calif., on Jobs-tears in cargo from Japan; and at New Orleans, La., on avocado in air baggage from Salvador.

Phyllosticta sp. at Brownsville, Tex., on *Chamaedorea* sp. in baggage from Mexico; at El Paso, Tex., on a sapote leaf in mail from Mexico; at Miami, Fla., on gardenia leaf in quarters from Cuba; and at San Juan, P. R., on agave in air baggage from St. Martin.

Phyllostictina sp. at Honolulu, Hawaii on *Barringtonia speciosa* in air baggage from Kwajalein.

Rhytisma sp. at Washington, D. C., on Japanese azalea in mail from Japan.

Septonema sp., close to *toruloides* Cke. & Ell., at Laredo, Tex., on *Chamaedorea* sp. in cargo from Mexico.

Septoria sp. at Brownsville, Tex., on philodendron in cargo from Mexico; at Laredo, Tex., on avocado in baggage from Mexico; at Nogales, Ariz., on yucca in cargo from Mexico; and at San Pedro, Calif., on an oak leaf in air baggage from Denmark.

Stachybotrys sp., probably *atrata* Cda., at Nogales, Ariz., on cantaloupe in cargo from Mexico.

Uredo sp. at Miami, Fla., on *Tillandsia* sp. leaf in air baggage from Mexico; and on *Trigonidium seemannii* leaf in air mail from the Canal Zone.

Verticillium sp. at Philadelphia, Pa., on a willow twig in quarters from the Netherlands.

Zygosporium sp., probably *oschioides* Mont., at Brownsville, Tex., on *Chamaedorea* sp. leaf in air cargo from Mexico.

NEMATODES

Aphelenchoides sp. at Boston, Mass., with amaryllis bulbs in air baggage from Bermuda; in beet in stores from the Netherlands; in celeriac in stores from Germany; with holly cutting in air baggage from Ireland; in lily-of-the-valley pips in air baggage from England; in oak timber in cargo from England; in onion in air baggage and cargo from Italy; in soil with cactus plant in baggage from Canada; in soil with carrots, parsnips, and potatoes in stores from Argentina; in soil with hydrangea plant in air baggage from Iran; in soil with rosemary plant in air baggage from Italy; and with potatoes in stores from Poland; at Key West, Fla., in soil from an automobile from Cuba; at Miami, Fla., in soil with aloe, croton, and an unknown plant in air baggage from Jamaica; in soil with cactus plants in air baggage from Brazil; in soil with carrots in stores from Germany; and in soil with an unknown plant in air baggage from Panama; at Newport News, Va., in soil with lily bulbs in cargo from Japan; at Nogales, Ariz., with a coleus plant in baggage from Mexico; at Norfolk, Va., in unknown flower bulbs and lily bulbs in cargo from Japan; at Pensacola, Fla., in soil in potato bin in stores from Belgium; and at San Francisco, Calif., with roots of tree peonies in cargo from Japan.

Aphelenchus sp. at Boston, Mass., in soil with cactus plant in baggage from Canada; in soil with carnation plants in air baggage from Greece; in soil with carrots in stores from Australia; in soil with carrots, parsnips, and potatoes in stores from Argentina; with celery in stores from the Union of South Africa; with horseradish in stores from Japan; in soil with onions in cargo from Italy; in soil with peanuts in mail from Barbados; in soil with miscellaneous plants in air baggage from Portugal; in soil with potatoes in stores from Poland; and with tulip bulbs in baggage from the Netherlands; at Key West, Fla., in soil with sansevieria plant in baggage from Cuba; at Miami, Fla., in soil with beadplant in baggage from France; in soil with garlic in stores from Israel and Italy; in soil with iris plants in air baggage from Cuba; in soil with mint plants in air baggage from Cuba; in soil with orchid plants in air baggage from Colombia; and in soil with unknown plants in air baggage from Jamaica and Panama; at New Orleans, La., in soil with an undetermined legume in air baggage from Jamaica; at Pensacola, Fla., in soil with carrots in stores from England; at San Diego, Calif., in gladiolus corm in baggage from Mexico; and at Tampa, Fla., in soil with beets in stores from Germany.

Ditylenchus sp. at Boston, Mass., in soil with cactus plants in baggage from Canada; in soil with carnation and primrose plants and tuberose bulbs in air baggage from England; in soil with oleander plants in air baggage from Ireland; in soil with onions in cargo from Italy; and in soil with unidentified plants in air baggage from Portugal; at Hoboken, N. J., in *Tigridia* sp. bulbs in mail from the Netherlands; at Key West, Fla., in soil from an automobile from Cuba; and at Miami, Fla., in soil with assorted plants in air baggage from Honduras.

Helicotylenchus sp. at Boston, Mass., in soil with hydrangea plants in air baggage from Iran; in soil with unknown plants in baggage from Brazil; at Laredo, Tex., in caladium and philodendron roots in baggage from Mexico; at Miami, Fla., in soil with assorted plants in air baggage from Costa Rica; and in soil with violet roots in air baggage from Costa Rica.

Heterodera sp., possibly *major*, at New York, N. Y., in soil with *Monarda didyma* plants in baggage from England.

Heterodera, new species, at Miami, Fla., in soil with beadplant in baggage from France.

Other members of the genus *Heterodera* were intercepted 360 times at 26 ports from the following countries: Argentina, Azores, Belgium, Brazil, Canada, Canary Islands, Denmark, Egypt, England, France, Germany, Greece, Hong Kong, Hungary, India, Iran, Ireland, Israel, Italy, Japan, Lebanon, Liberia, Malta, Mexico, Morocco, Netherlands, New Zealand, Norway, Philippines, Poland, Portugal, Scotland, Spain, Sweden, Switzerland, Union of Soviet Socialist Republics, and Yugoslavia. These interceptions were made from soil samples; soil with new and used automobiles; soil with army vehicles; soil with potatoes in railway car; soil in sweeping from a railway car; soil with bulbs and tubers in baggage, cargo, and mail; soil with plant material in baggage and mail; and in soil with vegetables in cargo and stores.

Hoplolaimus sp. at Laredo, Tex., with roots of Indian rubber tree in cargo from Mexico; and at Boston, Mass., in soil with wallflowers in baggage from Ireland.

Meloidogyne sp., perhaps *javanica*, at Miami, Fla., in soil with assorted plants in air baggage from Honduras.

Meloidogyne sp. at Boston, Mass., with celery in stores from the Union of South Africa; and in soil with plants in air baggage from Greece; at Brownsville, Tex., in root gall on dracaena plant in baggage from Mexico; at Hoboken, N. J., in *Achimenes* spp. tubers in air cargo from the Netherlands; in *Aconitum napellus*, *Ajuga reptans atropurpurea*, and *Anaphalis triplinervis* roots in cargo from the Netherlands; in *Begonia rex* roots in air mail from England; in calla tubers in cargo from Italy; in *Ceanothus* sp. roots in cargo from the Netherlands; in *Caladium candidum* tubers in cargo from Guatemala; in clematis in cargo from the Netherlands; in *Columnea pilosissima* roots in mail from Scotland; in *Epimedium* sp. roots in cargo from England; in *Genista lydia* roots in air cargo from England; in geranium roots in mail from France; in gerbera roots in air cargo from India; in ginger roots in mail from Peru; in hepatica roots in mail from England; in Japanese iris roots in cargo from Japan; in *Kaempferia rotunda* tubers in mail from the Netherlands; in *Kaempferia* sp. tubers in cargo from India; in passion flower roots in mail from Bermuda; and in roots of roses in mail from France; at Laredo, Tex., in philodendron and spiraea roots in baggage from Mexico; at Miami, Fla., in acacia roots in air mail from Venezuela; in beadplant in baggage from France; and in soil with African violets in air baggage from Ecuador; and at New York, N. Y., in aster roots in quarters from Japan.

Nothotylenchus sp. at Boston, Mass., in soil with hydrangea plant in air baggage from Iran; and at Key West, Fla., in sample of soil from Cuba.

Paratylenchus sp. at Miami, Fla., in soil with celery in stores from Germany; and in soil with sansevieria plant in air baggage from Haiti.

Pratylenchus, new species, at Miami, Fla., in beadplant in baggage from France.

Pratylenchus sp. at Boston, Mass., in dahlia root in air baggage from Italy; in soil with dwarf pine in quarters from Japan; in soil with potatoes in stores from Argentina; at Brownsville, Tex., in soil with a begonia plant in air baggage from Nicaragua; at Hoboken, N. J., in *Helleborus niger maximus* roots in air cargo from the Netherlands; in Japanese iris roots in cargo from Japan; in roots of *Ranunculus acris* Double in mail from Germany; at Laredo, Tex., in begonia tubers in baggage from Mexico; at Miami, Fla., in garlic in stores from Italy; at New York, N. Y., in lily-of-the-valley pips in baggage from Italy; at San Francisco, Calif., in lily-of-the-valley pips in cargo from Denmark and Germany and in mail from Denmark; and at Washington, D. C., in a soil sample in mail from Colombia.

Psilenchus sp. at Boston, Mass., in soil with leek in stores from Egypt.

Rotylenchus, new species, at Key West, Fla., in soil with sansevieria plant in baggage from Cuba; and at Miami, Fla., in soil with celery in stores from France.

Rotylenchus sp. at Boston, Mass., in soil with carnation plants in air baggage from the Azores; in soil with lily-of-the-valley pips in air baggage from England; and in soil with violet plants in air baggage from Italy; at Miami, Fla., in soil with celery in stores from Germany; at New Orleans, La., in soil with legumes in air baggage from Jamaica; and at New York, N. Y., in soil with citrus tree and olive tree in baggage from Italy.

Tylenchorhynchus sp., possibly *clarus* Allen, at Boston, Mass., in soil with celery in stores from Egypt.

Tylenchorhynchus, new species, at Miami, Fla., in soil with roots of an unknown plant in air baggage from Jamaica.

Tylenchorhynchus sp. at Boston, Mass., in soil with carnation and primrose plants and tuberose bulbs in air baggage from England; in soil with carnation plant and in soil with onion sets in air baggage from Italy; at Miami, Fla., in soil with celery in stores from Germany; in soil with garlic in stores from Italy; and in soil with iris plant in air

baggage from Cuba; and at Tampa, Fla., in soil with unidentified bulbs in air baggage from Cuba.

Tylenchus, new species, at Miami, Fla., in soil with violet plants in air baggage from Costa Rica.

Tylenchus sp. at Boston, Mass., in soil on an automobile from England; in soil with azalea, fuchsia, ivy, and tradescantia plants in air baggage from Germany; in soil with carnation plants in air baggage from Italy; in soil with holly cuttings in air baggage from Ireland; and with oak timber in cargo from England; at Key West, Fla., in soil on an automobile from Cuba; and in soil with sansevieria plant in baggage from Cuba; at Miami, Fla., in soil with carrots in stores from Germany; in soil with caladium, lily, mint, and peperomia plants in air baggage from Panama; in soil with copperleaf plant in air baggage from Cuba; and in soil with sansevieria plant in air baggage from Haiti; at New Orleans, La., in soil with undetermined legume in baggage from Jamaica; at New York, N. Y., in soil with citrus and olive trees in baggage from Italy; and at Tampa, Fla., in soil with unidentified bulbs in air baggage from Cuba.

Xiphinema sp., near *index* Thorne & Allen, at Miami, Fla., in soil with carnation plant in air baggage from Cuba.

Xiphinema sp. at Miami, Fla., in soil with codium plant in air baggage from Colombia.

Summary of Numbers of Interceptions Listed in Main Table

Country	Insect	Disease	Country	Insect	Disease
	Number	Number		Number	Number
Africa:			Europe—Continued		
Africa.....	0	1	Spain.....	13	7
Algeria.....	3	0	Sweden.....	13	3

¹ This total represents only pests of known or potential plant-quarantine importance or certain organisms of scientific importance. The total of all interceptions made during the year was 15,058.

NOTE.—Interceptions were also made from Aruba, Belgian Congo, British West Indies, Burma, Cameroons, Canary Islands, Canton Island, Ceylon, Christmas Island, Fanning Island, Fiji Islands, French West Africa, French West Indies, Ghana, Greenland, Hungary, Indo-China, Java, Johnston Island, Kenya, Korea, Malta, Nepal, Nevis, New Caledonia, Okinawa, Rhodesia, Sumatra, and Union of Soviet Socialist Republics.

Pests collected and reported from July 1, 1956, through June 30, 1957

[An asterisk indicates State inspection]

Pest and host	Country of origin	Number of interceptions in—			Collected in—
		Consumption	Non-entry	Propagation	
<i>Acanthoscelides armitagei</i> (Pic) (Bruchidae):					
<i>Cajanus</i> sp.-----	Panama-----	1			N. Y.
<i>Pisum sativum</i> (pea)-----	do-----	2			Fla.
" <i>Acanthoscelides</i> " <i>spinipes</i> (Er.) (Bruchidae):					
Legume-----	Greece-----			1	N. J.

Hosts and Insects

ABIES:

Blastophagus piniperda (Coleoptera)

ACER:

Aceria macrochelus (Acarina)

Pentatrichopus fraxaeifolii (Homoptera)

Periphyllus californiensis (Homoptera)

ACHRAS:

Anastrepha serpentina (Diptera)

ACTINOPHLOEUS:

Dacus dorsalis (Diptera)

AGARICUS:

Nemopogon granelia (Lepidoptera)

ALLIUM ASCALONICUM:

Myzus ascalonicus (Homoptera)

ALLIUM PORRUM:

Acrolepia assetella (Lepidoptera)

Deroceras reticulatum (Mollusca)

Glycyphagus domesticus (Acarina)

ALLIUM SATIVUM:

Aglossa cuprealis (Lepidoptera)

Brachycerus albidentatus (Coleoptera)

Brachycerus algerus (Coleoptera)

Dyspessa ulula (Lepidoptera)

Phyrdenus divergens (Coleoptera)

ALPINIA:

Bradybaena similaris (Mollusca)

Coccus viridis (Homoptera)

Pulvinaria psidii (Homoptera)

AMHERSTIA:

Aspidiotus diffinis (Homoptera)

ALYXIA:

Cercoplastes rubens (Homoptera)

AMARANTHUS:

Pachyzancla bipunctalis (Lepidoptera)

AMMI:

Systole gemiculata (Hymenoptera)

ANANAS:

Agroiconota propinqua (Coleoptera)

Alpheias conspirata (Lepidoptera)

Blissus leucopterus insularis (Hemiptera)

Brevipalpus phoenicis (Acarina)

Eutheola bidentata (Coleoptera)

Ribua innoria (Lepidoptera)

"Targionia" bromiliae (Homoptera)

Thecla ziba (Lepidoptera)

Xylobiops texanus (Coleoptera)

ANDROPOGON:

Nysius vinitor (Hemiptera)

ANNONA:

Bephra maculicollis (Hymenoptera)

Ceratitis capitata (Diptera)

Cerconota anonella (Lepidoptera)

Iridomyrmex humilis (Hymenoptera)

Pseudococcus lilacinus (Homoptera)

Talponia batesi (Lepidoptera)

ANTHURIUM:

Bradybaena similaris (Mollusca)

Ceroplastes rubens (Homoptera)

Pulvinaria psidii (Homoptera)

ANTIRRHINUM:

Prodenia ornithogalli (Lepidoptera)

APIUM:

Acidia heraclei (?) (Diptera)

Anuraphis tulipae (Homoptera)

Deroceras reticulatum (Mollusca)

Mamestra brassicae (Lepidoptera)

ARACHIS:

Caryedon fuscus (?) (Coleoptera)

ARCTOSTAPHYLOS:

Gynaikothrips ficorum (Thysanoptera)

ARCTOTIS:

Microcephalothrips abdominalis (Thysanoptera)

ASPASIA:

Vinsonia stellifera (Homoptera)

ASTER:

Frankliniella intonsa (Thysanoptera)

Taeniothrips atratus (Thysanoptera)

BAMBOO:

Asterolecanium mliarior robustum (Homoptera)

Chaetococcus bambusae (Homoptera)

BETA:

Gnorimoschema ocellatella (Lepidoptera)

Lixus junci (Coleoptera)

Theba pisana (Mollusca)

BRASSAVOLA:

Furcaspis biformis (Homoptera)

Vinsonia stellifera (Homoptera)

BRASSIA:

Tenthecoris distinguendus (Hemiptera)

Vinsonia stellifera (Homoptera)

BRASSICA NAPOBRASSICA:

Ceutorhynchus pleurostigma (Coleoptera)

BRASSICA OLERACEA BOTRYTIS:

Deroceras reticulatum (Mollusca)

Evergester rimosalis (Lepidoptera)

Mamestra brassicae (Lepidoptera)

Phytomyza rufipes (Diptera)

Pieris brassicae (Lepidoptera)

BRASSICA OLERACEA BULLATA:

Deroceras reticulatum (Mollusca)

BRASSICA OLERACEA CAPITATA:

Deroceras reticulatum (Mollusca)

Limax marginatus (Mollusca)

Limax maximus (Mollusca)

Mamestra brassicae (Lepidoptera)

Phytomyza rufipes (Diptera)

Pieris brassicae (Lepidoptera)

BRASSICA OLERACEA GONGYLODES:

Phytomyza rufipes (Diptera)

BRASSICA RAPA:

Helhula undalis (Lepidoptera)

Helophorus rugosus (Coleoptera)

Phytomyza rufipes (Diptera)

BROMELIAD:

Cryphula apicalis (Hemiptera)

Furcaspis biformis (Homoptera)

Galgupha punctifer (Hemiptera)

BROUGHTONIA:

Vinsonia stellifera (Homoptera)

BUXUS:

Eriophyes canestrinii (Acarina)

Psylla buxi (Homoptera)

CACTUS:

Aufeuus impressicollis (Hemiptera)

Lepidosaphes philococcus (Homoptera)

Orthezia cacticola (Homoptera)

Texananus spatulatus (Homoptera)

CAJANUS:

Acanthoscelides armitagei (Coleoptera)

Ancylostoma stercora (Lepidoptera)

Callosobruchus phaseoli (Coleoptera)

Chalcodermus aeneus (Coleoptera)

Maruca testulalis (Lepidoptera)

CALLUNA:

Gelechia ericetella (Lepidoptera)

Micrelus ericae (Coleoptera)

Orthotylus ericetorum (Hemiptera)

Taeniothrips atratus (Thysanoptera)

Taeniothrips ericae (Thysanoptera)

Thrips flavus (Thysanoptera)

CALOCARPUM:

Anastrepha ludens (?) (Diptera)

Anastrepha serpentina (Diptera)

CALOPHYLLUM:

Dacus dorsalis (?) (Diptera)

CAMARIDIUM:

Vinsonia stellifera (Homoptera)

CAMELLIA:

Aspidiotus degeneratus (Homoptera)

Brevipalpus inornatus (Acarina)

Lepidosaphes tubulorum (Homoptera) (As de-

finied by Kuwana)

Parlatoria camelliae (Homoptera)

Xylodendrus germanus (Coleoptera)

CANAVALLA:

Lampides boeticus (Lepidoptera)

Maruca testulalis (Lepidoptera)

CAPSICUM:

Dacus cucurbitae (Diptera)

Epinotia aporema (Lepidoptera)

Gnorimoschema gudmannella (Lepidoptera)

Neoleucinodes elegantalis (Lepidoptera)

Pachyzancla perisalis (Lepidoptera)

Phenacoccus parvus (Homoptera)

Platynota rostrana (Lepidoptera)

Pyrausta nivalis (Lepidoptera)

CASIMIROA:

Anastrepha ludens (Diptera)

Hosts Unknown

AIRPLANE:

Crambus ligonellus (Lepidoptera)
Dacus dorsalis (Diptera)
Diaphania indica (Lepidoptera)
Leptocorixa acuta (Hemiptera)
Mocis latipes (Lepidoptera)
Noropsis hieroglyphica (Lepidoptera)
Pachnaeus litus (Coleoptera)
Perigea illecta (Lepidoptera)
Platypus rugulosus (Coleoptera)
Tiracola plagiata (Lepidoptera)
Vanessa indica (Lepidoptera)

BAGGAGE:

Chelysoma variabilis (Hemiptera)
Plusia chalcites (Lepidoptera)
Sinozylon conigerum (Coleoptera)
Sphanta acula (Homoptera)

BARK:

Ernobius mollis (Coleoptera)
Hylurgops palliatus (Coleoptera)
Pityogenes chalcographus (Coleoptera)

BEAN:

Callosobruchus phaseoli (Coleoptera)
Neodryocoetes guianae (Coleoptera)

BOX:

Galgupha punctifer (Hemiptera)

BOX OF TOMATOES:

Dendrobiella aspera (Coleoptera)

BULB:

Arion circumscriptus (Mollusca)

CARDBOARD CRATE:

Nasutitermes corniger (Isoptera)

CLOTHING:

Monomorium destructor (Hymenoptera)

CONEX BOX:

Porthetria dispar (Lepidoptera)
Theba pisana (Mollusca)

DEBRIS:

Heterobostrychus brunneus (Coleoptera)
Iridomyrmex iniquus (Hymenoptera)

DUNNAGE:

Theba pisana (Mollusca)

FLOUR:

Trogoderma sternale (Coleoptera)

FLOWERS:

Adoretus sinicus (Coleoptera)
Deroceras reticulatum (Mollusca)
Frankliniella bispinosa (Thysanoptera)
Frankliniella formosae (Thysanoptera)

FOREST LITTER:

Arctothelia calaphracta (Homoptera)

FRUIT:

Lepidosaphes carinata (Homoptera)

GREENS:

Aleurocanthus woglumi (Homoptera)

HERBS AND PLANTS:

Aglossa cuprealis (Lepidoptera)

LEAF:

Coccus viridis (Homoptera)
Eucalymnatus tessellatus (Homoptera)
Orthesia pseudinsignis (Homoptera)
Pachyzancla bipunctalis (Lepidoptera)
Protopulvinaria pyriformis (Hymenoptera)

LEGUME POD:

"Acanthoscelides" spinipes (Coleoptera)

MACHINERY:

Theba pisana (Mollusca)

MILITARY CARGO:

Metopoplax ditomoides (Hemiptera)
Theba pisana (Mollusca)

MOSS:

Trapezonotus arenarius (Hemiptera)

PARCEL CONTAINING ANTHURIUM AND

ORCHID FLOWERS:

Dacus dorsalis (Diptera)

PLANTS:

Aleurocanthus woglumi (Homoptera)

PULPWOOD LOG:

Ips calligraphus (Coleoptera)

QUARTERS:

Argina cribraria (Lepidoptera)

SEED POD:

Mimosestes dominicanus (Coleoptera)

SUCCULENT:

Deroceras reticulatum (Mollusca)

SUITCASE:

Malacosoma castrensis (Lepidoptera)

WOOD:

Cossus cossus (Lepidoptera)
Cryptotermes brevis (Isoptera)
Cryptotermes cavifrons (Isoptera)
Heterobostrychus aequalis (Coleoptera)
Lyctus africanus (Coleoptera)
Pityogenes chalcographus (Coleoptera)
Prostephanus truncatus (Coleoptera)
Sinozylon anale (Coleoptera)
Sinozylon conigerum (Coleoptera)
Sirex noctilio (Hymenoptera)
Xylobius parilis (Coleoptera)

Countries of Origin and Insects

- ALGERIA:**
Anuraphis cardui
Ceratitis capitata
Ceutorhynchus erysimi
- ANGOLA:**
Stephanoderes hampei
- ANGUILLA:**
Cylas formicarius elegantulus
Phenacoccus parvus
- ANTIGUA:**
Anastrepha mombinpraeoptans
Asterolecanium miltaris robustum
Euscepes postfasciatus
Pectinophora gossypiella
Vinsonia stelfifera
- ARGENTINA:**
Ceratitis capitata
Epinothia aporema
Phyrdenus divergens
- AUSTRALIA:**
Aspidiotus australiensis
Asterolecanium petrophilae
Glycyphagus domesticus
Lepidosaphes tuberculata
Nezara viridula

NIGERIA:

Leucinodes orbonatis

NORTHERN IRELAND:

Steneotarsonemus laticeps

NORWAY:

Argyresthia conjugella
Pityogenes chalcographus
Trapezonotus arenarius

PAKISTAN:

Trogoderma granarium

PANAMA:

Acanthoscelides armatagei
Anastrepha mombinpraeoptans
Ancylostoma stercora
Aulacaspis mangiferae
Cerconota anonella
Furcaspis biformis
Leucaspis cockerelli
Mecolaemus carvalhoi (?)
Stenomoma catenifer
Vinsonia stellifera

PANAMA (?)

Maruca testulalis

PERU:

Anastrepha fraterculus
Dinoderus bifoveolatus
Mescinia perulla

Countries of Origin and Insects—Continued

PHILIPPINES:

Aspidiotus destructor
Caryedon fuscus
Coccus viridis
Cylas formicarius
Ectomyetis ceratoniae
Ferrisia virgata
Heltila undalis
Pseudococcus lilacinus
Pyrausta nubilalis

PHILIPPINES (?):

Sternochetus mangiferae

POLAND:

Nemapogon granella

PORTUGAL:

Aglossa cuprealis
Anuraphis tulipae
Bruchus luteicornis
Bryobia sarothamni
Curculio elephas
Deroceras reticulatum
Laspeyresia splendana
Opogona subcervinella
Parlatoria camelliae
Rhagoletis cerasi
Taeniothrips ericae
Tetralicia ericae

PUERTO RICO:

Anastrepha mombinpraeoptans
Anastrepha striata
Anastrepha suspensa
Ancylostomia stercorea
Crambus ligonellus
Cylas formicarius elegantulus
Maruca testulalis
Pachyzancla periusalis
Pectinophora gossypiella
Protopulvinaria longivalvata
Vinsonia stellifera

ST. KITTS:

Anastrepha mombinpraeoptans
Ancylostomia stercorea
Fundella pellucens
 "Targionia" sacchari

ST. LUCIA:

Protopulvinaria pyriformis

ST. MARTIN:

Anastrepha mombinpraeoptans

ST. THOMAS:

Caryedon fuscus

ST. VINCENT:

Opogona subcervinella

SALVADOR:

Anastrepha mombinpraeoptans
Anastrepha striata
Leucaspis cockerelli
Stenomoma catenifer
Vinsonia stellifera

SCOTLAND:

Arctothezia cataphracta
Gelechia ericetella
Micrelus ericae
Orthotylus ericetorum
Phytomyza rufipes
Taeniothrips atratus
Taeniothrips ericae
Taeniothrips vulgatissimus
Thrips flavus
Thrips fuscipennis

SIERRA LEONE:

Cylas puncticollis
Heterobostrychus brunneus

SOUTH AMERICA:

Ceratitis capitata

SPAIN:

Acrolepia assectella
Brachycerus algirus
Ceratitis capitata
Chilo suppressalis
Curculio elephas

Dyspessa ulula
Laspeyresia nigricana
Laspeyresia splendana
Pentamerismus coronatus
Rhagoletis cerasi

STRAITS SETTLEMENTS:

Ferrisia virgata
Furcaspis biformis
Trogoderma granarium

SWEDEN:

Ernobius mollis
Hylurgops palliatus
Lecanium corni
Pityogenes chalcographus
Zophodia convolutella (?)

SWITZERLAND:

Adelphocoris seticornis
Hypera nigrirostris
Sparteus villosus

SYRIA:

Pectinophora gossypiella

TAHITI:

Aspidiotus destructor
Dialeurodes kirkaldyi
Morganella longispina

THAILAND:

Cylas formicarius ssp.
Parlatoria zizyphus

TORTOLA:

Anastrepha mombinpraeoptans
Ancylostomia stercorea
Euscepes postfasciatus

TRINIDAD:

Anastrepha mombinpraeoptans
Ancylostomia stercorea
Callosobruchus phaseoli
Furcaspis biformis
Maruca testulalis
Talponia batesi
Vinsonia stellifera

TRIPOLI:

Theba pisana

UNION OF SOUTH AFRICA:

Carbula litigatrix
Ceratitis capitata
Cletus caffer
Cletus ochraceus
Epichorista ionephela
Iridomyrmex humilis
Ischnodemus diplopterus
Nezara viridula
Phlyctinus callosus

UNKNOWN:

Anastrepha mombinpraeoptans
Argina cribraria
Arion circumscriptus
Ceratitis capitata
Metamasius sericeus
Pachnaeus litus
Parlatoria cinerea
Parlatoria zizyphus
Perigea illecta
Portheiria dispar
Rhagoletis cerasi

VENEZUELA:

Anastrepha mombinpraeoptans (?)
Bephrata maculicollis
Maruca testulalis
Pachnaeus litus
Platynota rostrana
Stenomoma catenifer
Theba pisana
Unaspis citri
Zenadiatraea lineolata

WEST PACIFIC:

Leptocorixa acuta
Tiracola plagiata

YUGOSLAVIA:

Pyrausta nubilalis

Pests collected and reported from July 1, 1956, through June 30, 1957

Pest and host	Country of origin	Number of interceptions in—			Collected in—

Hosts and Diseases—Continued

ONCIDIUM—Continued

Uredo behnickiana (Promycetes)*Uredo epidendri* (Promycetes)*Uredo oncidii* (Promycetes)

ORCHID:

Camarosporium orchidicola (Deuteromycetes)*Leptosphaeria niessleana* (Ascomycetes)*Mycosphaerella cattleyae* (Ascomycetes)*Ophiodiella orchidearum* (Ascomycetes)*Phomopsis orchidophila* (Deuteromycetes)*Sphenospora kevorkianii* (Promycetes)*†Sphenospora mera* (Promycetes)*Uredo behnickiana* (Promycetes)*Uredo epidendri* (Promycetes)*Uredo guacae* (Promycetes)*Uredo nigropuncta* (?) (Promycetes)

ORNITHOGALUM:

†Didymellina ornithogali (Ascomycetes)*Meloidogyne hapla* (Nematoda)*Meloidogyne javanica* (Nematoda)*Puccinia ornithogali-thyrsoides* (Promycetes)

ORYZA:

†Leptosphaeria culmifraga (Ascomycetes)*†Leptosphaeria salvinii* (Ascomycetes)*†Ophiobolus oryzinus* (Ascomycetes)*Septoria oryzae* (Deuteromycetes)*†Tilletia horrida* (Promycetes)

PACHYCEREUS:

Phyllosticta concava (?) (Deuteromycetes)*†Pleospora diaportheoides* (?) (Ascomycetes)

PAEONIA:

†Coryneum microstictoides (Deuteromycetes)*Meloidogyne hapla* (Nematoda)*†Monochaetia paeoniae* (Deuteromycetes)*Sclerotopsis testudinea* (Deuteromycetes)*Thielaviopsis basicola* (Deuteromycetes)

PALM:

†Corynespora cassiicola (Deuteromycetes)*†Criconeimoides mutabile* (Nematoda)

PASPALUM:

Cerebella andropogonis (Deuteromycetes)

PASTINACA:

Phoma nebulosa (Deuteromycetes)

PERSEA:

Cercospora purpurea (Deuteromycetes)

PETROSELINUM:

Septoria petroselinii (Deuteromycetes)

PHALARIS:

Helicotylenchus nannus (Nematoda)

PHASEOLUS:

Elisinoe phaseoli (Ascomycetes)

PHILODENDRON:

Colletotrichum philodendri (Deuteromycetes)*Helicotylenchus nannus* (Nematoda)

PHORADENDRON:

†Phyllosticta phoradendri (Deuteromycetes)

PHRAGMITES:

†Lophodermium arundinaceum (Ascomycetes)*†Papularia sphaerosperma* (Deuteromycetes)

PHYSALIS:

†Meliola acervata (Ascomycetes)

PINUS:

Coleosporium solidaginis (Promycetes)

POLANTHES:

Meloidogyne javanica (Nematoda)

POLYGALA:

Meloidogyne incognita var. *acrita* (Nematoda)

POPULUS:

†Marssonina populi (Deuteromycetes)*†Melampsora populnea* (Promycetes)

PRIMULA:

†Tylenchorhynchus brevidens (Nematoda)

PRUNUS AMYGDALUS:

Coryneum carpophilum (Deuteromycetes)

PRUNUS ARMENIACA:

Coryneum carpophilum (Deuteromycetes)

PRUNUS DOMESTICA:

Monilinia laxa (Ascomycetes)

PSIDIIUM:

Pestalotia psidii (Deuteromycetes)

PUNICA:

Sphaceloma punicae (Deuteromycetes)

PYRACANTHA:

Fusicladium pyracanthae (Deuteromycetes)

PYRUS:

Monilinia fructigena (Ascomycetes)

QUERCUS:

†Cronartium quercuum (Promycetes)

RAUWOLFIA:

Meloidogyne arenaria (Nematoda)*Meloidogyne javanica* (Nematoda)

RHODODENDRON:

†Cercospora handelii (Deuteromycetes)*Chrysomya ledi* var. *rhododendri* (Promycetes)*Diplodina eurhododendri* (Deuteromycetes)*Exobasidium vaccinii* (Basidiomycetes)*Gloeosporium rhododendri* (Deuteromycetes)*Septoria azaleae* (Deuteromycetes)*†Torula rhododendri* (Deuteromycetes)

RHYNCHOSIA:

Meloidogyne incognita (Nematoda)

RIBES:

Pseudopeziza ribis (Ascomycetes)

ROSA:

Diaporthe eres (Ascomycetes)*Meloidogyne hapla* (Nematoda)*Phragmidium disciflorum* (Promycetes)*†Sphaerotheca humuli* (Ascomycetes)

RUBUS:

†Coryneum microstictum (Deuteromycetes)*†Mainsia variabilis* (Promycetes)*†Phyllosticta fusco-zonata* (?) (Deuteromycetes)

SACCHARUM:

Cytospora sacchari (Deuteromycetes)*Leptosphaeria sacchari* (Ascomycetes)

SALIX:

Tubercularia vulgaris (Deuteromycetes)

SANSEVIERIA:

Meloidogyne incognita (Nematoda)

SCHOMBURGKIA:

Fusarium solani (Deuteromycetes)*Pestalotia conspicua* (Deuteromycetes)*Uredo behnickiana* (Promycetes)*Uredo epidendri* (Promycetes)

SINNINGIA:

Thielaviopsis basicola (Deuteromycetes)

SOIL:

†Aphelenchoides bicaudatus (Nematoda)*†Aphelenchoides coffea* (Nematoda)*†Aphelenchoides huntii* (Nematoda)*†Criconeimoides xenoplax* (Nematoda)*†Helicotylenchus erythrinae* (Nematoda)*Helicotylenchus multicinctus* (Nematoda)*Helicotylenchus nannus* (Nematoda)*Heterodera cacti* (Nematoda)*Heterodera carotae* (?) (Nematoda)*Heterodera major* (Nematoda)*Heterodera punctata* (Nematoda)*Heterodera rostochiensis* (Nematoda)*†Heterodera schachtii* (Nematoda)*Meloidogyne incognita* (Nematoda)*Meloidogyne incognita* var. *acrita* (Nematoda)*†Paraphelenchus amblyurus* (?) (Nematoda)*Pratylenchus penetrans* (Nematoda)*Pratylenchus pratensis* (Nematoda)*†Pratylenchus vulnus* (Nematoda)*Rotylenchus reniformis* (Nematoda)*Rotylenchus robustus* (Nematoda)*Scutellonema brachyurum* (Nematoda)*Tylenchorhynchus dubius* (Nematoda)*†Tylenchorhynchus martini* (Nematoda)*Tylenchus jiliformis* (Nematoda)

SOLANUM:

Meloidogyne arenaria (Nematoda)*Meloidogyne hapla* (Nematoda)*Meloidogyne incognita* (Nematoda)*Meloidogyne incognita* var. *acrita* (Nematoda)*Meloidogyne javanica* (Nematoda)

SORBUS:

†Gymnosporangium juniperi (Promycetes)*Monilinia laxa* (Ascomycetes)

SPINACIA:

Peronospora effusa (Phycomycetes)

STACHYTARPHETA:

Puccinia urbaniana (Promycetes)

See footnotes at the end of this list.

Hosts and Diseases—Continued

STANHOPEA:

Uredo guacae (Promycetes)

TAXUS:

Diplodia taxi (Deuteromycetes)

TECOMA:

Meloidogyne javanica (Nematoda)

TELIPOGON:

Uredo guacae (?) (Promycetes)

THEOBROMA:

‡*Phytophthora palmivora* (Phycomycetes)

THUNBERGIA:

Meloidogyne javanica (Nematoda)

TRITICUM:

Ophiobolus graminis (?) (Ascomycetes)†*Puccinia glumarum* (Promycetes)

UROCHLOA:

‡*Phyllachora sanguinolenta* (Ascomycetes)†*Uromyces leptodermis* (Promycetes)

VANILLA:

†*Uredo scabiei* (Promycetes)

VIBURNUM:

1958

Issued June 1959

UNITED STATES DEPARTMENT OF AGRICULTURE

AGRICULTURAL RESEARCH SERVICE
PLANT QUARANTINE DIVISION

LIST OF INTERCEPTED PLANT PESTS, 1958

(List of Pests Recorded From July 1, 1957, Through June 30, 1958, as Intercepted In, On, or With Plants and Plant Products Entering United States Territory)

Compiled by
Judith Hunt
Plant Quarantine Aid

INTRODUCTION

This report, covering the 45th year for which interception lists have been issued, summarizes the records of insect pests, plant pathogens, and certain other organisms found in, on, or with plant products (1) imported; (2) offered for but refused entry; (3) held as ships' stores, etc., and hence not offered for entry through customs; (4) offered for entry for immediate transportation and exportation in bond; and (5) in domestic shipments between the American Virgin Islands, Hawaii, and Puerto Rico and the mainland.

The pests listed include insects, snails, fungi, bacteria, nematodes, and viruses causing injury of known or potential plant quarantine significance to the United States. Some common organisms are included if they are (1) new to the country of origin, (2) new to the host plant, or (3) of such limited distribution in the United States that they are worthy of mention.

The data for this list, which includes some for the previous year, are largely obtained from identifications made by specialists of the Entomology Research Division and Plant Quarantine Division, supplemented by information supplied by State officials. Some, however, represent critical studies and determinations made by specialists of the Crops Research Division who also identified many of the host plants cited.

All scientific names are reviewed by specialists in the Department to assure conformance to the International Rules of Nomenclature.

Every effort is made to give the correct origin for all collections listed; questionable cases are omitted or the origin is listed as unknown.

INTERCEPTIONS FROM AIRBORNE MATERIAL

Air importations from many parts of the world continue to bring an increasing number of viable plant pathogens, living insects, and other pests, which require constant vigilance to apprehend them at the ports of entry.

During the year, 5,502 pest interceptions were made from plant material arriving in baggage, express, freight, mail, and stores. Of the total, 4,898 were insects carried on plant parts or as stowaways, and 604 were plant diseases.

Some important insect interceptions in airborne material were:

Adoxophyes orana on lilac in cargo from the Netherlands.

The citrus blackfly (*Aleurocanthus woglumi*) on citrus leaves in baggage from Mexico and Nicaragua; and on citrus leaves in stores from Mexico.

The Mexican fruit fly (*Anastrepha ludens*) in mango in baggage from Mexico; in orange in baggage from Guatemala and Mexico; in orange in stores from Guatemala; and in pomegranate in baggage from Mexico.

The West Indian fruit fly (*Anastrepha mombinpraeoptans*) in guava in baggage from Mexico; in Malay-apple in baggage from Guatemala; in mango in baggage from Central America, Costa Rica, Cuba, Dominican Republic, El Salvador, Guatemala, Haiti, Honduras, Jamaica, Mexico, Nicaragua, Panama, and Puerto Rico; in mango in cargo from Cuba; in mango in mail from Puerto Rico; in purple mombin in baggage from El Salvador, Guatemala, Honduras, and Nicaragua; in purple mombin in quarters from Central America (country (?)); and in yellow mombin in baggage from Honduras(?) and Nicaragua. *A. mombinpraeoptans*(?) in yellow mombin in baggage from Trinidad.

Apion carduorum in globe artichoke in baggage from Italy.

The Mediterranean fruit fly (*Ceratitis capitata*) in cactus fruit in baggage from Italy; in coffee in preflight inspection of baggage leaving Hawaii for the mainland; in fig in baggage from Italy; in guava in baggage from the Azores and Portugal; in Mandarin orange in baggage from Israel and Libya; in mango in baggage from Egypt; in olive in baggage from Italy; in orange in baggage from the Azores, Israel, and Italy; in orange in quarters from the Azores; in orange in stores from the Azores and Italy; in peach in baggage from Italy and Tunisia and in peach in stores from Italy; in pear in baggage from Italy and in pear in stores from France(?); and in plum, pomegranate, and quince in baggage from Italy. *C. capitata*(?) in orange in baggage from Brazil; in orange in stores from Spain; and in sweet lime in stores from the Azores.

The Asiatic rice borer (*Chilo suppressalis*) in rice straw jackets in baggage from Portugal(?).

Cylas formicarius ssp. in sweetpotato in cargo from the Philippines; and in sweetpotato in quarters from Thailand.

Cylas formicarius var. in sweetpotato in cargo from the Philippines.

Cylas formicarius formicarius in sweetpotato in cargo from the Philippines and Thailand; and in sweetpotato in stores from the Philippines and Singapore.

The oriental fruit fly (*Dacus dorsalis*) in avocado, bitter almond, coffee, mango, *Passiflora* sp., and vi-apple in preflight inspection of baggage leaving Hawaii for the mainland; and in vi-apple in preflight inspection of mail leaving Hawaii for the mainland. *D. dorsalis*(?) in pomegranate in preflight inspection of baggage leaving Hawaii for the mainland.

The olive fruit fly (*Dacus oleae*) in olive in baggage from Italy. *D. oleae*(?) in olive on tray of hors d'oeuvres from an unknown origin.

Tahitian coconut weevil (*Diocalandra taitensis*) on coconut in preflight inspection of baggage leaving Hawaii for the mainland.

Malacosoma neustria in cherry cuttings in baggage from Japan.

Maruca testulalis with mauna loa lei in preflight inspection of baggage leaving Hawaii for the mainland; in peas in mail from Puerto Rico; and in string bean in baggage from Puerto Rico.

The pink bollworm (*Pectinophora gossypiella*) in cotton boll in baggage from Jamaica; in cottonseed in baggage from Cuba and Paraguay; in Malvaceae seed in cargo from Angola; and in okra in baggage from Barbados.

The European corn borer (*Pyrausta nubilalis*) in pepper in baggage from Italy; and in tomato in stores from Italy.

Rhagoletis cerasi in cherry in baggage from Belgium, Germany, Italy, Spain, and Switzerland; in cherry in quarters from France; and in cherry in stores from the Azores, France, Italy, Portugal, and an unknown origin.

Interceptions of airborne plant pathogens of interest were:

Cercospora coffeicola on coffee leaves in baggage from Brazil and El Salvador.

Cercospora insulana on statice in baggage from Peru.

Chrysomya ledi var. *rhododendri* on rhododendron leaves in baggage from Switzerland and in mail from Austria and Switzerland.

Colletotrichum crassipes on *Crataegus* sp. in baggage from El Salvador.

Curvularia geniculata on betel palm in express from Pakistan.

Elsinoe australis, the sweet orange scab, on lemon in baggage from an unknown

origin and in stores from Brazil; on orange in baggage from Brazil and an unknown origin; and on orange in stores from Argentina.

Phoma citricarpa (the black spot of citrus) on *Citrus* sp. peel in baggage from Hong Kong and the Philippines; on lemon in stores from Australia, the Union of South Africa, and an unknown origin; on Mandarin orange in baggage from China, Hong Kong, Japan, Philippines, and Thailand; on Mandarin orange in quarters from an unknown origin and in stores from Japan; on orange in baggage from an unknown origin; on orange in quarters from the Union of South Africa; on orange in stores from Australia, the Union of South Africa, and an unknown origin; and on Satsuma orange in baggage from China.

Puccinia horiana on chrysanthemum in baggage, quarters, and stores from Japan.

Septoria selenophomoides on an orchid leaf in cargo from the Union of South Africa.

Sphaceloma fawcettii var. *scabiosa* on lemon in stores from Australia.

Sphenospora kevorkianii on *Huntleya* sp. in baggage from Costa Rica.

Uromyces commelinae on *Geogenanthus* sp. leaf in cargo from Colombia.

Xanthomonas citri (citrus canker) on grapefruit(?) peel in baggage from Pakistan; on lime and sour lime in baggage from India; and on orange in baggage and stores from Japan.

"Yellow spot" virus on camellia leaf in baggage from the Netherlands.

The following nematodes were found in airborne material:

Gotholdsteineria goodeyi in soil with plants in baggage from Ireland.

Helicotylenchus erythrinae in soil with garlic in baggage from Ireland.

Helicotylenchus multicinctus in soil with roots of banana plants in baggage from Cuba.

Helicotylenchus nannus in soil on unknown roots in baggage from the Netherlands.

The oat nematode (*Heterodera avenae*) in soil with spruce seedlings in baggage from Germany.

The golden nematode (*Heterodera rostochiensis*) in soil with cactus plant in baggage from Scotland; in soil with assorted plants in baggage from Ireland; in soil with potatoes in baggage from Ireland and Peru; and in soil with shamrock roots in cargo from Ireland.

Scutellonema brachyurum in soil with unidentified plants in baggage from Greece.

Tylenchorhynchus acutus in soil with unknown plants in baggage from Cuba.

NOTES ON INSECTS INTERCEPTED

FRUIT FLIES

The following fruit flies were intercepted:

The Mexican fruit fly (*Anastrepha ludens*) in avocado in baggage from Mexico; in grapefruit in baggage and quarters from Mexico; in mamey sapote in baggage from Mexico; in mango in air baggage, baggage, and quarters from Mexico; in orange in air baggage and air stores from Guatemala; in orange in air baggage, baggage, cargo, quarters, and stores from Mexico; in peach in baggage from Mexico; in pomegranate in air baggage from Mexico; and in quince, sour orange, and sweet lime in baggage from Mexico.

The West Indian fruit fly (*Anastrepha mombinpraeoptans*) in guava in air baggage from Mexico; in Malay-apple in air baggage from Guatemala; in mango in air baggage from Central America (country(?)), Costa Rica, Cuba, Dominican Republic, El Salvador, Guatemala, Haiti, Honduras, Jamaica, Mexico, Nicaragua, Panama, and Puerto Rico; in mango in baggage from El Salvador, Haiti, Jamaica, Mexico, and Puerto Rico; in mango in aircargo from Cuba; in mango in airmail from Puerto Rico; in mango in quarters from Guatemala and Jamaica; in mango in stores from Costa Rica, Dominican Republic, Guatemala, Haiti, Jamaica, and Mexico; in purple mombin in air baggage from El Salvador, Guatemala, Honduras, and Nicaragua; in purple mombin in air quarters from Central America (country(?)); and in yellow mombin in air baggage from Honduras(?) and Nicaragua. *A. mombinpraeoptans*(?) in yellow mombin in air baggage from Trinidad.

Anastrepha serpentina in *Lucuma psammophila* in mail from Brazil; and in mamey sapote in baggage from Mexico.

Anastrepha striata(?) in guava in baggage from Mexico.

The Mediterranean fruit fly (*Ceratitidis capitata*) in cactus fruit in air baggage from Italy; in coffee in baggage from Hawaii; in fig in air baggage and baggage from Italy; in guava in air baggage from the Azores and Portugal; in lemon in baggage from Italy; in Mandarin orange in air baggage from Israel and Libya; in Mandarin orange in baggage from Italy; in Mandarin orange in mail from Tunisia; in Mandarin orange in stores from Italy; in mango in air baggage from Egypt; in olive in air baggage from Italy; in orange in air baggage from the Azores, Israel, and Italy; in orange in air quarters from the Azores; in orange in air stores from the Azores and Italy; in orange in quarters from Argentina and Italy; in orange in stores from Egypt, Israel, Italy, Lebanon, and Spain; in peach in air baggage from Italy and Tunisia; in peach in air stores from Italy; in pear in air baggage from Italy; in pear in air stores from France(?); in pear in baggage from Greece and Italy; in pear in stores from Greece, Italy, and Spain; in plum in air baggage from Italy; in pomegranate in air baggage and baggage from Italy; in pricklypear in baggage from Italy; in quince in air baggage from Italy; and in quince in baggage from Greece and Italy. *C. capitata*(?) in bell pepper in stores from Belgian Congo; in orange in air baggage from Brazil; in orange in air stores from Spain; in orange in stores from the Union of South Africa; and in sweet lime in air stores from the Azores.

The melon fly (*Dacus cucurbitae*) in balsam-pear in baggage from Hawaii; an adult and eggs on *Momordica* sp. in mail from Hawaii; and in string bean, tomato, and zucchini squash in stores from Hawaii. *D. cucurbitae*(?) in cucumber in stores from Hawaii.

The oriental fruit fly (*Dacus dorsalis*) in avocado in preflight inspection of baggage leaving Hawaii for the mainland; in avocado in quarters from Hawaii; in banana in baggage from an unknown origin; in banana in quarters and stores from Hawaii; in bitter almond in preflight inspection of baggage leaving Hawaii for the mainland; in *Calophyllum inophyllum* in mail leaving Hawaii for the mainland; in immature coconut in baggage from Hawaii; in coffee in preflight inspection of baggage leaving Hawaii for the mainland; in Malay-apple in mail leaving Hawaii for the mainland; in mango in baggage and quarters from Hawaii; in mango and *Passiflora* sp. in preflight inspection of baggage leaving Hawaii for the mainland; in tomato in stores from Hawaii; and in vi-apple in preflight inspection of mail leaving Hawaii for the mainland. *D. dorsalis*(?) in bitter almond in mail leaving Hawaii for the mainland; in coffee in preflight inspection of baggage leaving Hawaii for the mainland; in coffee in mail leaving Hawaii for the mainland; and in pomegranate in preflight inspection of baggage leaving Hawaii for the mainland.

The olive fly (*Dacus oleae*) in olive in baggage from Italy and Spain and in air baggage and mail from Italy. *D. oleae*(?) in olives on tray of hors d'oeuvres in air stores from an unknown origin.

Euleia heraclei(?) in celery in stores from Italy.

Rhagoletis cerasi in cherry in air baggage from Belgium, Germany, Italy, Spain, and Switzerland; in cherry in air quarters from France; in cherry in air stores from the Azores, France, Italy, Portugal, and an unknown origin; and in cherry in cargo from Italy.

Rhagoletis juglandis in black walnut in baggage from Mexico.

INSECTS OTHER THAN FRUIT FLIES

The following insects of unusual interest were intercepted:

Acrolepia assectella (Hyponomeutidae) in leek in stores from Belgium, France, Italy, and the Netherlands; and in turnip in stores from an unknown origin.

Adoxophyes orana (Tortricidae) with lilac in aircargo from the Netherlands.

The citrus blackfly (*Aleurocanthus woglumi*) on citrus leaves in air baggage from Mexico and Nicaragua; and on citrus leaves in baggage and stores from Mexico.

Aleurotrachelus camelliae (Aleyrodidae) on camellia cuttings and leaves in mail from Japan.

A curculionid, *Anthonomus rectirostris*, in black cherry in mail from Belgium.

Apion carduorum (Curculionidae) in globe artichoke in air baggage from Italy.

A noctuid, *Barathra brassicae*, in Chinese and petsai cabbage in stores from Japan.

Brachycerus albidentatus (Curculionidae) in garlic in cargo from Italy.

Bruchus tristis (Bruchidae) in bean and broadbean in baggage from Italy; in chickpea in baggage from Greece; in grass pea in mail from Italy; in legume seed

in air baggage from an unknown origin; and in lupine seed in baggage from Italy.

A coccid, *Ceroplastes rubens*, on *Alpinia purpurata* leaf in preflight inspection of air cargo leaving Hawaii for the mainland; on anthurium leaf in mail leaving Hawaii for the mainland; on camellia plants in baggage from Japan; on camellia plant in mail from Formosa; on cotoneaster plant and English ivy in air baggage from Japan; on finetooth holly in cargo from Japan; on gardenia in air baggage from Japan; on gardenia and maile in preflight inspection of air baggage leaving Hawaii for the mainland; on maile in mail leaving Hawaii for the mainland; on *Metrosideros collina* in preflight inspection of air baggage leaving Hawaii for the mainland; and on rhododendron in baggage from Japan.

The Asiatic rice borer (*Chilo suppressalis*) in rice straw in air baggage from Portugal(?); in rice straw in baggage from Korea; and in rice straw in baggage, cargo, and stores from Japan.

Conotrachelus aguacatae (Curculionidae) in avocado in baggage and quarters from Mexico.

Curculio elephas (Curculionidae) in chestnut in air baggage from Greece, Italy, and Portugal; in chestnut in baggage from Greece, Italy, Portugal, and Spain; in chestnut in cargo from Italy; in chestnut in mail from Italy; in chestnut in quarters from Turkey; in chestnut in stores from France, Italy, and Portugal; in European oak in cargo from Italy; in holly oak in mail from Italy; and in acorn in baggage from Italy.

A curculionid, *Cylas formicarius formicarius*, in sweetpotato in air cargo from the Philippines and Thailand; in sweetpotato in cargo from Hong Kong and Thailand; in sweetpotato in quarters from an unknown origin; and in sweetpotato in stores from India, Philippines, and Singapore.

Cylas puncticollis (Curculionidae) in sweetpotato in stores from Nigeria and Sierra Leone.

An aleyrodid, *Dialeurodes kirkaldyi*, on Arabian jasmine in preflight inspection of baggage leaving Hawaii for the mainland; on Arabian jasmine in baggage from the Philippines; on gardenia in baggage from Hawaii; and on star jasmine in preflight inspection of baggage leaving Hawaii for the mainland.

Diaprepes abbreviatus (Curculionidae) on *Pothos* sp. in air cargo from Puerto Rico.

A pyraustid, *Dichocrocis punctiferalis*, in peach in quarters from Japan.

Dyspessa ulula (Cossidae) in garlic in cargo from Italy and Spain; and in garlic in stores from Spain.

Epichorista ionephela (Tortricidae) with chinkerichee in baggage, cargo, and mail from the Union of South Africa.

An olethreutid, *Gymnandrosoma aurantianum*, in grapefruit in stores from Mexico.

Lampides boeticus (Lycaenidae) in leis made of *Canavalia* sp. in preflight inspection of baggage leaving Hawaii for the mainland.

An olethreutid, *Laspeyresia splendana*, in chestnut in air baggage from Italy and Portugal; in chestnut in baggage from the Azores, France, Greece, Italy, Philippines, Portugal, and Spain; in chestnut in cargo from Italy; and in chestnut in stores from France.

Leucinodes orbonalis (Pyraustidae) in eggplant in stores from Nigeria.

Lobesia botrana(?) (Olethreutidae) in grape in baggage from Italy.

Malacosoma neustria (Lasiocampidae) in cherry cuttings in air baggage from Japan.

A phalaenid, *Mamestra brassicae*, in cabbage in stores from Belgium.

A bean pod borer, *Maruca testulalis*, in leis made of *Canavalia* sp. in preflight inspection of baggage leaving Hawaii for the mainland; in civet bean in stores from Hawaii; in pea in air mail from Puerto Rico; in pigeonpea in cargo leaving Puerto Rico for the mainland; in string bean in preflight inspection of baggage leaving Puerto Rico for the mainland; in string bean in cargo and airmail from Puerto Rico; and in string bean in stores from Brazil, Ghana, and Japan.

An olethreutid, *Olethreutes leucotreta*, in grapefruit in stores and in orange in air quarters from the Union of South Africa.

Prays endocarpa (Hyponomeutidae) in pummelo in stores from the Federation of Malaya.

Prays oleelus (Hyponomeutidae) on olive leaf in air baggage from Italy.

A chrysomelid, *Psylliodes chrysocephala*, in turnip in stores from France.

Stephanoderes hampei (Scolytidae) in coffee in cargo from Brazil; and in coffee in stores from Egypt and India.

A mango weevil, *Sternochetus mangiferae*, in mango in air baggage from Australia; in mango in preflight inspection of baggage leaving Hawaii for the mainland; in mango in airmail from Guam, Philippines, and Vietnam; in mango in air quarters from Eniwetok(?); in mango in air stores from Vietnam; in mango in baggage from Hawaii and the Philippines; in mango in mail leaving Hawaii for the mainland; and in mango in quarters and stores from Hawaii.

The khapra beetle (*Trogoderma granarium*) with almond shells and cashew nuts in mail from India; with used bagging in cargo from the Netherlands; with dried beans in stores from the Netherlands; in flour in stores from England, Italy, Netherlands, and the Union of South Africa; with dried peaches in stores from an unknown origin; with peanuts in airmail from Portugal; with rice in stores from Brazil, China, Formosa, and an unknown origin; on old rice bags in stores from India; and in wheat bran in baggage from Mexico.

SNAILS

The giant African snail (*Achatina fulica*) was intercepted twice with military cargo from Morocco.

Porphyrobaphe iostoma, not in the United States and not injurious under normal conditions, was intercepted six times with bananas in cargo from Ecuador.

Theba pisana, an injurious snail not known to be established in the United States, was intercepted 33 times; 28 of these came in military cargo in aircargo and cargo from Morocco; once in military cargo in aircargo from Libya; once in general cargo from the Mediterranean region; once each on conex boxes in cargo from Morocco and Spain; and once on parsley in stores from Spain.

Other snails of economic importance, but of limited distribution in the United States, intercepted and worthy of mention were: *Arion circumscriptus*, *Bradybaena similis*, *Cepaea nemoralis*, *Deroceras reticulatum*, *Limax marginatus*, *L. maximus*, *Milax gagates*(?), *Orychilus allarius*, *Vallonia pulchella*, and *Zonitoides arboreus*.

NOTES ON DISEASES INTERCEPTED

The sweet orange scab (*Elsinoe australis*) was intercepted 51 times; 8 of these interceptions came from Argentina on lemon and orange; 39 from Brazil on grapefruit, lemon, Mandarin orange, and orange; and 4 were of unknown origin on lemon, orange, and sour lime.

Citrus canker (*Xanthomonas citri*) was intercepted 79 times; 68 of these came from Japan, 3 each from Hong Kong and India, 2 from China, and 1 each from the Federation of Malaya, Pakistan, and Singapore. These interceptions were made from the following hosts: *Citrus* sp., grapefruit, lemon, lime, Mandarin orange, orange, pummelo, sour lime, and sour orange.

Cancrosis B (*Xanthomonas* sp.), another bacterial disease of citrus, producing symptoms similar to citrus canker, was intercepted four times from Argentina on lemon and grapefruit.

The black spot of citrus (*Phoma citricarpa*) was intercepted 165 times; 45 of these came from Hong Kong, 33 from the Union of South Africa, 25 from Japan, 21 from China, 16 from Australia, 14 of unknown origin, 2 each from the Federation of Malaya, Formosa, Philippines, and Singapore, and 1 each from Africa (country(?)), Brazil, and Thailand. These interceptions were made on the following hosts: *Citrus* sp., grapefruit, lemon, Mandarin orange, orange, Satsuma orange, sour lime, and sour orange.

Other interceptions were:

Chrysomyxa ledi var. *rhododendri* on rhododendron in air baggage, airmail, cargo, and mail from Switzerland; in airmail from Austria; and in baggage from Canada and Germany.

Griphosphaeria corticola on rose canes in aircargo from Germany.

Tilletia contraversa on rye seed in mail from Afghanistan.

Urocystis gladiolicola on gladiolus corms in cargo from the Netherlands.

"Yellow spot" virus on camellia leaves in air baggage from the Netherlands.

NEMATODES

The oat nematode (*Heterodera avenae*) was intercepted 18 times from the following countries: Czechoslovakia, England, Europe (country(?)), Germany, Israel, Italy, and Spain. These interceptions were taken in soil with the following: Automobiles, carnation, cypress, and juniper plants, dahlia roots, garlic, onions, *Ornithogalum saundersiae*, potatoes, primrose plant, spruce seedlings, and unknown plants.

The golden nematode (*Heterodera rostochiensis*) was intercepted 48 times from the following countries: Argentina, Denmark, England, Germany, Ireland, Malta, Mexico, Peru, Scotland, and Sweden. These interceptions were taken in soil from new and used automobiles and in soil with bulbs, plant material, and vegetables.

Other nematodes of special interest were:

Gotholdsteineria goodeyi in soil with unknown plants in air baggage from Ireland.

Helicotylenchus erythrinae in soil with garlic in air baggage from Ireland and in soil with unknown plants in baggage from Mexico.

Helicotylenchus multicinctus in soil with roots of banana plants in air baggage from Cuba.

Helicotylenchus nannus in soil with begonia, carnation, coleus, mint, and unknown plants and unknown herbs in baggage from Mexico; and in soil with unknown roots in air baggage from the Netherlands.

Psilenchus hilarulus with bougainvillea, hibiscus, cactus, coleus, fern, and herbaceous plants in baggage from Mexico.

Scutellonema christiei in soil with caladium plants, palm, and an unknown plant in baggage from Trinidad.

Tylenchorhynchus acutus in soil with coleus plant in baggage from Mexico; and in soil with unknown plants in air baggage from Cuba.

Tylenchorhynchus capitatus in soil with succulent and unknown plants in baggage from Mexico.

Tylenchorhynchus martini in soil with boraginaceous and India rubber tree plants in baggage from Mexico.

Tylenchulus semipenetrans with *Citrus* sp. tree in baggage from Italy.

Tylenchus davaini in soil and moss in mail from Germany.

Tylenchus polyhyppus with bougainvillea and hibiscus plants in baggage from Mexico.

The genus *Meloidogyne* continues to represent a pest problem. During the year various plant shipments and vegetables have been found infected with one or more of the following species: *Meloidogyne arenaria*, *M. hapla*, *M. incognita*, *M. incognita acrita*, and *M. javanica*. They were intercepted from the following countries: Argentina, Australia, Bermuda, Brazil, Canada, Canal Zone, Colombia, Cuba, Egypt, England, Fiji Islands, France, French West Africa, Germany, Guatemala, Hawaii, India, Israel, Italy, Jamaica, Japan, Kenya, Mexico, Netherlands, New Guinea, Peru, Puerto Rico, Singapore, Trinidad, Union of South Africa, and West Africa.

INCOMPLETELY DETERMINED PESTS

Frequently complete determinations as to species are impossible or impracticable due to the stage or condition of the insects or pathogens on arrival. Some of these pests may be of economic importance, hitherto unreported from the United States, unknown for the host plant, or they may come from a new country of origin. As a matter of record they are included in this separate list but not in the table form.

INSECTS

Among the incompletely determined insects were the following fruit flies:

Anastrepha sp., possibly *fraterculus*, at Charleston, S.C., in orange in stores from Brazil; and at Miami, Fla., in cherimoya in air baggage from Peru.

Anastrepha sp., probably *ludens*, at El Paso and Laredo, Tex., in orange in baggage from Mexico; at Nogales, Ariz., in mango in baggage from Mexico; at Progreso, Tex., in pear in baggage from Mexico; and at San Ysidro, Calif., in mango in baggage from Mexico.

Anastrepha sp., probably *mombinpraeoptans*, at Brownsville, Tex., in mango in air baggage from El Salvador and Nicaragua; in purple mombin in air baggage from Guatemala and Nicaragua; and in *Psidium* sp. (wild guava) in baggage from El Salvador; at Charleston, S.C., in mango in air baggage from Panama; at Jacksonville, Fla., in mango in stores from Panama; at Miami, Fla., in mango in air baggage from Colombia and Panama; and in Mandarin orange in air stores from Peru; at Mobile, Ala., in mango in quarters from Trinidad; at New Orleans, La., in guava in air baggage from Guatemala; in mango in baggage

and quarters from Ecuador; and in purple mombin in air baggage from Central America (country(?)) and Guatemala; and at San Juan, P.R., in mango in air baggage from Barbados.

Anastrepha sp., probably *serpentina*, at Brownsville, Tex., in mamey sapote in air baggage from Guatemala; and in sapodilla in air baggage from El Salvador; and at Laredo, Tex., in mamey in baggage from Mexico.

Anastrepha sp., probably *striata*, at Brownsville, Tex., in guava in air baggage from Costa Rica, El Salvador, and Nicaragua; and in guava in baggage from Mexico; at Calexico, Calif., in guava in baggage from Mexico; at Laredo, Tex., in guava in baggage from Mexico; at Miami, Fla., in mango in air baggage from Panama; and at Nogales, Ariz., in guava in baggage and cargo from Mexico.

Anastrepha sp., possibly *suspensa* (Loew), at Chicago, Ill., in guava in airmail from Puerto Rico; at Miami, Fla., in custard-apple in air baggage from the Dominican Republic; and in guava in air baggage from Cuba.

Anastrepha sp., at Baltimore, Md., in grapefruit in stores from Trinidad; and in orange in stores from Brazil and Colombia; at Baton Rouge, La., in orange in stores from Brazil; at Boston, Mass., in grapefruit, orange, and plum in stores from Brazil; at Brownsville, Tex., in guava in air baggage from El Salvador; in Malay-apple in air baggage from Costa Rica; in mango in air baggage from El Salvador, Guatemala, and Panama; and in sapote in quarters from Mexico; at Chicago, Ill., in guava in airmail from Puerto Rico; at Del Rio, Tex., in mango in baggage from Mexico; at El Paso, Tex., in guava and mango in baggage from Mexico; at Galveston, Tex., in mango in quarters from Jamaica; at Hidalgo, Tex., in orange in cargo from Mexico; at Houston, Tex., in orange in stores from Peru; and in Japanese plum in stores from Argentina; at Jacksonville, Fla., in grapefruit in stores from Brazil; at Laredo, Tex., in mamey sapote, mango, and pear in baggage from Mexico; at Miami, Fla., in bullock's-heart in air baggage from Ecuador; in *Cereus* sp. in air baggage from Colombia; in cherimoya in air baggage from Ecuador; in coffee berries in air baggage from Brazil, Colombia, and Costa Rica; in custard-apple in air baggage from Peru; in grapefruit in air baggage from Colombia; in guava in air baggage from Costa Rica and Cuba; in Mandarin orange in air stores from an unknown origin; in mango in air baggage from Chile, Colombia, El Salvador, and Peru; in orange in air baggage from Colombia; in orange in air stores from Brazil; in pomegranate in air baggage from Argentina; in purple mombin in cargo from Costa Rica; and in *Ximenia americana* in air baggage from Colombia and Nicaragua; at New Orleans, La., in orange in stores from Mexico; in purple mombin in air baggage from Guatemala; in star-apple in air baggage from Mexico; and in tropical almond in air baggage from Venezuela; at New York, N.Y., in mango in air baggage from Jamaica; in orange in air stores from an unknown origin; in sapodilla in air quarters from Venezuela; and in *Spondias* sp. in baggage from Venezuela; at Nogales, Ariz., in guava, mango, *Myrtus ehrenbergii*, and orange in baggage from Mexico; at Philadelphia, Pa., in orange in stores from Brazil; at San Juan, P.R., in coffee berries in air baggage from Brazil; in grapefruit in baggage from Trinidad; and in *Spondias* sp. in air baggage from Venezuela; at San Pedro, Calif., in guava in air baggage from Nicaragua; at San Ysidro, Calif., in mango in baggage from Mexico; at Tampa, Fla., in mango in quarters from Cuba; and in orange in stores from Argentina; and at Washington, D.C., in *Psidium* sp. in express from Brazil.

Dacus sp., possibly *passiflorae* Frogg., at Honolulu, Hawaii, in Tahiti-chestnut in air baggage from the Fiji Islands.

Dacus sp., perhaps *psidii* (Frogg.), at Honolulu, Hawaii, in Tahiti-chestnut in air baggage from American Samoa.

Dacus sp. at Boston, Mass., in cucumber and squash in stores from French West Africa; at Honolulu, Hawaii, in coffee berry in preflight inspection of air baggage leaving Hawaii for the mainland; and in peach in baggage from Australia; and at New York, N.Y., in *Citrus* sp., probably *reticulata*, in air baggage from Pakistan.

Rhagoletis sp., probably *cerasi*, at Boston, Mass., in cherry in air stores from an unknown origin.

Rhagoletis sp. at Brownsville, Tex., in apple in baggage from Mexico; and in *Crataegus* sp. in baggage from Mexico; at Del Rio and Eagle Pass, Tex., in apple in baggage from Mexico; at El Paso, Tex., in *Crataegus* sp. in baggage from Mexico; at Galveston, Tex., in apple in stores from Mexico; at Laredo, Tex., in apple in baggage from Mexico; at New York, N.Y., in apple in stores from Mexico; at Nogales, Ariz., in apple and *Crataegus* sp. in baggage from Mexico; and at San Antonio, Tex., in apple in air baggage from Mexico.

Thirty interceptions identified to family only, Tephritidae, were intercepted at the following ports: Baltimore, Md., in mango in stores from India; at Baton Rouge, La., in orange in stores from an unknown origin; at Boston, Mass., in cucumber in stores from French West Africa; in guava in air baggage from the Azores; and with mixed cut flowers in air baggage from France; at Brownsville, Tex., in apple in baggage from Mexico; and in mango in air baggage from Nicaragua; at Hoboken, N.J., in franchet cotoneaster in mail from Italy; and in palm fruit in mail from Borneo; at Honolulu, Hawaii, in coffee berry, guava, and vi-apple in preflight inspection of baggage leaving Hawaii for the mainland; at Jacksonville, Fla., in courbaril seed and seed of *Enterolobium cyclocarpum* in baggage from Panama; at Laredo, Tex., in pecan husk in baggage from Mexico; at Miami, Fla., in chayote in air baggage from Brazil; and in quince in air stores from Peru; at New Orleans, La., in sour orange in stores from Colombia; at New York, N.Y., in cucurbit in air stores from an unknown origin; in cotton boll in baggage from Greece; and in pricklypear in baggage from Italy; at Nogales, Ariz., pupa with yucca plant in cargo from Mexico; at San Antonio, Tex., in Mandarin orange in air baggage from Mexico; at San Francisco, Calif., in cucumber in stores from Hawaii; and in mango in baggage from Hawaii; and at Washington, D.C., in *Solanum tuberosum* fruit in mail from Chile.

An adult of *Tephritis* sp. at New York, N.Y., in hay packing in baggage from Norway.

Other incompletely determined insects worthy of mention were:

An aleyrodid, Aleyrodicinae, new genus near *Aleyrodicus*, at Laredo, Tex., on orchid leaf in cargo from Mexico; and at Nogales, Ariz., on orchid leaf in cargo from Mexico.

Allocorhynus sp. (Curculionidae), a very interesting group, apparently confined to cycads, at Brownsville, Tex., in *Dion edule* in cargo from Mexico.

Alydus sp. (Coreidae), new to the National Museum collection, at Charlotte Amalie, St. Thomas, with cabbage in baggage from Tortola.

Anthonini (Curculionidae), near *Anthonus*, a very interesting weevil, not in the National Museum collection, at New York, N.Y., with ginger in cargo from Cuba.

Andrector sp., probably *salvini* (Baly) (Chrysomelidae), at New York, N.Y., with peas in aircargo from Venezuela.

Andrector sp., probably *variabilis* Jac. (Chrysomelidae), at San Pedro, Calif., on an orchid plant in mail from the Canal Zone.

Archips sp. (Tortricidae) at Boston, Mass., with canna plants in baggage from Italy.

Aspidiotus sp. (Coccidae), not placed as a described species, was intercepted eight times at six different ports on fruits and plant material from the following countries: Brazil, China, Ecuador, Ghana, and Mexico.

Asterolecanium sp. (Aleyrodidae), apparently undescribed, at Miami, Fla., on palm leaf in airmail from the Canal Zone.

Aulacaspis sp. (Coccidae), an undescribed species, at Hoboken, N.J., on pseudobulb of *Coelogyne* sp. in cargo from India.

Baris sp. (Curculionidae) at Baltimore, Md., in horseradish in cargo from Germany; and at New York, N.Y., in horseradish in cargo from Poland.

Batrachedra sp. (Cosmopterygidae), probably a new species, at Brownsville, Tex., with *Yucca* sp. cuttings in baggage from Mexico; and at San Ysidro, Calif., with agave cuttings in baggage from Mexico.

Brachyrhinus sp. (Curculionidae) at New York, N.Y., in soil with primrose plants in baggage from Belgium.

Bruchus sp. (Bruchidae), apparently new to the National Museum collection, at Boston, Mass., in *Lathyrus* sp. seed in air baggage from the Azores.

Bryobia sp. (Tetranychidae), apparently a new species, at Seattle, Wash., on chrysanthemum in quarters from Japan.

Carpocapsa sp. (Carposinidae) at Hoboken, N.J., in kobus magnolia seed in cargo from Japan; and at New York, N.Y., in unknown berries in baggage from Greece.

Crioceris sp. (Chrysomelidae) at Chicago, Ill., on asparagus fern in air baggage from Germany; and on asparagus fern in air quarters from England.

Diaprepes sp. (Curculionidae) at New York, N.Y., in yam in baggage from Jamaica; and at San Juan, P.R., in cargo leaving for the mainland.

Epicaerus sp. (Curculionidae) was intercepted 18 times at 9 different ports in potatoes in baggage and stores from Mexico.

An eriophyid mite, apparently undescribed genus and species, at Boston, Mass., on a beech cutting in air baggage from England.

"*Eulia*" sp. (Tortricidae) at New York, N.Y., in grape, nectarine, peach, and plum in cargo from Chile.

Gnorimoschema sp. (Gelechiidae), probably a new species and not any of the species heretofore associated with potato, at Mobile, Ala., in potato in stores from Honduras.

Gymnandrosoma sp. (Olethreutidae) at New Orleans, La., in genip in air baggage from Guatemala and in orange in quarters from Brazil; at Miami, Fla., in guava in air baggage from Cuba and in mangrove plant in air baggage from Grand Cayman; at Nogales, Ariz., in *Byrsonima crassifolia* in baggage from Mexico; and in guava in preflight inspection of baggage leaving San Juan, P.R., for the mainland.

Lepidosaphes sp. (Coccidae), not known to occur in the United States, at Washington, D.C., on *Angraecum compactum* in mail from England.

Leptinotarsa sp. (Chrysomelidae), new to the National Museum collection, at Brownsville, Tex., on banana in cargo from Mexico.

Ligyrocoris sp. (Lygaeidae), very unusual and not in the National Museum collection, at New Orleans, La., on banana in cargo from Ecuador.

Lixus sp. (Curculionidae) at Baltimore, Md., in beet in cargo from Algeria; at New Orleans, La., in beet in stores from England; and at Philadelphia, Pa., in beet in stores from Egypt and in celery in stores from Morocco.

Myrmex sp. (Curculionidae) at Honolulu, Hawaii, on *Epidendrum stenopetalum* stem in airmail from the Canal Zone.

Palaeopus sp. (Curculionidae) at New Orleans, La., in yam in air baggage from Jamaica; and at New York, N.Y., in yam in air baggage from Jamaica.

Premnotrypes sp. (Curculionidae) at Galveston, Tex., in potato in stores from Ecuador; at New Orleans, La., in potato in stores from Peru; and at New York, N.Y., in *Solanum* sp. tuber in baggage from Peru.

Pseudococcus sp. (Coccidae), not placed as a described species, was intercepted 32 times at 9 different ports on various plant material from the following countries: Azores, Brazil, Canal Zone, Costa Rica, Cuba, England, France, Guatemala, Indonesia, Jamaica, Marshall Islands, Mexico, Monaco, Panama, and Philippines.

Spermophagus sp. (Bruchidae) at Houston, Tex., with *Ipomoea pes-caprae* seed in air baggage from Liberia.

DISEASES

Incompletely determined pathogens worthy of mention were:

Asterina sp., apparently undescribed, at San Francisco, Calif., on *Banksia ericifolia* in aircargo from Australia.

Cercospora sp. at San Juan, P.R., on *Wedelia trilobata* leaf in air baggage from British Guiana.

Colletotrichum sp. at Brownsville, Tex., on *Reinhardtia* sp. leaf in cargo from Mexico.

Cytospora sp. at San Francisco, Calif., and Seattle, Wash., on tree peonies in cargo from Japan.

Guignardia sp. at New Orleans, La., on tropical almond leaf in air baggage from Cuba.

Helminthosporium sp. at Miami, Fla., on *Epidendrum stenopetalum* leaf in aircargo from Panama.

Hendersonia sp. at Nogales, Ariz., on *Calocarpum* sp. and sapote in baggage from Mexico.

Leptosphaeria sp., probably undescribed, at Miami, Fla., on bromeliad leaf in aircargo from the Canal Zone.

Monochaetia sp.(?) at Nogales, Ariz., on *Lucuma* sp. in baggage from Mexico.

Phomopsis sp., probably the "A" spores, at Washington, D.C., on bougainvillea plant in mail from Portugal; *Phomopsis* sp., apparently undescribed, at San Pedro, Calif., on *Persea* sp. in air baggage from Guatemala.

Phyllostictina sp. at New Orleans, La., on tropical almond leaf in air baggage from Cuba.

Puccinia sp., apparently undescribed, at Miami, Fla., on *Oncidium* sp. leaf in aircargo from Ecuador; *Puccinia* sp. at Miami, Fla., on *Oncidium* sp. leaf in air baggage from Mexico.

Septoria sp. at New Orleans, La., on anthurium flower petal in quarters from Trinidad(?); at Houston, Tex., on lily in air baggage from Mexico; and at Washington, D.C., on *Quaresmeira roza* in air express from Brazil.

NEMATODES

Aphelenchoides sp. at Boston, Mass., with Chinese vegetables in cargo from Hong Kong; with unknown greens in air stores from Italy; with unknown plants, in soil with gladiolus corms, and in soil with unknown bulbs and roots in air baggage from the Azores; in unknown roots in air baggage from England; and in soil with parsnips and turnips in stores from the Canary Islands; at Brownsville, Tex., in *Hypochoeris* sp. in air baggage from Argentina; at El Paso, Tex., in soil with amaryllis bulbs, hydrangea, and various plants in baggage from Mexico; at Hoboken, N.J., in colchicum corms in cargo from the Netherlands; and in primrose seed in mail from England; at Laredo, Tex., in chrysanthemum roots in baggage from Mexico; at New Orleans, La., in garlic in transiting cargo from Mexico; at New York, N.Y., in *Dicentra* sp. and *Trollius* sp. roots in aircargo from the Netherlands; at Nogales, Ariz., in soil with bougainvillea and assorted unknown plants in baggage from Mexico; and at Norfolk, Va., in soil with palm plants in baggage from Trinidad.

Aphelenchus sp. at Baltimore, Md., in soil with leeks in stores from Denmark; at Boston, Mass., in soil with bulbs, roots, and unknown plants in air baggage from the Azores; at Brownsville, Tex., in lily roots in baggage from Mexico; at Calexico, Calif., in *Euphorbia* sp. roots in baggage from Mexico; at El Paso, Tex., in soil with amaryllis bulbs and *Gasteria* sp. in baggage from Mexico; at Hoboken, N.J., in dahlia roots in mail from Germany; at Laredo, Tex., in chrysanthemum roots in baggage from Mexico; at Miami, Fla., in soil on roots of banana in air baggage from Cuba; and in soil on roots of unknown plant in air baggage from Argentina; at Nogales, Ariz., in soil with coleus and unknown plants in baggage from Mexico; and at Norfolk, Va., in soil with caladium plant in baggage from Trinidad.

Criconea sp. at Laredo, Tex., in soil with an unknown plant in baggage from Mexico; and at Seattle, Wash., in soil with a dwarf sweet lime tree in baggage from Japan.

Criconea sp. at Laredo, Tex., in soil with mango seedling in baggage from Mexico; at Miami, Fla., in soil on cactus roots in air baggage from Chile; and at New Orleans, La., in soil with mint roots in air baggage from Honduras.

Ditylenchus sp. at Boston, Mass., in dasheens in stores from Cuba; at Brownsville, Tex., in soil with *Chamaedorea* sp. plants in baggage from Mexico; at Calexico, Calif., in garlic in baggage from Mexico; at Hoboken, N.J., in colchicum corms in cargo from the Netherlands; and in hop roots in airmail from Germany; and at New Orleans, La., in garlic in cargo from Mexico.

Gottholdsteineria sp. at Boston, Mass., in garlic in stores from France; at Eagle Pass, Tex., in unknown plant in baggage from Mexico; and at Laredo, Tex., in soil with dahlia roots in mail from Germany.

Helicotylenchus sp. at Boston, Mass., in soil with callas, citrus, *Mesembryanthemum* sp., miscellaneous plants, and sedum in air baggage from the Azores; in soil with grape and oleander cuttings in air baggage from Italy; in soil with ivy plants in air baggage from Germany; in soil with petrea flat wood in air baggage from the Union of South Africa; and in soil with spruce tree in baggage from Canada; at Brownsville, Tex., with bougainvillea and royal poinciana plants in baggage from Mexico; in soil with *Chamaedorea* sp. plants in air baggage from Nicaragua; at Eagle Pass, Tex., with unknown plant in baggage from Mexico; at El Paso, Tex., with peperomia plant in baggage from Mexico; at Laredo, Tex., in lemon grass roots, in soil for analysis, and in soil with begonia, gardenia, and succulent plants, and roots of unknown plants in baggage from Mexico; in soil with dracaena plants in express from Cuba; and with unknown plants in baggage and cargo from Mexico; at Miami, Fla., in soil on banana roots and roots of miscellaneous plants in air baggage from Cuba; in soil near roots of coffee plants in air baggage from Guatemala; in soil with fern roots in airmail from Bolivia; and in soil near roots of *Pilea* sp. in air baggage from Peru; at New Orleans, La., in soil with mint roots in air baggage from Honduras; at Nogales, Ariz., in soil with lily bulbs in baggage from Mexico; at Presidio, Tex., in soil with cactus and portulaca plants in baggage from Mexico; at San Juan, P.R., in soil with philodendron plants in air baggage from Puerto Rico; and at Washington, D.C., in soil with olive trees in mail from Italy.

Hemicycliophora sp. at Nogales, Ariz., in soil with lily bulbs in baggage from Mexico.

Heterodera sp., possibly *trifolii* (Goffart) Oostenbrink, at San Pedro, Calif., in soil with shamrock roots in aircargo from Ireland.

Other members of the genus *Heterodera* were intercepted 208 times at 26 ports from the following countries: Argentina, Austria, Azores, Belgium, Cape Verde Islands, Chile, Denmark, Egypt, England, France, Germany, Iceland, Ireland, Italy, Japan, Korea, Malta, Mexico, Morocco, Netherlands, New Zealand, Northern Ireland, Norway, Poland, Scotland, Spain, Sweden, Switzerland, and Turkey. These interceptions were made from soil samples, sand ballast, and soil with the following: New and used automobiles, army equipment, bark, cereal straw jackets, conch boxes, flower bulbs, roots, and tubers, gladiolus corms, lily-of-the-valley pips, old bagging, plants, on shoes, and vegetables.

Hoplolaimus, new species, at Laredo, Tex., in soil with philodendron plants in baggage from Mexico.

Hoplolaimus sp. at Boston, Mass., with unknown plants and in soil with arborvitae plants in air baggage from the Azores.

Meloidogyne sp. probably new species closely related to *brevicauda* Loos, at New York, N.Y., with yams in baggage from Nigeria.

Meloidogyne sp. at Boston, Mass., in dasheens in air baggage from the Azores and Portugal and in stores from Cuba; at Hoboken, N.J., in *Achimenes* sp. tubers in mail from India; in calla lily tubers in cargo from Italy; in astilbe roots in cargo from the Netherlands; in clematis roots in mail from England and in cargo from the Netherlands; in *Curcuma roscoeana* and *C. zedaria* tubers in mail from the Netherlands; in *Kaempferia* spp. tubers in cargo and mail from India and the Netherlands; in Japanese iris roots in cargo from Japan; in peony roots in cargo from the Netherlands and in mail from England; in *Reichsteineria macropoda* roots in cargo from the Netherlands; and in *Thomsonia nepalensis* tubers and in tuberose in mail from India; at Laredo, Tex., in begonia tubers, coriander roots, and ivy roots in baggage from Mexico; at Miami, Fla., in soil with *Aphelandra* sp. roots in aircargo from the Netherlands; in soil with cactus roots in air baggage from Chile; and in soil with *Pittosporum* sp. roots in aircargo from the Netherlands; at New Orleans, La., in potatoes in stores from Italy and Japan; at New York, N.Y., in *Achimenes* sp. tubers in aircargo from India; and in gladiolus corms in cargo from Japan; at Nogales, Ariz., in soil with unknown plants in baggage from Mexico; at San Diego, Calif., in yam in stores from Japan; and at San Pedro, Calif., in dahlia roots in cargo from Japan.

Pratylenchus sp. at Boston, Mass., in soil with dasheens in air baggage from Portugal; at Douglas, Ariz., in soil sample in air baggage from Mexico; at El Paso, Tex., in soil with mint plants in baggage from Mexico; at Hoboken, N.J., in clematis roots in cargo from the Netherlands and in mail from England; in fortune plantain lily roots in cargo from the Netherlands; in iris roots in mail from England and the Netherlands and in cargo from Japan; in *Ligularia clivorum* roots in mail from England; and in roots of *Physostegia* sp., western bleedingheart, and yucca in cargo from the Netherlands; at Laredo, Tex., in chrysanthemum roots in baggage from Mexico; at New York, N.Y., in Kamchatka bugbane roots in aircargo from the Netherlands; at Nogales, Ariz., in soil with lily bulbs in baggage from Mexico; and at San Francisco, Calif., in lily-of-the-valley pips in cargo from Denmark.

Psilenchus sp. at El Paso, Tex., in soil with plants in baggage from Mexico; and at Nogales, Ariz., in soil with caladium tubers in baggage from Mexico.

Radopholus sp., near *gracilis* (de Man) Hirschmann, at Boston, Mass., in water-chestnuts in cargo from Hong Kong.

Radopholus sp. at Boston, Mass., in unknown roots in stores from Egypt.

Rotylenchulus sp. at Norfolk, Va., in soil with palm plants in baggage from Trinidad.

Rotylenchus sp. at Boston, Mass., in soil with *Arctostaphylos* sp. plant in baggage from Ireland; in soil with narcissus bulbs in aircargo and in soil with petrea flat wood in air baggage from the Union of South Africa; and in soil with tulip bulbs in mail from Germany; at Hoboken, N.J., in *Cladrastis* sp. roots in cargo from the Netherlands; at Laredo, Tex., in sansevieria roots in cargo from Mexico; and at Miami, Fla., in soil near roots of *Pilea* sp. in air baggage from Peru.

Scutellonema sp., near *bradys*, at Boston, Mass., in soil with begonia(?) plant in quarters from Belgian Congo.

Scutellonema sp. at Laredo, Tex., in soil with gardenia plants in baggage from Mexico; and at Nogales, Ariz., in soil with amaryllis bulbs in baggage from Mexico.

Tylenchorhynchus sp. at Baltimore, Md., in soil with leeks in stores from Denmark and the Netherlands; at Boston, Mass., with unknown flowering plants in air baggage from Greece; at Brownsville, Tex., with *Chamaedorea* sp. plants, *Pilea* sp. plants, and royal poinciana in baggage from Mexico; at Nogales, Ariz., in soil with bromeliad plants in baggage from Mexico; at Washington, D.C., in soil with olive trees in mail from Italy; and at Ysleta, Tex., in soil with portulaca plants in baggage from Mexico.

Tylenchus sp. at Boston, Mass., in soil with fern asparagus and "Spider" plant in air baggage from Germany; in soil with heather in air baggage from Scotland; and in soil with oleander plant in air baggage from Italy; at Brownsville, Tex., with bougainvillea plant in baggage from Mexico; at Douglas, Ariz., in soil sample in air baggage from Mexico; at El Paso, Tex., in soil with poinsettia and unknown plants in baggage from Mexico; at Laredo, Tex., with begonia tuber in baggage from Mexico; at Miami, Fla., in soil on roots of anthurium in air baggage from Colombia; in soil with roots of *Aphelandra* sp. in aircargo from the Netherlands; in soil on cactus roots in air baggage from Chile; and in soil on unknown plant roots in air baggage from Argentina; at Nogales, Ariz., in soil with bean plants, bromeliad plants, lily bulbs, and an unknown plant in baggage from Mexico; at Norfolk, Va., in rice straw rug in cargo from Japan; and in soil with palm plants in baggage from Trinidad; at San Antonio, Tex., in soil with wandering-jew plant in air baggage from Mexico; and at Ysleta, Tex., in soil with portulaca plant in baggage from Mexico.

Xiphinema sp. at Laredo, Tex., with lily bulbs and in soil around roots of royal poinciana plant in baggage from Mexico; and at Nogales, Ariz., in soil with an unknown plant in baggage from Mexico.

Hosts and Insects

ABIES:

- Blastophagus piniperda* (Coleoptera)
Chermes piceae (Homoptera)

ACACIA:

- Mimosestes sallaei* (Coleoptera)
Stator pruininus (Coleoptera)

ACALYPHA:

- Tetranychus cucurbitae* (Acarina)

ACER:

- Aceria macrochelus* (Acarina)
Hypera punctata (Coleoptera)
Lecanium coryli (Homoptera)
Pultrinaría vitis (Homoptera)

ADENANTHERA:

- Ectomyelois ceratoniae* (Lepidoptera)

AGARICUS:

- Trogoderma parabile* (Coleoptera)

AGAVE:

- Batrachedra linaria* (Lepidoptera)
Gymnococcus agavium (Homoptera)
Lepidosaphes philococcus (Homoptera)
Ozophora consanguineus (Hemiptera)
Pseudischmispis bowreyi (Homoptera)

ALLIUM CEPA:

- Lygaeus albo-ornatus* (Hemiptera)

ALLIUM PORRUM:

- Acrolepia assectella* (Lepidoptera)
Deroceras reticulatum (Mollusca)

ALLIUM SATIVUM:

- Aceria tulipae* (Acarina)
Brachycerus albidentatus (Coleoptera)
Brachycerus alpinus (Coleoptera)
Delogala guttata (Coleoptera)
Dyspessa ulula (Lepidoptera)
Frankliniella tenuicornis (Thysanoptera)
Parmena battentus (Coleoptera)

ALOCASIA:

- Brevipalpus phoenicis* (Acarina)

ALPINIA:

- Bradybaena similis* (Mollusca)
Ceroplastes rubens (Homoptera)
Orchidophilus aterrimus (Coleoptera)
Oxydema fusiforme (Coleoptera)

ALTHAEA:

- Trialeurodes abutilonea* (Homoptera)

ALYXIA:

- Ceroplastes rubens* (Homoptera)

AMARYLLIS:

- Trionymus lounsburyi* (Homoptera)

AMBROSIA:

- Pachyzancla bipunctalis* (?) (Lepidoptera)

ANANAS:

- Dysdercus mimus* (Hemiptera)
Eurtheota bidentata (Coleoptera)
Noropsis hieroglyphica (Lepidoptera)
Pheidole megacephala (Hymenoptera)
Ribua innoxia (Lepidoptera)
 "Targionia" bromiliae (Homoptera)
Thecla zebra (Lepidoptera)

ANEMONE:

- Thrips flavus* (Thysanoptera)

ANNONA:

- Cerconota anonella* (Lepidoptera)
Irdomyrmex humilis (Hymenoptera)
Pseudococcus citricus (Homoptera)
Talponia batesi (Lepidoptera)

ANTHURIUM:

- Bradybaena similis* (Mollusca)
Ceroplastes rubens (Homoptera)
Chrysomphalus albopictus (Homoptera)
Chrysomphalus umboniferus (Homoptera)
Lepidosaphes tokionis (Homoptera)
Orchidophilus aterrimus (Coleoptera)
Pinnaspis buzi (Homoptera)
Pseudischmispis alienus (Homoptera)

ANTIRRHINUM:

- Haplothrips goudyei* (Thysanoptera)
Thrips flavus (Thysanoptera)

APIUM:

- Deroceras reticulatum* (Mollusca)
Euleia heraclei (?) (Diptera)

APOLLONIAS:

- Targionia laurina* (Homoptera)

APONOGETON:

- Monomorium destructor* (Hymenoptera)

ARACHIS:

- Caryedon fuscus* (Coleoptera)
Trogoderma granarium (Coleoptera)

ARALIA:

- Coccus viridis* (Homoptera)

ARMERIA:

- Helix aspersa* (Mollusca)

ARMORACIA:

- Tyrophagus infestans* (Acarina)

ARTOCARPUS:

- Pheidole megacephala* (Hymenoptera)

ASCOCENTRUM:

- Parlatoria proteus* (Homoptera)

ASPLENIUM:

- Pheidole megacephala* (Hymenoptera)

ASTER:

- Taeniothrips atratus* (Thysanoptera)
Thrips major (Thysanoptera)

BAMBOO:

- Asterolecanium bambusae* (Homoptera)
Asterolecanium miltaris (Homoptera)
Asterolecanium miltaris miltaris (Homoptera)
Asterolecanium miltaris robustum (Homoptera)
Lyctocylus japonum (Coleoptera)
Lyctus africanus (Coleoptera)
Trogoderma parabile (?) (Coleoptera)

BAMBUSA:

- Aspidiotus destructor* (Homoptera)

BAUHINIA:

- Trialeurodes acaciae* (Homoptera)

BELLIS:

- Thrips flavus* (Thysanoptera)

BETA:

- Gnorimoschema ocellatella* (Lepidoptera)
Tyrophagus infestans (Acarina)

BETULA:

- Arge pullata* (Hymenoptera)

BOUGAINVILLEA:

- Sybra alternans* (Coleoptera)

BRASSAIA:

- Protopulvinaria pyriformis* (Homoptera)

BRASSAVOLA:

- Conchaspis orchidarum* (Homoptera)
Furcaspis biformis (Homoptera)
Pseudischmispis alienus (Homoptera)
Vinsonia stellifera (Homoptera)

Hosts and Insects—Continued

BRASSIA:

- Leucaspis cockerelli* (Homoptera)
- Vinsonia stellifera* (Homoptera)
- Zonitoides arboreus* (Mollusca)

BRASSICA CHINENSIS:

- Barathra brassicae* (Lepidoptera)
- Deroceras reticulatum* (Mollusca)
- Nezara viridula* (Hemiptera)

BRASSICA OLERACEA ACOEPHALA:

- Phytomyza rufipes* (Diptera)

BRASSICA OLERACEA BOTRYTIS:

- Deroceras reticulatum* (Mollusca)
- Phytomyza rufipes* (Diptera)

BRASSICA OLERACEA CAPITATA:

- Deroceras reticulatum* (Mollusca)
- Mamestra brassicae* (Lepidoptera)
- Phytomyza rufipes* (Diptera)

BRASSICA PEKINENSIS:

- Barathra brassicae* (Lepidoptera)

BRASSICA RAPA:

- Acalymma tridittata* (Coleoptera)
- Acrolepia assectella* (Lepidoptera)
- Deroceras reticulatum* (Mollusca)
- Helicula undatis* (Lepidoptera)
- Limax marginatus* (Mollusca)
- Phytomyza rufipes* (Diptera)
- Psyllodes chryscephala* (Coleoptera)

BROMELIA CEAE:

- Plagioderma thymaloides* (Coleoptera)

BROMELIAD:

- Calligrapha labyrinthica* (Coleoptera)
- Cryphula apicatus* (Hemiptera)
- Diabrotica porracea* (Coleoptera)
- Furcaspis bifurmis* (Homoptera)
- Galgapha punctifer* (Hemiptera)
- Galgapha quadrisignata* (Hemiptera)
- Limax marginatus* (Mollusca)
- Nasutitermes corniger* (Isoptera)
- Ogdoecosta catenulata* (Coleoptera)
- Paromius longulus* (Hemiptera)

BROMUS:

- Luzulaspis kondarensis* (Homoptera)

BROUGHTONIA:

- Asterolecanium epidendri* (Homoptera)
- Chrysomphalus odontoglossi* (Homoptera)
- Leucaspis cockerelli* (Homoptera)
- Vinsonia stellifera* (Homoptera)

BRYOPHYLLUM:

- Deroceras reticulatum* (Mollusca)
- Pulvinaria psidii* (Homoptera)

BUXUS:

- Cenopalpus pulcher* (Acarina)
- Chionaspis salicis* (Homoptera)
- Eriophyes canestrinii* (Acarina)
- Parlatoria camelliae* (Homoptera)
- Procryptotermes hubbardi* (Isoptera)
- Spanioneura fonscolombi* (Homoptera)

CACTUS:

- Amitermes wheeleri* (Isoptera)
- Ceratitidis capitata* (Diptera)
- Lepidosaphes phloeococcus* (Homoptera)
- Pseudodiaspis yuccae* (Homoptera)
- Reticulitermes tibialis* (Isoptera)

CAJANUS:

- Acanthoscelides armilagai* (Coleoptera)
- Ancylostoma stercora* (Lepidoptera)
- Chalcodermus aeneus* (Coleoptera)
- Fundella pellucens* (Lepidoptera)
- Maruca testulalis* (Lepidoptera)
- Phaedole megacephala* (Hymenoptera)

CALADIUM:

- Pentalonia nigronervosa* (Homoptera)

CALLUNA:

- Frankliniella intonsa* (Thysanoptera)
- Gelechia ericetella* (Lepidoptera)
- Micrelus ericae* (Coleoptera)
- Scolopostethus decoratus* (Hemiptera)
- Taeniothrips atratus* (Thysanoptera)
- Taeniothrips ericae* (Thysanoptera)
- Thrips major* (Thysanoptera)

CALOCARPUM:

- Anastrepha ludens* (Diptera)
- Anastrepha serpentina* (Diptera)

CALOPHYLLUM:

- Dacus dorsalis* (Diptera)

CAMELLIA:

- Aleurotrachelus camelliae* (Homoptera)
- Aspidiotus degeneratus* (Homoptera)
- Aspidiotus destructor* (Homoptera)
- Ceroplastes rubens* (Homoptera)
- Fiorinia theae* (Homoptera)
- Lepidosaphes kamakurensis* (Homoptera)
- Parlatoria camelliae* (Homoptera)
- Pulvinaria camelicola* (Homoptera)
- Pulvinaria floccifera* (Homoptera)
- Stephanitis nashi* (Hemiptera)

CANAVALLIA:

- Lampides boeticus* (Lepidoptera)
- Maruca testulalis* (Lepidoptera)

CANNABIS:

- Pseudischnaspis bowreyi* (Homoptera)

CAPSICUM:

- Ceratitidis capitata* (?) (Diptera)
- Faustinus cubae* (Coleoptera)
- C. norimoschema gudmannella* (Lepidoptera)
- Ligyrocoris auribilliana* (Hemiptera)
- Nezara viridula* (Hemiptera)
- Pachyzancla perisalis* (Lepidoptera)
- Platynota rostrana* (Lepidoptera)
- Pyrausta nubilalis* (Lepidoptera)

CARICA:

- Pseudoparlatoria ostreata* (Homoptera)

CARNEGIEA:

- Pseudodiaspis yuccae* (Homoptera)

CASSIA:

- Aganactes indecora* (Lepidoptera)
- Caryedon fuscus* (Coleoptera)
- Ectomyelois ceratoniae* (Lepidoptera)
- Phelomerus aberrans* (Coleoptera)

CASTANEA:

- Cureulio elephas* (Coleoptera)
- Hemimene juliana* (Lepidoptera)
- Laspeyresia splendana* (Lepidoptera)

CATTLEA:

- Asterolecanium epidendri* (Homoptera)
- Chrysomphalus tenax* (Homoptera)
- Chrysomphalus umboniferus* (Homoptera)
- Cryptoblabes gnidiella* (Lepidoptera)
- Furcaspis bifurmis* (Homoptera)
- Pseudischnaspis alienus* (Homoptera)
- Puto uller* (Homoptera)
- Vinsonia stellifera* (Homoptera)

CENTAUREA:

- Frankliniella panamensis* (Thysanoptera)

CERATONIA:

- Aspidiotus aharonii* (Homoptera)
- Neodryocetes guianae* (Coleoptera)

CHAENOMALES:

- Ceroplastes japonicus* (Homoptera)

Hosts and Insects—Continued

CHAMAEDOREA:

- Chrysomphalus albopictus* (Homoptera)
- Chrysomphalus sphaeroides* (Homoptera)
- Dinaspis aculeata* (Homoptera)
- Eugeraeus unifasciatus* (?) (Coleoptera)
- Lycophotia ornea* (Lepidoptera)

CHRYSANTHEMUM:

- Blissus pulchellus* (Hemiptera)
- Bryobia cristata* (Acarina)
- Conotelus mexicanus* (Coleoptera)
- Euschistus servus* (Hemiptera)
- Frankliniella formosae* (Thysanoptera)
- Frankliniella schultzei* (Thysanoptera)
- Taeniothrips hawaiiensis* (Thysanoptera)
- Thrips flavus* (Thysanoptera)
- Thrips imaginis* (Thysanoptera)

CICER:

- Bruchus tristis* (Coleoptera)

CICHORIUM:

- Helix aspersa* (Mollusca)
- Lygus gemellatus* (Hemiptera)
- Phytomyza rufipes* (Diptera)

CINNAMOMUM:

- Aspidiotus palmarum* (Homoptera)

CITRUS AURANTIFOLIA:

- Aleurocanthus woglumi* (Homoptera)
- Anastrepha ludens* (Diptera)
- Ceratitis capitata* (?) (Diptera)
- Leucaspis cockerelli* (Homoptera)
- Parlatoria cinerea* (Homoptera)
- Parlatoria zizyphus* (Homoptera)
- Phyllocnistis citrella* (Lepidoptera)
- Pseudonidia trilobitiformis* (Homoptera)
- Unaspis yanonensis* (Homoptera)

CITRUS AURANTIUM:

- Aleurocanthus woglumi* (Homoptera)
- Anastrepha ludens* (Diptera)
- Unaspis yanonensis* (Homoptera)

CITRUS GRANDIS:

- Aonidiella inornata* (Homoptera)
- Leucaspis cockerelli* (Homoptera)
- Parlatoria zizyphus* (Homoptera)
- Prays endocarpa* (Lepidoptera)

CITRUS LIMON:

- Aonidiella inornata* (Homoptera)
- Ceratitis capitata* (Diptera)
- Ceroplastes sinensis* (?) (Homoptera)
- Cryptoblabes gnidiella* (Lepidoptera)
- Parlatoria cinerea* (Homoptera)
- Parlatoria zizyphus* (Homoptera)
- Pseudonidia trilobitiformis* (Homoptera)
- Unaspis citri* (Homoptera)
- Unaspis yanonensis* (Homoptera)

CITRUS PARADISI:

- Anastrepha ludens* (Diptera)
- Gynandrosoma aurantianum* (Lepidoptera)
- Leucaspis cockerelli* (Homoptera)
- Morganella longispina* (Homoptera)
- Olethreutes leucotreta* (Lepidoptera)
- Parlatoria cinerea* (Homoptera)
- Parlatoria zizyphus* (Homoptera)
- Unaspis citri* (Homoptera)
- Unaspis yanonensis* (Homoptera)

CITRUS RETICULATA:

- Aonidiella inornata* (Homoptera)
- Bemisia citricola* (?) (Homoptera)
- Ceratitis capitata* (Diptera)
- Chrysomphalus bifasciculatus* (Homoptera)
- Morganella longispina* (Homoptera)
- Parlatoria zizyphus* (Homoptera)
- Unaspis yanonensis* (Homoptera)

CITRUS SINENSIS:

- Acrosternum heegeri* (Hemiptera)
- Aleurocanthus woglumi* (Homoptera)

- Aleurothrixus floccosus* (Homoptera)
- Aleurothrixus myrtacei* (Homoptera)
- Anastrepha ludens* (Diptera)
- Brevipalpus phoenicis* (Acarina)
- Ceratitis capitata* (Diptera)
- Chrysomphalus diversicolor* (Homoptera) (as defined by McKenzie).
- Cryptoblabes gnidiella* (Lepidoptera)
- Leucaspis cockerelli* (Homoptera)
- Monomorium destructor* (Hymenoptera)
- Morganella longispina* (Homoptera)
- Olethreutes leucotreta* (Lepidoptera)
- Parlatoria cinerea* (Homoptera)
- Parlatoria zizyphus* (Homoptera)
- Phyllocnistis saligna* (Lepidoptera)
- Pseudonidia trilobitiformis* (Homoptera)
- Pseudococcus citricus* (Homoptera)
- Tetraneurae ursorum* (Homoptera)
- Unaspis citri* (Homoptera)
- Unaspis yanonensis* (Homoptera)

CITUS SP.:

- Aleurocanthus woglumi* (Homoptera)
- Aleurothrixus floccosus* (Homoptera)
- Coccus viridis* (Homoptera)
- Dialeurodes citrifolii* (Homoptera)
- Eutetranychus banksi* (Acarina)
- Orthesia pseudosignis* (Homoptera)
- Parlatoria citri* (Homoptera)
- Parlatoria zizyphus* (Homoptera)
- Tetraneurae ursorum* (Homoptera)
- Trialeurodes vitrinellus* (Homoptera)
- Unaspis yanonensis* (Homoptera)

COCOS:

- Agonoxena argaula* (Lepidoptera)

Maruca testulalis

GRAND CAYMAN:

Microcerotermes arboreus

GREECE:

Bruchus tristis
Ceratitidis capitata
Cryptoblabes gnidiella
Curculio elephas
Ectomyelois ceratoniae
Hypera postica
Laspeyresia splendana
Leucaspis riccae
Parlatoria oleace
Pseudococcus citricus
Ripersistella palastinae
Trogoderma inclusum

GRENADA:

Furcaspis biformis

GUAM:

Achatina fulica
Aonidiella tinornata
Cerestium unicolor
Lepidosaphes mcgregori
Pheidole megacephala
Sternonchetus mangiferae

GUATEMALA:

Anastrepha ludens
Anastrepha mombinpraeoptans
Aspidiotus mendax
Aspidiotus palmarum
Asterolecanium epidendri
Chrysomphalus tenax
Chrysomphalus umboniferus
Deroceras reticulatum
Farinococcus guatemalensis
Furcaspis biformis
Iridomyrmex iniquus
Lepidosaphes tuberculata
Ligyrocoris aurivilliana
Limax marginatus
Nysius raphanus
Paromitus longulus
Pseudoparlatoria ostreata
Pulo ulter
Stenomoma catenifer
Tenthetocoris bicolor
Tenthetocoris confusus
Tenthetocoris vestitus
Vinsonia stellifera

HAITI:

Anastrepha mombinpraeoptans
Bemisia tabaci
Cylas formicarius elegantulus
Haplothrips gowdeyi
Nezara viridula

HAWAII:

Adoretus sinicus
Anomala orientalis
Araecerus levipennis
Athesapecta cyperi
Bradybaena similaris
Caryedon fuscus
Ceratitidis capitata
Ceroplastes rubens
Chaetanaphothrips orchidii
Coccus viridis
Conotellus mexicanus
Coptotermes formosanus
Cryptophlebia illepidia

Countries of Origin and Insects—Continued

HAWAII—Continued

Cryptotermes brevis
Cylas formicarius elegantulus
Dacus cucurbitae
Dacus dorsalis
Deroceras reticulatum
Diachus auratus
Dialeurodes kirkaldyi
Diocalantra taitensis
Ectomyelois ceratoniae
Ereunetis flavistriata
Euscapes postfasciatus
Furcaspis biformis
Geotomus pygmaeus
Halticus chrysolepis
Hyalopeplus pellicudus
Lampides boeticus
Lepidosaphes tokionis
Lepidosaphes tuberculata
Leucaspis cockerelli
Listroderes costirostris obliquus
Maruca testulalis
Mimosastes sallaei
Nysius coenosulus
Orchidophilus aterrimus
Oxydenia fusiforme
Parlatoria cratonis
Parlatoria zizyphus
Pectinophora gossypiella
Perkinsiella saccharicida
Pheidole megacephala
Pholidophorus advena
Pinnaspis buxi
Pinnaspis caricis
Plusia chalcites
Pseudococcus palmarum
Pulvinaria psidii
Sinoxylon conigerum
Siphanta acuta
Sternonchetus mangiferae
Syagrius fulvitaris
Sybra alternans
Taeniothrips hawaiiensis
Trogoderma insulare
Zonitoides arboreus

HONDURAS:

Anastrepha mombinpraeoptans
Chrysomphalus umboniferus
Cosmopolites sordidus
Furcaspis biformis
Metamasius sericeus
Paromius longulus
Plagiodes thymaloides
Pseudischinaspis alienus
Pseudoparlatoria ostreata
Rhinostomus barbirostris
Tenthetocoris vestitus

HONG KONG:

Cylas formicarius formicarius
Fiortina nephelii
Fulvius brevicornis
Parlatoria zizyphus
Unaspis yanonensis
Aonidiella inornata
Callosobruchus phaseoli
Caryedon fuscus
Chrysomphalus pinnulifera
Coccus capparidis
Cylas formicarius formicarius
Heterobostrychus aequalis
Lyctus africanus
Minthea rugicollis
Sinoxylon anale
Sinoxylon conigerum
Stephanoderes hampei
Trogoderma granarium

INDIA(?):

Nepholetitz bipunctatus

INDONESIA:

Aspidiotus palmae
Orchidophilus aterrimus

Parlatoria pseudaspidiotus
Phenacaspis dendrobii (tentative)

IRAN:

Lepidosaphes pistaciae
Lepidosaphes pistaciae f. pistacicola
Luzulaspis kondarensis
Parlatoria camelliae
Parlatoria oleae

IRELAND:

Argyresthia conjugella
Deroceras reticulatum
Helix aspersa
Lampetia equestris
Oxychilus allarius
Thrips major

ISRAEL:

Acrosternum heegeri
Aspidiotus aharonii
Ceratitidis capitata
Ceroplastes rusci
Cryptoblabes gnidiella
Ectomyelois ceratoniae
Pyrausta nubilalis

ITALY:

Acanthoscelides spinipes
Acrolepis assectella
Adleria kollari
Aleurolobus olivinus
Apion carduorum
Argyresthia conjugella
Arion circumscriptus
Bemisia citricola(?)
Brachycerus albidentatus
Brachycerus algeris
Bruchus ervi
Bruchus signaticornis
Bruchus tristis
Ceratitidis capitata
Ceroplastes rusci
Ceroplastes sinensis(?)
Cryptoblabes gnidiella
Curculio elephas
Curculio nucum
Dacus oleae
Deloyala guttata
Deroceras reticulatum
Diaspis zamiae
Dyspessa ulula
Ectomyelois ceratoniae
Eucalyptus tessellatus
Euleia heraclei(?)
Frankliniella tenuicornis
Hemimene juliana
Hypera nigristrostris
Iridomyrmex humilis
Laspeyresia nigricana
Laspeyresia splendana
Lepidosaphes ficus
Leucaspis riccae
Limax maximus
Lobesia botrana(?)
Lygus gemellatus
Parlatoria oleae
Parlatoria zizyphus
Parmena balteatus
Pentodon punctatus
Phloeotribus scarabaeoides
Prays oleellus
Pseudococcus citricus
Pyrausta nubilalis
Rhagoletis cerasi
Spanioneura fonscolombei
Spermophagus sericeus(?)
Thrips major
Trialeurodes lauri
Trogoderma granarium

JAMAICA:

Anastrepha mombinpraeoptans
Aonidiella citrina
Aonidiella comperei

Countries of Origin and Insects—Continued

JAMAICA—Continued

Aspidiotus destructor
Asterolecanium epidendri
Chrysomphalus odontoglossi
Coccus viridis
Cylas formicarius elegantulus
Faustinus cubae
Furcaspis biformis
Leucaspis cockerelli
Monomorium destructor
Palaeopus costicollis
Parlatoria proteus
Pectinophora gossypiella
Pseudoparlatoria ostreata
Tetranychus cucurbitae
Unaspis citri
Vinsonia stellifera

JAPAN:

Adoretus sinicus
Agrotis exusta
Aleurotrachelus camelliae
Aleurotuberculatus aucubae
Aleurotuberculatus magnoliae
Aleurotuberculatus similis
Aspidiotus cryptomeriae
Aspidiotus degeneratus
Aspidiotus destructor
Aspidiotus excisus
Aspidiotus pseudomeyeri
Aulacaspis latissimus
Barathra brassicae
Bryobia cristata
Callidium rufipenne
Callosobruchus phaseoli
Corposina niponensis
Ceronema japonica(?)
Ceroplastes japonicus
Ceroplastes rubens
Chilo suppressalis
Chrysomphalus bifasciculatus
Deroceus reticulatus
Dichocrocis punctiferalis
Ereunetis simulans
Frankliniella formosae
Gracilaria azaleella
Haplothrips gowdeyi
Icerya seychellarum
Lepidosaphes conchiformis
Lepidosaphes kamakurenensis
Lepidosaphes newsteadi
Lepidosaphes pallida
Lepidosaphes tuberculata
Lepidosaphes tubulorum
Limax marginatus
Lycotrylon japonum
Lyctus africanus
Malacosoma neustrina
Maruca testulalis
Morganella longispina
Nipponaclerda biwakoensis
Oligonychus perditus
Parlatoria camelliae
Parlatoria zizyphus
Pentamerismus oregonensis
Phyllocnistis saligna
Piezodorus rubrofasciatus
Pinnaspis buzi
Pinnaspis uniloba
Plusia chalcites
"Plusia" pini
Protaetia orientalis
Pseudonidia clavigera
Pseudonidia paeoniae
Pseudococcus azaleae
Pseudococcus kraunhiae
Pulvinaria psidii

An asterisk (*) indicates State inspection.

A dagger (†) indicates a first interception from the country named.

A double dagger (‡) indicates first record of its interception by Division inspectors.

Host and Diseases

ACIDANTHERA:

†*Papulaspora dodgei* (Deuteromycetes)

AGAPANTHUS:

Meloidogyne incognita acrita (Nematoda)

AGAVE:

†*Allantonectria millina* (Ascomycetes)

†*Coniothecium agaves* (Deuteromycetes)

†*Parodiella congregata* (Ascomycetes)

†*Scopulariopsis brevicaulis* var. *glabra* (Deuteromycetes)

Stagonospora macrospora (Deuteromycetes)

ALLIUM CEPA SOLANIUM:

Mycosphaerella schoenoprasii (Ascomycetes)

ALLIUM FISTULOSUM:

Mycosphaerella schoenoprasii (Ascomycetes)

ALLIUM PORRUM:

†*Colletotrichum dematium* f. *circinans* (Deuteromycetes)

Mycosphaerella schoenoprasii (Ascomycetes)

Papulaspora parasitica (Deuteromycetes)

ALLIUM SATIVUM:

Ditylenchus dipsaci (Nematoda)

Sclerotium cepivorum (Deuteromycetes)

ALLIUM SCHOENOPRASUM:

Mycosphaerella schoenoprasii (Ascomycetes)

ALNUS(?):

†*Plowrightia virgultorum* (Ascomycetes)

ALOE:

Meloidogyne incognita acrita (Nematoda)

†*Meloidogyne javanica* (Nematoda)

ALYXIA:

Uromyces alyziae (Promycetes)

ANGRAECUM:

†*Pestalotia conspicua* (Deuteromycetes)

ANTHURIUM:

Phyllachora engleri (Ascomycetes)

Uredo anthurii (Promycetes)

APIUM:

Meloidogyne hapla (Nematoda)

†*Meloidogyne incognita* (Nematoda)

†*Meloidogyne incognita acrita* (Nematoda)

ARAUCARIA:

Botryosphaeria berengeriana var. *araucariae* (Ascomycetes)

Cryptospora longispora (Ascomycetes)

†*Macrophoma araucariae* (Deuteromycetes)

†*Pestalotia micheneri* (Deuteromycetes)

Phoma araucariae (Deuteromycetes)

ARBUTUS:

Septoria unedonis (Deuteromycetes)

ARECA:

†*Curvularia gemiculata* (Deuteromycetes)

ARMERIA:

†*Cercospora insulana* (Deuteromycetes)

†*Uromyces limonii* (Promycetes)

ARTOCARPUS:

Meloidogyne incognita acrita (Nematoda)

ARUNDINARIA:

†*Colletotrichum graminicola* (Deuteromycetes)

ASTILBE:

†*Chalaropsis thielaviopsis* (Deuteromycetes)

†*Pratylenchus pratensis* (?) (Nematoda)

ASTROPHYTUM:

Mycosphaerella opuntiae (Ascomycetes)

AUCUBA:

Phyllosticta aucubicola (Deuteromycetes)

AVENA:

Septoria avenae (Deuteromycetes)

BAMBOO:

Papularia sphaerosperma (Deuteromycetes)

Puccinia phyllostachydis (Promycetes)

BEGONIA:

†*Meloidogyne arenaria* (Nematoda)

Meloidogyne javanica (Nematoda)

BENINCASA:

Phytophthora capsici (Phycomycetes)

BERBERIS:

Meloidogyne arenaria (Nematoda)

BERGENIA:

Discohainesia oenotherae (Ascomycetes)

BETA:

Meloidogyne incognita (Nematoda)

BLETILLA:

†*Aphelenchoides fragariae* (?) (Nematoda)

BOUGAINVILLEA:

†*Psilenchus hilarulus* (Nematoda)

†*Tylenchus polyhyppnus* (Nematoda)

A dagger (†) indicates a first interception from the country named.

A double dagger (‡) indicates first record of its interception by Division inspectors.

1959

Issued June 1960

**UNITED STATES DEPARTMENT OF AGRICULTURE
AGRICULTURAL RESEARCH SERVICE
PLANT QUARANTINE DIVISION
WASHINGTON 25, D. C.**

LIST OF INTERCEPTED PLANT PESTS, 1959

(Pests Arriving at United States Ports, July 1, 1958, Through June 30, 1959)

**Compiled by
Bessie C. Mumford¹
Plant Quarantine Aid**

INTRODUCTION

This 46th report of interceptions summarizes the records of insect pests, plant pathogens, and certain other harmful organisms found in, on, or with plants, plant products, baggage, and means of conveyance (1) imported into or entering the United States or its possessions, (2) offered for entry but refused, (3) held in stores or quarters of planes or ships, (4) offered for entry for immediate transportation and exportation in bond, or (5) in domestic shipments to the mainland from the State of Hawaii and the offshore possessions, including the American Virgin Islands, Guam, and Puerto Rico.

The pests listed include insects, snails, fungi, bacteria, nematodes, and viruses causing injury of known or potential plant quarantine significance to the United States. Some common organisms are included if they are new to the country of origin or the host plant, or are of such limited distribution in the United States that they are worthy of mention.

The data for this list include identifications received during the fiscal year 1959 and represent some interceptions made during previous years. Determinations are largely made by specialists of the Entomology Research Division and Plant Quarantine Division, although a certain amount of this work is done by collaborating State officials. Snail identifications are made by taxonomists in the Division of Mollusks, U.S. National Museum. Some critical studies and identifications are made by specialists of the Crops Research Division, who also identify many of the host plants.

All scientific names are reviewed by specialists of the Crops Research Division to assure conformance to the International Rules of Nomenclature. However, in the disease tabulation the name of the stage found is usually listed rather than the perfect stage of the organism. Family names are listed with the insects in the tabulation; orders are given in the host list. The classes of the diseases are shown in the disease host list.

Every effort is made to give the correct origin for all collections listed. Occasionally, however, it is difficult to trace the true origin of stores in planes and ships. Questionable cases are omitted, listed with a question mark, or shown as unknown.

¹ Assistance was received from Alice J. Watson, mycologist, and Paul X. Peltier, entomologist.

AIRBORNE MATERIAL

The interceptions from airborne material totaled 8,033, about one-third of the interceptions for the year. There were 6,986 insects and snails, and 1,047 diseases and nematodes. This is an increase of 2,531 over last year, when the total was 5,502. Many important pests are included in this number. From airborne material there were 30 interceptions of the European cherry fruit fly, 50 of the Mediterranean fruit fly, 19 of the Mediterranean land snail, 12 of the Mexican fruit fly, 28 of the olive fruit fly, 14 of the oriental fruit fly, 6 of the pink bollworm, 72 of the West Indian fruit fly, 90 of the black spot of citrus, 17 of citrus canker, 5 of sweet orange scab, and 15 of the golden nematode. A possible high survival rate of pests arriving by air necessitates constant vigilance on the part of Plant Quarantine inspectors.

NOTES ON PESTS INTERCEPTED

The total number of interceptions made during the fiscal year 1959 was 25,296, as compared with 18,198 the previous year. Of these, 8,850 were considered of enough importance to be listed, as compared with 7,946 last year. This increase is in part accounted for by expanding commerce and travel. The opening of the St. Lawrence Seaway to ocean-going vessels has materially increased the number of ship arrivals and interceptions at Great Lakes ports.

FRUIT FLIES

A total of 502 fruit fly interceptions were identified to species as follows:

Anastrepha ludens, the Mexican fruit fly, (153 times) in grapefruit, mango, orange, peach, pear, pomegranate, ponderosa lemon, quince, sapote, and sweet lime in air baggage, baggage, quarters, and stores from Mexico; and in sweet lime in air baggage from Guatemala.

Anastrepha mombinpraeoptans, the West Indian fruit fly, (110 times) in guava in air baggage from Puerto Rico; in mango in air baggage, air quarters, baggage, cargo, quarters, and stores from the American Virgin Islands, Colombia, Costa Rica, Cuba, Dominican Republic, El Salvador, Guatemala, Haiti, Honduras, Jamaica, Mexico, Nicaragua, Panama, Puerto Rico, and Trinidad; in purple mombin in air baggage and baggage from Cuba, El Salvador, Guatemala, Mexico, and Nicaragua; in *Spondias* sp. in air baggage from Cuba; in tropical almond in air baggage from Jamaica; in vi-apple in air baggage from El Salvador; and in yellow mombin in air baggage and air stores from Central America, Costa Rica, El Salvador, Guatemala, and Nicaragua.

Anastrepha serpentina (twice) in sapodilla in air baggage from Guatemala.

Anastrepha striata (twice) in guava in baggage from Mexico. *A. striata*(?) (twice) in guava in air baggage from El Salvador and in baggage from Mexico.

Anastrepha suspensa (6 times) in guava in air baggage from Cuba and in preflight inspection of air baggage and in airmail from Puerto Rico.

Ceratitis capitata, the Mediterranean fruit fly, (94 times) in apple in air baggage from Portugal, in air stores from Europe, and in baggage from Greece; in apricot in air stores from France and Italy; in Arabian coffee berries in air baggage, baggage, and mail from Hawaii; in coffee berries in air baggage from Brazil and Costa Rica, and in aircargo from Brazil; in fig in air baggage from Argentina and Italy, and in mail from Spain; in grape in baggage from Italy; in grapefruit in quarters and stores from Brazil, and in stores from Egypt; in guava in air baggage from Portugal; in loquat in air baggage from Tunisia, and in baggage from Italy; in Mandarin orange in air baggage from Italy, in air stores from Argentina, in baggage from Italy and Spain, and in stores from Cyprus and Syria; in orange in air baggage from Costa Rica, Israel and an unknown origin, in air stores from Italy and Spain, in baggage from Italy and Portugal, in quarters from Egypt, and in stores from Argentina, Egypt, Italy, and Spain; in peach in air baggage from Israel, Italy, Spain, and an unknown origin, and in stores from Europe and Spain; in pear in air baggage from Greece, Israel, and Italy; in pricklypear in air baggage and baggage from Italy; in pummelo in air baggage from Italy, and in stores from an unknown origin; in quince in air baggage from Italy, and

in baggage from Greece and Italy; and in tropical almond in baggage from Hawaii. *C. capitata*(?) (10 times) in Arabian coffee in air baggage and baggage from Hawaii; in coffee in air baggage from Brazil; in fig in air baggage from Italy; in Indiapoon beautyleaf seed pulp in air baggage from Hawaii; and in orange in air stores from Italy and the Union of South Africa, in mail from Italy, and in stores from an unknown origin.

Dacus cucurbitae, the melon fly, (9 times) an adult in an airplane from Japan(?); and in cucumber and tomato in stores from Hawaii.

Dacus dorsalis, the oriental fruit fly, (24 times) an adult in an airplane from Japan; in Arabian coffee in air baggage and mail from Hawaii; in avocado in baggage from Hawaii; in banana in baggage and quarters from Hawaii; in date in baggage from Hawaii; in guava in air baggage from Hawaii; in mango in air baggage and baggage from Hawaii; in papaya in air baggage from Hawaii; in passionflower fruit in mail from Hawaii; in pummelo in baggage from Hawaii; in tropical almond in air baggage from Hawaii; and in unidentified fruit in baggage from Hawaii. *D. dorsalis*(?) (5 times) in Arabian coffee in air baggage from Hawaii; in mango in air baggage and stores from Hawaii; and in tropical almond in mail from Hawaii.

Dacus oleae, the olive fly, (42 times) in olive in air baggage from Italy, Lebanon, Spain, Tunisia, and the Union of Soviet Socialist Republics and in baggage from Greece and Italy; and an adult with pumpkin seeds in air baggage from Italy. *D. oleae*(?) (once) pupa with olive in air baggage from Italy.

Dacus passiflorae (once) in *Degeneria vitiensis* fruit in aircargo from the Fiji Islands.

Dacus pedestris (twice) in *Melastoma malabatricum* and *Melastoma* sp. fruit in aircargo from the Federation of Malaya.

Euleia heraclei (twice) in celery in stores from England. *E. heraclei*(?) (twice) in parsley in air stores from England and an unknown origin.

Hexachaeta monostigma (once) adult with palm leaf in aircargo from Mexico.

Orellia punctata (once) adult with safflower seed heads in aircargo from Jordan.

Rhagoletis cerasi, the European cherry fruit fly, (31 times) in cherry in air baggage from France, Germany, Hungary, Italy, Poland, Portugal, Rumania, and Yugoslavia; in air stores from France, Italy, Portugal, and Spain; and in stores from Italy. *R. cerasi*(?) (once) in cherry in air baggage from Germany.

Toxotrypana curvicauda (once) in papaya in baggage from Mexico.

INSECTS OTHER THAN FRUIT FLIES

The following insects of unusual interest were intercepted:

Adoxophyes orana (Tortricidae) with apple in mail from Germany and on lilac in aircargo from the Netherlands.

Alcidodes dentipes (Curculionidae) with sweetpotatoes in stores from Sierra Leone.

Aleurocanthus woglumi (Aleyrodidae), the citrus blackfly, on *Citrus* sp. leaves in air baggage and baggage from Mexico and in mail from Jamaica, on lemon leaves in air baggage from Mexico, and on orange leaves in baggage from Mexico.

Aleutotuberculatus jasmini (Aleyrodidae) on jasmine leaf in aircargo from the Philippines.

Anthonomus rectirostris (Curculionidae) in cherry pits in air baggage from Germany.

Aspidiotus degeneratus (Coccidae) on camellia stem in mail from Japan, on Grecian laurel leaves in air baggage from Italy, and on laurel leaves in stores from Japan.

Baris lepidii (Curculionidae) in horseradish root in stores from Poland.

Blissus diplopterus (Lygaeidae) on apricots and Cape chinkerichiee flowers in cargo from the Union of South Africa.

Brachycerus algeris (Curculionidae) in garlic in air baggage and baggage from Italy.

Calidium rufipenne (Cerambycidae) in dunnage, quarters, and wooden crates in cargo and mail from Japan.

Carposina niponensis (Carposinidae) in apples in air baggage, air quarters, air stores, quarters, and stores from Japan.

Cenopalpus pulcher (Tenuipalpidae) on almond scion in aircargo from Iran and on pear scion in airmail from France.

Ceroplastes rusci (Coccidae) on fig leaves in air baggage from Argentina and in baggage from Greece.

Chilo suppressalis (Crambidae), the Asiatic rice borer, in rice straw in air baggage, mail, and stores from Japan; in rice straw jackets in air baggage from Spain; and in rice straw mats in dunnage from Japan.

Chionaspis asiatica (Coccidae) on Mazzard cherry scions in airmail and mail from Iran.

Chirothrips pretorianus (Thripidae) with *Eragrostis* spp. seeds and various other seeds in mail from the Union of South Africa.

Clysiana ambiguella (Phaloniidae) in grape in baggage from Italy.

Conotrachelus aguacatae (Curculionidae) in avocado in baggage from Guatemala and Mexico and in cargo from Mexico.

Cryptophlebia leucotreta (Olethreutidae) in grapefruit in stores, Mandarin orange in baggage, and orange in quarters from the Union of South Africa; and in orange in air baggage from an unknown origin.

Cylas formicarius var. (Curculionidae) in sweetpotato in cargo from Hong Kong and in stores from the Dominican Republic, and in an unidentified vegetable in baggage from the Dominican Republic.

Dialeurodes kirkaldyi (Aleyrodidae) on crapemyrtle in air baggage and air stores from Australia, on cut flowers in air baggage from Cuba, on jasmine in air baggage from Hawaii and air stores from Japan, on Mexican frangipani leaves in mail from Hawaii, and on orange leaf in air baggage from Tahiti.

Diaprepes abbreviatus (Curculionidae) as stowaway on airplane from the Dominican Republic and on air baggage in preflight inspection in Puerto Rico.

Dichocrocis punctiferalis (Pyraustidae) on Japanese white pine in baggage from Japan.

Euscapes postfasciatus (Curculionidae) in sweetpotato in baggage from Hawaii and Puerto Rico, in cargo from St. Kitts and Tortola, and in stores from Brazil and Trinidad; and in *Ipomoea* sp. in stores from Venezuela.

Frankliniella intonsa (Thripidae) on carnation in air baggage from Germany and Poland and in air quarters from an unknown origin, on assorted flowers and lavender plant in air baggage from England, on geranium plant in air baggage from Belgium, on painted daisy in air baggage from Finland, and on roses in air baggage from France and Germany.

Gnorimoschema ocellatella (Gelechiidae) in beets in stores from Egypt.

Grapholitha janthiana (Olethreutidae) in apple in air baggage from France.

Icerya seychellarum (Coccidae) on *Rhapis* sp.(?) in air baggage from the Philippines.

Ips typographus (Scolytidae) in bark on wooden crate in aircargo from Germany, in pine crate in baggage from Norway, and on wood crating in cargo from Sweden.

Lepidosaphes pini (Coccidae) on pine in air baggage and airmail from Japan.

Leucinodes orbonalis (Pyraustidae) in *Solanum* sp. fruit in air baggage from Liberia.

Lobesia botrana (Olethreutidae) in grape in air stores from France.

Mamestra brassicae (Noctuidae) as stowaway on airplane from Guam(?) and in cabbage in stores from France and Japan.

Maruca testulalis (Pyraustidae), a bean pod borer, in *Canavalia microcarpa* in preflight inspection of air baggage leaving Hawaii for the mainland; in mauna loa leis in baggage from Hawaii; in pigeonpeas in air baggage, baggage, and cargo from Puerto Rico; in string beans in cargo from Puerto Rico and in stores from Brazil and Trinidad; and in *Sesbania grandiflora* flowers in mail from Hawaii.

Megastigmus suspectus pinsapinis (Torymidae) in Cedar-of-Lebanon seed in mail from Turkey.

Pectinophora gossypiella (Gelechiidae), the pink bollworm, in cotton bolls in air baggage from Cuba, Jamaica, Hawaii, and Trinidad and in baggage from Mexico; in cottonseed in air baggage from Puerto Rico, in baggage from Brazil, Hawaii, and Mexico, and in quarters from Mexico; in seed cotton in quarters from Mexico; and in okra pods in air baggage, cargo, and stores from the Dominican Republic.

Phlyctinus callosus (Curculionidae) in grape in cargo from the Union of South Africa.

Pityogenes chalcographus (Scolytidae) in pine in baggage from Norway and in cargo from Sweden, in spruce bark in cargo from Belgium, and in wood crating in cargo from Belgium and Sweden.

Prays oleellus (Hyponomeutidae) in olive pits in air baggage from Greece, Lebanon, and Turkey.

Sesamia cretica (Noctuidae), the durra stem borer, in broomcorn in baggage from Italy and in mail from Greece.

Stephanoderes hampei (Scolytidae) in coffee in aircargo from Aruba and in cargo from the Belgian Congo and Brazil.

Tetranychus viennensis (Tetranychidae) on apple in aircargo, on *Pyrus* sp. in air stores, and on sand pear in air baggage from Japan.

Thrips major (Thripidae) on carnations in air baggage from Poland, on assorted flowers in air baggage from England and Ireland, on heather in air baggage from England and Scotland, on mimosa flowers in aircargo from France, on pussywillow buds in air baggage from France, and on roses in air baggage from Belgium, England, France, and Germany.

Trogoderma granarium (Dermestidae), the khapra beetle, in bagging in cargo from England and the Netherlands and in stores from Singapore; in beans in stores from

Formosa; in chickpea in stores from Greece; in durum wheat in mail from Iran in flax seed in mail from Afghanistan; in flour in quarters from England; in lentils in stores from Egypt; in peanuts in cargo and quarters from an unknown origin, in quarters from Nigeria(?), and in stores from Singapore; in rice in cargo from Pakistan, in quarters from India, and in stores from Australia, Formosa, India, Japan, and an unknown origin; with residue of titanium oxide in cargo from an unknown origin; and in dry stores from Australia, Formosa, and an unknown origin.

SNAILS

Achatina fulica, the giant African snail, was intercepted twice from Hawaii with baggage and mail.

Bradybaena similis was intercepted 51 times on various flowers and foliage; 45 times from Hawaii, twice each from Bermuda and Brazil, and once each from Cuba and Hong Kong.

Cochlicella barbara with military cargo from Morocco and in soil with fig cuttings in mail from Italy.

Cochlicella ventrosa with military cargo from Morocco and in soil in cargo from Italy.

Euglandina striata was intercepted twice on bananas in cargo from Ecuador.

Theba pisana, the Mediterranean land snail, was intercepted 92 times; 59 from Morocco on general cargo, military cargo, and wooden crates; 10 from France on military cargo, spinach in stores, and wooden crates in aircargo and cargo; 9 from Libya on military cargo; 7 from Italy on air baggage and military cargo; 4 from North Africa on military cargo; once from Cuba on string beans in stores; once from Turkey on military cargo; and once from an unknown origin on general cargo.

Xeroleuca mograbina, a species not previously in the U.S. National Museum collection, on military cargo from Morocco.

Other snails intercepted and worthy of mention were: *Arion circumscriptus*, *Ceciloides acicula*, *C. aperta*, *Deroceus reticulatus*, *Fossaria truncatula*, *Helicella caperata*, *H. itala*, *H. maritima*, *H. neglecta*, *H. pyramidata*, *H. striata*, *H. trochoides*, *Helix figulina*, *Hygromia cinctella*, *Lamellaxis gracilis*, *L. mauritanus*, *Limax marginatus*, *L. maximus*, *Melanoides tuberculata*, *Milax gagates*, *Monacha catiana*, *M. schotti*, *Otala lactea*, *O. vermiculata*, *Oxychilus alliarius*, *O. cellarius*, *Porphyrobaphe isotoma*, *Solaropsis monile*, *Testacella maugei*, and *Zonitoides arboreus*.

DISEASES

The sweet orange scab (*Elsinoe australis*) was intercepted 97 times; 57 came from Brazil on lemon, Mandarin orange, orange, and sweet lime; 38 from Argentina on lemon, Mandarin orange, and orange; and 1 each from Paraguay and an unknown origin on Mandarin orange.

Citrus canker (*Xanthomonas citri*) was intercepted 83 times; 68 came from Japan, 5 from China, 3 each from Hong Kong and India, 2 from Ceylon, and 1 each from the Philippines and an unknown origin. These interceptions were taken from the following hosts: *Citrus* sp., grapefruit, lemon, lime, Mandarin orange, orange, sour lime, and sour orange.

Cancerous B (*Xanthomonas* sp.) was intercepted 11 times; 8 came from Argentina on lemon, 2 from Brazil on lemon, and 1 from Uruguay on lime.

The black spot of citrus (*Phoma citricarpa*; perfect stage—*Guignardia citricarpa* Kiely) was intercepted 230 times; 67 came from the Union of South Africa; 42 from Hong Kong; 33 from Japan; 28 from Australia; 17 from China; 15 from an unknown origin; 10 from Formosa; 3 each from Mozambique, Okinawa, and the Philippines; 2 from Argentina; and 1 each from Africa, Brazil, Eniwetok, Federation of Malaya, India(?), Singapore, and Vietnam(?). These interceptions were taken from the following hosts: *Citrus* sp., grapefruit, lemon, lime, Mandarin orange, orange, and Satsuma orange.

Other disease interceptions of interest were:

Cercospora grandissima on dahlia leaf in aircargo from Argentina.

Cercospora henningsii on cassava leaf in air baggage from Trinidad.

Cercospora pancratii on hymenocallis leaves in baggage from Mexico.

Chrysomyxa ledi var. *rhododendri*, the rhododendron-spruce rust, was intercepted 24 times on rhododendron in air baggage, airmail, baggage, and mail from Austria, Canada, Germany, Switzerland, and an unknown origin.

Cryptocline paradoxa on English ivy 'Baltic' in cargo from the Netherlands.

Macrophoma araucariae on Norfolk-Island-pine seed in cargo from Hawaii.

Nematospora coryli on beans in aircargo from Peru.

Phyllostictina psidiiicola on guava in aircargo from the Philippines.

Puccinia arachidis on peanut in aircargo, airmail, and mail from Paraguay.

Puccinia carthami on safflower leaves in aircargo from Portugal.

Puccinia horiana on chrysanthemum cut flowers in air baggage from Australia.

Puccinia laguri on *Lagurus ovatus* (grass) in cargo from Spain.

Ring spot virus on watermelon in cargo from Mexico.

Sphenospora kevorkianii on *Epidendrum* sp. leaf in air baggage from the Bahamas, and in aircargo from Honduras; on *Ionopsis utricularioides* leaf in air baggage from Jamaica; and on *Oncidium pulchellum* leaf in air baggage from the Dominican Republic.

Uredo oncidii on *Epidendrum* sp.(?) leaf in air baggage from Nicaragua; and on *Oncidium* spp. in aircargo from Costa Rica, in air baggage from El Salvador, in air baggage and aircargo from Guatemala, in air baggage from Honduras, in aircargo and cargo from Mexico, and in aircargo from Venezuela. *U. oncidii*(?) on *Oncidium pusillum* in airmail from the Canal Zone.

Uromyces fabae on lentils in cargo from Chile.

Uromyces trifolii on Persian clover leaf and seed in mail from Iraq.

NEMATODES

The oat nematode (*Heterodera avenae*) was intercepted a total of 18 times from the following countries: Czechoslovakia, Denmark, England, France, Germany, Japan, Netherlands, and Portugal. These interceptions were taken from soil and soil with the following: Amaryllis and kafirlily, automobiles, chrysanthemum, dahlia, gladiolus, orchid, rutabaga turnip, strawberry, and unknown plants.

The golden nematode (*Heterodera rostochiensis*) was intercepted a total of 82 times from: Argentina, Azores, Belgium, Canary Islands, England, France, Germany, Ireland, Mexico, Netherlands, Norway, Peru, Poland, Scotland, Sweden, and an unknown country. These interceptions were taken from soil samples and from soil with Army tanks, new and used automobiles, bulbs, other plant material, and vegetables.

Other nematodes of special interest were:

Anguina tritici on wheat in baggage from Italy.

Criconeimoides informe on unidentified plant in baggage from Mexico.

Gothholdsteineria goodeyi on celery in stores from Norway, in soil with leek in stores from Germany, in soil with carrot in stores from the Netherlands, and in soil with plants in air baggage from Ireland.

Helicotylenchus erythrinae in soil with juniper and mountainash plants in air baggage from Finland.

Helicotylenchus nannus in beet in stores from Ceylon and in soil in air baggage from the American Virgin Islands.

Heterodera humuli(?) in soil with hops in airmail from Yugoslavia.

Heterodera punctata(?) in soil with yam in stores from Japan.

Hoplolaimus proporicus in soil with palm in air baggage from Nicaragua.

Pratylenchus brachyurus in soil with roots of miscellaneous plants in aircargo from British Honduras and in potato tubers in stores from Brazil.

Pratylenchus coffeae in dahlia in mail from the Union of South Africa.

Pratylenchus convallariae in lily-of-the-valley in baggage from England and in cargo from Denmark.

Radopholus similis on India banana in baggage from Hawaii. *R. similis*(?) in soil with miscellaneous plant roots in air baggage from Panama.

Tylenchorhynchus dubius in begonia in air baggage from Belgium, in soil with carrot in stores from the Netherlands, and in soil with miscellaneous plants in air baggage from Italy.

Tylenchorhynchus leptus in soil with tarragon plant in air baggage from France and in soil with juniper and mountainash plants in air baggage from Finland.

Tylenchorhynchus nothus in soil with horseradish in stores from Denmark.

Tylenchus thornei in soil with plant in baggage from Mexico.

Xiphinema americanum in soil with *Beaucarnea* sp. in cargo from Mexico.

The following species of *Meloidogyne* were intercepted from various bulbs, corms, plants, roots, and vegetables: *Meloidogyne arenaria*, *M. arenaria thamesi*, *M. hapla*, *M. incognita*, *M. incognita acrita*, and *M. javanica*. They were intercepted from the following countries: Algeria, Argentina, Australia, Barbados, Brazil, Canada, Canal Zone, Ceylon, Chile, Colombia, Cuba, Czechoslovakia, Dominican Republic, Egypt, England, France, French West Africa, Germany, Guatemala, Honduras, Hong Kong, India, Israel, Italy, Japan, Mexico, Netherlands, New Guinea, New Zealand, Peru, Puerto Rico, Spain, Trinidad, and the Union of South Africa.

INCOMPLETELY DETERMINED PESTS

Specific determinations are sometimes impossible or impracticable due to the stage or condition of the insects or pathogens, or the fact that they are undescribed. Many of these pests may be of economic importance, hitherto unreported from the United States, unknown for the host plant, or unreported from the country of origin. As a matter of record they are included in this separate list, but not in the table. During the fiscal year 1959 there were 2,603 insects and 852 diseases and nematodes, or a total of 3,455 incompletely determined interceptions which are considered to be potential pests.

FRUIT FLIES

There were 181 fruit fly interceptions which were incompletely determined as follows:

Anastrepha sp., possibly *acris* Stone, at Miami, Fla., an adult in an airplane from Central America.

Anastrepha sp., probably *fraterculus* (Wied.), at Miami, Fla., in coffee berries in air baggage from Colombia; and in purple mombin in air baggage from Costa Rica.

Anastrepha sp., possibly *ludens*, at Brownsville, Tex., in orange and sweet lime in baggage from Mexico; at Nogales, Ariz., in orange and mango in baggage from Mexico; and at Tampa, Fla., in orange in air quarters from El Salvador.

Anastrepha sp., possibly *mombinpraeoptans*, at El Paso, Tex., in guava in baggage from Mexico; at Key West, Fla., in mango in air baggage and baggage from Cuba; at Miami, Fla., in mango and purple mombin in air baggage from Cuba, Ecuador, Guatemala, and Nicaragua; at New Orleans, La., in guava in air baggage from Guatemala, and in mango and yellow mombin in air baggage from Venezuela; at New York, N.Y., in mango in air baggage from Jamaica and in baggage from Trinidad; and at San Pedro, Calif., in yellow mombin in air baggage from Nicaragua.

Anastrepha sp., probably *serpentina*, at Brownsville, Tex., in mamey sapote in air baggage from Nicaragua; at El Paso, Tex., in mamey sapote in baggage from Mexico; and at Miami, Fla., in mamey in air baggage from Cuba, and in sapodilla in air baggage from Curacao, N.W.I.

Anastrepha sp., probably *striata*, at El Paso, Tex., in guava from Mexico; at Hoboken, N.J., in guava in cargo from Panama; at Laredo, Tex., in guava in baggage from Mexico; at New Orleans, La., in guava in air baggage from Costa Rica; at Nogales, Ariz., in guava in baggage from Mexico; and at Roma, Tex., in guava in baggage from Mexico.

Anastrepha sp., probably *suspensa*, at Chicago, Ill., in guava in air mail from Puerto Rico; and at San Juan, P.R., in guava in air baggage from the Dominican Republic and preflight inspection of baggage from Puerto Rico.

Anastrepha sp. was intercepted a total of 80 times at the following ports: Arlington, Va., Baltimore, Md., Brownsville, Tex., Charleston, S.C., Eagle Pass, Tex., El Paso, Tex., Galveston, Tex., Hoboken, N.J., Laredo, Tex., Miami, Fla., Mobile, Ala., New Orleans, La., New York, N.Y., Nogales, Ariz., San Juan, P.R., San Pedro, Calif., San Ysidro, Calif., and Tampa, Fla. The hosts were: Apple, cherimoya, coffee berries, grapefruit, guava, lime, loquat, mamey, mamey sapote, mango, *Matisia cordata*, orange, passionflower fruit, peach, pear, plum, pummelo, purple mombin, quince, red mombin, rose-apple, sapodilla, soursop, star-apple, tropical almond, unidentified fruit, and yellow mombin. These interceptions were taken from air baggage, aircargo, air quarters, air stores, baggage, cargo, quarters, and stores from: Brazil, British Honduras, Chile, Colombia, Costa Rica, Cuba, Dominican Republic, Ecuador, El Salvador, Guatemala, Honduras, Jamaica, Mexico, Nicaragua, Panama, Peru, Puerto Rico, Trinidad, an unknown origin, and Venezuela.

Ceratitis sp., probably *capitata*, at New York, N.Y., in apricot in cargo from the Union of South Africa.

Dacus sp. at Boston, Mass., in cucumber in stores from French West Africa and in white marrow in stores purchased in Aden, probably of Egyptian origin; at Honolulu, Hawaii, in Arabian coffee in preflight inspection of air baggage, in mango in air quarters from the Philippines, and in stores from Borneo, in passionflower fruit in preflight inspection of air baggage, in sour cherry in air stores from Australia, and in Cattley guava and guava in aircargo from the Philippines; and at San Pedro, Calif., in fruit of Solanaceae in baggage from Hawaii.

Neotephritis sp. at Washington, D.C., in escorsionera seed heads in mail from Mexico.

Rhagoletis sp., possibly *cerasi*, at Detroit, Mich., in cherries in air baggage and air quarters from an unknown origin.

Rhagoletis sp. at Brownsville, Eagle Pass, and Laredo, Tex., in apple in baggage from Mexico; at New York, N.Y., in cherry in air stores from an unknown origin; at Nogales, Ariz., in tejocote in baggage from Mexico; at San Antonio, Tex., in apple in aircargo from Mexico; and at Washington, D.C., in *Carthamus glaucus* seed in cargo from Iraq.

Tephritinae at Honolulu, Hawaii, attached to receptacle of chrysanthemum flower in air quarters from Japan.

Twenty-four interceptions identified to family only, Tephritidae, were taken from air quarters, Araceae fruit, avocado, cactus leaf, carnation flower, *Centaurea* sp., chestnut, dried pepper, globe artichoke, green fig and bark of fig cutting, *Ochrosia elliptica*, orange, pear, tomato, and wheat seed. These were found in air baggage, air quarters, baggage, cargo, mail, quarters, and stores from: Argentina, Brazil, Formosa, France, Haiti, Hawaii, Iraq, Italy, Liberia, Mexico, Spain, Trinidad, the Union of South Africa, and an unknown origin.

Tephritis sp. at Washington, D.C., in *Podolepis aristata* seeds in aircargo from Australia. Possibly *Tephritis* or a related genus at Eagle Pass, Tex., on chrysanthemum flower in cargo from Mexico.

INSECTS OTHER THAN FRUIT FLIES

Among the incompletely determined insects of interest, other than fruit flies, were the following:

Agriotes sp., probably *lineatus* (L.) (Elateridae), at Chicago, Ill., in soil with shamrock plant in mail from England.

A new species of aleyrodid, genus near *Aleurodicus*, in the subfamily Aleurodicinae, at Brownsville, Tex., on orchid plants in cargo from Mexico.

Aleuroplatus sp. (Aleyrodidae), undescribed, at Nogales, Ariz., on bougainvillea in baggage from Mexico.

Aleyrodidae, apparently a new genus and new species, at Washington, D.C., on *Citropsis* sp. leaf in mail from the Belgian Congo.

Allochorhynchus sp. (Curculionidae), an interesting weevil, at Brownsville, Tex., on *Dioon edule* in cargo from Mexico.

Blastodacna sp. (Cosmopterygidae) at Hoboken, N.J., on *Crataegus* sp. stem in cargo from the Netherlands.

A mite, *Brevipalpus* n. sp. (Tenuipalpidae) at Jacksonville, Fla., on lemon in stores from Panama.

Byturus sp., probably *tomentosus* (F.) (Byturidae), at New York, N.Y., in raspberries in air baggage from England.

Cladius sp., probably *difformis* (Panz.) (Tenthredinidae), at Chicago, Ill., on rose in airmail from Germany; and at New York, N.Y., on rose in air baggage from England.

Cleonus sp. (Curculionidae) at Houston, Tex., in beet in stores from France; and at New York, N.Y., in beet in stores from Italy.

Curculionidae, genus unknown, at Philadelphia, Pa., in Kola nut in quarters from Sierra Leone.

Diaprepes sp., evidently *famelicus* (Ol.) (Curculionidae), at New York, N.Y., on lily in aircargo from Bermuda.

Dinomachellus sp., near *maculatus* Scudder (Lygaeidae), genus new to U.S. National Museum collection, at Washington, D.C., with Labiatae seed in aircargo from Angola.

Discocephalinae (Pentatomidae), not in U.S. National Museum collection, probably a new genus and new species, at Miami, Fla., on orchid plant in baggage from Guatemala.

Epicaerus sp. (Curculionidae) at Brownsville, Tex., in potato tuber in baggage and stores from Mexico; at Houston, Tex., in potato in stores from Mexico; and at Laredo, Tex., in potato in baggage from Mexico.

Eriosoma sp. (Aphidae) at Honolulu, Hawaii, on apple in cargo from Tasmania and in air stores and stores from Japan; and at New York, N.Y., on apple in baggage from England.

Eulia sp. (Tortricidae) at New York, N.Y., in nectarines, peaches, and plums in cargo from Chile.

Gonipterus sp. (Curculionidae) at New York, N.Y., on protea flowers in aircargo from the Union of South Africa.

A curculionid, probably Gymnaetrinae, a very interesting specimen not in the U.S. National Museum, at New York, N.Y., with apricot in cargo from the Union of South Africa.

Gymnandrosoma sp., near or *aurantianum* da Costa Lima (Olethreutidae), at Houston Tex., in orange in stores from Peru.

Haplothrips sp., near *setiger* Pr. (Phlaeothripidae) at New York, N.Y., on buttercup flowers in aircargo from Israel.

"*Lecanium*" sp. (Coccidae) at Washington, D.C., on Mazzard cherry in airmail from Iran.

Lepidosaphes sp., probably *camelliae* Hoke (Coccidae), at Washington, D.C., on *Camellia sasanqua* 'Asahi-Boton' in airmail from Japan.

Lixus sp. (Curculionidae) at New York, N.Y., in beet in stores from Italy; and at Philadelphia, Pa., in beet in stores from Egypt.

Meranoplus sp. (Formicidae), a species not represented in the U.S. National Museum collection, at Washington, D.C., in moss with unidentified plant in aircargo from Nepal.

Mormidea n. sp. (Pentatomidae) at Laredo, Tex., on bromeliad plant in cargo and orchids in baggage and cargo from Mexico; at New York, N.Y., on orchid plants in aircargo from Cuba; and at San Pedro, Calif., with Orchidaceae shakeout in aircargo from Ecuador.

Psyllidae, probably subfamily Pauropsyllinae, new genus near *Paurocephala* new species, very unusual, at Chicago, Ill., on roses in air quarters from Mexico.

Phenacoccus sp. (Coccidae), not placed as described species. at New York, N.Y., on snowdrop bulbs in cargo from Turkey; and at Washington, D.C., on shore drugsquill bulbs in mail from the Isle of Crete.

Phloeosinus sp., possibly *osumiensis* Muray. (Scolytidae), at Miami, Fla. on "cedar" dunnage from Japan.

Premnotrypes sp. (Curculionidae) at Galveston, Tex., in potato in stores from Peru; at Miami, Fla., in potato in air baggage from Peru; at Mobile, Ala., in potato in stores from Peru; at New Orleans, La., in potato in stores from Ecuador and Peru; and at New York, N.Y., in potato in air baggage from Colombia.

Psylla sp. (Psyllidae) at Chicago, Ill., on pussywillow cuttings in mail from Germany; at Honolulu, Hawaii, on chrysanthemum in baggage from Japan; and at New York, N.Y., on birch leaves and twigs in air baggage from Finland.

Psylliodes sp. (Chrysomelidae) at Boston, Mass., and Galveston, Tex., in turnip in stores from France; and at New York, N.Y., in turnip in stores from Norway.

Pyraustidae, a species not represented by larval stage in the U.S. National Museum collection, at New York, N.Y., on jasmine petals in aircargo from France.

Rhyacionia sp., presumably *duplana* (Hbn.) (Lethreutidae), at Honolulu, Hawaii, on terminal bud of 2-needle pine in air baggage from Japan.

Rhynchites sp. (Curculionidae) at Boston, Mass., in cherry in air stores from France; and at Washington, D.C., in pear in air baggage from the Union of Soviet Socialist Republics.

Rolaspis sp. (Coccidae), does not match any species thus far assigned to the genus, at Dallas, Tex., on leaves and stem of unidentified plant in mail from Southern Rhodesia.

Saissetia sp., closest to *S. exoleta* DeLotto but distinct (Coccidae), at Washington, D.C., on Gabon cherryorange in mail from the Belgian Congo.

Sitona sp. (Curculionidae) at Washington, D.C., on *Medicago* sp. plants with soil in mail from Greece.

Strophosomus sp. (Curculionidae) at Chicago, Ill., in forest litter with cut carnations in air baggage from Germany; and at New York, N.Y., with heather in air baggage from Germany, and with mixed cut flowers in aircargo from England.

Tetraleurodes sp. (Aleyrodidae), undescribed, at Honolulu, Hawaii, on teatree in mail from Australia.

Thrips sp. (Thripidae), not familiar species, at Chicago, Ill., on cut lilac in air quarters from Germany.

DISEASES

Incompletely determined pathogens worthy of mention were:

Ceratocystis sp. at New York, N.Y., on *Manihot* sp. twigs in air baggage from Trinidad.

Cercospora sp. at Philadelphia, Pa., on *Chamaedorea* sp. leaf in aircargo from Mexico.

Corynespora sp., probably *cassiicola* (Berk. & Curt.) Wei, at Brownsville, Tex., on tuftroot stems in cargo from Mexico.

Elsinoe sp. at Washington, D.C. on *Rhynchosia* sp. seed pods in aircargo from Panama. As far as is known, this is unreported on this host.

Hendersonia sp. at Laredo, Tex., on *Euphorbia* sp. stem in baggage from Mexico. None has been reported on this host as far as is known.

Nectria sp. at Nogales, Ariz., on yucca leaves in baggage from Mexico.

Phyllosticta sp. at Hoboken, N.J., on pachysandra leaf in cargo from England; and at New York, N.Y., on red escallonia leaf in aircargo from Brazil.

Phyllostictina sp. at Brownsville, Tex., on tuftroot in cargo from Mexico; and at Laredo, Tex., on *Beaucarnea* sp. in cargo from Mexico.

Placosphaeria sp. at New York, N.Y., on common screwpine seed in aircargo from Bermuda.

Septoria sp. at Honolulu, Hawaii, on lily bloom stalks in air baggage from Japan.

Sphenospora sp., probably *kevorkianii* Linder, at Miami, Fla., on *Epidendrum* sp. leaf in aircargo from the Canal Zone, and on *Oncidium variegatum* leaf in air baggage from the Dominican Republic.

Sphenospora sp., probably *mera* Cummins, at Laredo, Tex., on *Odontoglossum* sp. in mail from Mexico.

Sphenospora sp. at Laredo, Tex., on *Odontoglossum* sp. in baggage from Mexico; and at Miami, Fla., on *Oncidium pusillum* leaf in airmail from the Canal Zone.

Uredo n. sp. at Laredo, Tex., on *Ornithocephalus bicornis* in cargo from Mexico.

NEMATODES

Aphelenchoides sp., probably *besseyi* Christie, at Miami, Fla., on oncidium leaf in aircargo from El Salvador.

Aphelenchoides sp. at Baltimore, Md., in soil with carrot root in stores from the Netherlands; at Boston, Mass., in soil with bulbs and plants in air baggage from the Azores, in soil with carrots in stores from Argentina and in soil with sedum plants in air baggage from France; at El Paso, Tex., in amaryllis bulbs in baggage from Mexico; at Hoboken, N.J., in *Bletilla hyacinthina* stem sheath in cargo from the Netherlands, in dahlia roots in mail from France and Germany and in cargo from Japan, and in *Heuchera* 'Ibis' leaves and stems in cargo from the Netherlands; at New York, N.Y., in soil in aircargo from Germany; at Nogales, Ariz., in violet plants in baggage from Mexico; at Norfolk, Va., in rice straw rugs in cargo from Japan; and at San Ysidro, Calif., in *Limonium* sp. roots and in soil about mint plants in baggage from Mexico.

Aphelenchus sp. at Baltimore, Md., in celery root in stores from France; at Buffalo, N.Y., in soil in baggage from Canada; at El Paso, Tex., in soil with cactus plants in baggage from Mexico; at Miami, Fla., in soil on roots of arrowroot plant in baggage from Cuba; and at Nogales, Ariz., in soil with tuberose bulbs in baggage from Mexico.

Criconema n. sp. at Nogales, Ariz., in soil with tuberose bulbs in baggage from Mexico.

Criconema sp. at Laredo, Tex., in soil with gardenia plants in baggage from Mexico.

Criconemoides n. sp. at Laredo, Tex., in soil with gardenia plants in baggage from Mexico.

Criconemoides sp. at Laredo, Tex., in soil with bromeliad plants in cargo from Mexico; at Miami, Fla., in soil on roots of *Pilea* sp. (?) in air baggage from Guatemala; at Tampa, Fla., in soil in air baggage from Cuba; and at Ysleta, Tex., in soil with viburnum plants in baggage from Mexico.

Ditylenchus sp., probably *destructor*, at Hoboken, N.J., in dahlia roots in mail from France, and in tigerflower bulbs in mail from the Netherlands.

Ditylenchus sp., undescribed, at New York, N.Y., in lily-of-the-valley pips in cargo from Denmark.

Ditylenchus sp. at El Paso, Tex. in soil with Liliaceae plants in baggage from Mexico; at Hoboken, N.J., in dahlia roots in mail from Germany, and in narcissus bulbs in mail from Denmark; at New York, N.Y., in lily-of-the-valley pips in cargo from Denmark; at Nogales, Ariz., in garlic in cargo from Mexico; and at San Pedro, Calif., in narcissus bulbs in cargo from Japan.

Gotholdsteineria sp. at Baltimore, Md., in soil with carrot and turnip roots in stores from the Netherlands, and in soil with turnip roots in stores from England; at Boston, Mass., in dahlia roots in air baggage from Canada, and in soil with tarragon plant in air baggage from France; and at El Paso, Tex., in soil with unidentified plant in baggage from Mexico.

Helicotylenchus sp., undescribed, at Miami, Fla., in soil with miscellaneous plants in aircargo from British Honduras.

Helicotylenchus sp. at Boston, Mass., in soil with bulbs, dahlia roots, and unidentified plants in air baggage from Portugal, in soil with *Echeveria* sp. plants in air baggage from Albania, in soil with rubber tree plant in quarters from the Union of South Africa, and in soil with sansevieria plants in quarters from French Equatorial Africa; at Eagle Pass, Tex., in soil with begonia, caladium, and other plants in baggage from Mexico; at El Paso, Tex., in soil with plant in baggage from Mexico; at Laredo, Tex., with anthurium roots in baggage from Mexico, with roots of unidentified grass in mail from

Mexico, in soil sample and in soil with agave, begonia, bougainvillea, codiaeum, fern, heliconia, hibiscus, jasmine, Liliaceae, philodendron, and unidentified plants, avocado and mango seedlings, and narcissus bulbs in baggage from Mexico, and in soil with *Beaucarnea* sp. and bromeliad plants in cargo from Mexico; at Miami, Fla., in soil on breadfruit roots in aircargo from Cuba, in soil on orchid roots in air baggage from Brazil, and in soil with miscellaneous plants in air baggage from Bolivia and Panama; and at Nogales, Ariz., in soil with asparagus fern in baggage from Mexico.

Heterodera sp., probably *avenae*, at Port Everglades, Fla., in soil on new automobiles in cargo from France.

Heterodera sp., probably *punctata*, at Miami, Fla., in soil with automobile in cargo from Germany.

Heterodera rostochiensis group, may be *H. tabacum* Lownsbery and Lownsbery, at El Paso, Tex., in soil with begonia plant in baggage from Mexico.

Heterodera sp., probably *trifolii* (Goffart) Oostenbrink, at Mobile, Ala., in soil on automobiles in cargo from Germany.

Heterodera sp., probably *weissi* Steiner, at Wilmington, N.C., in soil with used bagging in cargo from Canada.

Heterodera sp. was intercepted 263 times at 27 ports from the following locations: Argentina, Azores, Belgium, Canada, Chile, Czechoslovakia, Denmark, Egypt, England, Europe (country(?)), France, Germany, Greece, Hawaii, Hong Kong, Indonesia, Ireland, Italy, Japan, Lebanon, Mexico, Morocco, Netherlands, New Zealand, Peru, Poland, Portugal, Rumania, Scotland, Spain, Sweden, Turkey, Union of South Africa, an unknown origin, Uruguay, and Yugoslavia. These interceptions were taken from sand ballast, soil as such, and soil with the following: Army vehicles, canned ham cases, clubmoss, conex boxes, cut flowers, earth-moving equipment, ferns, gladiolus corms, lily-of-the-valley pips, miscellaneous bulbs, cuttings, plants, roots, and tubers, new and used automobiles, old bagging, shoes, sod, truffles, and vegetables.

Hoplolaimus sp., an undescribed species, might be considered a new genus, at Laredo, Tex., in soil with cuttings of various plants in baggage from Mexico.

Meloidogyne sp., probably *hapla*, at New York, N.Y., in *Pyrethrum* sp. roots in aircargo from Scotland.

Meloidogyne sp., close to *incognita acrita*, possibly a new species, at Miami, Fla., with heliconia root in air baggage from Cuba.

Meloidogyne sp. at Boston, Mass., with miscellaneous plants in air baggage from Bermuda, in soil with fig plant in air baggage from Italy; at Eagle Pass, Tex., with begonia and other potted plants in baggage from Mexico; at Hoboken, N.J., in achimenes tubers in mail from India, in African violet roots in baggage from Brazil, in *Anemone hepatica* roots in mail from England, in *Artemisia* sp. roots in mail from Germany, in astilbe roots in cargo from the Netherlands; in begonia cuttings in mail from France and in begonia roots and stems in mail from England, in caladium in cargo from Guatemala, in calla lily in cargo from France and Italy, in clematis in cargo from the Netherlands and in mail from England, in *Colocasia* sp. tuber in mail from St. Kitts, in dahlia in mail from Australia, in periwinkle roots in mail from Canada, in *Thalictrum dipterocarpum* 'Hewitt's Double' in cargo from the Netherlands, and in *Thomsonia nepalensis* tubers in cargo from India; at Laredo, Tex., in banana roots and in caladium in cargo from Mexico; at Miami, Fla., in soil on roots of arrowroot plant in baggage from Cuba; at New Orleans, La., in sweetpotato in stores from Peru; and at San Pedro, Calif., in roots of an unidentified plant in air baggage from Costa Rica.

Paraphelenchus sp. at San Diego, Calif., in garlic bulb in stores from Japan.

Pratylenchus sp., probably *penetrans*, at New York, N.Y., in *Aconitum napellus* roots in aircargo from the Netherlands.

Pratylenchus sp., near *penetrans*, at New York, N.Y., in clematis and *Helleborus odoratus* roots in aircargo from the Netherlands.

Pratylenchus sp., undescribed, at New York, N.Y., in yam tubers in baggage from Trinidad.

Pratylenchus sp. at Boston, Mass., in soil with *Colocasia* sp. tubers in air baggage from the Azores; at Laredo, Tex., in soil with miscellaneous plants in baggage from Mexico; at Hoboken, N.J., in anthurium roots in mail from Barbados, in clematis in cargo from the Netherlands, in dahlia in cargo from Japan and in mail from Germany, in bleedingheart in cargo from the Netherlands, in iris in cargo from Japan and in mail from England and the Netherlands, and in torchlily in cargo from the Netherlands; at New York, N.Y., in aconitum, broom, clematis, *Helleborus* sp., and larkspur roots in aircargo from the Netherlands, in *Pulmonaria* sp. roots in aircargo from England, in soil with malanga tuber in cargo from Cyprus, and in yam root in air baggage from Jamaica; and at Tampa, Fla., in soil in air baggage from Cuba.

Psilenchus sp., at El Paso, Tex., in soil with Liliaceae and unidentified plants in baggage from Mexico; and at Nogales, Ariz., in soil with asparagus fern and tuberose bulbs in baggage from Mexico.

Rotylenchulus sp. at San Diego, Calif., in soil with codiaeum in baggage from Nicaragua.

Rotylenchus n. sp. at Boston, Mass., in soil with seed potatoes in air baggage from Scotland.

Rotylenchus sp. at Boston, Mass., in soil with lily-of-the-valley plants in air baggage from England, and in soil with sedum plant in air baggage from Spain.

Scutellonema sp. at Boston, Mass., in soil with amaryllis, "bay" trees, begonias, and gladiolus corms in air baggage from the Azores.

Tylenchorhynchus sp., near *capitatus*, at Brownsville, Tex., in soil with palm plant in baggage from Mexico.

Tylenchorhynchus sp. at Baltimore, Md., in soil with turnip root in stores from England; at Boston, Mass., in sod in mail from Canada, in soil with unidentified roots in air baggage from an unknown origin, and in soil with strawberry plants in air baggage from France; at El Paso, Tex., in soil with begonia plant in baggage from Mexico; at Laredo, Tex., in soil with agave plants, avocado seedling, bougainvillea plants, jasmine, and unidentified plants in baggage from Mexico; and at Norfolk, Va., in rice straw rugs in cargo from Japan.

Tylenchus sp. at Boston, Mass., in aubrieta plants in air baggage from England; at El Paso, Tex., in soil with unidentified plants in baggage from Mexico; at Laredo, Tex., in soil with tractor in cargo from Mexico; at Miami, Fla., in soil with unidentified plants in air baggage from Cuba; at New York, N.Y., in soil in aircargo from Germany; at San Pedro, Calif., in lily-of-the-valley in cargo from Denmark; and at Ysleta, Tex., in soil with unidentified plant in baggage from Mexico.

Xiphinema sp. at Boston, Mass., in ginger root in baggage from Liberia and in soil with sedum plant in air baggage from Spain; at Laredo, Tex., in soil sample and in soil with avocado seedling, begonia, jasmine, and unidentified plants in baggage from Mexico; and at San Juan, P.R., in soil with citrus roots in preflight inspection of air baggage.

Summary of Numbers of Interceptions Listed in Main Table

Country	Insect	Disease	Country	Insect	Disease
	Number	Number		Number	Number
Africa:			Australasia—Continued		
Africa (country(?))	0	2	Palmyra Island	1	0
Algeria	1	1	Palmyra Island(?)	1	0
Belgian Congo	2	0	Philippines	40	9
Canary Islands	1	1	South Pacific	7	0
Cape Verde Islands	1	0	Tahiti	4	0
East Africa (country(?))	1	0	Wake Island	1	0
Egypt	15	1	West Pacific	2	0
French West Africa	1	3	Europe:		
Kenya	4	0	Austria	1	7
Liberia	4	0	Azores	7	4
Libya	11	0	Belgium	18	8
Morocco	73	0	Czechoslovakia	1	9
Morocco(?)	2	0	Denmark	3	7
Mozambique	0	4	England	114	63
Nigeria	1	0	Europe (country(?))	4	1
Nigeria(?)	1	0	Finland	4	2
North Africa (country(?))	4	0	France	66	20
Sierra Leone	1	0	Germany	41	57
Tanganyika	0	1	Germany(?)	1	0
Tunisia	3	0	Great Britain (country(?))	2	0
Union of South Africa	55	83	Greece	32	1
Asia:			Hungary	1	0
Afghanistan	2	1	Ireland	155	6
Burma	1	0	Italy	344	29
Ceylon	2	5	Luxembourg	1	0
China	7	23	Malta	6	0
Cyprus	1	1	Netherlands	61	48
Federation of Malaya	4	2	Northern Ireland	2	0
Formosa	23	14	Norway	3	2
Hong Kong	10	55	Poland	12	1
India	12	9	Portugal	34	2

Hosts and Insects

- ACER:
Aceria macrochelus (Acarina)
A. macrorhynchus (Acarina)
- ACHRAS:
Anastrepha serpentina (Diptera)
Chrysomphalus personatus (Homoptera)
- ADENANTHERA:
Stephanoderes perkinsi (Coleoptera)
- AGAPANTHUS:
Iridomyrmex pilifer (Hymenoptera)
- AGAVE:
Batrachedra linaria (Lepidoptera)
Chrysomphalus agavis (Homoptera)
Gymnococcus agavium (Homoptera)
- ALLIUM CEPA:
Aceria tulipae (Acarina)
Lygaeus albo-ornatus (Hemiptera)
Myzus ascalonicus (Homoptera)
- ALLIUM PORRUM:
Acrolepia assectella (Lepidoptera)
Helix aspersa (Mollusca)
- ALLIUM SATIVUM:
Brachycerus abidentatus (Coleoptera)
B. algitus (Coleoptera)
Monomorium destructor (Hymenoptera)
- ALLIUM SP.:
Bradybaena similis (Mollusca)
- ALLOTHEROPSIS:
Chirothrips pretorianus (Thysanoptera)
Haplothrips gowdeyi (Thysanoptera)
- ALPINIA:
Pentalonia nigronervosa (Homoptera)
Pheidole megacephala (Hymenoptera)
Pulvinaria psidii (Homoptera)
Spodoptera mauritia (Lepidoptera)
- ALYXIA:
Ceroplastes rubens (Homoptera)
Coccu viridis (Homoptera)
Pinnaspis uniloba (Homoptera)
- AMARYLLIS:
Selenothrips rubrocinctus (Thysanoptera)
- ANANAS:
Pheidole megacephala (Hymenoptera)
Platynota rostrana (Lepidoptera)
Ribua innoxia (Lepidoptera)
"Targionia" bromilae (Homoptera)
- ANEMONE:
Thrips angusticeps (Thysanoptera)
- ANNONA:
Bephrata maculicollis (Hymenoptera)
Cerconota anonella (Lepidoptera)
Ctenoglyphus canestrinii (Acarina)
Pseudococcus lilacinus (Homoptera)
- ANSELLIA:
Monomorium destructor (Hymenoptera)
Myzus anselliae (Homoptera)
- ANTHISTIRIA:
Agrostothrips guillarmodi (Thysanoptera)
- ANTHURIUM:
Bradybaena similis (Mollusca)
Ceroplastes rubens (Homoptera)
Chrysomphalus reniformis (tentative) (Homoptera)
Conoderus exsul (Coleoptera)
Geotomus pygmaeus (Hemiptera)
Iridomyrmex pilifer (Hymenoptera)
Myrmecophila americana (Orthoptera)
Pinnaspis buxi (Homoptera)
Selenothrips rubrocinctus (Thysanoptera)
Spodoptera mauritia (Lepidoptera)
Vinsonia stelleri (Homoptera)
Xiphidiopsis lila (Orthoptera)
- ANTHIRRHINUM:
Haplothrips gowdeyi (Thysanoptera)
Iridomyrmex humilis (Hymenoptera)
- APIUM:
Arion hortensis (Mollusca)
Euleia heraclei (Diptera)
- APONOGETON:
Monomorium destructor (Hymenoptera)
- ARACEAE:
Hercynothrips bicornis (Thysanoptera)
- ARACHIS:
Caryedon fuscus (Coleoptera)
Trogoderma granarium (Coleoptera)
- ARAUCARIA:
Laspeyresia araucariae (?) (Lepidoptera)
Tyrophagus infestans (Acarina)
- ARBUTUS:
Acanthosoma haemorrhoidale (Hemiptera)
- ARECA:
Chrysomphalus propinquus (Homoptera)
- ARGYREIA:
Sybra alternans (Coleoptera)
- ARMORACIA:
Baris lepidii (Coleoptera)
- ARTOCARPUS:
Aspidiotus destructor (Homoptera)
- ASTER:
Haplothrips clariseta (?) (Thysanoptera)
- AVERRHOA:
Monomorium destructor (Hymenoptera)
- BAMBOO:
Antonina bambusae (Homoptera)
Asterolecanium bambusae (Homoptera)
Minthea rugicollis (Coleoptera)
Odonaspis greenii (Homoptera)
Trogosylus prostomoides (Coleoptera)
- BAMBUSA:
Odonaspis lobulatus (Homoptera)
- BAUHINIA:
Gibbrobruchus speculifer (Coleoptera)
- BEGONIA:
Limothrips denticornis (Thysanoptera)
- BETA:
Gnorimoschema ocellatella (Lepidoptera)
- BETULA:
Chionaspis salicis (Homoptera)
- BIXA:
Acanthoscelides bixae (Coleoptera)
- BLANDFORDIA:
Taeniothrips hawaiiensis (Thysanoptera)
- BLIGHIA:
Monomorium destructor (Hymenoptera)
- BOERLAGIODENDRON:
Pulvinaria psidii (Homoptera)
- BOUGAINVILLEA:
Haplothrips gowdeyi (Thysanoptera)
- BRASSA VOLA:
Furcaspis bifurmis (Homoptera)
Pseudischnaspis alienus (Homoptera)
- BRASSIA:
Asterolecanium epidendri (Homoptera)
Vinsonia stelleri (Homoptera)
- BRASSICA CHINENSIS:
Cicadella viridis (Homoptera)
Lophoteles hirsutus (Coleoptera)
Psylliodes punctifrons (Coleoptera)
- BRASSICA OLERACEA BOTRYTIS:
Deroceras reticulatum (Mollusca)
Phytomyza rufipes (Diptera)
- BRASSICA OLERACEA BULLATA:
Deroceras reticulatum (Mollusca)
Phytomyza rufipes (Diptera)
- BRASSICA OLERACEA CAPITATA:
Arion circumscriptus (Mollusca)
A. hortensis (Mollusca)
Deroceras reticulatum (Mollusca)
Euborellia stali (Dermaptera)
Evergestis forficalis (Lepidoptera)
Eysarcoris guttiger (Hemiptera)
Helicella maritima (Mollusca)
Limax maximus (Mollusca)
Manestira brassicae (Lepidoptera)
Milax gagates (Mollusca)
Nysius raphanus (Hemiptera)
Phytomyza rufipes (Diptera)
- BRASSICA RAPA:
Bradybaena similis (Mollusca)
Helicella undalis (Lepidoptera)
- BRASSICA SP.:
Thrips angusticeps (Thysanoptera)
- BROMELIA:
Acalymma trivittata (Coleoptera)
Althos obscurus (Hemiptera)
Dysdercus mimulus (Hemiptera)
Ribua innoxia (Lepidoptera)

Hosts and Insects—Continued

BROMELIAD:

- Althos obscurus* (Hemiptera)
- Capaneus tetricus* (Hemiptera)
- Cryphula apicatus* (Hemiptera)
- Deroceras reticulatum* (Mollusca)
- Furcaspis bifurcata* (Homoptera)
- Galgula punctifer* (Hemiptera)
- Iridomyrmex iniquus* (Hymenoptera)
- Phelypera distigma* (Coleoptera)
- Pygocorypha sallei* (Orthoptera)
- Valtissius diversus* (Hemiptera)
- Xestolabus corvinus* (Coleoptera)

BROUGHTONIA:

- Asterolecanium epidendri* (Homoptera)
- Vinsonia stellifera* (Homoptera)

BROWNEA:

- Dercynus micronyx* (Coleoptera)

BULBOPHYLLUM:

- Asterolecanium epidendri* (Homoptera)

BUXUS:

- Aspidiotus britannicus* (Homoptera)
- Eriophyes canestrinii* (Acarina)

CABOMBA:

- Phleoid megacephala* (Hymenoptera)

CACTUS:

- Cecilioides acicula* (Mollusca)
- Dactylopius confusus* (Homoptera)
- Hesperolabops gelatops* (Hemiptera)
- Lepidosaphes philococcus* (Homoptera)

CAESALPINIA:

- Mimosestes dominicanus* (Coleoptera)

CAJANUS:

- Ancylostomia stercora* (Lepidoptera)
- Doru albipes* (Dermaptera)
- Fundella pellucens* (Lepidoptera)
- Maruca testulalis* (Lepidoptera)
- Neodryocetes guianae* (Coleoptera)

CALADIUM:

- Helix aspersa* (Mollusca)

CALLUNA:

- Acalypta parvula* (Hemiptera)
- Kleidocerys ericae* (?) (Hemiptera)
- Limothrips denticornis* (Thysanoptera)
- Micrelus ericae* (Coleoptera)
- Myrmedobia distinguenda* (Hemiptera)
- Taeniothrips atratus* (Thysanoptera)
- T. ericae* (Thysanoptera)
- Thrips flavus* (Thysanoptera)
- T. major* (Thysanoptera)
- Ulopa reticulata* (Homoptera)

CALOCARPUM:

- Anastrepha ludens* (Diptera)

CALOPHYLLUM:

- Ceratitis capitata* (?) (Diptera)

CAMELLIA:

- Aspidiotus degeneratus* (Homoptera)
- Chrysomphalus setiger* (?) (Homoptera)
- Helix aspersa* (Mollusca)
- Pulvinaria floccifera* (Homoptera)
- Sciocoris cursitans* (?) (Hemiptera)

CANAVALLA:

- Lampides boeticus* (Lepidoptera)
- Maruca testulalis* (Lepidoptera)
- Taeniothrips viticornis* (Thysanoptera)

CANNABIS:

- Helicella maritima* (Mollusca)

CAPISCUM:

- Deroceras reticulatum* (Mollusca)
- Gnorimoschema gudmannella* (Lepidoptera)
- Platynota rostrana* (Lepidoptera)
- Pulvinaria urticae* (Homoptera)
- Pyrausta nubilalis* (Lepidoptera)

CARAPA:

- Hypsiptyla ferrealis* (Lepidoptera)

CARICA:

- Aconophora sinanensis* (Homoptera)
- Brevipalpus phoenicis* (Acarina)
- Dacus dorsalis* (Diptera)
- Toxotrypana curvicauda* (Diptera)

CARTHAMUS:

- Orellia punctata* (Diptera)
- Trogoderma grassmani* (Coleoptera)

CASSIA:

- Aganactes indecora* (Lepidoptera)
- Caryedon fuscus* (Coleoptera)
- Ectomyelois muricis* (Lepidoptera)

CASTANEA:

- Curculio elephas* (Coleoptera)
- C. nucum* (Coleoptera)
- Laspeyresia splendana* (Lepidoptera)
- Tischeria complanella* (Lepidoptera)

CATASETUM (?):

- Vinsonia stellifera* (Homoptera)

CATTLEYIA:

- Asterolecanium epidendri* (Homoptera)
- Conchaspis orchidarum* (Homoptera)
- Eurytoma orchidearum* (Hymenoptera)
- Furcaspis bifurcata* (Homoptera)
- Pseudischaspis alienus* (Homoptera)
- Tenthecoris orchidearum* (Hemiptera)
- Vinsonia stellifera* (Homoptera)

CEDRUS:

- Megastigmus suspectus pinsapinis* (Hymenoptera)

CENTAUREA:

- Haplothrips gowdeyi* (Thysanoptera)
- Thrips imagnis* (Thysanoptera)

CEPHALOCEREUS:

- Erembergia insignis* (Lepidoptera)

CERATONIA:

- Ectomyelois ceratoniae* (Lepidoptera)

CHAENOMELES:

- Lepidosaphes conchiformis* (Homoptera)

CHAMAECYPARIS:

- Diaspis minima* (Homoptera)
- Orsilus depressus* (Hemiptera)

CHAMAEDOREA:

- Chelysoma variabilis* (Hemiptera)
- Chrysomphalus sphaeroides* (Homoptera)
- Colanertus nigrostris* (Coleoptera)
- Ferrisia virgata* (Homoptera)
- Metamasius hemipterus sericeus* (Coleoptera)
- Parisschenus expositus* (Coleoptera)
- P. flavolimbatus* (Coleoptera)

CHAMAEROPS:

- Dactylothrips uytlenboogaarti* (Coleoptera)

CHLOROPHYTUM:

- Aspidiotus excisus* (Homoptera)
- A. palmae* (Homoptera)

CHRYSANTHEMUM:

- Acalymma trivittata* (Coleoptera)
- Bryobia ehari* (Acarina)
- Coccus viridis* (Homoptera)
- Conoletus mexicanus* (Coleoptera)
- Frankliniella formosae* (Thysanoptera)
- Haplothrips gowdeyi* (Thysanoptera)
- Iridomyrmex humilis* (Hymenoptera)
- Lecanium corni* (Homoptera)
- Nysius raphanus* (Hemiptera)
- Thrips angusticeps* (Thysanoptera)
- T. flavus* (Thysanoptera)

CHRYSOPOGON:

- Agrostothrips guillarmodi* (Thysanoptera)

CICER:

- Trogoderma granarium* (Coleoptera)

CICHORIUM:

- Phytomyza rufipes* (Diptera)

CISSUS:

- Ferrisia virgata* (Homoptera)

Heterobostrychus aequalis (Coleoptera)
Xyloperthella crinitarsis (Coleoptera)
- LACTUCA:**
Andrector atrofasciata (Coleoptera)
Arion hortensis (Mollusca)
Deroceras reticulatum (Mollusca)
Dicyphus annulatus (Hemiptera)
Helicella caperata (Mollusca)
H. itala (Mollusca)
Iridomyrmex humilis (Hymenoptera)
Myzus ascalonicus (Homoptera)
Raphogaster nebulosa (Hemiptera)
Tettigonia oculata (Homoptera)
Thrips angusticeps (Thysanoptera)
- LAELIA:**
Pseudischinaspis alienus (Homoptera)
- LAGERSTROEMIA:**
Dialeurodes kirkaldyi (Homoptera)
- LANSIUM:**
Pseudococcus lilacinus (Homoptera)
- LANTANA:**
Teleonemia scrupulosa (?) (Hemiptera)
- LATHYRUS:**
Iridomyrmex humilis (Hymenoptera)
Taeniothrips atratus (Thysanoptera)
- LAURUS:**
Aspidiotus degeneratus (Homoptera)
Trialeurodes lauri (Homoptera)
Vinsonia stellifera (Homoptera)
- LAVANDULA:**
Frankliniella intonsa (Thysanoptera)
- LEGUME:**
Caryedon fuscus (Coleoptera)
Ectomyelois decolor (Lepidoptera)
- LENS:**
Trogoderma granarium (Coleoptera)
- LEUCAENA:**
Araecerus levipennis (Coleoptera)
Pheidole megacephala (Hymenoptera)
- LIGISTRUM:**
Palomena angulosa (Hemiptera)
- LILLIACEAE:**
Frankliniella formosae (Thysanoptera)
- LILIUM:**
Bradybaena similis (Mollusca)
Iridomyrmex humilis (Hymenoptera)
Monomorium destructor (Hymenoptera)
Pheidole megacephala (Hymenoptera)
Sitona lineata (Coleoptera)
Testaceella maupei (Mollusca)
- LINUM:**
Trogoderma granarium (Coleoptera)
- LITCHI:**
Brevipalpus phoenicis (Acarina)
Cryptophlebia illepidia (Lepidoptera)
Pulvinaria psidii (Homoptera)
- LYCASTE:**
Tentecoris distinctus (Hemiptera)
- LYCOPERSICON:**
Conotelus mexicanus (Coleoptera)
Dacus cucurbitae (Diptera)
Gnorimoschema plaesiosoma (Lepidoptera)
Neoleucinodes elegantalis (Lepidoptera)
Psylla minuticoma (?) (Homoptera)
- LYCOPODIUM:**
Xiphidiopsis lila (Orthoptera)
- LYCORIS:**
Bradybaena similis (?) (Mollusca)
Iridomyrmex humilis (Hymenoptera)
Taeniothrips gracilis (Thysanoptera)
- MALUS:**
Adozophyes orana (Lepidoptera)
Carpocapsa niponensis (Lepidoptera)
Ceratitidis capitata (Diptera)
Cryptoblabes gnidiella (Lepidoptera)
Ectomyelois ceratoniae (Lepidoptera)
Grapholitha janthiana (Lepidoptera)
Stenodema holsatum (Hemiptera)
Tetranychus viennensis (Acarina)
- MAMMILLARIA:**
Puto mexicanus (Homoptera)
- MANGIFERA:**
Anastepha ludens (Diptera)
A. mombinpraepotans (Diptera)
Aulacaspis mangiferae (Homoptera)
Chrysomphalus personatus (Homoptera)
Dacus dorsalis (Diptera)
Pentalonia nigronervosa (Homoptera)
Pseudischinaspis longissima (Homoptera)
Sternonchus frigidus (Coleoptera)
S. mangiferae (Coleoptera)
S. olivieri (Coleoptera)
- MARSILEA** (?):
Melanoides tuberculata (Mollusca)
Thiara balonensis (Mollusca)
- MASDEVALLIA:**
Aonidiella inornata (Homoptera)
Chrysomphalus umboniferus (Homoptera)
- MATHIOLA:**
Nysius raphanus (Hemiptera)
- MELASTOMA:**
Dacus pedestris (Diptera)
Pulvinaria psidii (Homoptera)
Sipylus dilatatus (Homoptera)
- MENTHA:**
Chrysomphalus propisus (Homoptera)
Haplothrips gowdeyi (Thysanoptera)
Helicella itala (Mollusca)
Pentalonia nigronervosa (Homoptera)
Pheidole megacephala (Hymenoptera)
Tetranychus cinnabarinus (Acarina)
- MICHELIA** (?):
Tachardina lobata (tentative) (Homoptera)
- MIMOSA:**
Thrips major (Thysanoptera)
- MUCUNA:**
Pseudonidia trilobitiformis (Homoptera)
- MURRAYA** (?):
Protapulvinaria pyriformis (Homoptera)
Pulvinaria psidii (Homoptera)
- MUSA:**
Bradybaena similis (Mollusca)
Cosmopolites sordidus (Coleoptera)
Dacus dorsalis (Diptera)
Epilachna paenulata (Coleoptera)
Euglandina striata (Mollusca)
Heraeus ezimus (Hemiptera)
Metamasius hemipterus hemipterus (Coleoptera)
M. hemipterus sericeus (Coleoptera)
Pentalonia nigronervosa (Homoptera)
Platynota rostrana (Lepidoptera)
Porphyrobaphe isotoma (Mollusca)
Solaropsis monile (Mollusca)
- MYRISTICA:**
Chrysomphalus personatus (Homoptera)
- MYRTUS:**
Pseudococcus citricus (Homoptera)
- NARCISSUS:**
Stenotarsonemus laticeps (Acarina)
- NEOMOOREA:**
Pinnaspis buxi (Homoptera)
- NOLINA:**
Opuntiaspis carinata (Homoptera)
Pseudococcus cualatensis (Homoptera)
- NOTHOPANAX:**
Coccus viridis (Homoptera)
Pheidole megacephala (Hymenoptera)
- OLEA:**
Dacus oleae (Diptera)
Filippia oleae (?) (Homoptera)
Leucaspis riccae (Homoptera)
Parlatoria oleae (Homoptera)
Pollinia pollini (Homoptera)
Prays oleella (Lepidoptera)

Helicella caperata (Mollusca)
Pseudococcus boninensis (Homoptera)

DRIFTWOOD:

Cryptotermes domesticus (Isoptera)
Pheidole megacephala (Hymenoptera)

FLOUR:

Trogoderma granarium (Coleoptera)

FLOWERS:

Bradybaena similis (Mollusca)
Conotelus mexicanus (Coleoptera)
Dialeurodes kirkaldyi (Homoptera)
Frankliniella intonsa (Thysanoptera)
Geotomus pygmaeus (Hemiptera)
Haplothrips gowdeyi (Thysanoptera)
Iridomyrmex humilis (Hymenoptera)
Limax marginatus (Mollusca)
Myzus ascalonicus (Homoptera)
Parthenothrips dracaenae (Thysanoptera)
Platynota rostrana (Lepidoptera)
Protopulvinaria pyriiformis (Homoptera)
Pseudococcus gahani (Homoptera)
Spodoptera mauritia (Lepidoptera)
Taeniothrips atratus (Thysanoptera)
T. picipes (Thysanoptera)
Tetranychus cinnabarinus (Acarina)
Thrips flarus (Thysanoptera)
T. major (Thysanoptera)

FOLIAGE:

Bradybaena similis (Mollusca)

FOOD FOR SALAMANDER:

Deroceras reticulatum (Mollusca)

WITH FRAXINUS SP.:

Aspidaphium cuspidatis(?) (Homoptera)

FRUIT:

Dacus dorsalis (Diptera)
Iridomyrmex humilis (Hymenoptera)
Leptura fulva (Coleoptera)
Monomorium destructor (Hymenoptera)

GRAIN:

Trogoderma glabrum (Coleoptera)

GRASS SEED:

Chirothrips egregius (Thysanoptera)

HERB:

Bradybaena similis (Mollusca)
Capitophorus braggi(?) (Homoptera)
Metopoplax ditomoides (Hemiptera)
Pheidole megacephala (Hymenoptera)
Piesma capitatum (Hemiptera)
Tetranychus cinnabarinus (Acarina)
Tyrophagus infestans (Acarina)

LEAF—UNIDENTIFIED:

Ferrisia virgata (Homoptera)
Lepidosaphes tubulorum (Homoptera)
Restidia ruha(?) (Lepidoptera)
Verina suppicella (Lepidoptera)

LOG:

Conotelus mexicanus (Coleoptera)
Platypus rugulosus (Coleoptera)

MAIL PARCEL:

Achatina fulica (Mollusca)
Coptotermes formosanus (Isoptera)
Geotomus pygmaeus (Hemiptera)
Homoeogamia mexicana (Orthoptera)
Metioche vittaticollis (Orthoptera)
Oxydena fusiiforme (Coleoptera)

*Hosts Unknown—Continued***MILITARY CARGO:**

Cochlicella barbara (Mollusca)
C. ventrosa (Mollusca)
Helicella caperata (Mollusca)
H. derbentina (?) (Mollusca)
H. itala (Mollusca)
H. maritima (Mollusca)
H. neglecta (Mollusca)
H. pyramidata (Mollusca)
H. trochoides (Mollusca)
Helix aspersa (Mollusca)
Metopoplax ditomoides (Hemiptera)
Otala lactea (Mollusca)
O. vermiculata (Mollusca)
Theba pisana (Mollusca)
Xeroleuca mographina (Mollusca)

MOSS:

Tetranychus cinnabarinus (Acarina)

NONE (brought in as food)

Helix aspersa (Mollusca)

PACKING:

Drymus sylvaticus (Hemiptera)

WITH PALM LEAF:

Hexachaeta monostigma (Diptera)

PEAT MOSS:

Monacha schotti (Mollusca)

PLANTS:

Deroeras reticulatum (Mollusca)
Hercinotrips bicinctus (Thysanoptera)
Lamellaris gracilis (Mollusca)
Pheidole megacephala (Hymenoptera)
Protopulvinaria pyriiformis (Homoptera)
Zonitoides arboreus (Mollusca)

PLANT MATERIAL (dried arrangements)

Simodactylus cinnamomeus (Coleoptera)
Sybra alternans (Coleoptera)

QUARTERS:

Callidium rufipenne (Coleoptera)
Neoclytus acuminatus (Coleoptera)

RAILWAY CAR:

Trogoderma glabrum (Coleoptera)
T. inclusum (Coleoptera)

WITH RESIDUE OF TITANIUM OXIDE:

Trogoderma granarium (Coleoptera)

ROOTS:

Arion hortensis (Mollusca)

SPHAGNUM MOSS:

Anisolabis marginalis (Dermaptera)
Monacha cantiana (Mollusca)

STORES:

Trogoderma granarium (Coleoptera)

SUCCULENT:

Iridomyrmex humilis (Hymenoptera)
Pheidole megacephala (Hymenoptera)

TRAILER:

Coptosoma punctatissima (Hemiptera)

VEGETABLE:

Cylas formicarius var. (Coleoptera)

WOOD:

Callidium rufipenne (Coleoptera)
Dinoderus bifoveolatus (Coleoptera)
Heterobostrychus aequalis (Coleoptera)
Hylurgops palliatus (Coleoptera)
Ips typographus (Coleoptera)
Lyctus africanus (Coleoptera)
Micrapate labialis (Coleoptera)
Minthea rugicollis (Coleoptera)
Nasutitermes rippertii (Isoptera)
Phloeosinus shotoensis (Coleoptera)
Pityogenes chalcographus (Coleoptera)
P. quadridens (Coleoptera)
Pityokteines spinidens (Coleoptera)
Plagionotus arcuatus (Coleoptera)
Sinoxylon anale (Coleoptera)
Tetrapriocera longicornis (Coleoptera)
Theba pisana (Mollusca)

MIDWAY ISLANDS:

Cicadella spectra

MIDWAY ISLANDS(?):

*Cicadella viridis**Mocis frugalis*

MOROCCO:

*Cochlicella barbara**C. ventrosa**Helicella maritima**H. trochoides**Otala vermiculata**Scobicia chevrieri**Systole albipennis**Theba pisana**Thrips angusticeps**Xeroleuca mograbina*

MOROCCO(?):

*Laspeyresia splendana**Metopoplax ditomoides*

NEPAL:

Pulvinaria psidii

NETHERLANDS:

*Acrolepis assectella**Adoxophyes orana**Anuraphis tulipae**Arion circumscriptus**A. hortensis**Deroceras reticulatum**Dialeurodes chittendeni**Eriophyes canestrinii**Evergestis forficatus**Gracilaria azaleella**Haplothrips aculeatus**Phytomyza rufipes**Trogoderma granarium*

NETHERLANDS EAST INDIES:

Caryedon fuscus

NEW CALEDONIA:

*Morganella longispina**Unaspis citri*

Countries of Origin and Insects—Continued

NICARAGUA:

Anastrepha mombinpraeoptans
Aspidiotus herculeanus
Chrysomphalus personatus
Empoasca kraemeri
Paroecanthus annulatus
Plesiommata mollicella
Pseudischnaspis alienus
P. longissima

NIGERIA:

Dinoderus bifoveolatus

NIGERIA (?)

Trogoderma granarium

NORTH AFRICA (country(?)):

Theba pisana

NORTHERN IRELAND:

Steneotarsonemus laticeps

NORWAY:

Ips typographus
Lecanium corni
Pityogenes chalcographus

OKINAWA:

Parlatoria zizyphus
Unaspis yanonenis

PAKISTAN:

Trogoderma granarium

PALMYRA ISLAND:

Pheidole megacephala

PALMYRA ISLAND(?):

Megachile fullawayi

PANAMA:

Anastrepha mombinpraeoptans
Ancylostomia stercorea
Aulacaspis mangiferae
Chrysomphalus umboniferus
Conchaspis orchidarum
Cosmopolites sordidus
Diadurodes citrifolii
Diathrausta angustella
Fundella pellucens
Furcaspis biformis
Geotomus spinolai
Leucaspis cockerelli
Leucochroma corope
Metamastus hemipterus sericeus
Miogyllus ensifer
Parlatoria cinerea
P. pseudaspidotus
Platypus rugulosus
Pseudischnaspis alienus
Stenoma catenifer
Tetrapiocera longicornis
Unaspis citri
Valtissius diversus
Vinsonia stellifera

PERU:

Epinotia aporema
Helix aspersa
Pagiocerus fiorii
Stenoma catenifer

PHILIPPINES:

Aleurocanthus spiniferus
Aleurotuberculatus jasmini
Aspidiotus excisus
A. palmae
Chrysomphalus tingi
Ferrisia virgata
Fiorinia nephelii
F. theae
Furcaspis biformis
Heterobostrychus aequalis
Icerya seychellarum
Lepidosaphes tuberculata
Monomorium destructor
Pachybrachius nietneri
Parlatoria chinensis
P. pseudaspidotus
P. zizyphus
Phenacoccus hirsutus
Pinaspis buzi
Pseudoanidia trilobitiformis
Pseudococcus lilacinus
Pulvinaria psidii
Tenuipalpus pacificus
Unaspis yanonenis

POLAND:

Baris lepidii
Curculio nucum
Deroceras reticulatum
Frankliniella intonsa
Lecanium corni
Pyrausta nubilalis
Rhagoletis cerasi
Taeniothrips atratus
Thrips major

PORTUGAL:

Acrolepia assectella
Aspidiotus britannicus
Callirhytis glandium
Ceratitis capitata
Ctenoglyphus canestrinii
Curculio elephas
C. nucum
Deroceras reticulatum
Dicyphus annulatus
Haplothrips coltei
Iridomyrmex humilis
Laspeyresia splendana
Limax marginatus
Rhagoletis cerasi
Taeniothrips ericae
Testaceella maugei
Zonitoides arboreus

PUERTO RICO:

Anastrepha mombinpraeoptans
A. suspensa
Ancylostomia stercorea
Cylas formicarius elegantulus
Diaprepes abbreviatus
D. abbreviatus var.
Doru albipes
Ectomyelois ceratoniae
Euscepes postfasciatus
Fundella pellucens
Maruca testulalis
Metamasius hemipterus hemipterus
Ochrinus collaris
Pectinophora gossypiella
Pentalonia nigronervosa
Pheidole megacephala
Protopulvinaria longivalvata
Pulvinaria urbicola
Vinsonia stellifera

RUMANIA:

Rhagoletis cerasi

ST. KITTS:

Ancylostomia stercorea
Euscepes postfasciatus

SCOTLAND:

Limothrips denticornis
Micrelus ericae
Steneotarsonemus laticeps
Taeniothrips atratus
T. ericae
Thrips major

SIERRA LEONE:

Alcidodes dentipes

SINGAPORE:

Pinaspis orchidarum
Tenuipalpus pacificus
Trogoderma granarium

SOUTH AMERICA (country(?)):

Haplothrips gowdeyi

SOUTH PACIFIC:

Coccus viridis
Lepidosaphes tokionis
Orchamoplatus mammaeferus
Pulvinaria psidii

SPAIN:

Ceratitis capitata
Chilo suppressalis
Cryptoblabes gnidiella
Curculio elephas
Dacus oleae
Deroceras reticulatum
Ectomyelois ceratoniae
Eurydema ornatum
Helicella maritima
Helix aspersa
Laspeyresia splendana

Countries of Origin and Insects—Continued

SPAIN—Continued

Newsteadia floccosa
Parlatoria zizyphus
Rhagoletis cerasi

SURINAM:

Fundella pellucens
Tettigonia oculata
Vinsonia stelfifera

SWEDEN:

Ips typographus
Parthenothrips dracaenae
Phytomyza rufipes
Pityogenes chalcographus
P. quadridens
Pityophthorus micrographus
Taeniothrips atratus
Thrips flavus
Ulopa reticulata

SWITZERLAND:

Curculio elephas
Deroceras reticulatum
Ernobius abietis
Haplothrips aculeatus
Phytomyza gentianae(?)
Psylla rhododendri
Stenoptilia stigmatodactyla

SYRIA:

Ceratitidis capitata

TAHITI:

Aspidiotus destructor
Dialeurodes kirkaldyi
Morganella longispina

THAILAND:

Parlatoria zizyphus

TORTOLA:

Ancylostomia stercorea
Euscepes postfasciatus
Orocharis vaginalis

TRINIDAD:

Aeneolamia varia
A. varia saccharina
Anastrepha mombinpraeoptans
Ancylostomia stercorea
Coenobela paucula
Dercynus micronyx
Euscepes postfasciatus
Lepidosaphes tokionis
Maruca testulalis
Nasutitermes costalis
Orthesia praelonga
Palaeopus costicollis
Parlatoria cinerea
Pectinophora gossypiella
Pinnaspis buxi
Protopulvinaria longivalvata
Pseudonidia trilobitiformis
Vinsonia stelfifera

TUNISIA:

Ceratitidis capitata
Dacus oleae
Parlatoria zizyphus

TURKEY:

Aspidiotus hedericola
Megastigmus suspectus pinsapinis
Prays oleellus
Stenodema holsatum
Theba pisana

TURKEY (?)

Helicella derbentina(?)
Helicella pyramidata

UNION OF SOUTH AFRICA:

Agrostothrips guillarmodi
Blissus capitatus
Ceratitidis capitata(?)

Chirothrips egregius
C. hoodi
C. pretorianus
Cryptophlebia leucotreta
Epichorista ionephela
Frankliniella schultzei
Haplothrips powdeyi
H. nigricornis(?)
Homothrips distinctus
Iridomyrmex humilis
Megastigmus pistaciae
Orychilus altharius
Parlatoria cinerea
Phenacoccus stelli
Phylctinus callosus
Pseudococcus gahani
Pyrausta nubilalis

UNION OF SOVIET SOCIALIST REPUBLICS:

Dacus oleae

UNKNOWN:

Adelphocoris lineolatus
Andrector atrofasciatus
Aonidiella citrina
Arion hortensis
Ceratitidis capitata
Conotelus mexicanus
Cryptophlebia leucotreta
Deroceras reticulatum
Ectomyelois ceratoniae
Euleia heraclei
Frankliniella intonsa
Iridomyrmex humilis
Lygaeus pandurus
Metopoplax ditomoides
Myzus ascalonicus
Otala vermiculata
Parlatoria cinerea
P. zizyphus
Pheidole megacephala
Plagionotus arcuatus
Taeniothrips atratus
Theba pisana
Trogoderma granarium

VENEZUELA:

Bephrata maculicollis
Coccus viridis
Ectomyelois muricis
Euscepes postfasciatus
Eutetranychus banksi
Furcaspis bifurmis
Hypsipyla ferrealis
Nasutitermes ephratae
Palaeopus costicollis
Proelymiotus johanna
Scaptocoris minor
Synnyrias difundens
Vinsonia stelfifera

VENEZUELA (?)

Neoclytus acuminatus

VIETNAM:

Minthea rugicollis
Parlatoria zizyphus
Sternonchetus olivieri

WAKE ISLAND:

Cryptotermes domesticus

WEST PACIFIC:

Geotomus pygmaeus
Nephotettix apicalis

YUGOSLAVIA:

Laspeyresia splendana
Monanthia lupuli
Rhagoletis cerasi
Stenodema laevigatum(?)

Pests Collected and Reported From July 1, 1958, Through June 30, 1959

Pest and host	Country of origin	Number of interceptions in—			Collected in—
		Consumption	Non-entry	Propagation	
† <i>Albugo platensis</i> (Speg.) Swing.: <i>Boerhaavia</i> sp. (spiderling)	Philippines			1	Hawaii.

PLANT QUARANTINE DIVISION
WASHINGTON 25, D.C.**

LIST OF INTERCEPTED PLANT PESTS, 1960

(Pests Intercepted From July 1, 1959, Through June 30, 1960)

Compiled by
Bessie C. Mumford¹
Plant Quarantine Aid

INTRODUCTION

This 47th report of interceptions summarizes the records of plant pests found in, on, or with plants, plant products, baggage, and means of conveyance (1) imported into or entering the United States or its possessions, (2) offered for entry but refused, (3) held in quarters or stores of planes or ships, (4) offered for entry for immediate transportation and exportation in bond, (5) in domestic shipments to the mainland from the States of Alaska and Hawaii, and the offshore possessions, including the American Virgin Islands, Guam, and Puerto Rico, or (6) in preclearance inspection at Nassau in the Bahamas.

The pests listed include insects, snails, fungi, bacteria, nematodes, and viruses of known or potential plant quarantine significance to the United States. Some common organisms are included if they are new to the country of origin or the host plant, or are of such limited distribution in the United States that they are worthy of mention.

The data for this list include identifications received during the fiscal year 1960 and represent some interceptions made during previous years. Determinations are largely made by specialists of the Entomology Research Division and the Plant Quarantine Division, although a certain amount of this work is done by collaborating State officials. Snail identifications are made by taxonomists in the Division of Mollusks, U.S. National Museum. Some critical studies and identifications are made by specialists of the Crops Research Division, who also identify many of the host plants.

All scientific names of insects, diseases, and hosts are reviewed by specialists of the Department to assure conformance to the International Rules of Nomenclature. However, in the disease tabulation the name of the stage found is usually listed rather than the perfect stage of the organism. Family names are listed with the insects in the tabulation; orders are shown in the host list. Classes of the diseases are given in the disease host list.

Every effort is made to give the correct origin for all collections listed. Occasionally, however, it is difficult to trace the true origin

¹ Assistance was received from Alice J. Watson, mycologist, and Paul X. Peltier, entomologist.

of stores in planes and ships. Questionable cases are omitted, listed with a question mark, or shown as unknown.

NOTES ON PESTS INTERCEPTED

The total number of interceptions during the fiscal year 1960 was 30,230, as compared with 25,296 the previous year. This does not include common pests which are widespread in this country and are no longer recorded. Of the total number, 8,022 interceptions were considered of enough importance to be listed. This year we have omitted many injurious insects and diseases which are established in the United States and some fungi previously listed which are not parasitic.

AIRBORNE MATERIAL

The interceptions from airborne material totaled 10,719; last year there were 8,033. Insect and snail interceptions numbered 9,812; disease and nematode interceptions, 907. There were 364 interceptions of significant insects found as stowaways in airplanes. Among the important pests arriving by air were 19 interceptions of the European cherry fruit fly, 117 of the Mediterranean fruit fly, 20 of the Mediterranean land snail, 11 of the Mexican fruit fly, 37 of the olive fruit fly, 4 of the oriental fruit fly, 7 of the pink bollworm, 84 of the West Indian fruit fly, 38 of the black spot of citrus, 79 of citrus canker, and 46 of the sweet orange scab. Increasing air travel and the high survival rate of pests arriving by air require special attention to inspection of airborne material.

FRUIT FLIES

A total of 574 fruit fly interceptions were identified to species as follows:

Anastrepha ludens, the Mexican fruit fly (170 times), 166 from Mexico, 3 from Guatemala, and once from an unknown origin. The hosts were apple, grapefruit, mamey sapote, mango, peach, pear, pomegranate, quince, sour lime, sweet lime, sweet orange, and white sapote.

Anastrepha mombinpraeoptans, the West Indian fruit fly (120 times), in guava, mango, mombin, sapodilla, and tropical almond from the Bahamas, Costa Rica, Cuba, Curacao, Dominican Republic, Ecuador, El Salvador, Guatemala, Haiti, Honduras, Jamaica, Mexico, Nicaragua, Panama, and Puerto Rico.

Anastrepha serpentina (twice) in mamey sapote in air baggage from El Salvador and in sapodilla in air baggage from Nicaragua.

Anastrepha striata (once) in guava in air baggage from El Salvador.

Anastrepha suspensa (?) (twice) in guava in air baggage from Haiti and Puerto Rico.

Ceratitis capitata, the Mediterranean fruit fly (173 times), an adult on a salon window of a ship arriving at Tampa, Fla., in apple, apricot, Arabian coffee berries, baggage (with chestnuts), *Coffea* sp. berries, crabapple, fig, grape, grapefruit, guava, lemon, loquat, Mandarin orange, peach, pear, persimmon, *Phaleria papuana*, pitanga, plum, pomegranate, pricklypear, quince, sweet orange, and unidentified fruit. Countries of origin were: Algeria, Argentina, Azores, Brazil, Cyprus, Europe (country(?)), Greece, Hawaii, Hungary, Indonesia, Israel, Italy, Lebanon, Morocco, Portugal, Spain, Tunisia, Turkey, Union of South Africa, United Arab Republic, and an unknown origin. *C. capitata* (?) (14 times) in Arabian coffee berries, fig, grape, guava, passionflower fruit, peach, sweet orange, and tomato from Greece, Hawaii, Italy, Portugal, Union of South Africa, and an unknown origin.

Dacus cucurbitae, the melon fly (once), in tomato in stores from Hawaii.

Dacus dorsalis, the oriental fruit fly (10 times), in guava, mango, papaya, peach, and tropical almond from Guam and Hawaii. *D. dorsalis* (?) (5 times) in Arabian coffee berries, mango, and passionflower fruit from Hawaii.

Dacus cleae, the olive fly (52 times), in olive from Greece, Israel, Italy, Lebanon, and the United Arab Republic.

Euleia heraclei(?) (once) in celery in stores from England.

Rhagoletis cerasi, the European cherry fruit fly (20 times), in cherry from Czechoslovakia, Denmark, France, Hungary, Italy, and an unknown origin.

R. cerasi(?) (3 times) in cherry from Germany, Italy, and an unknown origin.

INSECTS OTHER THAN FRUIT FLIES

The following insects of unusual interest were intercepted:

Acrolepiä assectella (Hyponomeutidae) in leek in stores from Italy, Japan, and the Netherlands.

Adoretus sinicus (Scarabaeidae) (18 times) from Hawaii as stowaway in airplane, on *Alpinia purpurata* cut flowers, anthurium, with automobile, baggage, clothing, and mail wrapper, on mixed flowers, seeds, *Tillandsia* sp., and *Vanda* sp. orchids.

Adoxophyes orana (Tortricidae) on lilac cut flowers in aircargo from the Netherlands.

Agriotes obscurus (Elateridae) in soil with Amur chokecherry tree in aircargo from the Union of Soviet Socialist Republics.

Aleurocanthus spiniferus (Aleyrodidae) on sweet orange leaf in stores from Japan.

Aleurocanthus woglumi (Aleyrodidae), the citrus blackfly (17 times), from Mexico on *Citrus* sp. leaves in baggage, lime leaf in cargo, and sweet orange leaves in baggage.

Amphimallon majalis (Scarabaeidae) as stowaway on airplane from France and an unknown origin.

Blastodacna atra (Cosmopterygidae) in apple in air baggage from Turkey.

Blissus diplopterus (Lygaeidae) on peach in cargo from the Union of South Africa.

Brachycerus albidentatus (Curculionidae) in garlic in baggage from Italy.

Brachycerus algirus (Curculionidae) in garlic in baggage from Italy and cargo from Spain.

Brevipalpus chilensis (Tenuipalpidae) (41 times) on custard-apple in aircargo, on grapes in cargo, and on sweet orange in stores from Chile.

Bruchus affinis (Bruchidae) in perennial pea in mail from Denmark and France and on *Lathyrus* sp. seed in mail from the Netherlands.

Callosobruchus analis (Bruchidae) in chickpea in baggage from Hong Kong and in pea in stores from China.

Carposina niponensis (Carposinidae) in apple in stores from Japan and in plum in mail from Hong Kong.

Ceroplastes rubens (Coccidae) on maile alyxia in baggage from Hawaii.

Chilo suppressalis (Crambidae), the Asiatic rice borer (13 times), in rice straw in air baggage from Japan and Korea, aircargo, air stores, and baggage from Japan, cargo from Hong Kong, Japan, and an unknown origin, and in mail from Japan.

Chrysomphalus paulistus (Coccidae) on Grecian laurel in air baggage and philodendron in aircargo from Brazil.

Conotrachelus aguacatae (Curculionidae) (26 times) in avocado in air baggage and baggage from Mexico.

Coptotermes crassus (Rhinotermitidae) in pine stump in cargo from British Honduras.

Corythaica carinata (Tingidae) on *Lippia reptans* leaf in baggage from Cuba.

Cryptophlebia leucotreta (Olethreutidae) in bell pepper in stores from the Republic of the Congo and in sweet orange in stores from the Union of South Africa.

Curculio elephas (Curculionidae) (22 times) in European chestnut in air baggage and stores from France and in air baggage, baggage, and cargo from Italy; in chestnut in air baggage, baggage, cargo, and mail from Italy, air baggage and quarters from Portugal, and in air baggage from Spain; and in acorns of European turkey oak in cargo from Italy.

Curculio nucum (Curculionidae) in filbert in air baggage from Poland and mail from Italy; and in hazelnut in air baggage and baggage from Italy.

Cylas formicarius var. (Curculionidae) in *Ipomoea* sp. in aircargo from Thailand and in sweetpotato in air baggage from the Dominican Republic, aircargo from the Philippines, Singapore, and Thailand, air stores from the Federation of Malaya, cargo from Hong Kong and Japan, and stores from Thailand.

Dialeurodes kirkalyi (Aleyrodidae) on gardenia leaves in air baggage from Lebanon and on jasmine in air baggage from Hong Kong and in air baggage and mail from Hawaii.

Diaprepes abbreviatus var. (Curculionidae) in pigeonpea pod in cargo from Puerto Rico.

Dyspessa ulula (Cossidae) (12 times) in garlic in cargo from Italy and Spain.

Epichorista ionephela (Tortricidae) in Cape chinkerichee in aircargo and mail from the Union of South Africa.

Epinolia aporema (Olethreutidae) in cowpea pod in air baggage from Argentina, in string bean in baggage and stores from Mexico, and in tomato in cargo from Mexico.

Ernobius abietis (Anobiidae) in conifer cone, probably spruce, in cargo from Germany.

Euscepes postfasciatus (Curculionidae) (16 times) in mail parcel containing peanuts and cut flowers and with pineapple in air baggage from Hawaii; and in sweetpotato in air baggage from Barbados and Japan, in baggage and mail from Puerto Rico, and in stores from Brazil and Trinidad.

Frankliniella formosae (Thripidae) (44 times) on *Arctotis stoechadifolia*, carnation, chrysanthemum, *Citrus* sp. peel, *Dianthus* sp., unidentified flowers, gardenia, gladiolus, hyacinth, lily, and rose from the Fiji Islands, Hong Kong, Japan, and the West Pacific.

Gnorimoschema ocellatella (Gelechiidae) in beet in stores from France, Israel, and the United Arab Republic, and with stores from Israel.

Gymnandrosoma aurantianum (Olethreutidae) in sweet orange in air stores from Curacao.

Hellula undalis (Pyraustidae) in turnip in stores from the United Arab Republic.

Hemimene juliana (Olethreutidae) in chestnut in air baggage and baggage from Italy.

Heterobostrychus aequalis (Bostrichidae) in wooden crates in cargo from India and Vietnam.

Hypoborus ficus (Scolytidae) in fig cuttings in baggage from Israel and cargo from Yugoslavia.

Kaloterms flavicollis (Kalotermitidae) in quince in air baggage from Greece.

Lampides boeticus (Lycaenidae) (28 times) in mauna loa lei in air baggage and baggage from Hawaii, in leguminous flowers in baggage from Hawaii, in peas in stores from Japan, in sesbania flowers in mail from Hawaii, and in *Strongylo-*
lucidus in air baggage from Hawaii.

Laspeyresia fabivora (Olethreutidae) in string bean in stores from Ecuador.

Laspeyresia splendana (Olethreutidae) (66 times) in baggage with lily bulbs from Italy; in chestnuts in air baggage from France, Germany, Italy, Portugal, Spain, and Yugoslavia, in baggage from Italy and Portugal, in cargo from France, Israel, and Italy, in mail from Portugal, and in stores from the Canary Islands; and in acorn in cargo from France.

Laspeyresia strobilella (Olethreutidae) in spruce cones in baggage from England and Switzerland.

Lema melanopa (Chrysomelidae) in lily-of-the-valley pips in cargo from Denmark and on rose bush in cargo from England.

Leucinodes orbonalis (Pyraustidae) in eggplant in stores from Indonesia and in *Solanum* sp. in air baggage from Liberia.

Lobesia botrana (Olethreutidae) in grapes in air baggage from Italy and the United Arab Republic.

Mamestra brassicae (Noctuidae) (9 times) on cabbage in stores from Italy, on cauliflower in stores from Belgium, France, Germany, and Italy, on Chinese cabbage in stores from Japan, and on lettuce in stores from France.

Maruca testulalis (Pyraustidae) (27 times) loose in baggage, in bean, leguminous flower, lima bean, mauna loa lei, pigeonpea, string bean, sesbania flower, *Strongylo-*
lucidus, and *Strongylo-*
lucidus sp. from Hawaii, Hong Kong, and Puerto Rico.

Megastigmus limoni (Torymidae) in *Eremocitrus glauca* seed in aircargo from Australia.

Megastigmus strobilobius (Torymidae) in Norway spruce seed in cargo from Germany.

Pectinophora gossypiella (Gelechiidae), the pink bollworm (15 times), in cotton boll in air baggage and baggage from Hawaii; on cotton leaf in air baggage from Jamaica; in cottonseed in air baggage from Hawaii, aircargo, and airmail from the Dominican Republic, in baggage from Hawaii and Mexico, and in mail from Hawaii; in seed cotton in baggage and quarters from Mexico; and in okra in air baggage from the Dominican Republic and stores from Brazil.

Perkinsiella vitiensis (Delphacidae) as stowaway on airplane from the Fiji Islands.

Petrova resinella (Olethreutidae) in Scotch pine in aircargo from the Union of Soviet Socialist Republics.

Phalonia zephyrana (Phalonidae) in carrot in stores from Italy.

Pieris brassicae (Pieridae) on cabbage in stores from the Azores and France, on cauliflower in stores from the Azores and Italy, and with wooden crate in aircargo from Spain.

Polytus mellerborgii (Curculionidae) in banana stolon in aircargo from the Philippines.

Prays oleellus (Hyponomeutidae) in olives in air baggage and baggage from Italy.

Sesamia cretica (Noctuidae), the durra stem borer, in broomcorn stalk and corn stalk in cargo from Italy.

Sternonchetus mangiferae (Curculionidae) (93 times) in mango from Australia, French Equatorial Africa (the interception was made before the country was divided), Guam, Hawaii, India, and an unknown origin.

Taeniothrips gracilis (Thripidae) (27 times) in lycoris in cargo from Japan.

Thrips imaginis (Thripidae) on gladiolus in air baggage from Australia.

Trogoderma granarium (Dermestidae), the khapra beetle (131 times), is becoming increasingly important as a quarantine problem. It was found mostly in ships' stores, in quarters, or with cargo; but once with guar gum in mail. The hosts were barley, bean, cumin seed, mung bean, myrobalan nut, peanut, pepper, pigeonpea, poppyseed, rice, soybean, and miscellaneous dry stores (including chickpea, coffee, flour, macaroni, mixed grain, pea, spaghetti, sugar, tapioca, etc.), frequently from infestations in storerooms. It was found with automobiles, old bagging, bales of rubber, debris, goat skins, guar gum, gum arabic, Karaya gum, seedlac, steel and tuna fish cartons, usually associated with used burlap or other wrappings or infesting cargo holds of ships. Infested materials were from the following countries: Asia (country(?)), Burma, Ceylon, China, England, Europe (country(?)), Formosa, Germany, Hong Kong, India, Indonesia, Iran, Japan, Kuwait, Lebanon, Netherlands, Nigeria, Pakistan, Portugal, Singapore, Sudan, Union of South Africa, United Arab Republic, and an unknown origin.

SNAILS

Snails are causing increasing concern as more species are being recognized as potential pests and greater numbers are being found with plant material and on cargo.

Bradybaena similaris was intercepted 26 times on various cut flowers, foliage, and in soil with plants; 18 from Hawaii, 3 from Bermuda, 2 each from Brazil and Cuba, and 1 from Mexico.

Cochlicella barbara (29 times) on lemon in stores from Algeria; on military cargo from France, Italy, Morocco, and Spain; on mixed seeds in air baggage from Italy; and on new automobiles from France.

Cochlicella ventrosa (9 times) on geranium plants in air baggage from the Azores; lemon in stores from Algeria; lettuce in air stores from Portugal; military cargo from Bermuda, Italy, and Morocco; mint in air baggage from Bermuda; and Roman camomile in cargo from Italy.

Fourteen species of the genus *Helicella* were intercepted a total of 39 times on bell pepper, blackberry plants, cabbage, cut flowers, household goods, military cargo, new automobiles, parsley, and soil with various plants from the following countries: France, Greece, Ireland, Italy, Libya, Morocco, Portugal, Spain, and Turkey.

Monacha carthusiana with military cargo and rose petals in aircargo from France.

Opeas pumila with orchid plants in aircargo from British Honduras.

Opeas pyrgula with iris in air quarters from Japan and in soil with plants in baggage from Bermuda.

Porphyrobaphe iostoma (23 times) on bananas in cargo from Ecuador and Honduras.

Rumina decollata with orchids in cargo from Mexico.

Solaropsis monile (10 times) on bananas in cargo from Costa Rica and Ecuador.

Subulina octona (9 times) on orchids in aircargo from Jamaica and in baggage and cargo from Mexico; and in soil with assorted plants in air baggage from Brazil, Ecuador, Panama, and Venezuela.

Theba pisana, the Mediterranean land snail, was intercepted 75 times; 37 from Morocco on begonia cuttings in air baggage and on military cargo; 14 from France on cut flowers in aircargo and on automobile, motor canisters, and military cargo; 8 from Libya on military cargo; 7 from Italy as food in baggage, with other mollusks

in air baggage, on Roman camomile in cargo, and on military cargo; 7 from Spain with bell pepper in stores, on automobile in cargo, on military cargo, and on walls of hold of ship; 1 from Greece as food in baggage; and 1 from an unknown origin on dried herbs in air baggage.

Other snails of potential economic importance were: *Ceciloides acicula*, *Cepaea nemoralis*, *Helicina zephyrina*, *Helix aspersa*, *H. pomatia*, *Lamellaxis micra*, *Otala lactea*, and *O. vermiculata*.

DISEASES

Elsinoe australis, the sweet orange scab, was intercepted 98 times; 47 from Brazil on lemon, Mandarin orange, sour lime, and sweet orange in air baggage, air stores, quarters, and stores; 31 from Argentina on lemon, Mandarin orange, and sweet orange in air baggage, air stores, baggage, and stores; 19 from an unknown origin on Mandarin orange and sweet orange in air baggage, air quarters, and air stores; and 1 from Uruguay on sweet orange in stores.

Phoma citricarpa (perfect stage is *Guignardia citricarpa* Kiely), the black spot of citrus, was intercepted 108 times; 25 from Japan, 23 from the Union of South Africa, 14 from China, 13 from Australia, 11 from Hong Kong, 8 from Formosa, 5 from an unknown origin, 4 from Brazil, and 1 each from Africa (country(?)), the Federation of Malaya, Mozambique, New Zealand, and Thailand. The hosts were *Citrus* sp., grapefruit, ichandarin, lemon, Mandarin orange, pummelo, sour orange, and sweet orange.

Xanthomonas citri, citrus canker, was intercepted 140 times; 129 from Japan on *Citrus* sp., grapefruit, ichandarin, King orange, lemon, Mandarin orange, pummelo, sour lime, sour orange, and sweet orange; 4 from China on *Citrus* sp. peel and sweet orange peel; 3 from Hong Kong on *Citrus* sp. peel and sweet orange; and 1 each from India and Pakistan on sour lime, Saipan on *Citrus* sp., and an unknown origin on lemon.

Xanthomonas sp., Cancrosis B, was intercepted 7 times from Argentina on lemon in stores.

Other diseases of unusual interest were:

Dasturella divina (Syd.) Mundk. & Keshw. on dried leaves of *Sasa palmata* in cargo from Formosa.

Gymnosporangium yamadai Miy. on apple in air stores from Japan.

Heteropatella vattelinensis (Trav.) Wr. on *Dianthus* sp. in mail from Canada.

Neovossia horrida (Tak.) Padw. & A. Khan (58 times) on rice hulls in stores from Japan.

Peronospora schachtii Fekl. on Swiss chard in stores from Japan.

Phakopsora gossypii (Arth.) Hirat. f. (*Cerotelium desmum*) on cotton leaves in preflight inspection of baggage from the Bahamas.

Puccinia nakansihikii Diet. on lemongrass leaves in stores from Japan.

Puccinia oncidii Cummins on *Oncidium* spp. leaves in aircargo from Brazil and Ecuador.

Puccinia praegracilis Arth. var. *praegracilis* Savile (*Aecidium graebnerianum* P. Henn.) on *Habenaria* spp. in aircargo from Alaska.

Sphacloma spondiadis Bitanc. & Jenkins on vi-apple in air baggage from British Guiana.

Sphenospora kevorkianii Linder on *Huntleya burtii* leaf in air baggage from Panama.

Uredo nidularii P. Henn. on tillandsia in cargo from Mexico.

Uredo oncidii P. Henn. on *Oncidium* spp. leaves in aircargo from British Honduras, Guatemala, Panama, and Peru and on orchid leaf in air baggage from Haiti.

Uromyces fabae (Grev.) Cke. on lentil stems in air baggage and cargo from Chile and in stores from Germany, and on vetch plants in air baggage from Portugal.

NEMATODES

Anguina tritici in wild einkorn seeds from straw jackets in cargo from Italy(?). *Aphelenchoides blastophthorus* in lily-of-the-valley plants in baggage from England.

Aphelenchoides fragariae(?) in hyacinth bletila stems in cargo from Japan. *Ditylenchus destructor* in dahlia roots in mail from Switzerland and the Union of South Africa, and in tigerflower bulbs in mail from Germany.

Ditylenchus dipsaci in onion in mail from the Netherlands, in garlic in cargo from Mexico, and in narcissus in airmail and mail from England.

Gottholdsteineria goodeyi in soil with unidentified plants in air baggage from Canada.

Helicotylenchus nannus in soil with begonia plants in air baggage from Portugal and baggage from Mexico, soil with cactus and crocus plants in baggage from Mexico, soil with fern and mint roots in air baggage from Mexico, and soil with geranium and rose plants in baggage from Mexico.

Heterodera avenae, the oat nematode (4 times), in soil with new Jaguars in cargo from England, in soil with cabbage in air baggage from Ireland, and in soil with potatoes in stores from England.

Heterodera cacti (25 times) in soil samples, soil with the following plants: Begonia, cactus, citrus, coleus, Crassulaceae, spearmint, and various potted plants, and soil with railway cars. The countries of origin were: Brazil, Germany, Mexico, New Zealand, and Switzerland.

Heterodera punctata (11 times) in soil with automobiles in cargo from England, soil with heather in mail from Scotland, soil with Indiarubber fig in baggage from Mexico, soil with malvaceous plant in air baggage from Czechoslovakia, soil with philodendron plants in baggage from Canada, soil with plants in baggage from Mexico, and soil with rose roots in baggage from Northern Ireland.

Heterodera rostochiensis, the golden nematode (19 times), from soil in a small vial in air baggage, soil with calla lily and unidentified plants in baggage, soil with new and used automobiles and spruce in cargo, and soil with beet, celery, horseradish, leek, potato, and ullucus tuber in stores. The countries of origin were: Argentina, England, Germany, Mexico, Peru, and Spain.

Meloidogyne arenaria, *M. hapla*, *M. incognita*, *M. incognita acrita*, and *M. javanica*, rootknot nematodes, were intercepted from Australia, Brazil, Cuba, Dominican Republic, England, Germany, Guatemala, Haiti, Japan, Kenya, Mexico, Netherlands, and Northern Ireland. The hosts were begonia and euphorbia in baggage; astilbe, beautyberry roots, caladium, calla lily, clematis, common edelweiss, coriander, dahlia, echeveria, gladiolus corms, hepatica, tomato roots, and tuberosc bulbs in aircargo and cargo; acanthus roots, *Adenia globosa* plant, clockvine, dahlia, rose roots, and winged euonymus in airmail and mail; and dasheen and potato in stores.

Pratylenchus penetrans in dahlia in mail from Australia, Canada, and the Union of South Africa.

Pratylenchus pratensis in Japanese iris roots in mail from Czechoslovakia.

Psilenchus hilarulus in soil with fern and with dead plant in baggage from Mexico.

Scutellonema brachyurum in soil with cactus and unidentified plants in baggage from Mexico.

Tylenchorhynchus capitatus in soil with unidentified plants in air baggage from Jamaica and baggage from Mexico.

Xiphinema americanum in soil with gardenia plant in baggage from Mexico.

INCOMPLETELY DETERMINED PESTS

Specific determinations are sometimes not possible, due to the stage or condition of the insects or pathogens when intercepted or the fact that they are undescribed. Many of these pests may be of economic importance, unreported from the United States or the country of origin, or unknown on the host plant. As a matter of record the significant ones are included in this separate list, but not in the table. This year there were 2,897 insects, 600 diseases, and 229 nematodes, or a total of 3,276 incompletely determined interceptions considered to be important.

FRUIT FLIES

There were 183 incompletely determined fruit fly interceptions as follows:

Anastrepha sp., possibly *dissimilis* Stone, at Philadelphia, Pa., in giant grana-dilla in stores from the Dominican Republic.

Anastrepha sp., possibly *fraterculus* (Wied.), at New York, N.Y., in mango in baggage from Brazil; and at Philadelphia, Pa., in sweet orange in stores from Brazil.

Anastrepha sp., possibly *ludens*, at Brownsville, Tex., in sweet orange in air stores from Mexico; at Eagle Pass, Tex., in apple, cherimoya, and pear in baggage from Mexico; at El Paso, Tex., in pear, sweet orange, and white sapote in baggage from Mexico; at Laredo, Tex., in sweet orange in baggage from Mexico;

at Nogales, Ariz., in sweet orange in air baggage from Mexico; and at San Ysidro, Calif., in sweet orange in baggage from Mexico.

Anastrepha sp., probably *mombinpraeoptans*, at Miami, Fla., in mango in air baggage from El Salvador, Nicaragua, and Panama, in purple mombin in air baggage from Costa Rica and Honduras, and in *Spondias* sp. in air quarters from Colombia; at New Orleans, La., in mamey sapote in air baggage from Nicaragua, in mango in air baggage from El Salvador and Guatemala, in purple mombin and *Spondias* sp. in air baggage from Guatemala, and in tropical almond in air baggage from Jamaica; at New York, N.Y., in mango and sweet orange in air stores from an unknown origin; at Philadelphia, Pa., in mango in baggage from Puerto Rico; at San Pedro, Calif., in guava in air baggage from Venezuela; and at San Ysidro, Calif., in guava in baggage from Mexico.

Anastrepha sp., possibly *serpentina*, at El Paso, Tex., in mamey sapote in baggage from Mexico; at Miami, Fla., in quince in air baggage from Peru; and at Laredo, Tex., in mamey sapote in baggage from Mexico.

Anastrepha sp., prob. *striata*, at El Paso, Tex., in guava in baggage from Mexico; at Houston, Tex., in guava in baggage from Costa Rica and Honduras; at Laredo, Tex., in guava in baggage from Mexico; at Miami, Fla., in guava in air baggage from Mexico; at New Orleans, La., in guava in air baggage from Costa Rica; at Nogales, Ariz., in *Psidium* sp. in woman's purse from Mexico; and at San Pedro, Calif., in guava in air baggage from El Salvador, Mexico, and Nicaragua.

Anastrepha sp., probably *suspensa*, at Chicago, Ill., in guava in airmail from Puerto Rico; at Key West, Fla., in guava in air baggage from Cuba; at Miami, Fla., in guava in air baggage from Cuba and tropical almond in air baggage from Jamaica; at New York, N.Y., in guava in air baggage from Cuba and tropical almond in air baggage from Jamaica; and at San Juan, P.R., in guava in pre-flight inspection of baggage.

Anastrepha sp. was intercepted a total of 84 times at the following ports: Baltimore, Md., Brownsville, Tex., Chicago, Ill., Eagle Pass, El Paso, Galveston, Hidalgo, and Houston, Tex., Jacksonville, Fla., Laredo, Tex., Miami, Fla., New Orleans, La., New York, N.Y., Nogales, Ariz., Port Arthur, Tex., Port Everglades, Fla., St. Thomas and St. John, U.S.V.I., San Juan, P.R., San Pedro, Calif., and Tampa, Fla. The hosts were: Apple, Barbadoscherry, cherimoya, coffee berry, grapefruit, guava, mamey, mamey sapote, Mandarin orange, mango, *Matisia cordata* ("chupa-chupa"—a new host for *Anastrepha*), *Myrtus ehrenbergii*, peach, peach-palm nut, pear, purple mombin, quince, sapodilla, *Spondias* sp., star-apple, sweet orange, and yellow mombin. The countries of origin were: Argentina, Brazil, Colombia, Costa Rica, Cuba, Ecuador, El Salvador, Guatemala, Jamaica, Mexico, Nicaragua, Panama, Peru, Puerto Rico, Tortola, Venezuela, West Indies, and an unknown origin. *Anastrepha* sp.(?) at Brownsville, Tex., in mango in baggage from Mexico; and at New Orleans, La., in mango in air baggage from Guatemala.

Ceratitis sp., probably *capitata*, at Boston, Mass., in peach in air stores from an unknown origin.

Dacus sp., probably *cucurbitae*, at Seattle, Wash., in zucchini squash in stores from Hawaii.

Dacus sp., probably *dorsalis*, at Honolulu, Hawaii, in Indiapoon beautyleaf nut in mail from Hawaii.

Dacus sp., possibly *vertebratus* Bezzi, at New York, N.Y., in cucumber in stores from the Union of South Africa.

Dacus sp., at Boston, Mass., in cucumber in stores from the Republic of Mali; at Honolulu, Hawaii, in candlenut tree fruit, cattley guava, and coffee berries in preflight inspection of baggage, in mango in air stores from the Fiji Islands and the Philippines, in pepper in air baggage from Japan, and in solanaceous fruit in air baggage from the Philippines; and at Seattle, Wash., in guava in air baggage from the Philippines. *Dacus* sp.(?) at Honolulu, Hawaii, in *Phaseolus* sp. and tropical almond in mail from Hawaii and in fruit of Sapotaceae in air baggage from the Philippines; and at Savannah, Ga., in sweet orange in stores from Mozambique.

Rhagoletis sp., probably *cerasi*, at New York, N.Y., in cherry in air stores from Spain.

Rhagoletis sp., at Eagle Pass, Tex., in apple in baggage from Mexico; at El Paso, Tex., in *Crataegus* sp. in baggage from Mexico; at Laredo, Tex., in apple in baggage from Mexico; and at New York, N.Y., in cherry in air baggage from Ireland.

Tephritidae, genus near *Euaresta*, species unidentified, at Washington, D.C., in *Helichrysum* sp. and *Helipterum incanum* seeds in aircargo from Australia.

Tephritidae, probably genus and species of Tephritinae, at New York, N.Y., in strawflower in air baggage from Bermuda.

Tephritidae, identified to family only (7 times), at Brownsville, Tex., in guava in aircargo from Colombia; at Honolulu, Hawaii, in pepper in air stores from the West Pacific and in stores from the Fiji Islands, and in watermelon in air stores from the Philippines; at Laredo, Tex., in sweet orange in baggage from Mexico; at Miami, Fla., in coffee berry in air baggage from Brazil; and at New York, N.Y., in jujube in air baggage from Lebanon.

Tephritis sp., near *multiguttata* Beck., at New York, N.Y., in dried herbs in air baggage from England.

INSECTS OTHER THAN FRUIT FLIES

Aeolothrips sp., near *ericae* Bagn. (Aeolothripidae), not presently represented in the National Museum collection, at New York, N.Y., on calla lily in aircargo from Israel.

Alcidodes sp. (Curculionidae) at New York, N.Y., in sweetpotato in stores from Liberia.

Aleuroplatus n. sp. (Aleyrodidae) at Key West, Fla., on rose leaf in baggage from Cuba; at Progreso, Tex., on citrus leaf in baggage from Mexico; and at San Pedro, Calif., on rose leaf in air baggage from El Salvador.

Aleurotrachelus sp., probably undescribed (Aleyrodidae), at Miami, Fla., on leaf of an aquatic plant in aircargo from Peru. We have no previous records of aleyrodids on aquatic plants.

Aleyrodidae, genus uncertain, perhaps *Aleurotuberculatus* n. sp., at New York, N.Y., on *Baccaurea* sp. leaf in aircargo from Thailand.

Apion sp., probably *carduorum* (Curculionidae), at New York, N.Y., in globe artichoke in baggage from Italy and stores from Greece.

An apparent new species of the subfamily Bagoini (Curculionidae) at Miami, Fla., on burhead plants in aircargo from Peru.

Baris sp. (Curculionidae) at Galveston, Tex., in horseradish in stores from Germany; and at Philadelphia, Pa., in turnip in stores from France.

Brachyrhinus sp., possibly *singularis* (L.) (Curculionidae), at New York, N.Y., in cyclamen tuber in air baggage from Italy.

Chlorochroa sp. (?) (Pentatomidae), not in the National Museum collection, at McGuire Air Force Base, N.J., on crates in aircargo from Spain.

Chrysolina sp., possibly *cerealis* (L.) (Chrysomelidae), at New York, N.Y., with rosemary in baggage from Italy.

Chrysomela sp., probably *chlorina* Maulik (Chrysomelidae), not in the National Museum collection, at New York, N.Y., on orchid plants in aircargo from India.

Cladius sp., probably *difformis* (Panz.) (Tenthredinidae), at New York, N.Y., on cut roses in air baggage from England.

Cleonus sp. (Curculionidae) at Baltimore, Md., in beet in stores from the United Arab Republic; and at New York, N.Y., in beet in stores from Israel.

Coccotrypes sp., probably *surinamensis* Schedl (Scolytidae), at New York, N.Y., in palm seed in aircargo from Brazil.

Conoderus sp., near *lividus* (DeG.) (Elateridae), at Miami, Fla., as stowaway in airplane from Venezuela; at New Orleans, La., as stowaway in airplane from Central America; and at San Juan, P.R., on *Epidendrum* sp. plants in aircargo from Panama.

Conoderus sp., probably *rufangulus* (Gyll.) (Elateridae), at New York, N.Y., in grape in cargo from Chile.

Ctenicera sp., probably *aneus* (L.) (Elateridae), at Washington, D.C., in soil with Amur chokecherry tree in aircargo from the Union of Soviet Socialist Republics.

Cylas sp. (Curculionidae) at Baltimore, Md., in sweetpotato in stores from Nigeria; at Mobile, Ala., in sweetpotato in stores from Liberia; and at New York, N.Y., in sweetpotato in cargo from Liberia.

Diaprepes sp. (Curculionidae) at St. Thomas & St. John, U.S.V.I., in sweetpotato in cargo from St. Kitts, B.W.I.

Epicaerus sp. (Curculionidae) at Brownsville and Presidio, Tex., in potato in baggage from Mexico; and at Tampa, Fla., in potato in stores from Mexico.

Erosoma sp. (Aphidae) at Miami, Fla., on apple in air baggage from Venezuela, in air stores from Argentina and Brazil, and in stores from Germany and Japan; and at New York, N.Y., on apple in cargo from Chile.

"*Eulia*" sp. (Tortricidae) at New York, N.Y., in grape, nectarine, peach, and plum in cargo from Chile.

Frankliniella sp., undescribed (Thripidae), at New York, N.Y., on cut gladiolus in aircargo from Israel. A really distinct undescribed species, very rare.

Gymnandrosoma sp. (Olethreutidae) at Chicago, Ill., in guava in airmail from Puerto Rico; at Miami, Fla., in cacao pod in air baggage from Barbados and in jujube in air baggage from Mexico; and at Mobile, Ala., in cacao pod in baggage from Trinidad.

Heilipus sp. (Curculionidae) at Brownsville, Tex., in avocado seed in baggage from Mexico; at El Paso, Tex., in avocado in cargo from Mexico; at Laredo, Tex., on orchids in cargo from Mexico; at San Diego, Calif., in avocado in stores from Panama; and at San Pedro, Calif., in avocado seed in air baggage from Guatemala.

Heterotermes sp., probably *cardini* (Snyder) (Rhinotermitidae), at New York, N.Y., in tomato in cargo from the Dominican Republic. A very destructive termite to buildings and crops.

Hyperodes sp. (Curculionidae) at Philadelphia, Pa., in carrot in stores from Brazil.

Lixus sp. (Curculionidae) at Baltimore, Md., in beet in stores from Italy and Sierra Leone; at Eagle Pass, Tex., in grain sweepings from railway car from Mexico; at Houston, Tex., in beet in stores from the United Arab Republic; at New York, N.Y., in beet in stores from Israel; and at Philadelphia, Pa., in beet in stores from Peru and the United Arab Republic.

Lygaeidae, new genus near *Cligenes*, at Brownsville, Tex., on bromeliad in cargo from Mexico. New genus near *Ozophora* at Laredo, Tex., on bromeliad in cargo from Mexico.

Lygaeus (?) n. sp. (*Lygaeidae*), new to the National Museum collection, at Laredo, Tex., on orchid plant in baggage from Mexico.

Megastigmus sp., possibly *pictus* Mayr (Torymidae), at Hoboken, N.J., in white spruce seed in cargo from Denmark.

Melanthrips sp., probably *ficabii* Buffa (Acolothripidae), not presently represented in the National Museum collection, at New York, N.Y., on calla lily in aircargo from Israel.

Metamasius sp., near *rugipectus* Champ. (Curculionidae), at Laredo, Tex., on bromeliad plant in baggage from Mexico.

Periphyllus sp., perhaps *kuwanaii* Takah. (Aphidae), at Honolulu, Hawaii, on maple tree in air baggage from Japan.

Phyllobius sp. (Curculionidae) at Hoboken, N.J., in wood moss with apple and quince stock in cargo from France.

Phyllotreta sp., possibly *nemorum* (L.) (Chrysomelidae), at New York, N.Y., in apple in baggage from Norway.

Phytophaga sp. (Cecidomyiidae) at Hoboken, N.J., in Norway spruce seed in cargo from Germany.

Pineus sp. (Chermidae), different from any seen from the United States, at Washington, D.C., on *Pinus sibirica* in aircargo from the Union of Soviet Socialist Republics.

Podapion sp., *gallicola* Riley or n. sp. (Curculionidae), at Laredo, Tex., on pine in cargo from Mexico. First record of the genus from Mexico.

Polychisme sp. (*Lygaeidae*) at Brownsville, Tex., in *Chamaedorea* sp. seed in cargo from Mexico. This is a South American genus; first record so far north.

Premnotrypes sp. (Curculionidae) at Houston, Tex., in potato in stores from Peru; at Miami, Fla., in potato in air baggage from Colombia; at New Orleans, La., in potato in stores from Peru; and at San Pedro, Calif., in potato in air baggage from Peru.

Psylliodes sp., probably *chrysocephala* (L.) (Chrysomelidae), at Boston, Mass., on parsley in air stores from England.

Stenotarsonemus sp., probably n. sp. (Tarsonemidae), at Miami, Fla., on passionflower fruit in air baggage from Colombia.

Strophosoma sp. (Curculionidae) at Chicago, Ill., with forest litter packing in mail from Germany; and at Hoboken, N.J., in wood moss with apple and quince stocks in cargo from France.

Tenuipalpus sp., probably n. sp. (Tenuipalpidae), at Washington, D.C., on *Spathiphyllum* sp. in aircargo from Indonesia.

Tetralicia n. sp. (Aleyrodidae) at Nogales, Ariz., on breadnut tree in baggage from Mexico.

Tetranychus n. sp. (Tetranychidae) at Honolulu, Hawaii, on carnation flower in air baggage from Japan.

Trionymus sp. (Coccidae), not placed as a described species, at Hoboken, N.J., on cactus in mail from England.

DISEASES

Incompletely determined pathogens of special interest were:

Ascochyta sp. at El Paso, Tex., on lentil seed in mail from Germany. This is the first report on this host as far as is known.

Cercospora sp., close to *sapindi* Obregon-Brotere, at Miami, Fla., on genip fruit in air baggage from Nicaragua. No *Cercospora* has been previously reported on this host.

Cercospora sp. at Brownsville, Tex., on *Aglaonema* sp. leaf in cargo from Mexico; and at Miami, Fla., on philodendron leaf in air baggage from Jamaica.

Coniothyrium sp. at Honolulu, Hawaii, on lemon in air stores from Australia, on Mandarin orange in air quarters and air stores from Japan, and on sweet orange in air baggage and air stores from Japan.

Elsinoe sp. (not typical) at San Juan, P.R., on lemon in air stores from the West Indies.

Elsinoe sp. at Miami, Fla., on Satsuma orange in air baggage from Argentina and in air stores from South America.

Gloeosporium sp. at Key West, Fla., on *Myroxylon pereirae* seed pod in air baggage from Cuba. No previous reports on this host as far as known.

Helminthosporium sp. at New York, N.Y., on *Trema guineensis* leaf in air cargo from Liberia.

Phyllosticta sp. at Brownsville, Tex., on peperomia leaf in cargo from Mexico (first report on this host as far as known); and at New York, N.Y., on *Trema guineensis* leaf in air cargo from Liberia.

Sphenospora sp. at Miami, Fla., on *Ionopsis utricularioides* leaf in air baggage from Jamaica.

Stagonospora sp. at Boston, Mass., on red pepper in stores from Mozambique. First report of this on *Capsicum* as far as known.

NEMATODES

Aphelenchoides sp. at Brownsville, Tex., in tuftroot in cargo from Mexico; at Hoboken, N.J., in cyclamen tuber in cargo from Italy and in dahlia root in mail from Belgium, Canada, and Switzerland; at Nogales, Ariz., in soil with caladium plant in baggage from Mexico; at San Diego, Calif., in ginger root in stores from Japan; and at San Ysidro, Calif., in Indianrubber fig roots in air baggage from Mexico.

Aphelenchus sp. at Hoboken, N.J., in cyclamen tuber in cargo from Italy.

Criconeimoides sp. at Laredo, Tex., in soil with *Cymbopogon* sp. and *Ipomoea* sp. plants in baggage from Mexico.

Ditylenchus sp. at New Orleans, La., in garlic in cargo from Italy.

Helicotylenchus sp. at Boston, Mass., in canna roots in air baggage from the Azores; at Brownsville, Tex., in soil with begonia plant in baggage from Mexico; at El Paso, Tex., in soil with various plants in baggage from Mexico; at Laredo, Tex., in amaryllis roots, grass roots, soil with azalea, lily, and various plants in baggage from Mexico and in soil with railway car from Mexico; and at Nogales, Ariz., in soil with *Eriobotrya* sp. in baggage from Mexico.

Heterodera sp., probably *rostochiensis*, at Boston, Mass., in soil with potato in stores from Spain.

Heterodera sp., probably *trifolii* (Goffart) Oostenbrink, at Boston, Mass., in soil with spruce in cargo from Germany.

Other members of the genus *Heterodera* were intercepted 113 times at 23 ports from the following countries: Argentina, Australia, Austria, Azores, Barbados, Belgium, Bermuda, British Honduras, Canada, Czechoslovakia, England, Estonia, Federation of Malaya, France, Germany, Greece, Ireland, Italy, Japan, Korea, Mexico, Netherlands, New Zealand, Northern Ireland, Norway, Scotland, Sweden, United Arab Republic, and an unknown origin. These were taken from air baggage and baggage in soil samples and soil with the following plants: Begonia, chrysanthemum, cyclamen, *Dianthus* sp., fern, fig, forget-me-not, geranium, heather, herb, lemon, *Mespilus* sp., mint, oregano, philodendron, rose, shamrock, silver crassula, strawberry, sweetpotato, tree tomato, various unidentified plants, violet, and wormwood; from airmail and mail in soil with asters, fig cuttings, gladiolus, pansy plants, and shamrock plants; from cargo in soil with new and used automobiles, cabbage, cycad plant, lily bulb, potato, tanks, and trucks; and from stores in soil with beet, burdock, cabbage, carrot, celeriac, horseradish, leek, onion, parsley, parsnip, potato, rutabaga, salsify, and turnip.

Hoplolaimus sp. at Laredo, Tex., in grass roots and in soil with unidentified plant in baggage from Mexico.

Meloidogyne sp., possibly *arenaria*, at Hoboken, N.J., in iris roots in mail from India.

Meloidogyne sp., probably *hapla*, at Hoboken, N.J., in rose plant in mail from Germany.

Meloidogyne sp., probably *incognita acrita*, at Washington, D.C., in *Piper* sp. in airmail from the Netherlands.

Meloidogyne sp. at Brownsville, Tex., in tuftroot in cargo from Mexico; at Hoboken, N.J., in achimenes tubers in aircargo from India, in African agapanthus roots in cargo and mail from Japan, in anemone roots in mail from England, in astilbe roots in mail from England and cargo from the Netherlands, in begonia tubers in mail from Japan, in bigleaf goldenray roots in cargo from Germany, in caladium tubers in cargo from Guatemala, in calla lily tubers in baggage from Tanganyika, cargo from France and Japan, and mail from India, in clematis roots in airmail and mail from England and cargo from the Netherlands, in cohosh bugbane roots in mail from England, in coralbells in cargo from the Netherlands, in dahlia roots in mail from France, in epimedium roots in airmail from England, in geranium in airmail from England and cargo from the Netherlands, in gerbera roots in mail from India, in Japanese iris in cargo from Japan, in monkshood roots in mail from England, in peony in cargo from the Netherlands, in plantain lily roots in cargo from Japan, in rose plants in mail from France, Germany, and Portugal, in tree peony roots in cargo from Japan, in tuberose bulb in mail from India, and in turmeric rhizome in mail from India; at Laredo, Tex., in beet roots, elephantsear, lime seedling, and succulent plant in baggage from Mexico; at Philadelphia, Pa., in potato in stores from Brazil; at San Diego, Calif., in sweetpotato tuber in stores from Mexico; and at San Francisco, Calif., in begonia tuber and gladiolus corm in cargo from Japan, and in resurrection lily in aircargo from Singapore.

Pratylenchus sp. at Boston, Mass., in soil with unidentified plants in air baggage from Finland; at Brownsville, Tex., in heliconia roots in cargo from Mexico; and at Hoboken, N.J., in roots of astilbe, Christmas-rose, clematis, coral torchlily, fringed iris, *Helleborus odoratus*, Japanese iris, and phlox in cargo, and in monkshood roots in mail from the Netherlands; in clematis roots in mail from England; and in Japanese iris in cargo from Japan.

Psilenchus sp. at El Paso, Tex., in soil with rose plant in baggage from Mexico.

Rhabditis sp. at San Diego, Calif., in ginger root in stores from Japan.

Rotylenchulus sp. at Miami, Fla., in soil with miscellaneous plants in air baggage from Jamaica.

Scutellonema sp. at Laredo, Tex., in soil with plants in baggage from Mexico.

Trophurus sp., possibly a new species, at Brownsville, Tex., in soil with begonia plant in baggage from Mexico.

Tylenchorhynchus sp. at Laredo, Tex., in soil with begonia plant and unidentified plant in baggage from Mexico; and at Nogales, Ariz., in soil with coleus and philodendron in baggage from Mexico.

Tylenchus sp. at El Paso, Tex., in soil with dead plants and rose plant in baggage from Mexico.

Xiphinema sp. at Laredo, Tex., in selaginella roots in cargo and in soil with yam in baggage from Mexico.

Summary of Numbers of Interceptions Listed in Main Table

Country	Insect	Disease	Country	Insect	Disease
Africa:			Europe—Continued

*This total represents only pests of known or potential plant quarantine importance or organisms of scientific significance. The total of all interceptions made during the year was 30,230.

NOTE.—Interceptions were also made from the American Virgin Islands, Angola, Anguilla, Aruba, Bolivia, British Samoa, British Virgin Islands, Cayman Islands, Christmas Island, Eniwetok, Estonia, Ghana, Guernsey, Johnston Island, Jordan, Madeira Islands, Malta, Martinique, St. Kitts, St. Lucia, Sierra Leone, Tanganyika, Tortola, and Wales.

Pests Collected and Reported From July 1, 1959, Through June 30, 1960

[An asterisk indicates State inspection]

Pest and host	Country of origin	Number of interceptions in—			Collected in—
		Consumption	Nonentry	Propagation	
<i>Acanthoderes circumflexa</i> Jacq. Duv. (Cerambycidae):					
Airplane	Cuba		1		Fla.
<i>Acanthoscelides armitagei</i> (Pic) (Bruchidae):					
<i>Cajanus cajan</i> (pigeonpea)	Panama	1			N.Y.
<i>Aceria macrochelus</i> (Nal.) (Eriophyidae):					
<i>Acer pseudoplatanus</i> (planetree maple)	France		2		Mass.

Hosts and Insects

- ACACIA:**
Thrips flavus (Thysanoptera)
T. major (Thysanoptera)
Trogoderma granarium (Coleoptera)
- ACER:**
Aceria macrochelus (Acarina)
A. macrorhynchus (Acarina)
Aculus aceris (Acarina)
- ACHRAS:**
Anastrepha mombinpraepotans (Diptera)
A. serpentina (Diptera)
- AGAPANTHUS:**
Haplothrips gowdeyi (Thysanoptera)
- AGAVE:**
Batrachedra linaria (Lepidoptera)
Diachus auratus (Coleoptera)
- ALLIUM CEPA:**
Lygaeus albo-ornatus (Hemiptera)
- ALLIUM PORRUM:**
Acrolepis assectella (Lepidoptera)
Phytomyza rufipes (Diptera)
- ALLIUM SATIVUM:**
Brachycerus albidentatus (Coleoptera)
B. algius (Coleoptera)
Dyspessa ulula (Lepidoptera)
Frankliniella tenuicornis (Thysanoptera)
- ALPINA:**
Adoretus sinicus (Coleoptera)
- ALYXIA:**
Ceroplastes rubens (Homoptera)
- AMARYLLIS:**
Diaprepes famelicus var. (Coleoptera)
- ANANAS:**
Alpheias conspurcata (Lepidoptera)
Metamasius hemipterus sericeus (Coleoptera)
Pheidole megacephala (Hymenoptera)
Platoceticus symmetrica (Lepidoptera)
Ribua innoxia (Lepidoptera)
- ANNONA:**
Bephrata maculicollis (Hymenoptera)
Brevipalpus chilensis (Acarina)
Cerconota anonella (Lepidoptera)
Phenacoccus hirsutus (Homoptera)
Talponia batesi (Lepidoptera)
- ANTHEMIS:**
Cochlicella ventrosa (Mollusca)
Theba pisana (Mollusca)
- ANTHURIUM:**
Adoretus sinicus (Coleoptera)
Conoderus exsul (Coleoptera)
- APIUM:**
Euleia heraclei (?) (Diptera)
Otala lactea (Mollusca)
- ARACHIS:**
Trogoderma granarium (Coleoptera)
- ARCTOTIS:**
Frankliniella formosae (Thysanoptera)
- ARECA:**
Coptotermes vastator (Isoptera)
- ARMORACIA:**
Baris lepidii (Coleoptera)
- AUCUBA:**
Hypera postica (Coleoptera)
- BAMBOO:**
Myelobia smerintha (Lepidoptera)
- BEGONIA:**
Haplothrips gowdeyi (Thysanoptera)
Theba pisana (Mollusca)
- BETA:**
Gnorimoschema ocellatella (Lepidoptera)
Lygus lineolaris (Hemiptera)
- BIXA:**
Geotomus pygmaeus (Hemiptera)
Selenothrips rubrocinctus (Thysanoptera)
- BRASSICA:**
Vinsonia stellifera (Homoptera)
- BRASSICA CHINENSIS:**
Mamestra brassicae (Lepidoptera)
Nezara antennata (Hemiptera)

Countries of Origin and Insects

- ALGERIA:**
Ceratitis capitata
Cochlicella barbara
C. ventrosa
- AMERICAN SAMOA:**
Haplothrips gowdeyi
Organothrips bianchii
Pheidole megacephala
Xylothrips religiosus
- ANTIGUA:**
Cylas formicarius elegantulus
Vinsonia stellifera
- ARGENTINA:**
Brevipalpus obovatus
Ceratitis capitata
Epinotia aporema
Megacyllene spinifera
Xyleborus biconicus
- ASIA (country(?)):**
Trogoderma granarium
- AUSTRALIA:**
Lepidosaphes tuberculata
Megastigmus limoni
Nysius cienclandensis
Pinnaspis buzi
Plusia chalcites
Pseudaonidia clavigera
Sternochetus mangiferae
Taeniothrips hawaiiensis
T. kellyanus
Tetranychus cinnabarinus
Thrips imaginis
- AUSTRALIA(?):**
Unaspis yanonensis
- AUSTRIA:**
Baris lepidii
Frankliniella intonsa
- AZORES:**
Arion ater
Ceratitis capitata
Cochlicella ventrosa
Conoderus azoricus
Haplothrips cottei
Helix aspersa
Opogona sacchari
Pieris brassicae
Theba pisana
- BAHAMAS:**
Anastrepha mombinpraeoptans
Petrusa epilepsis
Rotruda mucidella olivaceella
Trogoderma ornatum
- BARBADOS:**
Euscepes postfasciatus
Fundella pellucens
Lamellaxis micra
Sphenarches caffer
- BELGIUM:**
Evergestis forficalis
Frankliniella intonsa
Haplothrips gowdeyi
Mamestra brassicae
Phytomyza rufipes
- BERMUDA:**
Bradybaena similaris
Cochlicella ventrosa
Diaprepes famelicus var.
Haplothrips gowdeyi
Lamellaxis micra
Opeas pyrgula
Pheidole megacephala
- BRAZIL:**
Asterolecanium epidendri
Bradybaena similaris
Ceratitis capitata
Chrysomphalus paulistae
C. personatus
Coccotrypes pygmaeus
Cryptotermes brevis
Euscepes postfasciatus
Leucoptera coffeella
Mordellistena cattlejana
Parlatoria cinerea
Pectinophora gossypiella
Pseudaonidia trilobitiformis
Stephanoderes hampei

Phloeotribus scarabaeoides
Taeniothrips atratus
Thrips angusticeps

ITALY:

Acrolepis assectella
Aleurolobus olivinus
Anacridium aegyptium
Apion carduorum
Archips prunivorus(?)
Ardis sulcata
Brachycerus albidentatus
B. algeris
Bruchidius trifolii
Bruchus lentis
B. signaticornis
P. tristis
Cassida sanguinolenta

Countries of Origin and Insects—Continued

ITALY—Continued

C. vibex
Cecilioides acicula
Ceratitidis capitata
Ceutorhynchus pleurostigma
Chrysolina americana
Cochlicella barbara
C. ventrosa
Cryptoblabes gnidiella
Curculio elephas
C. nucum
Dacus oleae
Dicyphus annulatus
Dyspessa ulula
Ectomyelois ceratoniae
Ephestia calidella
Frankliniella tenuicornis
Helicella conspurcata

H. maritima
H. pyramidata
H. variabilis
Helix aperta
H. aspersa
Hemimene juliana
Laspeyresia dorsana (?)
L. splendana
Lobesia botrana
Mamestra brassicae
Otala lactea
O. vermiculata
Parlatoria zizyphus
Phalonia zephyrana
Phytomyza rufipes
Pieris brassicae
Prays oleellus
Pyrausta nubilalis
Rhagoletis cerasi
Sehirus sexmaculatus
Sesamia cretica
Tetranychus cinnabarinus
Theba pisana
Thrips angusticeps
T. major
Trogoderma inclusum
Udea ferrugalis

JAMAICA:

Aganactesis indecora
Anastrepha monbinpraeoptans
Ectomyelois ceratoniae
E. muriscis
Lyctus brunneus
Monomorium destructor
Neodryocetes caribaeus
Palaeopus costicollis
Pectinophora gossypiella
Pseudococcus neobrevipes
Subulina octona
Vinsonia stellifera

JAPAN:

Acrolepis assectella
Aethus indicus
Aleurocanthus spiniferus
Aleurolobus taenabae
Aleurotuberculatus similis
Amyna natalis
Anomala orientalis
Aonidiella inornata
Brevipalpus obovatus
Callidium rufipenne
Carpocina niponensis
Chilo suppressalis
Chrysomphalus bifasciculatus
Coccus pseudomagnoliarum
Cylas formicarius var.
Euscepes postfasciatus
Frankliniella formosae
F. tenuicornis
Haplothrips aculeatus
H. gowdeyi
Hylurgops palliatus
Lampides boeticus
Lepidosaphes pini
L. tuberculata
Leucania loreyi
Macrosctus japonensis

JAPAN—Continued

Mamestra brassicae
Megastigmus tsugaphilus
Morganella longispina
Nezara antennata
Nipponaclerda biwakensis
Nomophila noctuella
Oligonychus perditus
Opeas pyrgula
Parlatoria zizyphus
Pieris rapae crucivora
Planococcus dorsopinosus
Pseudanidia paeoniae
Pseudococcus pini
Pyrausta nubilalis
Selenothrips rubrocinctus
Spodoptera mauritia
S. mauritia acronyctoides
Stictoptera subobliqua
Taeniothrips gracilis
T. hawaiiensis
Thrips flavus
Trogoderma granarium
Unaspis citri
U. yanagisensis

JAPAN (?):

Arcte coerula
Diaphania itysalis
Ectomyelois ceratoniae
Pheidole megacephala

KOREA:

Chilo suppressalis

KUWAIT:

Trogoderma granarium

KWAJALEIN (?):

Pyrausta nubilalis

LEBANON:

Ceratitidis capitata
Cryptoblabes gnidiella
Dacus oleae
Dialeurodes kirkaldyi
Ectomyelois ceratoniae
Trogoderma granarium

LIBERIA:

Leucinodes orbonalis

LIBYA:

Helicella cespitum
H. variabilis
Theba pisana

LUXEMBOURG:

Thrips flavus
Trialeurodes lauri

MEXICO:

Aleurocanthus woglumi
Aleuroglandulus emmae
Aleuroparadozus gardeniae
Aleuroplatus variegatus
Alpheias conspirata
Anastrepha ludens
A. monbinpraeoptans
Anechura vara
Anthonomus albolineatus
Aspidiotus palmarum
Aulacoscelis melanocera
Batrachedra linaria
Bradybaena similis
Cactophagus validirostris
Calypsocephala gerstaeckeri
C. marginipennis
Capaneus tetricus
Chalepus aculeicornis
Charidotis seminulum
Chilo toftini
Chrysomphalus personatus
C. sphaerioides
Citigenes delineta
Coelonertus nigrirostris
Conotelus mexicanus
Conotrachelus aquacatae
C. perseae
Ctenochira hectica
C. hierglyphica
C. plicata
Cylas formicarius elegantulus
Deloyala guttata bohemani
Dendrocoris variegatus

Countries of Origin and Insects—Continued

MEXICO—Continued

Deuteroecampa atomaculata
Diabrotica lepida
D. porracea
Diachus auratus
Dialeurodes citrifolii
Dyscinetus laevipunctatus
Ectomyelois muriscis
Epilachna borealis var.
E. mexicana
Epinotia aporema
Everes comyntas
Exptochiomeria formosa
E. oblonga
Frankliniella williamsi
Gnorimoschena gudmanella
Grapholitha packardii
Gynaikothrips ficorum
Helicina zephyrina
Helix aspersa
Heterotermes convezinotatus
Hileithia decostalis
Homoeogamia mexicana
Iridomyrmex iniquus
Lepidosaphes philococcus
Ligyrocoris aurivilliana
Lygus lineolaris
Micrapate labialis
Moodna bisinuella(?)
Myelobia smerintha
Neoleucinodes elegantalis
Neolobophora inopinata
Ogdoecosta biannularis
O. catenulata
Ophraea maculicollis
Parisoschonus flavolimbatus
Pectinophora gossypiella
Phelypera distigma
Phlegyas annulicrus
Physonota alutacea
Plagiodera congesta
Platoceticus symmetrica
Puto mexicanus
P. uller
Rumina decollata
Stenomma catenifer
Subulina octona
Sylepta reginalis
Talponia batesi
Tenthecoris angustimarginatus
T. bicolor
T. confusus
Trialeurodes similis
T. vitrinellus
Trionymus sacchari
Trochuda raspa
Trogoderma glabrum
T. inclusum
T. ornatum
T. parabile
Trogozylon aequale
T. prostomoides

MIDWAY ISLANDS:

Gnaphalocoris medinalis

MOROCCO:

Cochlicella barbara
C. ventrosa
Helicella caperata
H. maritima
Melopoplax ditomoides
Otala lactea
O. vermiculata
Sitona lineata(?)
Theba pisana
Trogoderma inclusum
T. ornatum
Xeroleuca mognabina

MOROCCO(?):

Copris hispanus

NETHERLANDS:

Acrolepia assectella
Adozophyes orana
Brevipalpus obovatus
Bruchus affinis
Cassida nebulosa
Dialeurodes chittendeni

NETHERLANDS—Continued

Empoasca flavescens
Eriophyes canestrinii
Frankliniella intonsa
Haplothrips aculeatus
Hypera postica
Lygus rugulipennis
Myzus ascalonicus
Phytomyza rufipes
Steneotarsonemus laticeps
Taeniothrips atratus
Tenuipalpus punicae
Tetranychus viennensis
Thrips flarus
T. major

Heterobostrychus brunneus
Trogoderma granarium
Xyloperthella picea
 NORTHERN IRELAND:
Phytomyza rufipes
 NORWAY:
Argyresthia conjugella
Evergestis forficalis
Frankliniella intonsa
Taeniothrips atratus
T. ericae
 OKINAWA:
Chalciope hyppasia
Pheidole megacephala
 PAKISTAN:
Sincizylon anale
Trogoderma granarium
Vinsonia stellifera
 PANAMA:
Acanthoscelides armitagei
Anastrepha mombinpraeoptans
Ceciloides acicula
Cephaloleia pretiosa
Megasoma elephas
Metamasius hemipterus sericeus
Nasutitermes corniger
Platypus rugulosus
Subulina octona
Vinsonia stellifera
 PERU:
Delphacodes teapae
Dinoderus bifoveolatus
Pagiocerus fiorii
 PHILIPPINES:
Aethus indicus
Caryedon fuscus
Coptotermes vastator
Cylas formicarius
C. formicarius var.
Ectomyelois ceratoniae
Mirperus ferrugineus
Monomorium destructor
Parlatoria zizyphus
Phenacoccus hirsutus
Polytus mellerborgii
Unaspis yanonensis
 POLAND:
Curculio nucum
Frankliniella intonsa
Haplothrips tritici
Taeniothrips atratus
 PORTUGAL:
Archips pronubanus(?)

Countries of Origin and Insects—Continued

PORTUGAL—Continued

Ardis sulcata
Arion ater
Ceratitis capitata
Cochlicella ventrosa
Cryptoblabes gnidiella
Curculio elephas
Ectomyelois ceratoniae
Helicella caperata
H. variabilis
Laspeyresia splendana
Pyrausta nubilalis
Trogoderma granarium

PUERTO RICO:

Anastrepha mombinpraeoptans
A. suspensa(?)
Ceratomya ruficornis
Crambus ligonellus
Diaprepes abbreviatus var.
Euscepes postfasciatus
Maruca testulalis
Metamasius hemipterus hemipterus
Nasutitermes costalis
Pheidole megacephala

REPUBLIC OF THE CONGO:

Callosobruchus phaseoli
Caryedon fuscus
Cryptophlebia leucotreta

RUMANIA:

Podagrica fuscicornis

SCOTLAND:

Fiebrocapsus flaveolus(?)
Gelechia ericetella
Micrelus ericae
Orthotylus ericetorum
Taeniothrips atratus
T. ericae
Thrips flavus
T. major

SINGAPORE:

Antonina graminis
Cylas formicarius var.
Parlatoria zizyphus
Pinnaspis orchidarum
Trogoderma granarium

SOUTH PACIFIC:

Spodoptera mauritia acronyctoides

SPAIN:

Agriotes lineatus
Arion ater
Brachycerus algerus
Ceratitis capitata
Cochlicella barbara
Cryptoblabes gnidiella
Curculio elephas
Dyspessa ulula
Helicella striata(?)
H. virgata
Helix aspersa
Laspeyresia splendana
Parlatoria zizyphus
Pieris brassicae
Pseudococcus citricus
Theba pisana
Thrips angusticeps

SUDAN:

Trogoderma granarium

SURINAM:

Vinsonia stellifera

SWEDEN:

Argyresthia conjugella
Frankliniella intonsa
Phytomyza rufipes
Taeniothrips atratus

SWITZERLAND:

Adela ochensheimeriella
Laspeyresia strobilella
Psylla rhododendri
Ripersiella cacticans
Stenopitilia stigmatodactyla
Taeniothrips atratus

TAHITI:

Morganella longispina
Parlatoria zizyphus
Selenothrips rubrocinctus

THAILAND:

Cylas formicarius var.
Phyllocnistis citrella(?)

TRINIDAD:

Dercynus micronyx
Euscepes postfasciatus
Sylepia elevata
Vinsonia stellifera

TUNISIA:

Ceratitis capitata

TURKEY:

Blastodacna atra
Ceciloides acicula
Ceratitis capitata
Helicella derbentina
H. variabilis

UNION OF SOUTH AFRICA:

Blissus diplopterus
Ceratitis capitata
Coradylomera spinicornis
Cryptophlebia leucotreta
Dictyophorus spumans
Epichorista ionephela
Frankliniella schultzei
Haplothrips gowdeyi
H. nigricornis
Opogona sacchari
Oryzaenus rufiventris
Phlyctinus callosus
Trogoderma granarium

UNION OF SOVIET SOCIALIST REPUBLICS:

Agriotes obscurus
Petrova resinella

UNITED ARAB REPUBLIC:

Ceratitis capitata
Dacus oleae
Gnorimoschema ocellatella
Hellula undalis
Lobesia botrana
Trogoderma granarium

UNKNOWN:

Amphimallon majalis
Anastrepha ludens
Argyresthia conjugella
Bothynus cuniculus
Ceratitis capitata
Chilo suppressalis
Conoderus bisoveatus
C. pallipes
Cretonotos gangis
Diocalandra tailensis
Euethola rugiceps
Euricania splendida
Frankliniella intonsa
Haplothrips dianthinus
Hypera nigritrostris
Limothrips denticornis
Lyctus brunneus
Myzus ascalonicus

An asterisk (*) indicates State inspection.

A dagger (†) indicates a first interception from the country named.

A double dagger (‡) indicates a first interception by Division inspectors.

Hosts and Diseases

- ABIES:**
Atichia glomerulosa (Ascomycetes)
Hormiscium pinophyllum (Deuteromycetes)
- ACANTHUS:**
Meloidogyne hapla (Nematoda)
- ACER:**
Cladosporium epiphyllum var. *acerinum* (Deuteromycetes)
- ADENIA:**
Meloidogyne javanica (Nematoda)
- AGAVE:**
Coniothyria agaves (Deuteromycetes)
Pleospora phragmospora (Ascomycetes)
- ALLIUM CEPA:**
Ditylenchus dipsaci (Nematoda)
Heterosporium allii (Deuteromycetes)
Mycosphaerella schoenoprasii (Ascomycetes)
- ALLIUM CEPA SOLANINUM:**
Mycosphaerella schoenoprasii (Ascomycetes)
- ALLIUM PORRUM:**
Heterosporium allii (Deuteromycetes)
Mycosphaerella schoenoprasii (Ascomycetes)
- ALLIUM SATIVUM:**
Ditylenchus dipsaci (Nematoda)
Mycosphaerella schoenoprasii (Ascomycetes)
- ANTHURIUM:**
Macrophoma anthurii (Deuteromycetes)
Phyllachora engleri (Ascomycetes)
- ANTIRRHINUM:**
Puccinia antirrhini (Promycetes)
- ARACHIS:**
Puccinia arachidis (Promycetes)
- ARAUCARIA:**
Cryptospora longispora (Ascomycetes)
Diaporthe eres (Ascomycetes)
Macrophoma araucariae (Deuteromycetes)
- ARECA:**
Phomopsis palmicola (Deuteromycetes)
- ASTILBE:**
Meloidogyne incognita acrita (Nematoda)
- AUCUBA:**
Coniothyrium aucubae (Deuteromycetes)
Phyllosticta aucubicola (Deuteromycetes)
- BACCHARIS:**
Puccinia baccharidis (Promycetes)
- BAMBOO:**
Papularia sphaerosperma (Deuteromycetes)
- BEGONIA:**
Meloidogyne arenaria (Nematoda)
- BETA:**
Peronospora schachtii (Phycomycetes)
- BETULA:**
Floutrightia virgultorum (Ascomycetes)
- BLETILLA:**
Aphelenchoides fragariae (Nematoda)
- BRASSICA RAPA:**
Meloidogyne incognita (Nematoda)
- BROMELIAD:**
Echidnoides bromeliacearum var. *stellata* (Ascomycetes)
- BUXUS:**
Puccinia buxi (Promycetes)
- CALADIUM:**
Meloidogyne arenaria (Nematoda)
- CALLICARPA:**
Meloidogyne hapla (Nematoda)
- CALLISTEPHUS:**
Coleosporium asterum (Promycetes)
- CAMELLIA:**
Cylindrosporium camelliae (Deuteromycetes)
- CASSIA:**
Phyllachora canafistulae (Ascomycetes)
- CATTLEYA:**
Septoria selenophomoides (Deuteromycetes)
- CELOSIA:**
Alternaria celastae (Deuteromycetes)
- CHRYSANthemUM:**
Puccinia horiana (Promycetes)
Septoria leucanthemi (Deuteromycetes)
- CICHORIUM:**
Pseudomonas marginalis (Schizomycetes)
- CITRUS AURANTIFOLIA:**
Elsinoe australis (Ascomycetes)
Xanthomonas citri (Schizomycetes)
- CITRUS AURANTIUM:**
Phoma citricarpa (Deuteromycetes)
Xanthomonas citri (Schizomycetes)
- CITRUS AURANTIUM VAR.:**
Xanthomonas citri (Schizomycetes)
- CITRUS GRANDIS:**
Phoma citricarpa (Deuteromycetes)
Xanthomonas citri (Schizomycetes)
- CITRUS ICHANGENSIS X C. RETICULATA:**
Phoma citricarpa (Deuteromycetes)
Xanthomonas citri (Schizomycetes)
- CITRUS LIMON:**
Camarosporium citri (Deuteromycetes)
Coniothecium scabrum (Deuteromycetes)
Elsinoe australis (Ascomycetes)
Phoma citricarpa (Deuteromycetes)
Septoria citri (Deuteromycetes)
Sphaceloma fawcettii var. *scabiosa* (Deuteromycetes)
Xanthomonas citri (Schizomycetes)
Xanthomonas sp. (Cancrosis B) (Schizomycetes)
- CITRUS PARADISI:**
Coniothecium citri (Deuteromycetes)
Phoma citricarpa (Deuteromycetes)
Xanthomonas citri (Schizomycetes)
- CITRUS RETICULATA:**
Coniothecium scabrum (Deuteromycetes)
Elsinoe australis (Ascomycetes)
Phoma citricarpa (Deuteromycetes)
Septoria citri (Deuteromycetes)
Stromiopsis citri (Ascomycetes)
Xanthomonas citri (Schizomycetes)
- CITRUS RETICULATA VAR.:**
Xanthomonas citri (Schizomycetes)
- CITRUS SINENSIS:**
Elsinoe australis (Ascomycetes)
 "Greasy spot"
Phoma citricarpa (Deuteromycetes)
Septoria citri (Deuteromycetes)
Sphaceloma fawcettii var. *scabiosa* (Deuteromycetes)
Xanthomonas citri (Schizomycetes)
- CITRUS SP.:**
Phoma citricarpa (Deuteromycetes)
Xanthomonas citri (Schizomycetes)
- CLEMATIS:**
Meloidogyne hapla (Nematoda)
- COCOLOBA:**
Phyllosticta coccolobae (Deuteromycetes)
- COCOS:**
Cytophora palmicola (Deuteromycetes)
Diplodia epicocos (Deuteromycetes)
Macrophoma cocos (Deuteromycetes)
Phomopsis cocos (Deuteromycetes)
- COFFEA:**
Leptosphaeria coffeigena (Ascomycetes)
- COLOASIA:**
Meloidogyne javanica (Nematoda)
- CONVALLARIA:**
Aphelenchoides blastophthorus (Nematoda)
- CORIANDRUM:**
Meloidogyne incognita acrita (Nematoda)

UNITED STATES DEPARTMENT OF AGRICULTURE
AGRICULTURAL RESEARCH SERVICE
PLANT QUARANTINE DIVISION
WASHINGTON 25, D.C.

LIST OF INTERCEPTED PLANT PESTS, 1961

(Pests Recorded From July 1, 1960, Through June 30, 1961)

Compiled by
Bessie C. Mumford
Plant Quarantine Aid

INTRODUCTION

This report covers the 48th year for which lists of interceptions have been published. It summarizes records of plant pests found in, on, or with plants, plant products, baggage, cargo, mail, and means of conveyance (1) imported into or entering the United States or its possessions, (2) offered for entry but refused, (3) held in quarters or stores of planes or ships, (4) offered for entry for immediate transportation and exportation in bond, (5) in domestic shipments to the mainland from the States of Alaska and Hawaii, the American Virgin Islands, Guam, Puerto Rico, and other offshore possessions, or (6) in preclearance inspection in the Bahamas and Bermuda.

The pests listed include insects, snails, bacteria, fungi, nematodes, and viruses of known or potential plant quarantine significance to the United States. Some common organisms are included if they are new to the country of origin or the host plant, or are of such limited distribution in the United States that they are worthy of mention.

The data for this list include identifications received from the specialists during the fiscal year 1961 and represent some interceptions made during previous years. Determinations are largely made by specialists of the Entomology Research Division and the Plant Quarantine Division, although a certain amount of this work is done by collaborating State officials. Snail identifications are made by taxonomists in the Division of Mollusks, U.S. National Museum. Some critical studies and identifications are made by specialists of the Crops Research Division, who also identify many of the host plants.

Scientific names of the insects are reviewed by the specialists who identify them and also by Mr. Paul X. Peltier, entomologist, who assists in the compilation. Mrs. Alice J. Watson, mycologist, assists with the disease list. Host names are reviewed by Dr. Bernice G. Schubert of the New Crops Research Branch. Every effort is made to conform to the International Rules of Nomenclature. However, in the disease tabulation the name of the stage found is usually listed rather than the perfect stage. Family names are listed with the insects in the tabulation; orders are shown in the host list. Classes of the diseases are given in the disease host list.

It is often difficult to trace the true origin of stores in planes and ships. Questionable cases are omitted, listed with a question mark, or shown as unknown. Pests of a serious nature reported for the first time from a country are usually listed as from an unknown origin or omitted until confirmation of the presence of the pest is given by the country concerned.

NOTES ON PESTS INTERCEPTED

The total number of interceptions for the fiscal year 1961 was 25,575, as compared with 30,230 the previous year. This does not include common pests which are widespread in this country and are no longer recorded. Of the total, 8,808 were considered of enough importance to be listed. The decrease in the number of interceptions may be due in part to the increased efforts of the Plant Quarantine Division to educate the public through the use of movies ("The Hidden Menace" and "Don't Bring Your Enemy Home") and various leaflets distributed to air and ship lines.

AIRBORNE MATERIAL

Interceptions of pests arriving by air totaled 8,722, of which 7,968 were insects or snails and 754 diseases or nematodes. There were 199 interceptions of significant insects found as stowaways on airplanes. Among the important airborne pests were 69 interceptions of the European cherry fruit fly, 3 of khapra beetle, 109 of the Mediterranean fruit fly, 28 of a chafer, *Melolontha melolontha*, 7 of the Mexican fruit fly, 30 of the olive fruit fly, 4 of the oriental fruit fly, 15 of the pink bollworm, 72 of the West Indian fruit fly, 153 of the black spot of citrus, 18 of citrus canker, 55 of the sweet orange scab, and 5 of the golden nematode.

FRUIT FLIES

A total of 685 fruit fly interceptions were identified to species as follows:

Anastrepha ludens, the Mexican fruit fly, was intercepted 151 times, 149 from Mexico and 2 from Guatemala. The hosts were cherimoya, grapefruit, mango, pomegranate, quince, sour orange, sweet lime, and sweet orange.

Anastrepha mombinpraeoptans, the West Indian fruit fly (142 times), in mamey sapote, mango, purple mombin, tropical almond, and yellow mombin from the American Virgin Islands, Colombia, Costa Rica, Cuba, Dominican Republic, El Salvador, Guatemala, Haiti, Honduras, Jamaica, Mexico, Nicaragua, Panama, Puerto Rico, Trinidad, and the West Indies (island(?)).

Anastrepha serpentina (4 times) in mamey sapote in air baggage from Mexico and Nicaragua, in star-apple in air baggage from Nicaragua, and in Tempisque jungleplum in baggage from Mexico.

Anastrepha suspensa (twice) on airplane window from Puerto Rico (?) and in guava in air baggage from Puerto Rico.

Ceratitis capitata, the Mediterranean fruit fly (195 times), an adult female in an airplane from Hawaii, and larvae in apple, apricot, Arabian coffee berry, cherry, *Coffea* sp. berry, fig, grape, grapefruit, guava, jujube, lemon, loquat, Mandarin orange, mango, pawpaw, peach, pear, pomegranate, pricklypear, quince, soda-apple nightshade fruit, sweet orange, and tropical almond. The countries of origin were: Argentina, Azores, Brazil, Costa Rica, Cyprus, Greece, Hawaii, Iran, Israel, Italy, Lebanon, Peru, Portugal, Republic of South Africa, Spain, Turkey, United Arab Republic, and an unknown origin. *C. capitata* (?) (19 times) in Arabian coffee berry, *Coffea* sp. berry, fig, *Musa* sp. fruit, pepper, pomegranate, sweet orange, and tropical almond from Greece, Hawaii, Italy, and Spain.

Ceratitis colae(?) (once) in Sudan colanut in aircargo from Nigeria.

Dacus cucurbitae, the melon fly (5 times), in cucumber, tomato, and zucchini squash in stores from Hawaii. *D. cucurbitae*(?) (twice) in cucumber in air stores and stores from Hawaii.

Dacus dorsalis, the oriental fruit fly (22 times), in banana, guamachil apesearring pod, Indiapoon beautyleaf fruit, lychee nut, mail package, mango, *Ochrosia elliptica*

fruit, pitanga, and tropical almond from Guam, Fiji(?), and Hawaii. *D. dorsalis*(?) (12 times) in agati sesbania, betel palm nut, guava, mango, ti berry, and tropical almond from Hawaii.

Dacus oleae, the olive fruit fly (57 times), with baggage and in olive in air baggage, air stores and baggage from Austria (?), Cyprus, Greece, Italy, Lebanon, and an unknown origin.

D. oleae(?) (once) in green olive from Italy.

Euleia heraclei (once) in celery in stores from Germany.

Rhagoletis alternata(?) (once) in rosaceous berry in baggage from Italy.

Rhagoletis cerasi, the European cherry fruit fly (69 times), in cherry in air baggage, air quarters, and air stores from Czechoslovakia, Denmark, France, Germany, Greece, Hungary, Israel(?), Italy, Netherlands, Poland, Portugal, Spain, and an unknown origin. *R. cerasi*(?) (once) in cherry from Italy.

INSECTS OTHER THAN FRUIT FLIES

The following insects of special significance were intercepted:

Acrolepia assectella (Hyponomeutidae) in leek in stores from France, Italy, and Spain.

Adoxophyes orana (Tortricidae) in apple in air stores and peach in air baggage from an unknown origin; and on cut roses in air baggage from the Netherlands.

Aleurocanthus spiniferus (Aleyrodidae) on sour orange leaf in stores from Japan.

Aleurocanthus woglumi (Aleyrodidae), the citrus blackfly (8 times), on *Citrus* sp. leaf in air baggage from Nicaragua and baggage from Mexico, on lime leaf in cargo from Mexico, and on sweet orange leaf in quarters from Jamaica.

Aspidiotus destructor (Coccidae) (19 times) on coconut in air baggage from Honduras and Mexico, baggage and cargo from Mexico, quarters from the Bahamas, and stores from Costa Rica, Mexico, Panama, and the Philippines; on kentia palm in stores from the Philippines; on oleander in quarters from the Bahamas; on palm seed in air baggage from Cuba; on rose leaf in baggage from Tortola; on screwpine in aircargo from Indonesia; and on sugar-apple and sweet orange in baggage from Cuba.

Blissus diplopterus (Lygaeidae) on hakea seed in mail from the Republic of South Africa.

Brachycerus algirus (Curculionidae) in garlic in cargo from Spain.

Brevipalpus chilensis (Tenuipalpidae) on grape in aircargo and cargo, on lemon in air stores, and on reed jacket for liquor in air baggage from Chile.

Bruchus tristis (Bruchidae) in broadbean in baggage, grass pea in baggage and mail, and white lupine seed in baggage from Italy; and in pea in stores from Greece.

Cacaecimorpha (Archips) pronubana (Tortricidae) in chayote and pomegranate in baggage from Italy.

Carposina niponensis (Carposinidae) in apple in stores from Japan.

Ceroplastes rubens (Coccidae) on anthurium leaf in mail and maile alyxia in baggage and mail from Hawaii.

Chilo suppressalis (Crambidae), the Asiatic rice borer (16 times), in rice straw in air baggage from Japan, baggage from Formosa, Spain, and an unknown origin, and mail and stores from Japan.

Coccus viridis (Coccidae) (40 times) on Brazil peppertree, *Citrus* sp. twig, coffee berry and leaf, *Gardenia* spp., guava, horseshoe geranium, ixora, jasmine, and lychee from Barbados, Brazil, Cuba, Hawaii, Madeira Islands, and St. Kitts.

Coptotermes niger (Rhinotermitidae) in rosewood log in cargo from Brazil and in virola log in cargo from Costa Rica.

Cryptoblabes gnidiella (Phycitidae) (18 times) in bamboo in baggage from Italy, on cockscomb cut flower in baggage from Greece, in lemon in air stores from Spain, on oleander cutting in air baggage from Bermuda, in pomegranate in air baggage from Israel and baggage from Italy, and in sweet orange in air baggage from Italy and air stores and stores from Spain.

Cylas formicarius (Curculionidae) in sweetpotato in aircargo and cargo from Hong Kong and Thailand.

Dialeurodes kirkaldyi (Aleyrodidae) on Arabian jasmine in mail and on frangipani cutting in air baggage from Hawaii, on gardenia in air baggage from Tahiti, and on jasmine in aircargo from the Philippines.

Diaspis juniperi (Coccidae) on Lawson falsecypress in cargo from the Netherlands.

Dichocrocis punctiferalis (Pyraustidae) on Japanese white pine in baggage from Japan and on rambutan in air baggage from the Federation of Malaya.

Dyspessa ulula (Cossidae) in garlic in cargo from Italy and Spain and stores from Yugoslavia.

Earias cupreoviridis (Noctuidae) in okra in stores from British West Africa.

Ectomyelois ceratoniae (Phycitidae) (33 times) in almond, Arabian coffee, assorted seed, barringtonia pod, English walnut, goldenshower senna pod, pomegranate, quince, sweet orange, and tamarind seed pod. Countries of origin were Africa (country(?)), Greece, Hawaii, Israel, Italy, Jamaica, Montserrat, Philippines, Portugal, Puerto Rico, and Turkey.

Epichorista ionephela (Tortricidae) on Cape chinkerichee in cargo and mail from the Republic of South Africa.

Epilachna 28-punctata (Coccinellidae) in cabbage in stores from Australia.

Epinolia aporema (Olethreutidae) in broadbean in air baggage from Ecuador and in pigeonpea in air baggage from Jamaica.

Euscepes postfasciatus (Curculionidae) in sweetpotato in stores from Brazil and Trinidad.

Evergestis forficalis (Pyraustidae) in cauliflower in stores from Norway.

Frankliniella intonsa (Thripidae) (17 times) on carnation, gladiolus, mixed cut flowers, rose, strawflower, and sweetpea in air baggage from Denmark, England, France, Germany, Hungary, Poland, and Sweden; and on rose in cargo from France.

Gnorimoschema ocellatella (Gelechiidae) in beet in air baggage from Italy and stores from the United Arab Republic.

Grapholitha janthiana(?) (Olethreutidae) in apple in air baggage and baggage from Austria, Rumania, and Yugoslavia and in air stores from an unknown origin.

Lampides boeticus (Lycaenidae) in broadbean in stores from the United Arab Republic and in mauna loa lei in air baggage and baggage from Hawaii.

Laspeyresia splendana (Olethreutidae) (29 times) in chestnut in air baggage and baggage from Germany, Italy, Portugal, Spain, Turkey, and Yugoslavia and in cargo from Italy.

Laspeyresia strobilella (Olethreutidae) in pine cone in baggage from England; and in spruce cone in air baggage and baggage from Germany and an unknown origin.

Lobesia botrana (Olethreutidae) in grape in air baggage from Italy and Lebanon.

Mamestra brassicae (Noctuidae) in *Brassica* sp. in stores from Japan, in cabbage in stores from England, France, Germany, Italy, and the Netherlands, in cauliflower in stores from Tanganyika, and in parsley in stores from Italy.

Maruca testulalis (Pyraustidae) (35 times) in cargo (with celery and chayote) from Puerto Rico, in jade flower(?) and mauna loa lei in air baggage and baggage from Hawaii, in pigeonpea in air baggage, airmail, and cargo from Puerto Rico, in sesbania in air baggage and mail from Hawaii, and in string bean in air baggage, airmail, and cargo from Puerto Rico and stores from Brazil and Japan.

Megastes grandalis (Pyraustidae) in sweetpotato in stores from Brazil.

Melolontha melolontha (Scarabaeidae), a chafer (28 times), as stowaway on airplane from France.

Nilotaspis halli (Coccidae) on *Prunus* sp. scion in aircargo from Iran.

Ostrinia (*Pyrausta*) *nubilalis* (Pyraustidae) in broomcorn stalk in baggage and cargo from Italy and in mail from Yugoslavia, in chestnut in air baggage from Italy, on chrysanthemum in air baggage from Japan, with military cargo from Spain, and in string bean in stores from Japan.

Oulema (*Lema*) *melanopa* (Chrysomelidae) in soil with heather plant in baggage from Germany and on unidentified plant in cargo from the Netherlands.

Parlatoria zizyphus (Coccidae) (49 times) on *Citrus* sp. leaf, grapefruit, lemon, Mandarin orange, pummelo, sour and sweet lime, and sweet orange from Algeria, Cameroun, China, Formosa, Gambia, Hong Kong, Israel, Italy, Japan, Liberia, Okinawa, Philippines, Spain, Thailand, and an unknown origin.

Pectinophora gossypiella (Gelechiidae), the pink bollworm (33 times), in bale of cotton in cargo from India; in bale of cotton motes in cargo from Brazil; in cotton boll in air baggage from Haiti, Hawaii, Italy, and Turkey, baggage from Mexico, and mail from Hawaii; in cottonseed in air baggage from Brazil and Grand Cayman, baggage from Mexico, cargo from Hong Kong and the United Arab Republic, and quarters from Mexico; in hibiscus lei in air baggage from Cuba; in Levant cotton boll in air baggage from Trinidad; in okra in air baggage from the Dominican Republic, Haiti, and Jamaica and in aircargo and stores from the Dominican Republic; and in seed cotton in quarters from Mexico.

Perkinsiella saccharicida (Delphacidae) on anthurium flower in air baggage from Hawaii.

Phalonia zephyrana (Phaloniidae) in carrot in stores from Italy.

Pieris brassicae (Pieridae) on cabbage in stores from Italy, on lettuce in stores from the Azores, and with military cargo from Greece and Morocco.

Pityogenes chalcographus (Scolytidae) in conifer dunnage from Belgium and Germany.

Prays oleellus (Hyponomeutidae) in olive leaf cutting and fruit in air baggage and baggage from Italy.

Prodenia litura (Noctuidae) in pepper in stores from Israel.

Rhynchites auratus (Curculionidae) in sloe seed in mail from Scotland.

Sesamia cretica (Noctuidae), the durra stem borer, in sorghum stalk in cargo from Italy.

Stenoma catenifer (Stenomidae) (23 times) in avocado in air baggage and baggage from Brazil, Colombia, Ecuador, El Salvador, Guatemala, Honduras, Mexico, Nicaragua, and Panama.

Taeniothrips gracilis (Thripidae) (18 times) on amaryllis bulb in cargo from Japan, on cut gladiolus in air baggage from Bermuda, on *Lycoris* spp. bulbs in cargo from Japan, on polyanthus narcissus bulb in air baggage from Formosa, and on sweetpea in air baggage from Bermuda.

Tetranychus viennensis (Tetranychidae) on apple in air baggage from Germany, air stores from an unknown origin, and stores from Japan.

Thrips major (Thripidae) on fig in air baggage from Italy, on heather in air baggage from Germany, on lily-of-the-valley in air quarters from an unknown origin, on mixed cut flowers in air baggage from Denmark and Scotland, and on roses in air baggage from the Azores, England, France, and Germany and in aircargo from France.

Trogoderma granarium (Dermestidae), the khapra beetle (202 times), with bagging (including used burlap and wrappers on cinnamon, cotton waste, guar gum, karaya gum, pigeonpea, rice, stores, etc.), bean, celery seed, chickpea, cinnamon, common cassava, cottonseed, cumin seed, debris, food, filbert nut, ginger root, gum, gum arabic, gum ghatti, guar gum, gutta-percha, karaya gum, lima bean, myrobalan, pea, peanut, pistache nut, quarters of ship, rice, rye straw, stores (including bean, chickpea, corn, flour, grits, lentil, macaroni, noodles, pigeonpea, sesame seed, soybean, and miscellaneous dry stores), and wheat. Infested materials were from the following countries: Ceylon, China, England, Federation of Malaya, Formosa, France, Germany, Greece, Hong Kong, India, Iraq, Italy, Japan, Korea, Kuwait, Mozambique, Netherlands, Nigeria, Pakistan, Philippines(?), Senegal, Singapore, Sudan, Thailand, United Arab Republic, and an unknown origin.

Unaspis yanonensis (Coccidae), the yanone scale (467 times), on *Citrus aurantium* var., *Citrus* sp., grapefruit, ichandarin, ichang bitter-orange, King orange, lemon, lime, Mandarin orange, sour orange, sweet orange, and tangelo from Japan and the Philippines.

Zeadiatraea lineolata (Crambidae) in corn in air baggage from Honduras.

SNAILS

The following snails of particular interest were intercepted:

Bradybaena similaris (13 times) on various cut flowers and foliage in air baggage, baggage, cargo, and mail from Hawaii; and in soil with asparagus plant in air baggage from Bermuda.

Achatina fulica, the giant African snail (5 times), with air baggage and in mail from Hawaii; and with stone in cargo from Guam.

Cochlicella barbara (26 times) on military cargo from France, Morocco, Spain, and Turkey; and in soil in baggage from Italy.

Cochlicella conoidea on military cargo from Spain.

Cochlicella ventrosa (10 times) on military cargo from the Azores, Bermuda, Italy, Morocco, and an unknown origin.

Euglandina striata (17 times) on banana in cargo from Ecuador.

Ten species of *Helicella* were intercepted a total of 41 times from the Azores, France, Greece, Italy, Libya, Morocco, Netherlands, Spain, Turkey, and an unknown origin. The hosts were cabbage seed, camomile, military cargo, nasturtium seed, romaine lettuce, soil sample, soil with automobile, and sweet orange.

Monacha cantiana on lettuce in stores from Italy, military cargo from France, and unidentified plant in cargo from Germany.

Monacha carthusiana on cabbage seed in baggage and on military cargo from Italy.

Porphyrobaphe iostoma (8 times) on banana in cargo from Ecuador and an unknown origin; and in quarters from Ecuador.

Rumina decollata in soil in baggage from Italy.

Solaropsis monile (3 times) on banana in cargo from Ecuador.

Subulina octona on bromeliad plant in aircargo from Surinam and on avocado seedling in air baggage from St. Lucia.

Theba pisana, the Mediterranean land snail (64 times), on camomile in aircargo, on military cargo, in quarters, and on beet, cabbage, lettuce, other mollusks, and sweet

orange in stores from the following countries: France, Italy, Libya, Morocco, Spain, Turkey, and an unknown origin.

Other snails of potential economic importance were *Ceciloides acicula*, *Cepaea hortensis*(?), *Helicina strebeli*, *Helix aspersa*, *H. pomatia*, *Lamellaris gracilis*, *Limax marginatus*, *L. maximus*, *Otala lactea*, *O. vermiculata*, *Oxychilus alliarius*, and *O. draparnaldi*.

DISEASES

Elsinoe australis, the sweet orange scab, was intercepted a total of 163 times; 98 from Brazil, 55 from Argentina, 7 from an unknown origin, and 3 from Uruguay. The hosts were grapefruit, lemon, lime, Mandarin orange, and sweet orange.

Phoma citricarpa (perfect stage is *Guignardia citricarpa* Kiely), the black spot of citrus, was intercepted 255 times; 75 of these came from an unknown origin, 46 from Japan, 34 from Hong Kong, 28 from Australia, 27 from the Republic of South Africa, 25 from China, 8 from Formosa, 3 from Africa (country(?)), 2 each from Asia (country(?)), Fiji, and Mozambique, and 1 each from Brazil, New Zealand, and the West Pacific. The hosts were *Citrus* sp., citron, grapefruit, lemon, Mandarin orange, pummelo, sour orange, sweet orange, and tangelo.

Xanthomonas citri, citrus canker, was intercepted 127 times; 107 came from Japan, 4 from Hong Kong, 3 each from China, Formosa, India, and an unknown origin, 2 from the Philippines, and 1 each from Thailand and Vietnam. The hosts were *Citrus* sp., grapefruit, ichandarin, lemon, lime, Mandarin orange, pummelo, Satsuma orange, sour orange, and sweet orange.

Xanthomonas sp. (Cancrosis B) was intercepted 5 times; 3 from Argentina and 2 from an unknown origin, on grapefruit and lemon.

Other pathogens of special interest were:

Gymnosporangium haraeum on pyramid Chinese juniper and sargent Chinese juniper in air baggage, aircargo, and cargo from Japan.

Phomopsis occulta var. *ginkgoina* on dwarf ginkgo tree in cargo from Japan.

Phomopsis palmicola on betel palm nut in mail from Guam.

Phomopsis pterophila on samara wing of European ash seed in cargo from Italy.

Phyllosticta salicifoliae on iron tree in air baggage from Australia.

Phyllostictina cordylines on ti in air baggage and aircargo from Hawaii.

Phyllostictina mangiferae on mango leaf in baggage from Mexico.

Prospodium perornatum on herbarium specimen of trumpet tree in baggage from Mexico.

Prospodium pithecoctenii on Mexican monkeycomb seed pod in air baggage and baggage from Mexico.

Puccinia hordei on barley straw in mail from Kenya. First interception of this pathogen from that country.

Puccinia kusanoi on bamboo leaf in airmail from Japan.

Puccinia noccae on *Lagascea glandulosa* cutting in herbarium press in baggage from Mexico. New host as far as is known.

Sphenospora mera on *Catasetum* sp. and *Mormodes* sp.(?) orchid leaves in aircargo from Peru.

Sphenospora saphena on *Oncidium pulchellum* orchid leaf in air baggage from Haiti and aircargo from Jamaica, on *Oncidium* sp. leaf in aircargo from Peru, and on orchid leaf in air baggage from Haiti. *S. saphena*(?) on *Ionopsis utricularioides* leaf in air baggage from Jamaica. This is a new host for this rust.

Uredo nidularii on bromeliad leaf in aircargo from Costa Rica and on tillandsia leaf in baggage and cargo from Mexico.

Uredo oncidii on *Ornithocephalus* sp. orchid leaf in aircargo from Panama and Peru and on *Rodriguezia* sp.(?) orchid leaf in aircargo from Peru.

Uromyces aloes on *Aloe dewettii*, *A. simii*, and *A. vryheidensis* in aircargo from the Republic of South Africa.

Uromyces fabae (5 times) on lentil in air baggage from Argentina, cargo and quarters from Chile, and stores from an unknown origin; and on broadbean in stores from the Netherlands.

NEMATODES

Aphelenchoides bicaudatus in sweetpotato in baggage from Mexico.

Aphelenchoides fragariae(?) in hyacinth bletilla stem in cargo from Japan.

Criconemoides mutabile in soil with flamboyant-tree, philodendron, and unidentified plant in baggage from Mexico.

Ditylenchus dipsaci in narcissus bulb in mail from England.

Helicotylenchus nannus in soil with asparagus, botree fig, citrus, *Echeveria* sp., laurel, pepper, spiderwort, and unidentified plant in baggage from Mexico.

Heterodera avenae, the oat nematode (12 times), in soil with the following: Freesia bulb in cargo from England, garlic and onion in cargo and grape root and lemon tree in baggage from Italy, potato in stores from Belgium, rose bush in mail from Germany, tulip bulb in cargo from Denmark, and used automobile in cargo from Sweden.

Heterodera cacti (27 times) in soil with begonia, cactus, fern, garlic, philodendron, tuberose, railway car, and unidentified plants from Argentina, Chile, France, Germany, Italy, Mexico, and Switzerland.

Heterodera punctata (14 times) in soil with amaryllis, automobile, babysbreath, begonia, cactus, grass sod, heather, philodendron, railway car, rose, and unidentified plant from Austria, Belgium, England, Germany, Mexico, Norway, and Switzerland.

Heterodera rostochiensis, the golden nematode (29 times), in soil sample and soil with chrysanthemum, shamrock, and violet plants in air baggage; in soil with strawberry plant in airmail; in soil with amaryllis, begonia, cactus, fern, *Haworthia papillosa*, ivy, palm, peony, and unidentified plant in baggage; in soil with dahlia root, *Dianthus* sp., horseshoe geranium, *Medinilla magnifica*, and rose plant in mail; and in soil with celeriac, celery, horseradish, lettuce, potato, and turnip in stores. Countries of origin were Belgium, England, Germany, Ireland, Mexico, Netherlands, Poland, Spain, and Sweden.

Meloidogyne arenaria, *M. arenaria arenaria* (first interception), *M. hapla*, *M. incognita*, *M. incognita acrita*, and *M. javanica*, rootknot nematodes, were intercepted from Argentina, England, Germany, Guatemala, Italy, Japan, Mexico, Netherlands, and the Republic of South Africa. Hosts were roots of the following: Alocasia, asparagus, beet, caladium, calla lily, capefuchsia, carrot, clematis, common edelweiss, coriander, *Cussonia* sp., *Euphorbia multiceps*, fragrant viburnum, gardenia, gerbera, rose bush, tuberose, tuberous begonia, and yam.

Pratylenchus penetrans in dahlia root in mail from Australia.

Pratylenchus pratensis in geranium in baggage from Mexico.

Psilenchus hilarulus in mesembryanthemum and in soil with unidentified plant in baggage from Mexico.

Radopholus similis in anthurium root in baggage from Hawaii.

Scutellonema brachyurum in soil with *Crassula* sp. and African-violet plants in baggage from Mexico.

Scutellonema christie in soil with philodendron plant in baggage from Mexico.

Tylenchorhynchus capitatus in soil with citrus plant in baggage from Mexico.

Tylenchus costatus in soil with African-violet plant in baggage from Mexico.

Tylenchus filiformis in soil with African-violet plant in baggage from Mexico.

INCOMPLETELY DETERMINED PESTS

Sometimes it is not possible to complete a determination as to species, due to the stage or condition of the insect or pathogen when intercepted or the fact that it is undescribed. Many of these pests are (1) of potential economic importance, (2) unreported from the country of origin or the United States, or (3) new to the host plant. Some of the significant ones are included in this writeup, but not in the table. This year there were 2,765 insects, 525 diseases, and 195 nematodes, or a total of 3,485 incompletely determined interceptions considered important enough to record.

INCOMPLETELY DETERMINED FRUIT FLIES

There were 230 incompletely determined fruit fly interceptions as follows:

Anastrepha sp., possibly *fraterculus* (Wied.) (4 times) in coffee berry in air baggage from Brazil and Colombia, loquat in air baggage from Brazil, and quince in air baggage from Peru.

Anastrepha sp., possibly *ludens* (9 times) in kaki persimmon in air baggage from Mexico, mamey and mamey sapote in baggage from Mexico, mango in baggage from Mexico and quarters from Panama, sweet orange in air stores from Guatemala, and white sapote in baggage from Mexico.

Anastrepha sp., possibly *mombinpraeoptans* (15 times), in avocado in air baggage from El Salvador; in mango in air baggage from Aruba, El Salvador, Guatemala, and Panama and in airmail, baggage, and quarters from Puerto Rico; in mombin in air baggage from Costa Rica and Guatemala; in tropical almond in air baggage from Jamaica; and in unidentified fruit in baggage from Mexico.

Anastrepha sp., possibly *serpentina* (3 times), in mamey in air baggage and sapote in air baggage and baggage from Mexico.

Anastrepha sp., possibly *striata* (Schin.) (9 times), in guava in air baggage from Panama and baggage from Mexico; and in sweet orange in air baggage from Guatemala.

Anastrepha sp., possibly *suspensa* (11 times), in guava in air baggage from Cuba and Puerto Rico, in rose-apple in air baggage from the Dominican Republic, in sapodilla in air baggage from Cuba, and in tropical almond in air baggage from Jamaica and Puerto Rico and baggage from an unknown origin.

Anastrepha sp., (127 times) in *Annona* sp., apple, baggage, cherimoya, custard-apple grapefruit, guava, mamey, mango, *Matisia cordata*, palm fruit, pear, pepper, purple mombin, quince, sapodilla, sapote, star-apple, sweet orange, tropical almond, unidentified fruit, and yellow mombin. Countries of origin were Argentina, Barbados, Brazil, British Honduras, Colombia, Costa Rica, Dominican Republic, Ecuador, El Salvador, Guatemala, Honduras, Jamaica, Mexico, Nicaragua, Panama, Peru, Puerto Rico, Trinidad, an unknown origin, and Venezuela. *Anastrepha* sp. (?) (twice) in Arabian coffee berry in air baggage from Jamaica and Mandarin orange in air stores from Brazil (?).

Dacus sp., probably *ciliatus* Loew (once) in cucumber in stores from Senegal.

Dacus sp., possibly *cucumerius* Sack (once) in cucumber in stores from French West Africa (intercepted before the division of this country).

Dacus sp. (7 times) in avocado in air quarters from an unknown origin, cucumber in stores from the Ivory Coast, and guava in air baggage from American Samoa, Hawaii, and the Philippines. *Dacus* sp. (?) (once) in sour sop in air baggage from French Equatorial Africa (intercepted before the division of this country).

Rhagoletis sp., possibly *cerasi* (once), in plum in air stores from Spain.

Rhagoletis sp. (13 times) in apple, black walnut, and red haw in baggage from Mexico and jujube in air baggage from Italy. *Rhagoletis* sp. (?) (6 times) in apple in air baggage from Mexico, air stores from an unknown origin, and baggage from Italy; in *Crataegus grayana* fruit in mail from an unknown origin; in miyama cherry seed in mail from Japan; and in pear in baggage from Mexico.

Tephritidae, genus and species of Tephritinae (twice) on *Bellis* sp. in air quarters from an unknown origin and on flower with seed in air baggage from Guatemala. Tephritidae, probably Tephritinae (once) on composite flower in packing material in cargo from Mexico.

Tephritidae (16 times) in common smoketree seed in mail from Austria, globe artichoke leaf in air baggage from Italy, green pea in stores from Japan, guava in airmail from Puerto Rico, mango skins in air quarters from Brazil, *Osteospermum spinosum* seed in aircargo from the Republic of South Africa, peach in air baggage from an unknown origin, pepper in air baggage from the Philippines, *Physalis* sp. in cargo from Mexico, plantain in air baggage from Hawaii, pomegranate in baggage from Italy, Satsuma orange in air baggage from Colombia, shelled corn in air baggage from Brazil, and tropical almond in air baggage and mail from Hawaii. Tephritidae (?) (twice) in *Dioon edule* plant in cargo from Mexico and tuberose lei in air baggage from Tahiti.

Terellia sp. (once) in globe artichoke in baggage from France.

INSECTS OTHER THAN FRUIT FLIES

Of special interest among the incompletely determined insects, other than fruit flies, were the following:

Acalles sp. (Curculionidae), not in the U.S. National Museum Collection, in cyclamen bulb in cargo from Italy.

Aegyptobia n. sp. (Tenuipalpidae) on leaf of dwarf pyramid Chinese juniper in baggage from Japan.

Agriotes sp., near *obscurus* (L.) (Elateridae), in beet in stores from Italy.

Aleyrodidae, new genus near *Aleurodicus*, n. sp., on *Epidendrum fragrans* leaf in aircargo from Nicaragua; and on orchid leaf in aircargo from British Honduras and baggage and cargo from Mexico.

Aphidae, perhaps Pemphiginae, not found in literature or in the U.S. National Museum Collection, on clematis seed in airmail from Japan.

Argyresthia sp., near *eugeniella* Busck (Hyponomeutidae), in guava in air baggage from El Salvador.

Argyresthia sp. (Hyponomeutidae) on pyramid Chinese juniper in air baggage from Japan.

Argyroploce sp. (Olethreutidae) in bell pepper in stores from the Republic of South Africa.

- Athalia* sp. (Tenthredinidae) in petsai in stores from Japan.
- Athous* sp. (Elateridae) in soil with azalea plant in air baggage from Belgium.
- Blastodacna* sp. (Cosmopterygidae) in peach in air stores from Italy.
- Blissus* n. sp. (Lygaeidae) on *Andropogon* sp. grass sample in baggage from Mexico.
- Brachyrhinus* sp. (Curculionidae) with packing material in cargo from the Netherlands.
- Cacaecimorpha* sp., near or *pronubana* (Tortricidae), in sweet orange in baggage from Italy.
- Ceroplastes* sp., may be *cirripediformis* Comst. (Coccidae), on holly malpighia in air baggage from Bermuda.
- Ceroplastes* sp., may be *rusci* complex (Coccidae), on *Eucalyptus* sp.(?) leaf in air baggage from India.
- Ceroplastes* sp. (Coccidae) on bird-of-paradise-flower leaf in aircargo from Italy, on chrysanthemum plant in air baggage from Venezuela, on gardenia leaf in mail from Australia, on laurel in quarters from Italy, on mint plant in air baggage from Cuba, on passionflower in baggage and plumeria in air baggage from Hawaii, and on unidentified leaf in baggage from Italy.
- Chirothrips* sp., probably *aculeatus* Bgn. (Thripidae), on mixed cut flowers in air baggage and nursery stock in cargo from Germany.
- Chrysomphalus* sp., undescribed (Coccidae), on bromeliad leaf in aircargo from Jamaica.
- Cocotrypes* sp. (Scolytidae) in betel palm nut in baggage from India.
- Coptotermes* sp., probably *testaceus* (L.) (Rhinotermitidae), in rosewood log in cargo from Brazil.
- Coptotermes* sp. (Rhinotermitidae) in *Paurotis wrighti* log in cargo from Mexico.
- Dallasiellus* sp. (Pentatomidae), not in U.S. National Museum Collection, on orchid leaf in aircargo from Nicaragua and baggage from Mexico.
- Diaprepes* sp., evidently *famelicus* (Ol.) var. (Curculionidae), on marigold flower in air baggage from Bermuda.
- Diatraea* sp., near or *considerata* Hein. (Crambidae), on sugarcane in baggage from Mexico.
- Diatraea* sp., near or *magnifactella* Dyar (Crambidae), on sugarcane in baggage from Mexico.
- Dimorothrips* sp., may be *hookeri* Hood (Thripidae), very pale for any described species, on orchid plant in aircargo from Peru.
- Dysdercus* sp., possibly *mavrus* Dist. (Pyrrhocoridae), with bromeliad plant in airmail from Brazil.
- "*Eulia*" sp. (Tortricidae) in plum, peach, and grape in cargo from Chile.
- Eurytoma* sp. (Eurytomidae) in bromeliad seed pod in aircargo from Peru, with kafirbread seed in mail from the Republic of South Africa, and in galls on eucalyptus in aircargo from Australia.
- Euura* sp. (Tenthredinidae) in willow twig tie in air baggage from Switzerland.
- Euzophora* sp., near or *bigella* (Zell.) (Phycitidae), in quince in baggage from Greece.
- Fiorinia* sp., not placed as anything described (Coccidae), on date in air baggage from Saudi Arabia.
- Gnorimoschema* sp., near or *borsaniella* (Koehl.) (Gelechiidae), in pepper in air baggage from Argentina.
- Harmolita* sp. (Eurytomidae) on pampasgrass in air baggage from Turkey and on esparto grass in cargo from Italy.
- Heilipus* sp. (Curculionidae) in avocado seed in air baggage from Panama and baggage from Mexico.
- Heliothis* sp., presumably *armigera* (Hbn.) (Noctuidae), with cauliflower in stores from Greece, in chili pepper in stores from Japan, in tomato in cargo from the Canary Islands, in eggplant in stores from the Republic of South Africa, and in corn stalk in aircargo from Spain.
- Hyperodes* sp. (Curculionidae) in carrot in stores from Argentina.
- Ips* sp. (Scolytidae) in pine bark in dunnage from Japan and crate in cargo from Italy.
- Laspeyresia* sp. (Olethreutidae), not represented by larval stage in the U.S. National Museum Collection, in broadbean in aircargo from Italy.
- Lecanium* sp. (Coccidae) on dwarf English yew in cargo from England and on podocarpus leaf in airmail from the Netherlands.
- Lixus* sp. (Curculionidae) on wawa log in cargo from Ghana.
- Lygaeidae, subfamily Pachygronthinae, not represented in the U.S. National Museum Collection, on protea seed in aircargo from the Republic of South Africa.

- Malacorhinus* sp. (Chrysomelidae), not in the U.S. National Museum Collection, on orchid plant in air baggage from Jamaica(?).
- Megastigmus* sp. (Torymidae) in white spruce seed in cargo from Denmark.
- Mesolecanium* sp. (Coccidae), not placed as described, on bromeliad in cargo from Mexico.
- Miridae, subfamily Bryocorinae, tribe Bryocorini, not in the U.S. National Museum Collection, on agave in cargo from Mexico.
- Myeloidis* group (Phycitidae), a species not represented in the U.S. National Museum Collection, on Ivorycoast cherry-orange in airmail from the Republic of the Congo.
- Nematus* sp. (Tenthredinidae) on birch leaf in air baggage from Italy.
- Neocattarus* sp. (Lygaeidae), probably new, on bromeliad, orchid, and philodendron plants in baggage from Mexico and orchid plant in aircargo from Guatemala.
- Olethreutidae, not represented by larval stage in the U.S. National Museum Collection, in legume pod in stores from Japan.
- Phatnoma* sp. (Tingidae), not in the U.S. National Museum Collection, in cacao bean pod in air baggage from Ecuador.
- Phyllobrotica* sp. (Chrysomelidae) on lily bulb in cargo from Japan.
- Pieris* sp., probably *brassicae* (Pieridae), with military cargo from Greece.
- Premnotrypes* sp. (Curculionidae) (7 times) in potato in air baggage and stores from Colombia and Peru.
- Reticulitermes* sp., probably *lucifugus* (Rossi) (Rhinotermitidae), on dahlia root in baggage from Greece.
- Stenotarsonemus* sp. (Tarsonemidae), probably n. sp., on sweet orange in air stores from Jamaica.
- Stephanopachys* sp., probably *quadricollis* (Marseul) (Bostrichidae), in pine wood in cargo from Portugal.
- Tetranychus* sp., probably undescribed, near *cinnabarinus* (Bois) (Tetranychidae), on nettlespurge in baggage from Aruba.
- Xyloperthodes* sp., probably *nitidipennis* (Murray) (Bostrichidae), in wawa log in cargo from Ghana.
- INCOMPLETELY DETERMINED DISEASES**
- Of the 525 incompletely determined diseases which were recorded, the following are of special interest:
- Ascochyta* sp. on *Glycine javanica* seed in mail from Ethiopia. None reported from Ethiopia as far as is known.
- Cercospora* sp. on coriander in cargo from Puerto Rico and on mahonia in air baggage from Japan. None reported on mahonia as far as is known.
- Colletotrichum* sp. on leaf of oyster rhoeo in mail from Hawaii. None reported on this host as far as is known.
- Coniothecium* sp., may be *chomatosporum* Cda., on apple in cargo from New Zealand.
- Coniothyrium* sp. on lemon in stores from Aruba and on sour orange in stores from Japan.
- Curvularia* sp., probably *geniculata* group, on *Strongylodon macrobotrys* in aircargo from the Philippines.
- Diorchidium* sp. or *Dicheirinia* sp., probably new, on senna in baggage from Mexico.
- Dothiorella* sp., probably new, on orchid stem in aircargo from British Honduras and Venezuela.
- Eremotheca* sp. on *Odontoglossum* sp. leaf in cargo from Mexico.
- Graphium* sp. on Hindu lotus in stores from Japan. None reported on this host as far as is known.
- Hormiscum* sp. on boojamtree plant in baggage from Mexico.
- Massaria* sp. on *Conyza velutina* cutting in aircargo from the Federation of Malaya. None reported on this host as far as is known.
- Monilia* sp. on *Bombax* sp.(?) fruit in baggage from Mexico.
- Mycosphaerella* sp. on tree peony plant in aircargo from Japan.
- Ophiobolus* sp. on coconut in baggage from Hawaii and Tahiti.
- Phomopsis* sp. on flame amherstia in aircargo from Indonesia, *Lucia calathea* leaf petiole in aircargo from Canada, and smooth senna seed in mail from Southeast Asia.
- Phyllosticta* sp. on teatree in aircargo from Australia.
- Phyllostictina* sp. on maile alyxia in air baggage from Hawaii and nandina in air baggage from Japan.
- Robillarda* sp., close to *agrostidis* Sprague, on Bermuda grass in airmail from India.
- Robillarda* sp. on vanda orchid leaf in baggage from Venezuela.
- Septoria* sp. on common anthurium leaf in aircargo from Belgium and on coriander in baggage from Mexico.

Sphenospora sp., may be new, on *Huntleya burtii* orchid plant in aircargo from Costa Rica, on *Lycaste* sp. (?) leaf in aircargo from Peru, and on pansy orchid leaf in air baggage from Panama.

Sporodesmium sp., close to *tropicale* Ellis, on sago palm plant in air baggage from Okinawa. New to host as far as is known.

INCOMPLETELY DETERMINED NEMATODES

Aphelenchoides sp., closely related to *parietinus* (Bastian) Steiner, in dahlia root in mail from France.

Aphelenchoides sp. in dahlia root in cargo from Japan, geranium leaf in baggage from Mexico, oxalis bulb in aircargo from the Netherlands, narcissus plant in baggage from Mexico, and in soil with elephantsear plant, tuberose bulb, and unidentified cutting in baggage from Mexico.

Aphelenchus sp. in dahlia root in mail from France and in narcissus plant and soil with tuberose bulb in baggage from Mexico.

Criconemoides sp. in soil with banana and jasmine plants in baggage from Mexico.

Ditylenchus sp. in narcissus plant in baggage from Mexico.

Helicotylenchus sp. in soil sample and soil with African-violet, banana, cactus, coleus, gardenia, and unidentified cutting and plant in baggage from Mexico.

Heterodera sp., probably *rostochiensis*, in soil with *Haworthia papillosa* plant in baggage from Mexico.

Other members of the genus *Heterodera* were intercepted a total of 91 times from Argentina, Bahamas(?), Belgium, Bermuda, Chile, Colombia, Czechoslovakia, El Salvador, England, France, Germany, Ireland, Italy, Japan, Mexico, Netherlands, Norway, Spain, Sweden, and Yugoslavia. These were taken from a soil sample and soil, in air baggage and baggage, with gladiolus corm, unidentified bulb, and the following plants: Asparagus, begonia, cactus, carnation, Compositae, flamboyant-tree, gerbera, gloxinia, heather, ivy, Ming tree, myrtle, parsley, rosemary, sansevieria, unidentified plant, and walnut seedling; from soil in aircargo and cargo with aircraft engine, automobile, machinery, sun dried adobe brick, tank tracks, and the following plant material: Cape-cowslip bulb, garlic, lily bulb, and onion; from soil in air stores and stores with beet, carrot, celeriac, parsley, potato, turnip, and yam; and from soil in mail with dahlia root, iris rhizome, laurel tree, and rose bush.

Meloidogyne sp., probably *hapla*, in dahlia root in soldier's mail from an unknown origin.

Meloidogyne sp., probably n. sp., in tuberose bulb in cargo from Italy.

Meloidogyne sp. was intercepted 51 times in roots of agapanthus, alumroot, *Andromischus* sp., astilbe, begonia, caladium, calla lily, canna, clematis, Compositae, dahlia, dasheen, delphinium, echeveria, eucharis, freesia, gentian, gerbera, gloxinia, Japanese iris, monkshood, plantain-lily, *Reichsteineria cardinalis*, roundleaf resurrection-lily, rose bush, and unidentified cutting and plant. Countries of origin were Australia, Cuba, England, France, Germany, Greece, Guatemala, India, Israel, Italy, Japan, Mexico, Netherlands, Republic of South Africa, Spain, and Switzerland.

Pratylenchus sp. in dahlia root and Japanese iris rhizome in cargo from Japan, Christmas-rose and primrose roots in cargo from the Netherlands, resurrection-lily root in aircargo from England, and soil with laurel tree in baggage from Mexico.

Psilenchus sp. in soil with laurel tree and spiderwort plant in baggage from Mexico.

Rotylenchulus sp. in soil with unidentified plant in baggage from Jamaica.

Rotylenchus sp. in root of poinsettia plant in stores from Hawaii.

Scutellonema sp. in soil with unidentified plant in baggage from Mexico.

Tylenchorhynchus sp. in aluminum plant in air baggage from Germany and in soil with African-violet, laurel tree, and unidentified plant in baggage from Mexico.

Tylenchus sp. in soil with cactus plant and tuberose bulb in baggage from Mexico.

Xiphinema sp. in soil with unidentified plant in baggage from Mexico.

Hosts and Insects

ACACIA:

- Mimosastes sallaei* (Coleoptera)
Trogoderma granarium (Coleoptera)

ACER:

- Aceria macrorhynchus* (Acarina)
Chrysomphalus inopinat (Homoptera)
Lecanium coryli (Homoptera)
Periphyllus aceris (Homoptera)

ACHRAS:

- Vinsonia stellifera* (Homoptera)

AGAVE:

- Aegiale hesperiaris* (Lepidoptera)
Batrachedra linaria (Lepidoptera)
Chrysomphalus agavis (Homoptera)
Gymnococcus agavium (Homoptera)
Ligyrocoris nitidulus (Hemiptera)
Nysius tenellus (Hemiptera)
Pseudischinaspis bowreyi (Homoptera)

ALLIUM CEPA:

- Aceria tulipae* (Acarina)
Ecpanttheria icasia (Lepidoptera)
Myzus ascalonicus (Homoptera)

ALLIUM PORRUM:

- Acrolepia assectella* (Lepidoptera)

ALLIUM SATIVUM:

- Aceria tulipae* (Acarina)
Brachycerus algirus (Coleoptera)
Dyspessa ulula (Lepidoptera)
Plusia orichalcea (Lepidoptera)

ALOCASIA:

- Pentaltionia nigronevosa* (Homoptera)

ALPINIA:

- Adoretus sinicus* (Coleoptera)
Bradybaena similis (Mollusca)
Pentaltionia nigronevosa (Homoptera)
Pheidole megacephala (Hymenoptera)
Pulvinaria psidii (Homoptera)
Siphanta acuta (Homoptera)

ALTHAEA:

- Thrips flavus* (Thysanoptera)

ALYXIA:

- Ceroplastes rubens* (Homoptera)

AMARYLLIS:

- Euborellia stali* (Dermaptera)
Taeniothrips gracilis (Thysanoptera)
Tentecoris distinctus (Hemiptera)

ANACHARIS:

- Pheidole megacephala* (Hymenoptera)

ANANAS:

- Alpheias conspirata* (Lepidoptera)
Pheidole megacephala (Hymenoptera)
Platynota rostrana (Lepidoptera)
Ribua innoxia (Lepidoptera)

ANNONA:

- Anastrepha ludens* (Diptera)
Aspidiotus destructor (Homoptera)
Bephra maculicollis (Hymenoptera)
Brevipalpus phoenicis (Acarina)
Cerconota anonella (Lepidoptera)
Talponia batesi (Lepidoptera)

ANOGEISSUS:

- Trogoderma granarium* (Coleoptera)

ANTHEMIS:

- Helicella variabilis* (Mollusca)
Sterrhia inquinata (Lepidoptera)
Theba pisana (Mollusca)

ANTHURIUM:

- Bradybaena similis* (Mollusca)
Ceroplastes rubens (Homoptera)
Chrysomphalus umboniferus (Homoptera)
Orthesia praelonga (Homoptera)
Perkinsiella saccharicida (Homoptera)
Siphanta acuta (Homoptera)

APIUM:

- Euleia heraclei* (Diptera)
Trogoderma granarium (Coleoptera)

ARACHIS:

- Caryedon gonagra* (Coleoptera)
Trogoderma granarium (Coleoptera)

ARAUCARIA:

- Eriococcus araucariae* (Homoptera)
Neophyllaphis araucariae (Homoptera)
 "Pseudoparlatoria" giffardi (Homoptera)

ARECA:

- Dacus dorsalis* (?) (Diptera)

ARTOCARPUS:

- Eutetranychus banksi* (Acarina)

ARUM:

- "Targionia" hartii (Homoptera)
Tetranychus neocaledonicus (Acarina)

ASIMINA:

- Ceratitidis capitata* (Diptera)

ASTER:

- Myzus ascalonicus* (Homoptera)

BAMBOO:

- Asterolecanium milaris robustum* (Homoptera)
Cryptoblabes gnidiella (Lepidoptera)
Dinoderus brevis (Coleoptera)
Minthea rugicollis (Coleoptera)
Myelobia smerinthus (Lepidoptera)

BAMBUSA:

- Asterolecanium bambusae* (Homoptera)
Heterobostrychus aequalis (Coleoptera)

BARRINGTONIA:

- Ectomyelois ceratoniae* (Lepidoptera)

BASELLA:

- Pseudococcus neobrevipes* (Homoptera)

BETA:

- Gnorimoschema ocellatella* (Lepidoptera)
Theba pisana (Mollusca)

BETULA:

- Eriophyes leionotus* (Acarina)

BIFRENARIA:

- Asterolecanium epidendri* (Homoptera)

BORASSUS:

- Dinoderus brevis* (Coleoptera)

BRASSIA:

- Vinsonia stellifera* (Homoptera)
 BRASSICA OLERACEA VAR. BOTRYTIS:
Evergestis forficalis (Lepidoptera)
Helix aperta (Mollusca)
Limax marginatus (Mollusca)
Mamestra brassicae (Lepidoptera)
Otala lactea (Mollusca)
Phytomyza rufipes (Diptera)

BRASSICA OLERACEA VAR. CAPITATA:

- Ecpanttheria eridanus* (Lepidoptera)
Epilachna 28-punctata (Coleoptera)
Helicella itala (Mollusca)
Helix aperta (Mollusca)
Hellula undalis (Lepidoptera)
Limax marginatus (Mollusca)
L. maximus (Mollusca)
Mamestra brassicae (Lepidoptera)
Monacha carthusiana (Mollusca)
Phytomyza rufipes (Diptera)
Pieris brassicae (Lepidoptera)
Theba pisana (Mollusca)

BRASSICA RAPA:

- Phytomyza rufipes* (Diptera)

BRASSICA SP.:

- Mamestra brassicae* (Lepidoptera)
Nysius raphanus (Hemiptera)

BROMELIA:

- Isorhinus undatus* (Coleoptera)

BROMELIAD:

- Agroiconota propinqua* (Coleoptera)
Arphnus melanotylus (Hemiptera)
Chrysomphalus umboniferus (Homoptera)
Clerada apicicornis (Hemiptera)
Cyrtomenus bergi (Hemiptera)
Dallasiellus orchidophilus (Hemiptera)
Dysdercus minus (Hemiptera)
Iridomyrmex iniquus (Hymenoptera)
I. leucomelas (Hymenoptera)
Nasutitermes ephratae (Isoptera)
N. nigriceps (Isoptera)
Neolobophora ruficeps (Dermaptera)
Nudur fractibittarum (Lepidoptera)
Ogdocoesta biannularis (Coleoptera)
Paragonatas divergens (Hemiptera)
Pheidole megacephala (Hymenoptera)
Polyglypta costata (Homoptera)
Pseudoparlatoria ostreata (Homoptera)
Rhynchoterms nasutissimus (Isoptera)
Subulina octona (Mollusca)

BROSIMUM:

- Chrysomphalus personatus* (Homoptera)

BROUGHTONIA:

- Asterolecanium epidendri* (Homoptera)
Vinsonia stellifera (Homoptera)

Hosts and Insects—Continued

- BUXUS:**
Eriophyes canestrinii (Acarina)
- CACTUS:**
Amitermes wheeleri (Isoptera)
Aulacosecis melanocera (Coleoptera)
Camirus moestus (Coleoptera)

Pemphigus populiramulorum
Pheidole megacephala
Philaspis bivulnerata
Phorodon menthae
Plagiomorpha scabricula
Platynota rostrana
Podisus lineolatus
Polyglypta costata
Procrystotermes hubbardi
Pseudacysta perseae
Pseudischaspis alienus
Plutia versicolor
Puto mexicanus
Sparedrus depressus
Stator limbatus
Stenomoma catenifer
Talponia batesi
Taylorilygus pallidulus
Tenthecoris bicolor
Tenthecoris distinctus
Tenuirostritermes cinereus
Thyanta pallidovirens
Trialeurodes vitrinellus
Trionymus sacchari
Unaspis citri
Vinsonia stellifera
Xylobiops parilis
X. sextuberculatus

MONTserrat:
Ectomyelois ceratoniae

MOROCCO:
Cochlicella barbara
C. ventrosa
Helicella conspurcata
Metopoplax ditomoides
Nezara viridula
Otala lactea
O. vermiculata
Pieris brassicae
Thaumatomyia notata flavifrons
Theba pisana

MOZAMBIQUE:
Trogoderma granarium

NETHERLANDS:

Adoxophyes orana
Aspidiotus zonatus
Bruchus affinis
Cepaea hortensis (?)
Ceutorhynchus erysimi
Dialeurodes chittendeni
Diaspis juniperi
Haplothrips aculeatus
Helicella ericetorum
Helix aperta
Limothrips denticornis
Lygus lucorum
Mamestra brassicae
Myzus ascalonicus
Oulema melanopa
Phytomyza rufipes
Rhagoletis cerasi
Sitona lineata
Taeniothrips atratus
Thrips flavus
Trionymus lounsburyi
Trogoderma granarium

Trogoderma granarium

NETHERLANDS NEW GUINEA:
Cosmopolites sordidus

NETHERLANDS WEST INDIES:
Cylas formicarius elegantulus

NEW ZEALAND:
Cosmopolites sordidus

NEW ZEALAND:
Brevipalpus obovatus
Nysius huttoni

NICARAGUA:
Aleurocanthus woglumi
Anastrepha mombinpraeoptans
A. serpentina
Chrysomphalus calurus
C. personatus
Stenomoma catenifer
Tenthecoris vestitus
Vinsonia stellifera

NIGERIA:
Caryedon gonagra
Ceratitis colae (?)
Pseudococcus boninsis
Trogoderma granarium

NORTHERN IRELAND:
Stenotarsonemus laticeps

NORWAY:
Aphis callunae
Argyresthia conjugella
Eremocoris plebejus
Evergestis forficatus
Ips typographus
Taeniothrips atratus
T. ericae

OKINAWA:
Parlatoria zizyphus
Pheidole megacephala
Popillia lewisi
Pulvinaria psidii

OKINAWA (?) :
Sinozyton conigerum
Stromatium longicorne

PAKISTAN:
Sinozyton conigerum
Trogoderma granarium

PALMYRA ISLAND:
Pseudococcus neobrevipes

PALMYRA ISLAND (?) :
Eobia bicolor

PANAMA:
Anastrepha mombinpraeoptans
Ancylostoma stercora
Aspidiotus destructor
Cephaloleia pretiosa
Chrysomphalus odontoglossi
C. umboniferus
Ecpantheria eridanus
Lepidosaphes tokionis
Metamasius hemipterus sericeus
Pentalonia nigronervosa

LIST OF INTERCEPTED PLANT PESTS, 1962

(Pests Recorded From July 1, 1961, Through June 30, 1962)

Compiled by
Bessie C. Mumford
Plant Quarantine Aid

INTRODUCTION

This 49th interception list summarizes records of plant pests found in, on, or with plants, plant products, baggage, cargo, mail, and means of conveyance (1) imported into or entering the United States or its possessions, (2) offered for entry but refused, (3) in quarters and stores of planes and ships, (4) offered for entry for immediate transportation and exportation in bond, (5) in domestic shipments to the mainland from the States of Alaska and Hawaii, the American Virgin Islands, the Commonwealth of Puerto Rico, Guam, and other offshore possessions, or (6) in preclearance inspection in the Bahamas and Bermuda.

The pests listed include insects, mites, snails, bacteria, fungi, nematodes, and viruses of known or potential plant quarantine significance to the United States. Some common organisms are included if they are new to the country of origin or the host plant or are of limited distribution in this country.

The data for this list include identifications received during the fiscal year 1962 and represent some interceptions made during previous years, since occasionally determinations are delayed because of heavy work loads or lack of specialists for certain types of organisms. Most identifications are made by specialists of the Entomology Research Division, the Plant Quarantine Division (both of the U.S. Department of Agriculture), and the U.S. National Museum, although collaborating State officials identify many pests intercepted in California. Snail identifications are made by taxonomists in the Division of Mollusks of the U.S. National Museum. Some critical studies and determinations are made by specialists of the Crops Research Division. Many host plants are identified by workers in the Department of Botany of the Smithsonian Institution.

Scientific names of insects and diseases are reviewed by specialists of the Plant Quarantine Division, who also assist in preparing the list. Nematode names are checked in Nematology Investigations and host names are reviewed in the New Crops Research Branch. Every effort is made to conform to the International Rules of Nomenclature.

However, in the disease tabulation the name of the stage found is often listed rather than the perfect stage. Family names are listed with the insects in the tabulation and orders are shown in the host list. Classes of the diseases are given in the disease host list.

Pests determined only to family are not usually recorded unless they are fruit flies, new species, or of some special significance. Snails not identified to species are not recorded.

NOTES ON PESTS INTERCEPTED

The total number of interceptions for the fiscal year 1962 was 33,033, as compared with 25,575 the previous year. This does not include certain common pests which are widespread in this country and are no longer recorded. Of the total, 10,921 were considered important enough to be reported in this list. This figure includes the incompletely determined pests which were significant.

Airborne Material

Interceptions of pests arriving by air totaled 10,005, of which 8,625 were insects or snails and 1,380 were diseases or nematodes. There were 311 interceptions of significant insects found as stowaways on airplanes. Among the important pests arriving by air were 27 interceptions of the European cherry fruit fly, 105 of the Mediterranean fruit fly, 7 of the Mexican fruit fly, 34 of the olive fruit fly, 15 of the oriental fruit fly, 29 of the pink bollworm, 119 of the West Indian fruit fly, 224 of the black spot of citrus, 112 of citrus canker, 78 of the sweet orange scab, and 35 of the golden nematode.

FRUIT FLIES

A total of 473 fruit fly interceptions were identified to species as follows:

Anastrepha ludens, the Mexican fruit fly, was intercepted 76 times; 75 were from Mexico and 1 from Guatemala. The hosts were grapefruit, lime, mango, pear, quince, sour orange, sweet orange, and white sapote.

Anastrepha mombinpraeoptans, the West Indian fruit fly (145 times), in guava, mango, purple mombin, rose-apple, sweet orange, tropical almond, and yellow mombin from Barbados, British Honduras, Costa Rica, Curacao, Dominican Republic, El Salvador, Guatemala, Haiti, Honduras, Jamaica, Mexico, Nicaragua, Panama, Puerto Rico, and Venezuela.

Anastrepha serpentina (3 times) in mamey sapote and sapodilla in air baggage from El Salvador.

Anastrepha suspensa (3 times) in guava in air baggage from Jamaica and baggage from Puerto Rico.

Ceratitis capitata, the Mediterranean fruit fly (140 times), in apple, Arabian coffee berry, Cattley guava, *Coffea* sp. berry, fig, grape, grapefruit, lemon, loquat, Mandarin orange, mountainash fruit, nectarine, peach, pear, pepper, persimmon, plum, pomegranate, pricklypear, quince, rosaceous fruit, sweet orange, and tropical almond. Countries of origin were Argentina, Azores, Brazil, Cyprus, Greece, Hawaii, Israel, Italy, Lebanon, Portugal, Spain, Turkey, United Arab Republic, and an unknown origin. *C. capitata* (?) (10 times) in Arabian coffee berry, *Coffea* sp. berry, grapefruit, kaki persimmon, pummelo, screwpine lei, and sweet orange from Argentina, Ethiopia, Hawaii, Italy, Peru (?), and Spain.

Ceratitis colae (once) in *Coffea* sp. berry in airmail from Ethiopia.

Dacus dorsalis, the oriental fruit fly (20 times), in banana, breadfruit, guava, mango, orange-jasmine fruit, papaya, and tropical almond from Guam, Hawaii, and the Philippines. *D. dorsalis* (?) (3 times) in guava, Malay-apple, and tropical almond from Hawaii and an unknown origin.

Dacus oleae, the olive fruit fly (43 times), in olive in air baggage and baggage from Cyprus, Italy, Lebanon, Spain, and Syria.

Rhagoletis cerasi, the European cherry fruit fly (28 times), in cherry in air baggage, air stores, and stores from Czechoslovakia, France, Germany, Italy, Spain, and an unknown origin.

Toxotrypana curvicauda (once) in papaya in aircargo from Puerto Rico.

INSECTS OTHER THAN FRUIT FLIES

The following insect interceptions are of particular significance:

Acrolepia assectella (Hyponomeutidae) in leek in stores from Denmark, France, Italy, Netherlands, Norway, and Spain; with miscellaneous stores from France; and in onion in air baggage from France.

Adoretus sinicus (Scarabaeidae) as stowaway on airplane, on copperleaf plant, baggage, flowers, mango, and orchid in air baggage from Hawaii.

Adoxophyes reticulana (= *A. orana*) (Tortricidae) on cut lilac in aircargo from the Netherlands.

Aleurocanthus woglumi (Aleyrodidae), the citrus blackfly (10 times), on *Citrus* sp. leaf in air baggage from Ecuador and baggage and cargo from Mexico, on lime leaf in baggage and cargo from Mexico, and on sweet orange leaf in baggage from Mexico.

Aleurotrachelus camelliae (Aleyrodidae) on camellia leaf in airmail from Japan.

Ancylostomia stercorea (Phycitidae) in bean, on bromeliad leaf, in chickpea, pea, and pigeonpea. Countries of origin were the Canal Zone, Dominican Republic, Ecuador, El Salvador, Haiti, Jamaica, Mexico, Panama, St. Kitts, St. Martin, and Tortola.

Arge similis (Argidae) on *Rhododendron* sp. cutting and torch azalea plant in airmail from Japan.

Argyresthia conjugella (Hyponomeutidae) in apple in air baggage from Norway and the Union of Soviet Socialist Republics and in mountainash berry in air baggage from England, Norway, and Scotland.

Aspidiotus destructor (Coccidae) on arrowroot leaf in airmail from Panama; on coconut in air baggage from the Bahamas, baggage from the American Virgin Islands, Costa Rica, Nicaragua, and Panama, quarters from the Cayman Islands, and stores from Costa Rica; on kentia palm leaf in stores from Japan; on plum in baggage from Mexico; and on tropical almond in baggage from Jamaica.

Austrotortrix postvittana (Tortricidae) in airplane from New Zealand.

Blastodacna atra (Cosmopterigidae) in apple in air stores from an unknown origin and in baggage from Poland.

Brachycerus albidentatus (Curculionidae) in garlic in baggage from Italy.

Bruchus tristis (Bruchidae) in grass peavine seed in baggage from Italy and in lupine seed in air baggage from the Azores.

Cacoecimorpha pronubana (Tortricidae) on cut carnation in airmail from an unknown origin, on miscellaneous plant material in aircargo from France, and on pomegranate in air baggage and baggage from Italy.

Carposina niponensis (Carposinidae) in apple in air stores, quarters, and stores and in pear in air baggage from Japan.

Ceroplastes rubens (Coccidae) on cibotium fern in mail from Hawaii, on maile alyxia leaf in baggage from Hawaii, and on polypody fern in air baggage from Tahiti.

Chilo suppressalis (Crambidae), the Asiatic rice borer (18 times), with aircargo from Japan and in rice straw in air baggage from Japan and Spain, baggage from the Philippines, Spain, and an unknown origin, and in cargo, mail, and stores from Japan.

Cladius pectinicornis (Tenthredinidae) on cut roses in air baggage from Denmark, England, and Germany and air stores from the Netherlands; on rose cutting in air baggage from England; and in soil with holly plant in baggage from Switzerland.

Coccus viridis (Coccidae) (151 times) on *Alpinia purpurata*, alstonia leaf, Arabian coffee berry, Brazil peppertree, *Citrus* sp. leaf, frangipani, gardenia, ixora, limeberry leaf, and tuberose from Fiji, Hawaii, New Guinea, and Tahiti.

Conotrachelus aguacatae (Curculionidae) (11 times) in avocado in baggage from Mexico.

Coptotermes testaceus (Rhinotermitidae) in jacaranda log in cargo from Brazil.

Cryptoblabes gnidiella (Phycitidae) in grape in air baggage from Italy; in pomegranate in air baggage from France, Israel, and Italy and baggage from Greece and Italy; and in sweet orange in aircargo from Italy, air stores from Spain and an unknown origin, and stores from Spain.

Cryptophlebia leucotreta (Olethreutidae) in Arabian coffee in mail from Ethiopia and in sweet orange in stores from the Republic of South Africa.

Curculio elephas (Curculionidae) (121 times) in chestnut in air baggage, baggage, cargo, and mail from Greece, Italy, Portugal, Spain, and Yugoslavia; in cork oak seed in mail from Spain; and in oak seed in air baggage from Italy.

Cylas formicarius elegantulus (Curculionidae) in sweetpotato in air baggage from Cuba, Dominican Republic, and Haiti(?), baggage from Antigua, cargo from the Dominican Republic, quarters from Trinidad, and stores from Cuba, Dominican Republic, and Venezuela.

Cylas puncticollis in sweetpotato in cargo from Sierra Leone.

Dialeurodes kirkaldyi (Aleyrodidae) on Arabian jasmine leaf in air baggage, baggage, and mail from Hawaii; on gardenia leaf in air baggage from Tahiti; and on jasmine leaf in baggage from the Philippines.

Diatraea magnifactella (Crambidae) in sugarcane node in baggage from Mexico.

Dichocrocis punctiferalis (Pyraustidae) on pine tree in baggage from Japan.

Epinotia aporema (Olethreutidae) in string bean in baggage and stores from Mexico.

Euscepes postfasciatus (Curculionidae) in sweetpotato in air baggage from Puerto Rico, baggage from Hawaii, and stores from Brazil, Peru, and Trinidad.

Euergestis forficatis (Pyraustidae) in cabbage in stores from France, Germany, and Italy.

Frankliniella formosae (Thripidae) (53 times) on carnation, chrysanthemum, cyclamen, fairybells, flowers, gardenia, lychee, rice, roses, and screwpine. Countries of origin were American Samoa, Formosa, Hong Kong, Japan, Okinawa, Philippines, and an unknown origin.

Frankliniella intonsa (Thripidae) (15 times) on carnation, flowers, gladiolus, nursery stock, roses, and in soil with primrose plant from England, France, Germany, Iceland, Israel, Netherlands, and unknown origin, and Yugoslavia.

Gnorimoschema ocellatella (Gelechiidae) in beet in stores from the United Arab Republic, with stores by air from Italy, and in Swiss chard in stores from Italy.

Grapholitha funebrana (Olethreutidae) in plum in air baggage from Czechoslovakia and Poland.

Grapholitha janthiana (Olethreutidae) in apple in air baggage from Hungary.

Gymnandrosoma aurantianum (Olethreutidae) in sweet orange in air stores from an unknown origin and stores from Colombia.

Harmolita ips (Eurytomidae) in straw packing in cargo from France.

Lampides boeticus (Lycaenidae) in agati sesbania in air baggage and in mauna loa lei in air baggage, baggage, and quarters from Hawaii; and in pea in stores from Japan.

Laspeyresia araucaria (Olethreutidae) in *Araucaria* sp. seed in airmail and in Norfolk-Island-pine seed in air baggage and aircargo from Brazil and in parana araucaria seed in aircargo from Argentina.

Leucinodes orbonalis (Pyraustidae) in eggplant in stores from West Africa.

Leucoptera scitella (Lyonetiidae) with apple in air stores from England and stores from Italy.

Lixus junci (Curculionidae) in beet in stores from the United Arab Republic.

Lobesia botrana (Olethreutidae) in grape in air baggage from England, Italy, and Lebanon.

Mamestra brassicae (Noctuidae) on cabbage in stores from France, Italy, and the Netherlands; on cauliflower in stores from France and Italy; on Chinese cabbage in stores from Japan; on lettuce in stores from Germany; and on Swiss chard in stores from Italy.

Maruca testulalis (Pyraustidae) in hyacinth bean in air baggage from Trinidad; in mauna loa flowers in air baggage and baggage from Hawaii; in *Phaseolus* sp. in stores from Angola; in pigeonpea in air baggage from the Dominican Republic and Grenada and in aircargo, airmail, and cargo from Puerto Rico; in sesbania in air baggage and baggage from Hawaii; in string bean in air baggage and cargo from Puerto Rico and stores from Brazil, Japan, Puerto Rico, and Surinam; and in *Strongylodon macrobotrys* in air baggage from the Philippines.

Matsumuraesia phaseoli (Olethreutidae) in string bean in stores from Japan.

Melolontha melolontha (Scarabacidae) (5 times) as stowaway on airplane from France and Switzerland.

Necoleucinodes elegantalis (Pyraustidae) in eggplant in air baggage from Brazil, naranjilla in air baggage from Colombia, and in tomato in cargo from Mexico.

Oulema melanopa (Chrysomelidae) with cabbage in stores from Italy.

Parlatoria zizyphus (Coccidae) (55 times) on *Citrus* sp. leaf, grapefruit, lemon,

lime, Mandarin orange, pummelo, and sweet orange. Countries of origin were Algeria, British Guiana, China, Formosa, France, Guam, Hawaii, Hong Kong, Iran, Italy, Japan, Okinawa, Philippines, Republic of the Congo, Thailand, Tunisia, and an unknown origin.

Pectinophora gossypiella (Gelechiidae), the pink bollworm (59 times), in bale of cotton in aircargo from Puerto Rico; in cotton boll in air baggage from Antigua, Bermuda, Cayman Islands, Cuba, Hawaii, and Turkey, baggage and quarters from Mexico, and mail from Hawaii; in cotton lint in quarters from Mexico; in cottonseed in aircargo and mail from India, baggage and quarters from Mexico, and cargo from Pakistan and Thailand; in okra pod in air baggage from Barbados, Dominican Republic, and Haiti, aircargo from Jamaica, and stores from the Dominican Republic; in seed cotton in aircargo from Pakistan and cargo and quarters from Mexico; in seed of Sea Island cotton in air baggage from Hawaii; and in seed of Upland cotton in quarters from Mexico.

Petrova cristata (Olethreutidae) in Japanese black pine cone in stores from Japan.

Pieris brassicae (Pieridae) (14 times) in cabbage in stores from the Azores, Belgium, and Italy; in cauliflower in stores from Germany and Italy; and with military cargo from Italy.

Prays oleellus (Hyponomeutidae) in olive in air baggage from Italy, Lebanon, and Syria and aircargo from Italy.

Prodenia litura (Noctuidae) in airplane from the West Pacific, on flowers in air quarters from Formosa, on gladiolus in air baggage from Japan, and in pepper in stores from Israel.

Rhynchaenus populi (Curculionidae) on cut lilac in aircargo from the Netherlands.

Sesamia cretica (Noctuidae), the durra stem borer (8 times), in broomcorn in air baggage from France and Greece, baggage from Italy, and cargo from Greece and Italy.

Stenoma catenifer (Stenomidae) (35 times) in avocado in air baggage from British Honduras, Colombia, Costa Rica, Ecuador, El Salvador, Nicaragua, Panama, and Venezuela, aircargo from Mexico and Panama, baggage from Honduras, Mexico, and Panama, quarters from Ecuador, and stores from Colombia, Ecuador, and Panama.

Taeniothrips gracilis (Thripidae) (18 times) on autumn lycoris, shorttube lycoris, and *Lycoris* sp. bulbs in cargo from Japan; on polyanthus narcissus in air baggage from Hong Kong; and on snapdragon in air baggage from Japan.

Tetranychus viennensis (Tetranychidae) on apple in air baggage from Poland.

Thrips major (Thripidae) on carnation in aircargo from Italy; on China aster in air baggage from the Netherlands; on mixed flowers in air baggage from England and air quarters from England, Turkey, and an unknown origin; on nursery stock in cargo from the Netherlands; and on roses in air baggage from Denmark, England, and Poland.

Trogoderma granarium (Dermestidae), the khapra beetle (249 times), with bagging (including new and used burlap and wrappers on various cargo shipments and stores), in bean, in cargo hold of ship, in cinnamon quills, corn seed (in mail), cumin seed, debris, grain residue, guar gum, gum arabic, gum ghatti, karaya gum, mangrove bark, myrobalan, pea, peanut, pigeonpea, rice, soybean, turmeric, various dry stores, and wheat flour and straw. Countries of origin were Belgium, Ceylon, China, England, Formosa, France, Greece, Hong Kong, India, Indonesia, Iran, Italy, Korea, Kuwait, Mexico, Netherlands, Pakistan, Senegal, Sierra Leone, Singapore, Sudan, Tanganyika, Thailand, United Arab Republic, an unknown origin, and West Africa.

Udea ferrugalis (Pyraustidae) on cabbage in stores from Portugal, on cauliflower in stores from England, on celery in stores from France, on geranium leaf in air baggage from Portugal, and on zucchini squash in stores from Italy.

Unaspis yanonensis (Coccidae), the yanone scale (356 times), on calamondin orange, *Citrus* sp., grapefruit, ichandarin, lemon, lime, King orange, Mandarin orange, pummelo, sour orange, sweet orange, and tangelo. Countries of origin were Australia, Hong Kong, Japan, Philippines, and an unknown origin.

Zeadiatraea lineolata (Crambidae) in corn in air baggage from Guatemala and air stores from the Bahamas.

SNAILS

The following snail interceptions are of special interest:

Achatina fulica (10 times) in air baggage from Hawaii and with military cargo from Okinawa.

Archachatina marginata in aircargo from Spain.

Arianta arbustorum in soil with rose plant in mail from Germany and on strawberry plant in aircargo from the Netherlands.

Bradybaena similaris (7 times) on *Anthurium* sp. flower, fern asparagus, and ginger root in mail from Hawaii; and with snapdragon flower and unidentified plant in air baggage from Bermuda.

Cochlicella barbara (26 times) on common four-o'clock seed in cargo from France; on military cargo from Italy, Libya, Morocco, and Spain; and in soil in baggage from Italy.

Cochlicella conoidea on military cargo from Spain.

Cochlicella ventrosa (16 times) on broccoli seed in baggage from Italy; on cedar block in stores from Bermuda; on military cargo from the Azores, Italy, Morocco, Spain, and Turkey; and in soil with unidentified plant in air baggage from Bermuda.

Fourteen species of *Helicella* were intercepted a total of 75 times on automobile, baggage, general cargo, military cargo, soil, and various plant material from the Azores, Cuba, England, France, Greece, Italy, Spain, Turkey, and an unknown origin.

Monacha cantiana with unidentified plants in cargo from Germany.

Monacha carthusiana on sainfoin seed in baggage from Italy.

Monacha olivieri with military cargo from Turkey.

Rumina decollata on palm seed in baggage from Mexico and in soil with unidentified plant in air baggage from Bermuda and baggage from Mexico.

Sculptaria reticulata on *Myrothamnus flabellifolia* plant in aircargo from the Republic of the Congo.

Subulina octona (15 times) on military cargo from Libya; on orchid plant in air baggage from British Honduras, aircargo from British Honduras, Colombia, and Jamaica, baggage from Jamaica, and cargo from Mexico; in soil with coleus plant in air baggage from Honduras; in soil with croton plant in air baggage from Jamaica; in soil with *Dieffenbachia* sp. plant in baggage from Puerto Rico; and in soil with unidentified plant in baggage from Mexico.

Theba pisana, the Mediterranean land snail (82 times), on automobile, in air baggage, on general cargo and military cargo; on cipollino, flowers, herb, mollusk, rose, rosemary, and various plant material in air baggage, aircargo, and cargo; and on cabbage, cauliflower, lettuce, miscellaneous stores, parsley, and potato in stores. Countries of origin were the Azores, Cuba, France, Israel, Italy, Libya, Morocco, Spain, and an unknown origin.

Theba planata on military cargo from Spain.

Veronicella moreleti on banana in cargo from Honduras and on *Chamaedorea* sp. palm leaf in aircargo from Mexico.

Other snails of potential economic importance were: *Bulimulus fraterculus*, *B. hepatostomus*, *B. unicolor*, *Capillifera plebeia*, *Cecilioides acicula*, *C. aperta*, *Cepaea nemoralis*, *Helicina neritella*, *H. substriata*, *H. zephyrina*, *Helix aspersa*, *H. cincta*, *H. leucorum*, *H. pomatia*, *Lamellaxis gracilis*, *Limax marginatus*, *Neocyclotus dysoni cookei*, *Otala lactea*, *O. vermiculata*, and *Oxychilus alliarius*.

DISEASES

Elsinoe australis, the sweet orange scab, was intercepted 213 times; 129 from Brazil, 64 from Argentina, 13 from an unknown origin, 4 from Paraguay, and 3 from Uruguay. The hosts were *Citrus reticulata* hybrid, grapefruit, lemon, lime, Mandarin orange, sweet orange, and tangelo.

Guignardia (Phoma) citricarpa, the black spot of citrus, was intercepted 464 times; 95 from Japan, 91 from Hong Kong, 83 from the Republic of South Africa, 63 from Australia, 44 from an unknown origin, 36 from China, 18 from Formosa, 7 from Asia (country(?)), 5 each from Brazil and the Philippines, 4 from Tahiti(?), 3 from Okinawa, 2 each from Argentina and Korea, and 1 each from the Federation of Malaya, Macao, Mozambique, Singapore, Thailand, and Vietnam. The hosts were *Citrus* sp., *Fortunella* sp.(?), grapefruit, lemon, lime, Mandarin orange, pummelo, sour orange, sweet orange, and tangelo.

Xanthomonas citri, citrus canker, was intercepted 271 times; 217 from Japan, 20 from Hong Kong, 10 from India, 9 from an unknown origin, 5 from China, 4 from Thailand, 2 from Formosa, and 1 each from Afghanistan, the Federation of Malaya, Guam, and Indonesia. The hosts were *Citrus aurantium* X *C. reticulata*, *Citrus* sp., grapefruit, ichandarin, lemon, lime, Mandarin orange, pummelo, sour orange, sweet orange, tangelo, tanger, and "yuzu."

Xanthomonas sp. (Cancrosis B) was intercepted 17 times; 10 from Argentina, 5 from an unknown origin, and 1 each from Brazil and Uruguay. The hosts were lemon, Mandarin orange, and sweet orange.

Other pathogens of special interest are:

Ascochyta armoraciae on horseradish tops in stores from Germany. Not reported from the United States as far as is known.

Coniothyrium trabutii on geranium leaf in baggage from Mexico. No reports from there as far as known.

Diaporthe camelliae on camellia twig in airmail from New Zealand.

Didymascella thujina on leaf of arborvitae plant in baggage from Canada.

Elsinoe piri (*Sphaceloma* stage) on apple in stores from Spain.

Gymnosporangium cornutum on European mountain ash leaf in air baggage from Finland and baggage from Norway.

Gymnosporangium haraceanum on pyramid Chinese juniper in air baggage and cargo from Japan.

Macrophoma dalmatica on olives in air baggage from Lebanon.

Phomopsis cedrelae on cigarbox cedrela seed and pod in aircargo from Dominica.

Phyllosticta bromeliae on bromeliad in baggage from Mexico.

Puccinia abyssinica on *Jasminum abyssinicum* leaf in mail from Ethiopia.

Puccinia iridis on iris leaf in air baggage from Bermuda and aircargo from Haiti.

Pythium intermedium, *P. mamillatum*, *P. salpingophorum*, and *P. ultimum* on roots of trees in aircargo from the Union of Soviet Socialist Republics.

Rhytisma ilicis-latifoliae (*Melasmia* stage) on *Ilex integra* leaf in airmail from Japan.

Septoria minimum on anthurium leaf in airmail from France and mail from the Netherlands.

Sphaceloma fawcettii var. *scabiosa* (10 times) on lemon in air stores, quarters, and stores from Australia.

Sphaceloma punicea on pomegranate in air baggage from the Dominican Republic. New locality for this fungus.

Sphaceloma rosarum on rose leaf in air baggage from England and Germany.

Sphaceloma spondiadis(?) on vi-apple in baggage from Puerto Rico.

Sphaerophragmium acaciae on Lebbek albizzia leaf in baggage from the Bahamas.

Thecaphora solani on *Solanum stoloniferum* tuber in baggage from Mexico.

Uredo nidularii on bromeliad leaf in air baggage from Colombia and aircargo from Costa Rica; and on tillandsia leaf in aircargo from Mexico and Panama.

Uromyces fabae on lentil in airmail and mail from Chile.

CORRECTION: The 1960 list showed *Pucciniastrum arcticum* Tranz. on *Rubus chamaemorus* from Norway. This has now been identified as *Melampsoridium betulinum* (Fr.) Kleb. on *Betula odorata*.

NEMATODES

Aphelenchoides fragariae in bletilla orchid in cargo from Japan.

Aphelenchoides subtenuis in narcissus in cargo from Italy.

Criconema celutum in soil with anthurium plants in baggage from Mexico.

Criconemoides curvatum in soil with begonia in baggage from Argentina and in soil with unidentified plant in baggage from Mexico.

Criconemoides mutabile in soil with carpetgrass, philodendron, pine seedling, and treebine in baggage from Mexico.

Criconemoides peruense in soil with begonia in baggage from Mexico.

Ditylenchus destructor in autumn-crocus and Blushing Bride dwarf gladiolus in cargo from the Netherlands.

Ditylenchus dipsaci in garlic in cargo from Mexico; and in narcissus bulb in mail and onion sets in baggage from England.

Helicotylenchus buxophilus in soil with euonymus plant in baggage from Mexico.

Helicotylenchus dihystris in Indianrubber fig plant in baggage from Brazil; in soil with begonia plant in air baggage from the Azores and baggage from Argentina; in soil with azalea, balsam, caladium, citrus, common rue, and euphorbia plants, lily bulb, peach tree, portulaca, sansevieria, spiderwort, and succulent plants in baggage from Mexico; and in soil with unidentified plant in air baggage from England.

Helicotylenchus nannus in *Aglaonema* sp. root in aircargo, in soil with begonia, fern, hydrangea, and mint plants in baggage, and in soil with chestnut dioon

plants in cargo from Mexico; and in soil with common swordfern and Sprenger asparagus in baggage from Italy.

Heterodera avenae, the oat nematode (13 times), in soil sample in air baggage from Germany and in soil with the following: Automobiles in cargo from England and Germany, cactus plant in air baggage from Germany, dasheen in cargo from the Azores, garlic in cargo from Italy, larch tree and polypody fern in baggage from Austria, military cargo by air from England and France, peach tree in baggage from Italy, and potato in stores from the Canary Islands.

Heterodera cacti (75 times) in soil sample and in soil with amaryllis bulb, begonia, bougainvillea, cactus, covers on cotton bales, dahlia roots, euphorbia, garlic, geranium, Indiarubber fig plant, lily bulb, potato, portulaca, pricklypear, railway car, spiderwort, and tractor from the following countries: Austria, Belgium, Costa Rica, England, France, Germany, Italy, Mexico, Peru, and Sweden.

Heterodera humuli in soil with hops in aircargo from Germany.

Heterodera punctata (47 times) in soil sample, soil with army tanks, automobiles, celery, dasheen, lily bulb, military cargo, mudbird nest, potato, semi-trailer, and the following plants: Banana, begonia, cactus, geranium, Indiarubber fig, lavender, lily, philodendron, primrose, sequoia, shamrock, stonecrop, unidentified, and violet. Countries of origin were Argentina, Belgium, England, Germany, Ireland, Italy, Mexico, Morocco, Netherlands, Norway, Portugal, Sweden, an unknown origin, and Wales.

Heterodera rostochiensis, the golden nematode (83 times), in soil sample and in soil with the following: African-violet, aroid plant, automobiles, beet, cactus, celery, coleus, conifer plant, dahlia roots, geranium cutting and plant, gladiolus corm, heather plant, horseradish, ivy plant, lavender plant, lilac plant, lily-of-the-valley pips, onion sets, Jerusalem cherry plant, oxalis, potato, primrose, *Ribes* sp., shamrock, soapberry plant, *Solanum andigena*, spearmint, Sprenger asparagus, stonecrop, strawberry plant, tree fern log, tuberose, turnip, unidentified bulb and plant, and violet plant. Countries of origin were Denmark, England, France, Germany, Ireland, Mexico, Netherlands, Peru, Poland, Scotland, Sweden, and an unknown origin.

Hoplolaimus uniformis in soil with celeriac in stores from the Netherlands.

The rootknot nematodes, *Meloidogyne arenaria*, *M. arenaria arenaria*, *M. arenaria thamesi*, *M. hapla*, *M. incognita*, *M. incognita acrita*, *M. incognita incognita* (first interception), *M. javanica*, and *M. javanica javanica* (first interception) were intercepted a total of 156 times from Argentina, Azores, Brazil, Canal Zone, Chile, Costa Rica, Cuba, Dominican Republic, Ecuador, England, France, Germany, Guatemala, India, Italy, Jamaica, Japan, Mexico, Morocco, Netherlands, Panama, Peru, Portugal, Republic of South Africa, Sierra Leone, Spain, Switzerland, Tahiti, Trinidad, and West Africa. The hosts were roots of various flowers, ornamental plants, and vegetables.

Pratylenchus coffeae in dahlia roots in mail from Australia, in soil with common rue in baggage from Mexico, and in yam in air baggage from Jamaica.

Pratylenchus penetrans in clematis and toadlily roots in aircargo and in goldenray roots in cargo from the Netherlands.

Pratylenchus scribneri in apple root stock in cargo from Canada.

Radopholus similis in flamingo anthurium and in ginger plant in mail from Hawaii.

Rotylenchus robustus in soil with celeriac in stores from the Netherlands and in soil with unidentified plants in air baggage from the Azores and Germany.

Scutellonema brachyurum in amaryllis bulb and crassula plant in baggage from Mexico; Indiarubber fig plant in baggage from Brazil; in soil with kalanchoe in air baggage from Guatemala; and in soil with common rue, philodendron, and unidentified bulbs and plants in baggage from Mexico.

Scutellonema bradys in yam root in air baggage from Cuba.

Tylenchorhynchus acti in soil with cactus plant in baggage from Mexico.

Tylenchorhynchus capitatus in soil with begonia, lemongrass, and spiderwort plants in baggage from Mexico.

Tylenchorhynchus claytoni in soil with common swordfern and Sprenger asparagus in baggage from Italy.

INCOMPLETELY DETERMINED PESTS

It is not always possible to complete a determination as to species, due to the stage or condition of the insect or pathogen when inter-

cepted or the fact that it may be undescribed. Many of these pests are of potential economic importance, unreported from the country of origin or the United States, or new to the host plant. Some of the significant ones are included in this writeup, but not in the tabulation except in the summary. This year there were 3,223 insects, 357 diseases, and 936 nematodes, or a total of 4,516 incompletely determined interceptions considered important enough to record.

INCOMPLETELY DETERMINED FRUIT FLIES

There were 186 incompletely determined fruit fly interceptions as follows:

Anastrepha sp., possibly *ludens* (7 times) in apple, lime, mango, sapote, and sweet orange in baggage, and in grapefruit in stores from Mexico.

Anastrepha sp., possibly *mombinpraeoptans* (27 times), in grapefruit in stores from Costa Rica; in guava in air baggage from Guatemala, baggage from Mexico, and cargo from Tortola; in mango in air baggage from the Bahamas, Colombia, Dominican Republic, El Salvador, Guatemala, Honduras, Jamaica, and Nicaragua, in airmail from Jamaica, baggage from Mexico and Panama, and in cargo and stores from the Dominican Republic; in purple mombin in air baggage from Guatemala and Panama; and in *Spondias* sp. in air baggage from Nicaragua.

Anastrepha sp., possibly *serpentina* (twice), in cainito star-apple in air baggage from El Salvador and in mamey sapote in baggage from Mexico.

Anastrepha sp., possibly *striata* (13 times), in guava in air baggage from Costa Rica and El Salvador and in baggage and mail from Mexico.

Anastrepha sp., possibly *suspensa* (13 times), in guava in air baggage from the Dominican Republic and Puerto Rico and in airmail and baggage from Puerto Rico.

Anastrepha sp. (89 times) in *Annona* sp., apple, Arabian coffee berry, cherimoya, giant granadilla, grapefruit, guava, ilama, loquat, Mandarin orange, mango, peach, pear, pummelo, purple mombin, rose-apple, sapodilla, sapote, sour lime, *Spondias* sp., star-apple, sweet orange, tropical almond, and yellow mombin. Countries of origin were: Argentina, Brazil, Colombia, Costa Rica, Dominican Republic, Ecuador, El Salvador, Guatemala, Honduras, Jamaica, Mexico, Nicaragua, Panama, Peru, Puerto Rico, Tortola, Trinidad, an unknown origin, and Venezuela.

Dacus sp., prob. *dorsalis* (once), in mango in air baggage from Hawaii.

Dacus sp. (twice) in pepper in mail from Thailand and in sapodilla in air stores from Guam. *Dacus* sp. (?) (3 times) in avocado in air baggage from Tahiti, grapefruit in stores from the Republic of South Africa, and sapodilla in air stores from the Philippines.

Euleia sp., probably *heraclei* (L.) (once), in parsley in stores from Spain.

Parozyna s. l. sp., possibly *Diozyna sororcula* (Wied.) (twice), on *Osteospermum muricatum* and *O. thodei* seed in mail from the Republic of South Africa.

Rhagoletis sp., probably *alternata* (Fall.) (once), in rose hips in air baggage from Italy.

Rhagoletis sp. (4 times) in apple and hawthorn fruit in baggage from Mexico. *Rhagoletis* sp. (?) (3 times) in peach and redhaw fruit in baggage from Mexico and in Tartarian honeysuckle seed in cargo from Italy.

Tephritidae (15 times) in carnation in air quarters from an unknown origin, in chayote in stores from the Dominican Republic, in chupa-chupa fruit in air baggage from Ecuador, dwarf banana in air baggage from Hawaii, with flower pot in baggage from Mexico, in galangal flower in air quarters from an unknown origin, in giantreed node in baggage from Italy, in grapefruit in stores from the Republic of South Africa, in lychee nut and mango in air baggage from Vietnam(?), in peach in air baggage from Venezuela, in pear in air baggage from England, in sphagnum moss with ginseng root in air baggage from Korea, and in Turkterebinth pistache in air baggage from Greece. Tephritidae(?) (once) in pomegranate in air baggage from Argentina.

Trupanea sp. (once) adults with marigolds in air quarters from Mexico. *Trupanea* sp. (?) (once) in flowering head of encelia in baggage from Mexico.

INSECTS OTHER THAN FRUIT FLIES

The following incompletely determined insects, other than fruit flies, are of special interest:

Aleyrodidae, Aleurodicinae, new genus near *Aleurodicus*, n. sp., on *Epidendrum* spp. leaf in aircargo from Honduras and cargo from Mexico; on *Laelia anceps* leaf in cargo from Mexico; on *Odontoglossum grande* leaf in air baggage from Guatemala; on *Oncidium* spp. leaf in aircargo and cargo from Mexico; and on orchid leaf in air baggage from Guatemala and Honduras, aircargo from the Canal Zone, Guatemala, Honduras, and Mexico, airmail from the Canal Zone, and baggage and cargo from Mexico.

Alsophila sp. (Geometridae) on *Prunus* sp. branch in air baggage from Japan. *Anaulacomera* sp. (Tettigoniidae), a distinctive species useful to the U.S. National Museum Collection, on orchid in aircargo from Peru.

Aphidae, Panaphini, genus and species undescribed, on pine twig in air baggage from Italy. No description found of a species on pine resembling this.

Blastodacna sp., near or *atra* (Cosmopterygidae), on apple in air stores from an unknown origin, probably Spain.

Brachyrhinus sp. (Curculionidae) on Siebold stonecrop roots in baggage from Switzerland, in soil with herbs in baggage from Italy, and in soil with larch in baggage from Austria.

Ceutorhynchus sp., probably *pleurostigma* (Curculionidae), in rutabaga root in cargo from Germany and in turnip root in stores from Belgium, England, and France.

Cnephasia sp. (Tortricidae) on gentian bloom in mail from Switzerland, on lettuce in stores from France, on parsley in stores from Japan, and on strawberry plant in aircargo from France.

Ctenicera sp. (Elateridae) in soil with unidentified plant in air baggage from Poland.

Diaprepes sp., probably *abbreviatus* (L.) (Curculionidae), in yam in cargo from Puerto Rico.

Epicaerus sp., possibly *cognatus* Sharp (Curculionidae), in potato in baggage and stores from Mexico.

"*Eulia*" sp. (Tortricidae) in pear in aircargo from Ecuador.

Euzophora sp., near or *bigella* Zell. (Phycitidae), in quince in baggage from Greece.

Gnorimoschema sp., near or *borsaniella* (Gelechiidae), in pepper in air baggage from Peru and stores from Argentina.

Grapholitha sp., probably *funebrana* (Olethreutidae), in plum in air baggage from Czechoslovakia and Italy and air stores from France.

Gymnandrosoma sp., near or *aurantianum* (Olethreutidae), in guava in air baggage from Colombia and in cacao pod in baggage from Bermuda and Trinidad.

Harmolita sp. (Eurytomidae) on esparto needlegrass and unidentified straw in cargo from Italy.

Heilipus sp., probably *lauri* Boh. (Curculionidae), in avocado seed in air baggage from Costa Rica.

Heliothis sp., probably *armigera* (Noctuidae), on carnation flower in aircargo from France and Spain, on gladiolus flower in air quarters from France, and on strawflower in air baggage and airmail from the Philippines.

Homothrips sp., probably *distinctus* (Thripidae), on protea flower in aircargo from the Republic of South Africa.

Hoplandrothrips, undescribed species (Phlaeothripidae), on *Davallia mariesii* fern rhizome in cargo from Japan.

Hyperodes sp. (Curculionidae) in carrot in stores from Argentina. *Hyperodes* sp., or near, on burhead plant in aircargo from Peru.

Ips sp., apparently a species not established in the United States (Scolytidae), in pine bark of crate and in unidentified wood of crate in cargo from Italy.

Leucoptera sp., probably *lustratella* H.-S. (Lyonetiidae), with apple in stores from Italy.

Lixus sp., possibly *junci* (Curculionidae), in beet root in stores from the United Arab Republic.

Lygaeidae, genus and species not in the U.S. National Museum, in airplane from an unknown origin; in cape-marigold seed in airmail from the Republic of South Africa; on *Dianthus* sp. flower in air baggage from Mexico; on garden asparagus in aircargo from New Zealand; on mixed cut flowers in air baggage from the Republic of South Africa; in okra seed in mail from Nigeria; on orchid in aircargo from

Brazil, Honduras, and India and airmail from the Canal Zone; and in soil with European grape plant in mail from Italy.

Melanotus sp. (Elateridae) on orchid plant in airmail from Antigua; and on rosemary plant and in soil with amaryllis bulb in air baggage from Italy.

Odontalecyrodes sp., apparently undescribed (Aleyrodidae), on *Argoslemma* sp. leaf in aircargo from Indonesia.

Olethreutidae, probably *Cryptophlebia* sp., in grapefruit in stores from the Republic of South Africa, in mango seed in air stores from Thailand, and in sweet orange in air baggage from Guinea.

Pantomorus sp. (Curculionidae) on lemongrass in baggage from Mexico and in soil with Indiarubber fig plant in baggage from Brazil.

Phycitidae, presumably *Myelois* group but does not match any material in the U.S. National Museum, in Ivorycoast cherry-orange in airmail from the Republic of the Congo.

Phyllocoptes n. sp. (Eriophyidae), an interesting form, on soursop fruit in air baggage from Costa Rica. *Phyllocoptes* sp., apparently n. sp., not assignable to any known apple eriophyid, on apple in air stores from Honduras.

Phyllotreta sp., possibly *undulata* Kutsch. (Chrysomelidae), on cabbage in stores from England.

Phytomyza sp., probably *rufipes* (Agromyzidae), on cauliflower in stores from France and the Netherlands and on radish in air stores from an unknown origin.

Prays sp., near or *endocarpa* Meyr. (Hyponomeutidae), in grapefruit in air baggage and Mandarin orange in air stores from the Philippines.

Premnotrypes sp. (Curculionidae) (34 times) in potato in air baggage from Colombia, Ecuador, and Peru, in air stores from Chile, in baggage from Peru, and in stores from Colombia, Ecuador, and Peru.

Pseudonidia sp., not placed as anything described (Coccidae), on orchid plant in aircargo from India.

Rhynchites sp. (Curculionidae) in cherry in air baggage from Italy and on *Prunus* sp. plant in airmail from Iran.

Sternochetus sp., probably *maniferae* (Curculionidae), in mango in air baggage from the Philippines and quarters from Hawaii.

Tenuipalpus n. sp. (Tenuipalpidae) on *Plumeria* sp.(?) in mail from Mexico.

Xyleborus sp., near *testaceus* Walk. (Scolytidae), in raintree saman log in cargo from Fiji.

INCOMPLETELY DETERMINED DISEASES

Of the 357 incompletely determined diseases which were recorded, the following are of special interest:

Cercospora sp. on sweet basil leaf and pricklypear stem in baggage from Mexico.

Cryptosphaeria sp. on *Dendrobium* sp. stem in aircargo from India.

Cytospora sp., probably *sydowiana* (Syd.) Camara, on camellia twig in airmail from New Zealand.

Cytospora sp. on astilbe flower stalk in cargo from the Netherlands. None reported on this host as far as known.

Dothiorella sp. on *Araucaria cookii* seed in aircargo and *Howea forsteriana* seed in cargo from Australia.

Microstroma sp. on tomato in stores from Spain. *Microstroma* sp.(?) on loquat in air quarters from Italy.

Monochaetia sp. on sapodilla in baggage from Mexico. Not reported on this host as far as is known.

Mycosphaerella sp. on *Jatropha* sp. in baggage from Mexico and on tree peony stem in cargo and mail from Japan.

Pellicularia sp. on orchid plant in aircargo from Peru.

Pestalotia sp. on *Agave* sp. leaf in baggage from Mexico. There is no report on this host.

Phyllostictina sp. on tropic-American hymenocallis in mail from Hawaii.

Ravenelia sp., close to *pithecolobii* Arth., on guamachil apes-earring seed in baggage from Mexico.

Septoria sp., probably an undescribed species, on *Agave* sp. in baggage from Mexico.

Sphenospora sp., probably *kevorkianii*, on *Epidendrum* sp. leaf in aircargo from Honduras, on *Ionopsis* sp. leaf in air baggage from the Dominican Republic and in cargo from Mexico, on *Oncidium pusillum* leaf in aircargo from Peru, on *Oncidium* sp. leaf in aircargo from British Honduras and Peru, and on orchid leaf in aircargo from Honduras.

Sphenospora sp., probably *saphena*, on orchid leaf in aircargo from Guatemala.
Sphenospora sp. on *Ornithocephalus* sp. leaf in air baggage from Peru. Probably a new host.

Stomiopellis sp., probably should be described as new, on vi-apple in air baggage from Panama and Trinidad. None reported on Anacardiaceae.

Trematosphaeria sp. on leaf of *Agave* sp. plant in baggage from Mexico. No report on this host as far as known.

Virus, a new virus or a new strain of an old virus, on carnation leaf in cargo from Canada.

INCOMPLETELY DETERMINED NEMATODES

There were 936 nematode interceptions not completely determined as follows:

Acroboloides sp. in apple root stock in cargo from Canada.

Aphelenchoides sp. in amaryllis bulb in baggage from Mexico; in carnation in air baggage from Germany; in dahlia root in cargo from Japan and mail from Australia; in orchid, portulaca, rose, and unidentified plants and in soil with cactus in baggage from Mexico; in soil sample in cargo from Mexico; and in soil with tuberose in cargo from Italy.

Aphelenchus sp. in apple root stock in cargo from Canada; in soil with army tank in cargo from Germany; in soil with automobile in cargo from the Republic of South Africa; in soil with unidentified bulb in baggage from Cuba; in soil with cactus, citrus, dahlia, *Eugenia* sp.(?), fig, lemongrass, and rose plants in baggage from Mexico; and in soil with grape cuttings in air baggage from Italy.

Criconema sp., undescribed, in soil with African-violet and unidentified plant in baggage from Mexico. *Criconema* sp. in soil with unidentified plant in baggage from Mexico.

Criconemoides sp., probably *xenoplax* Raski, in soil with lily bulb in baggage from Mexico.

Criconemoides sp. in chrysanthemum in airmail from Formosa; in rhubarb root in baggage from Canada; and in soil sample in baggage and cargo and in soil with avocado, Bermuda grass, cactus, citrus, croton, echeveria, fig, guava, lemongrass, onion, palm, spiderwort, and unidentified plants in baggage from Mexico.

Ditylenchus sp. in dahlia root in cargo from Japan and mail from Australia, in garlic in cargo from Italy, in soil with cactus and unidentified plant in baggage from Mexico, and in torchlily in aircargo from England.

Helicotylenchus sp., probably *dihystera*, in soil with begonia in cargo from Mexico.

Helicotylenchus sp. was intercepted 98 times; 82 from Mexico, 2 each from the Azores and Brazil, and 1 each from Alaska, Cuba, England, France, Germany, Hawaii, Ireland, Italy, Japan, Portugal, Republic of South Africa, and Turkey. The hosts were various flower plants and soil with army tanks, refrigerator car, and unidentified bulbs and plants.

Hemicyclophora sp. in soil with mango plant in baggage from Mexico.

Heterodera sp., probably *avenae*, in soil with beet in stores from the Netherlands and in soil with peach tree in air baggage from Germany.

Heterodera sp., probably *humuli*, in soil with hop roots in cargo from Canada.

Heterodera sp., probably *punctata*, in soil with automobile in cargo from an unknown origin, in soil with cuphea plant in baggage from Mexico, and in soil with holly and lavender plants in air baggage from England.

Heterodera sp., probably *rostochiensis*, in soil in air baggage from Germany, in soil with automobile in cargo from England, in soil with heather in air baggage from Scotland, and in soil and debris from vegetables in stores from the Netherlands.

Heterodera sp., probably *trifolii*, in soil with army tank in cargo from Germany.

Heterodera sp., *caci* group (39 times), from Belgium, Canal Zone, England, France, Germany, Italy, Japan, Mexico, Poland, Portugal, Republic of South Africa, and Turkey. These were taken from a soil sample, soil with automobiles, and soil with cactus and various plants.

Heterodera sp., *goettingiana* group (207 times), cyst with cucurbit seed; in soil sample; in soil with automobile, military cargo, and tractor; in soil with carrot, celery, garlic, leek, onion, potato, rutabaga, and turnip in stores; and in soil with various bulbs and plants. Countries of origin were Argentina, Azores, Belgium, Brazil, Czechoslovakia, Denmark, England, France, Germany, Greece, Guatemala, Ireland, Israel, Italy, Japan, Lebanon, Mexico, Netherlands, Peru, Poland, Spain, Switzerland, United Arab Republic, an unknown origin, and Yugoslavia.

Heterodera sp., *rostochiensis* group, in soil with celery in stores from England, soil with orchid in baggage from Guatemala, soil with shamrock in airmail from

Ireland, and soil with jasmine, succulent, and unidentified plants in baggage from Mexico.

Heterodera sp., *schachtii* group (265 times), cysts with lentil seed; in soil ballast and samples; in soil with automobiles, bicycle, military cargo, railway car, shoes, and tractor; in soil with beet, carrot, celeriac, celery, garlic, horseradish, leek, onion, parsnip, potato, rutabaga, salsify, turnip, and yam in stores; and in soil with various bulbs and plants. Countries of origin were Argentina(?), Azores, Belgium, Brazil, British Honduras, Canada, Chile, Colombia, Czechoslovakia, Denmark, East Germany, England, France, Germany (West), Greece, India, Ireland, Israel, Italy, Japan, Netherlands, Norway, Pakistan, Panama, Peru, Poland, Portugal, Republic of South Africa, Spain, Sweden, Turkey, United Arab Republic, Wales, and Yugoslavia.

Heterodera sp. (24 times) in soil sample; in soil with automobile, military cargo, snow plow, and truck; in soil with horseradish, onion, potato, and turnip in stores; and in soil with asparagus, begonia, *Calathea* sp., citrus, dahlia, fuchsia, heather, stonecrop, and unidentified plants. Countries of origin were England, France, Germany, Hawaii, Hong Kong, Italy, Mexico, Peru, Portuguese Guinea, Scotland, Spain, and Turkey.

Hoplotaimus sp., probably *scinhorsti* Luc, in soil with croton plant in baggage from Mexico.

Hoplotaimus sp., undescribed, in soil with cactus plant in baggage from Mexico. *Hoplotaimus* sp. in soil sample and soil with onion, succulent plant, and sweet-potato in baggage from Mexico.

Meloidogyne sp., near *arenaria*, in carrot root in stores from Japan and in rubber-vine root in air baggage from Colombia.

Meloidogyne sp., probably *arenaria thamesi*, in dahlia root in cargo from Japan.

Meloidogyne sp., probably *hapla*, in beet root in stores from Poland and in brassbuttons root in aircargo from Germany.

Meloidogyne sp., possibly *incognita*, in beet in stores from Brazil, dasheen in cargo from Cuba, *Ledenbergia rosea-aenea* root in aircargo from Ireland, sansevieria in air baggage from Venezuela, and *Stephanotis* sp. root in baggage from Mexico.

Meloidogyne sp., possibly *incognita acrita*, in tulip root in baggage from England.

Meloidogyne sp., probably *javanica*, in beet root in stores from Australia, freesia root in air baggage from the Azores, strawberry root in aircargo from France, and yam in air baggage from Puerto Rico.

Meloidogyne n. sp.(?), close to *incognita acrita*, in astilbe root in cargo from the Netherlands. *Meloidogyne* sp., possibly a new species, in agapanthus root in mail from India.

Meloidogyne sp. (76 times) in roots of various bulbs, corms, flower plants, tubers, and vegetables from the Canal Zone, Cuba, Dominican Republic, England, Fiji, Formosa, France, Germany, Guatemala, Hawaii, India, Italy, Japan, Mexico, Netherlands, Peru, Singapore, and Switzerland.

Paratylenchus sp. in soil with African-violet in baggage from Mexico.

Pratylenchus sp., probably *penetrans*, in babysbreath root in cargo from the Netherlands.

Pratylenchus sp. (22 times) in roots of various flower plants from Canada, Colombia, Japan, Mexico, and Netherlands.

Pseudhalenchus sp. in soil with portulaca in baggage from Mexico.

Psilenchus sp. in hibiscus, Josephs-coat amaranth, and soil with anthurium, gardenia, and lemongrass plants in baggage from Mexico; and in soil with mint plant in baggage from Cuba.

Radopholus sp. in flamingo anthurium and ginger plants in mail from Hawaii.

Rotylenchus sp. in crassula, gardenia, soil sample, and soil with fern plant in baggage from Mexico; in soil with automobile in cargo from Sweden; and in unidentified plants in air baggage from England and an unknown origin.

Scutellonema sp. (22 times) in soil with automobiles in aircargo from Puerto Rico and cargo from Cuba; in soil with agave, amaryllis, asparagus-fern, begonia, caladium, citrus, *Eugenia* sp.(?), gardenia, lily, narcissus, philodendron, sansevieria, and unidentified plants in baggage from Mexico; and in yam root in air baggage from Cuba.

Tetylenchus sp. in amaryllis bulb in baggage from Mexico, in soil with railway refrigerator car in cargo from Mexico, and in soil sample and soil with echeveria and succulent plants in baggage from Mexico.

Trichodorus sp., undescribed, in soil with kalanchoe in air baggage from Guatemala. *Trichodorus* sp. in soil with fern plant in air baggage from Mexico.

Tylenchorhynchus sp. (29 times) in cactus, carnation, crassula, and gardenia plants and in soil with bamboo, begonia, coleus, dahlia, fig, flatsedge, geranium, hydrangea, lemongrass, onion, peperomia, peppertree, rose, succulent, and unidentified plants in baggage from Mexico and in soil with stonecrop in air baggage from England.

Tylenchus sp. in chrysanthemum in air baggage from England, Indiarubber fig plant in baggage from Brazil, in rose plant in baggage from Mexico, in soil with army tank in cargo from Germany, in soil with begonia in baggage from Argentina, in soil with cyclamen in baggage from Canada, and in soil sample and soil with fig, persimmon, rose, and unidentified plants in baggage from Mexico.

Xiphinema sp. in soil sample in air baggage from British Honduras and baggage and cargo from Mexico; in soil with acacia, banana, begonia, citrus, gardenia, lily, mango, succulent, and tuftroot plants and medicinal herbs in baggage from Mexico; in soil with croton plant in aircargo from British Honduras; and in soil with jasmine plant in air baggage from Cuba.

*This total represents only pests of known or potential plant quarantine importance or organisms of scientific interest. The total of all interceptions made during the year was 33,033.

NOTE.—Interceptions were also made from British West Africa, Canton Island, Christmas Island, Crete, Ghana, Guinea, Ivory Coast, Malta, Martinique, Montserrat, Netherlands New Guinea, Portuguese Guinea, Rumania, and Zanzibar.

Pests Collected and Reported From July 1, 1961, Through June 30, 1962

[An asterisk indicates State inspection]

Pest and host	Country of origin	Number of inter- ceptions in—			Collected in—
		Consump- tion	Nonentry	Propaga- tion	
<i>Acanthoscelides armitagei</i> (Pic) (Bruchidae):					
<i>Cajanus cajan</i> (pigeonpea)-----	Colombia, Jamaica, Panama, Peru, Trinidad, unknown.	12	-----	1	Fla., N.Y.
<i>Phaseolus lunatus</i> (lima bean)-----	Colombia, Ecuador	-----	-----	2	D.C.
<i>P. vulgaris</i> (bean)-----	Colombia, Jamaica, Trinidad, unknown, Venezuela.	2	1	2	D.C., Fla., La., N.Y. Tex.
<i>Pisum sativum</i> (pea)-----	Panama	1	-----	-----	Fla.
Stores (with mixed fruits)-----	Unknown	-----	1	-----	N.Y.
<i>Acanthoscelides griseolus</i> (Fall.) (Bruchidae):					
<i>Cajanus cajan</i> (pigeonpea)-----	Panama, Peru	3	-----	-----	Fla., N.Y.
<i>Lens culinaris</i> (lentil)-----	Nicaragua	1	-----	-----	Calif.*
<i>Phaseolus lunatus</i> (lima bean)-----	Peru	-----	1	-----	Pa.
<i>P. vulgaris</i> (bean)-----	Panama	1	-----	-----	Calif.*
<i>Pisum sativum</i> (pea)-----	do	1	-----	-----	Fla.
<i>Sesbania aculeata</i> (cannabina)-----	Mexico	-----	-----	1	Calif.
<i>Sesbania</i> sp.-----	do	1	-----	3	Ariz., Calif.
<i>Acanthoscelides spinipes</i> (Er.) (Bruchidae):					
Legume (seed)-----	Greece	-----	-----	1	N.Y.
<i>Acentroptera nevermanni</i> Uhmann (Chrysomelidae):					
Bromeliad-----	Costa Rica	-----	-----	1	Fla.
<i>Achaea janata</i> (L.) (Noctuidae):					
Airplane-----	Unknown	-----	1	-----	Hawaii.
<i>Codiaeum variegatum</i> (croton)-----	Hawaii	1	-----	-----	Hawaii.
<i>Achatina fulica</i> Bowdich (Achatinidae):					
Baggage-----	do	8	-----	-----	Hawaii.
Military cargo-----	Okinawa	2	-----	-----	Calif.*
<i>Acrolepia assectella</i> (Zell.) (Hyponomeutidae):					
<i>Allium cepa</i> (onion)-----	France	1	-----	-----	N.Y.
<i>A. porrum</i> (leek)-----	Denmark, France, Italy, Netherlands, Norway, Spain.	-----	9	-----	N.Y., N.C. Ohio, Pa.
Stores-----	France	-----	1	-----	N.Y.
<i>Acronicta psi</i> (L.) (Noctuidae):					
<i>Rosa</i> hybrid (leaf)-----	Poland	1	-----	-----	N.Y.
<i>Adelphocoris lineolatus</i> (Goeze) (Miridae):					
<i>Fagus</i> sp. (beech) cutting-----	England	-----	-----	1	Mass.
<i>Adoretus sinicus</i> Burm. (Scarabaeidae):					
<i>Acalypha</i> sp. (copperleaf)-----	Hawaii	-----	-----	1	Hawaii.
Airplane-----	do	-----	2	-----	Hawaii.
Baggage-----	do	2	-----	-----	Hawaii.
Flowers-----	do	1	-----	-----	Hawaii.
<i>Mangifera indica</i> (mango)-----	do	1	-----	-----	Hawaii.
Orchid-----	do	1	-----	-----	Hawaii.
<i>Adoxophyes reticulana</i> (Hbn.) (Tortricidae):					
<i>Syringa</i> sp. (lilac) cut flowers-----	Netherlands	3	-----	-----	N.Y.
<i>Aeolus pictus</i> (Cand.) (Elateridae):					
Orchid-----	Honduras	-----	-----	2	Fla.
<i>Aganactesis indecora</i> Dyar (Galleriidae):					
<i>Cassia</i> sp. (senna) seed pod-----	Jamaica, Trinidad	2	-----	-----	Fla., N.Y.
<i>Agonopterix costosa</i> (Haw.) (Oecophoridae):					
<i>Cytisus scoparius</i> (Scotch-broom)-----	Canada	-----	-----	1	Wash.
<i>Agonozena pyrogramma</i> Meyr. (Agonozenidae):					
<i>Cocos nucifera</i> (coconut)-----	Guam	1	-----	-----	Hawaii.
<i>Akermes andersoni</i> Newst. (Coccidae):					
<i>Garcinia mangostana</i> (mangosteen) sepal-----	Liberia	1	-----	-----	N.Y.
<i>Aleurocanthus citripedus</i> Q. & B. (Aleyrodidae):					
<i>Citrus</i> sp. (leaf)-----	Philippines	1	-----	-----	Hawaii.
<i>Aleurocanthus woglumi</i> Ashby (Aleyrodidae):					
<i>Citrus aurantifolia</i> (lime) leaf-----	Mexico	3	-----	-----	Tex.
<i>C. sinensis</i> (sweet orange) leaf-----	do	1	-----	-----	Tex.
<i>Citrus</i> sp. (leaf)-----	Ecuador, Mexico	6	-----	-----	Fla., Tex.
<i>Aleurodicus tridescens</i> Okil. (Aleyrodidae):					
<i>Echinodorus</i> sp. (burhead)-----	Peru	-----	-----	3	Fla.
<i>Aleurothrixus myrtacei</i> Bondar (Aleyrodidae):					
<i>Laurus nobilis</i> (Grecian laurel) leaf-----	British Honduras	1	-----	-----	Fla.
<i>Aleurotrachelus camelliae</i> (Kuw.) (Aleyrodidae):					
<i>Camellia japonica</i> (leaf)-----	Japan	-----	-----	2	D.C.
<i>Aleyrodes lonicerae</i> Wlk. (Aleyrodidae):					
<i>Fragaria</i> sp. (strawberry) leaf-----	France	-----	-----	1	N.Y.

Pests Collected and Reported From July 1, 1961, Through June 30, 1962—Continued

Pest and host	Country of origin	Number of interceptions in—			Collected in—
		Consumption	Nonentry	Propagation	
<i>Chrysomphalus umboniferus</i> —Continued					
<i>Diachaea</i> sp. (orchid) leaf.....	Costa Rica.....	-		1	Fla.
Orchid (leaf).....	Canal Zone, Costa Rica, El Salvador, Guatemala, Mexico, Peru.....			13	Ariz., Calif.,* Fla.
<i>Philodendron</i> sp. (leaf).....	Peru.....			1	Fla.
<i>Sobralia</i> sp. (orchid) leaf.....	Costa Rica.....			1	Calif.*
<i>Cladius pectinicornis</i> (Fourc.) (Tenthredinidae):					
<i>Rosa</i> hybrid (rose).....	Denmark, England, Germany, Netherlands, Switzerland.....	4	1	1	Ill., Mich., N.Y., Wash.
Soil with <i>Ilex</i> sp. plant.....				1	N.Y.
<i>Clausilia lineolata</i> Held (?) (Clausiliidae):					
Military cargo.....	France.....	1			N.J.
<i>Cleistophus similis</i> (Chev.) (Curculionidae):					
<i>Chrysanthemum</i> sp. (cut flowers).....	Guatemala.....	1			Fla.
<i>Clerada apicicornis</i> Sign. (Lygaeidae):					
Baggage.....	Hawaii.....	1			Hawaii.
Grass (dried—used for tea).....	Dominican Republic.....	1			N.Y.
<i>Clystiana ambiguella</i> (Hbn.) (Phalonidae):					
<i>Prunus persica</i> (peach).....	Italy.....	1			N.Y.
<i>Vitis</i> sp. (grape).....	do.....	1			N.Y.
<i>Coccus alpinus</i> deLotto (Coccidae):					
<i>Coffea arabica</i> (Arabian coffee).....	Brazil.....	1		1	Fla.
<i>Coccus viridis</i> (Green) (Coccidae):					
<i>Alpinia purpurata</i>	Hawaii.....	1			Hawaii.
<i>Alstonia</i> sp. (leaf).....	New Guinea.....	1			Calif.*
<i>Citrus</i> sp. (plant).....	Tahiti.....			1	Hawaii.
<i>Coffea arabica</i> (Arabian coffee) berry.....	Hawaii.....	8			Hawaii.
<i>Gardenia jasminoides</i>	do.....	121	2	7	Calif.* Hawaii.
<i>Ixora chinensis</i>	Fiji.....	1			Hawaii.
<i>Ixora</i> sp.....	Tahiti.....	2			Hawaii.
<i>Plumeria rubra</i> (Mexican frangipani).....	Hawaii.....			1	Hawaii.
<i>Plumeria</i> sp.....	do.....		1	2	Hawaii.
<i>Polianthes tuberosa</i> (tuberose).....	Tahiti.....	1			Hawaii.
<i>Schinus terebinthifolia</i> (Brazil peppertree).....	Hawaii.....	1			Hawaii.
<i>Triphasia trifolia</i> (limeberry).....	do.....			1	Hawaii.
<i>Cochlicella barbara</i> (L.) (Helicellidae):					
Military cargo.....	Italy, Libya, Morocco, Spain.....	24			La., N.Y., S.C., Va.
<i>Mirabilis jalapa</i> (common four-o'clock) seed.....	France.....			1	Pa.
Soil.....	Italy.....	1			N.Y.
<i>Cochlicella conoidea</i> (Draparnaud) (Helicellidae):					
Military cargo.....	Spain.....	1			Va.
<i>Cochlicella ventrosa</i> (Fer.) (Helicellidae):					
<i>Brassica oleracea</i> var. <i>botrytis</i> (broccoli) seed.....	Italy.....			1	N.Y.
<i>Cedrus</i> sp. (cedar).....	Bermuda.....		1		Fla.
Military cargo.....	Azores, Italy, Morocco, Spain, Turkey.....	13			La., N.Y., S.C., Tex., Va.
Soil with unidentified plants.....	Bermuda.....			1	Va.
<i>Conchaspis orchidarum</i> Mamet (Coccidae):					
Orchid (pseudobulb).....	Panama.....			1	P.R.
<i>Conchylodes bryophilalis</i> Hamp. (Pyraustidae):					
Airplane.....	Costa Rica.....		1		Fla.
<i>Conocephalus longipennis</i> (Haan) (Tettigoniidae):					
Airplane.....	Philippines.....		1		Hawaii.
<i>Conoderus exsul</i> (Sharp) (Elateridae):					
<i>Asparagus myriocladus</i>	Hawaii.....	1			Hawaii.
<i>Conotelus mexicanus</i> Murr. (Nitidulidae):					
<i>Chrysanthemum</i> sp. (cut flowers).....	Mexico.....	5			Ariz., Tex.
<i>Cucurbita</i> sp.....	do.....	1			Ariz.
<i>Gardenia</i> sp.....	Hawaii.....	1			Hawaii.
<i>Lathyrus odoratus</i> (sweetpea).....	Mexico.....	1			Tex.
<i>Plumeria</i> sp.....	Hawaii.....	1			Hawaii.
<i>Spinacia oleracea</i> (spinach).....	Mexico.....	1			Tex.
<i>Vanda</i> sp. (orchid).....	Hawaii.....	1			Hawaii.
<i>Zinnia</i> sp. (cut flowers).....	Mexico.....	1			Ariz.

Pests Collected and Reported From July 1, 1961, Through June 30, 1962—Continued

[An asterisk indicates State inspection]

Pest and host	Country of origin	Number of interceptions in—			Collected in—
		Consumption	Nonentry	Propagation	
<i>Vinsonia stellifera</i> —Con. Orchid (leaf of plant)-----	American Virgin Islands, Antigua, Bahamas, British Guiana, British Honduras, Canal Zone, Dominica, Honduras, Jamaica, Mauritius, Panama, Trinidad, unknown.	-----	-----	42	Calif.,* Fla., P.R.
<i>Vitina diaphana</i> Draparnaud (Zonitidae): <i>Brassica oleracea</i> var. <i>capitata</i> (cabbage)-----	France-----	-----	1	-----	Pa.
<i>Xiphidiopsis lita</i> Heb. (Tettigoniidae): <i>Anthurium andraeanum</i> (flamingo anthurium)-----	Hawaii-----	1	-----	-----	Hawaii.
<i>Anthurium</i> sp. (cut flowers)-----	do-----	1	-----	-----	Hawaii.
Flowers-----	do-----	1	-----	-----	Hawaii.
Leaf—unidentified-----	do-----	1	-----	-----	Hawaii.
<i>Xylopsocus capucinus</i> (Fab.) (Bostrichidae): Wood (crate)-----	Indonesia-----	1	-----	-----	Calif.*
<i>Xystrocera globosa</i> (Ol.) (Cerambycidae): <i>Operculina tuberosa</i> (wood-rose)-----	Hawaii-----	1	-----	-----	Hawaii.
<i>Yosemitia didactyla</i> Dyar (Phycitidae): Cactus (plant)-----	Mexico-----	-----	-----	1	Tex.
<i>Zachrysia guanensis</i> Poey (Camaenidae): Baggage-----	Cuba-----	1	-----	-----	Fla.
<i>Zeadiatraea lineolata</i> (Wlk.) (Crambidae): <i>Zea mays</i> (corn)-----	Bahamas, Guatemala-----	1	2	-----	Fla., Tex.
<i>Zonitoides arboreus</i> (Say) (Zonitidae): Bromeliad (plant)-----	France, Mexico-----	-----	-----	2	Ariz., Fla.
Orchid (plant)-----	Aruba, Costa Rica, El Salvador, Germany, Guatemala, Mexico, Peru.	-----	-----	12	Ariz., Calif.,* Fla., Tex.
Palm (plant)-----	Mexico-----	-----	-----	1	Tex.
<i>Saintpaulia</i> sp. (African-violet)-----	Canada-----	-----	-----	1	Wash.
Soil with <i>Pinus</i> sp-----	Japan-----	-----	-----	1	Hawaii.
<i>Zygospila bigenera</i> Stal (Chrysomelidae): Orchid (plant)-----	Honduras-----	-----	-----	1	Fla.

Hosts and Insects

- ABIES:**
Megastigmus suspectus (Hymenoptera)
- ACACIA:**
Trogoderma granarium (Coleoptera)
- ACALYPHA:**
Adoretus sinicus (Coleoptera)
- ACHRAS:**
Anastrepha serpentina (Diptera)
- AGAVE:**
Batrachedra linaria (Lepidoptera)
Caulotepea distanti (Hemiptera)
Chrysomphalus tingi (Homoptera)
Ligyrocoris auricilliana (Hemiptera)
Ozophora consanguineus (Hemiptera)
- ALLIUM CEPA:**
Acrolepis assectella (Lepidoptera)
Myzus ascalonicus (Homoptera)
- ALLIUM PORRUM:**
Acrolepis assectella (Lepidoptera)
Hispa atra (Lepidoptera)
Limax marginatus (Mollusca)
- ALLIUM SATIVUM:**
Lepidosaphes albidentatus (Coleoptera)
Dyspessa ulula (Lepidoptera)
Sinoxylon serdentatum (Coleoptera)
Taeniothrips hawaiiensis (Thysanoptera)
- ALLIUM SP.:**
Myzus ascalonicus (Homoptera)
- ALOE:**
Erythrochloera formosa (Hemiptera)
- ALPINIA:**
Coccus viridis (Homoptera)
Geotomus pygmaeus (Hemiptera)
Monomorium destructor (Hymenoptera)
Pentalonia nigronervosa (Homoptera)
Pheidole megacephala (Hymenoptera)
Pulvinaria psidii (Homoptera)
- ALSTONIA:**
Coccus viridis (Homoptera)
- ALYXIA:**
Ceroplastes rubens (Homoptera)
Pinnaspis uniloba (Homoptera)
- ANACARDIUM:**
Schneidereria pistaciella (Lepidoptera)
- ANANAS:**
Alpheias conspirata (Lepidoptera)
Cryptoccephalus marginicollis (Coleoptera)
Neoclytus acuminatus (Coleoptera)
Reticulitermes flavipes (Isoptera)
"Targionia" bromiliae (Homoptera)
- ANEMONE:**
Myzus ascalonicus (Homoptera)
- ANNONA:**
Bephrcta maculicollis (Hymenoptera)
Ceronota anonella (Lepidoptera)
Ectomyelois ceratoniae (Lepidoptera)
Talponia batesi (Lepidoptera)
- ANOGEISSUS:**
Trogoderma granarium (Coleoptera)
- ANTHURIUM:**
Bradybaena similis (Mollusca)
Pheidole megacephala (Hymenoptera)
Pulvinaria psidii (Homoptera)
Selenothrips rubrocinctus (Thysanoptera)
Siphanta acuta (Homoptera)
Xiphidopsis lita (Homoptera)
- ANTIRRHINUM:**
Bradybaena similis (Mollusca)
Taeniothrips gracilis (Thysanoptera)
Thrips flavus (Thysanoptera)
- APIUM:**
Cecilioides acicula (Mollusca)
Pyrrhidium sanguineum (Coleoptera)
Trichia hispida (Mollusca)
Udea ferrugalis (Lepidoptera)
- ARACHIS:**
Trogoderma granarium (Coleoptera)
- ARAUCARIA:**
Laspeyresia araucaria (Lepidoptera)
- ARBUTUS:**
Eucheira socialis (Lepidoptera)
- ARMORACIA:**
Baris lepidii (Coleoptera)
- ARTOCARPUS:**
Anaballus amplicollis (Coleoptera)
Aspidiotus palmarum (Homoptera)
- Dacus dorsalis* (Diptera)
- ASPARGUS:**
Bradybaena similis (Mollusca)
Conoderus exsul (Coleoptera)
- ASPASIA:**
Vinsonia stellifera (Homoptera)
- ASTER:**
Haplothrips gowdeyi (Thysanoptera)
- BAMBOO:**
Asterolecanium milaris milaris (Homoptera)
Lyctus africanus (Coleoptera)
Minthea rugicollis (Coleoptera)
Neodoxoplatys saileri (Hemiptera)
Platypus rugulosus (Coleoptera)
- BAMBUSA:**
Asterolecanium bambusae (Homoptera)
A. pseudomiliaris (Homoptera)
- BARRINGTONIA:**
Ectomyelois ceratoniae (Lepidoptera)
- BAUHINIA:**
Protopulvinaria pyriiformis (Homoptera)
- BEAUCARNEA:**
Lepidosaphes carinata (Homoptera)
- BENINCASA:**
Pachybrachius albocinctus (Hemiptera)
- BETA:**
Arion ater (Mollusca)
Gnorimoschema ocellatella (Lepidoptera)
Helix aperta (Mollusca)
H. aspersa (Mollusca)
Lizus juncti (Coleoptera)
Mamestra brassicae (Lepidoptera)
- BETULA:**
Eriophyes leionotus (Acarina)
- BRASSAVOLA:**
Orthalicus undatus (Mollusca)
- BRASSIA:**
Vinsonia stellifera (Homoptera)
- BRASSICA CHINENSIS:**
Mamestra brassicae (Lepidoptera)
- BRASSICA OLERACEA VAR. BOTRYTIS:**
Autographa gamma (Lepidoptera)
Cochlicella ventrosa (Mollusca)
Helix aperta (Mollusca)
Mamestra brassicae (Lepidoptera)
Milax gagates (Mollusca)
Phytomyza rufipes (Diptera)
Pieris brassicae (Lepidoptera)
Theba pisana (Mollusca)
Udea ferrugalis (Lepidoptera)
- BRASSICA OLERACEA VAR. CAPITATA:**
Anacardium aegyptium (Orthoptera)
Arion hortensis (Mollusca)
Evergestis forficata (Lepidoptera)
Helix aperta (Mollusca)
H. aspersa (Mollusca)
Limax marginatus (Mollusca)
Mamestra brassicae (Lepidoptera)
Milax gagates (Mollusca)
Otala lactea (Mollusca)
Oulema melanopa (Coleoptera)
Pieris brassicae (Lepidoptera)
Theba pisana (Mollusca)
Trichia hispida (Mollusca)
Udea ferrugalis (Lepidoptera)
Vaginulus occidentalis (?) (Mollusca)
Vittrina diaphana (Mollusca)
- BRASSICA RAPA:**
Ceutorhynchus pleurostigma (Coleoptera)
- BRASSICA SP.:**
Loxostege bifidialis (Lepidoptera)
- BROMELIAD:**
Acentroptera nevermanni (Coleoptera)
Althos obscurus (Hemiptera)
Ancylotoma stercora (Lepidoptera)
Arion ater (Mollusca)
Arphnus melanotylus (Hemiptera)
Aspidiotus mendax (Homoptera)
A. palmarum (Homoptera)
Atheas nigricornis (Hemiptera)
Chrysomphalus umbriferus (Homoptera)
Cryphula apicata (Hemiptera)
Drymaeus alternans (Mollusca)
D. hegewischi (Mollusca)
Elthea sobrina (Coleoptera)
Erythrochloera tumens (Hemiptera)

Hosts and Insects—Continued

BROMELIAD—Continued

Galgupha punctifer (Hemiptera)
G. quadrisignata (Hemiptera)
Helicina openiana (?) (Mollusca)
H. zephyrina (Mollusca)
Iridomyrmex iniquus (Hymenoptera)
Lamelaxis gracilis (Mollusca)
Limax marginatus (Mollusca)
Mecolaemus carvalhoi (Hemiptera)
Monanthia monotropidia (Hemiptera)
Nasutitermes ephrae (Isoptera)
N. nigriceps (Isoptera)
Oplomus nigripennis pulcher (Hemiptera)
Orthalicus boucardi (Mollusca)
Pachybrachius albocinctus (Hemiptera)
Plagioderia punctigera (Coleoptera)
Pseudoparlatoria turgida (Homoptera)
Termaophylla fulvipes (Hemiptera)
Vaginulus occidentalis (Mollusca)
Zonitoides arboreus (Mollusca)

BROUGHTONIA:

Asterolecanium epidendri (Homoptera)
Vinsonia stellifera (Homoptera)

BUXUS:

Eriophyes canestrinii (Acarina)

CACTUS:

Amitermes wheeleri (Isoptera)
Bulimulus hepatostomus (Mollusca)
Cryphula apicata (Hemiptera)
Gymnococcus agavium (Homoptera)
Lepidosaphes philococcus (Homoptera)
Polygyra richardsoni (Mollusca)
Reticulitermes flavipes (Isoptera)
Sisamnes contractus (Hemiptera)
Yosemitia didactica (Lepidoptera)

CAESALPINIA:

Mimosestes sallaei (Coleoptera)

CAJANUS:

Acanthoscelides armitagei (Coleoptera)
A. griseolus (Coleoptera)
Ancylostoma stercora (Lepidoptera)
Callosobruchus analis (Coleoptera)
Fundella pellucens (Lepidoptera)
Maruca testulalis (Lepidoptera)
Sphenarches caffer (Lepidoptera)
Trogoderma granarium (Coleoptera)

CALADIUM:

Vaginulus occidentalis (?) (Mollusca)

CALLISTEPHUS:

Taeniothrips atratus (Thysanoptera)
T. ericae (Thysanoptera)
Thrips major (Thysanoptera)

CALLUNA:

Aphis callunae (Homoptera)
Lygus rugulipennis (Hemiptera)
Orthotylus ericetorum (Hemiptera)
Rhinocola ericae (Homoptera)
Taeniothrips atratus (Thysanoptera)
T. ericae (Thysanoptera)

CALOCARPUM:

Anastrepha serpentina (Diptera)

CALOTROPIS:

Taeniothrips hawaiiensis (Thysanoptera)

CAMELLIA:

Aleurotrachelus camelliae (Homoptera)
Fiorinia theae (Homoptera)

CANAVALLIA:

Lampides boeticus (Lepidoptera)
Maruca testulalis (Lepidoptera)
Taeniothrips vitticornis (Thysanoptera)

CAPSICUM:

Ceratitis capitata (Diptera)
Ephestia calidella (Lepidoptera)
Gnorimoschema borsaniella (Lepidoptera)
G. gudmannella (Lepidoptera)
Ostrinia nubilalis (Lepidoptera)
Platynota rostrana (Lepidoptera)
Prodenia litura (Lepidoptera)
Sterrhia inquinata (Lepidoptera)

CARICA:

Dacus dorsalis (Diptera)
Toxotrypana curvicauda (Diptera)

CARISSA:

Publinaria psidii (Homoptera)

CASIMIROA:

Anastrepha ludens (Diptera)

CASSIA:

Aganactesis indecora (Lepidoptera)

CASTANEA:

Curculio elephas (Coleoptera)
C. nucum (Coleoptera)
Helix aspersa (Mollusca)
Heterogenea asella (Lepidoptera)
Laspeyresia splendana (Lepidoptera)

CATTLEYA:

Asterolecanium epidendri (Homoptera)
Chrysomphalus umboniferus (Homoptera)
Eurytoma orchidearum (Hymenoptera)
Puto ulter (Homoptera)
Vinsonia stellifera (Homoptera)

CEDRUS:

Cochlicella ventrosa (Mollusca)

CEPHALOCEREUS:

Lepidosaphes philococcus (Homoptera)

CERATONIA:

Ectomyelois ceratoniae (Lepidoptera)

CHAMAEDOREA:

Amnestus uhleri (Hemiptera)
Chrysomphalus sphaeroides (Homoptera)
Helicina zephyrina (Mollusca)
Loxostege similalis (Lepidoptera)
Parisochoenus flavolimbalis (Coleoptera)
Veronicella moreleti (Mollusca)

CHRYSANthemum:

Cleistolophus similis (Coleoptera)
Conotelus mexicanus (Coleoptera)
Frankliniella formosae (Thysanoptera)
F. schultzei (Thysanoptera)
F. williamsi (Thysanoptera)
Haplothrips gowdegi (Thysanoptera)
Lygus lineolaris (Hemiptera)
Nysius tenellus (Hemiptera)
Ostrinia nubilalis (Lepidoptera)
Stephanitis nashi (Hemiptera)
Taeniothrips hawaiiensis (Thysanoptera)
Tetranychus cinnabarinus (Acarina)
Thrips flavus (Thysanoptera)
T. imaginis (Thysanoptera)

CIBOTIUM:

Ceroplastes rubens (Homoptera)

CICER:

Ancylostoma stercora (Lepidoptera)

CICORIUM:

Helicella itala (Mollusca)

CINNAMOMUM:

Trogoderma granarium (Coleoptera)

CITRULLUS:

Heterodermes maculatus (Isoptera)

Jadera rufofusca (Hemiptera)

CITRUS AURANTIFOLIA:

Aleurocanthus woglumi (Homoptera)
Anastrepha ludens (Diptera)
Chrysomphalus personatus (Homoptera)
Morganella longispina (Homoptera)
Paragonatus divergens (Hemiptera)
Parlatoria cinerea (Homoptera)
P. zizyphus (Homoptera)
Pheidole megacephala (Hymenoptera)
Pseudonidia trilobitiformis (Homoptera)
Unaspis citri (Homoptera)
U. yanonensis (Homoptera)
Valtissius diversus (Hemiptera)

CITRUS AURANTIUM:

Anastrepha ludens (Diptera)
Aonidiella citrina (Homoptera)
Chrysomphalus personatus (Homoptera)
Unaspis yanonensis (Homoptera)

CITRUS GRANDIS:

Ceratitis capitata (?) (Diptera)
Morganella longispina (Homoptera)
Parlatoria cinerea (Homoptera)
P. zizyphus (Homoptera)
Unaspis yanonensis (Homoptera)

CITRUS ICHANGENSIS X C. RETICULATA:

Unaspis yanonensis (Homoptera)

CITRUS LIMON:

Ceratitis capitata (Diptera)

Chrysomphalus personatus (Homoptera)

Ectomyelois ceratoniae (Lepidoptera)

Parlatoria cinerea (Homoptera)

P. citri (Homoptera)

P. zizyphus (Homoptera)

C. colae (Diptera)

Coccus alpinus (Homoptera)

C. viridis (Homoptera)

Cryptophlebia leucotreta (Lepidoptera)

Leucoptera coffeella (Lepidoptera)

Stephanoderes hampei (Coleoptera)

COLA:

"Lecanium" catori (tentative) (Homoptera)

COLOCASIA:

Limax marginatus (Mollusca)

Orychilus alliarius (Mollusca)

Ozophora quinqueaculata (Hemiptera)

Pentalonia nigronervosa (Homoptera)

Pheidole megacephala (Hymenoptera)

CONVALLARIA:

Taeniothrips picipes (Thysanoptera)

CORDYLINE:

Geotomus pygmaeus (Hemiptera)

Pinnaspis buxi (Homoptera)

Pseudococcus boninensis (Homoptera)

Selenothrips rubrocinctus (Thysanoptera)

CORYLUS:

Curculio nucum (Coleoptera)

COTINUS:

Helicella itala (Mollusca)

Trichia striolata (Mollusca)

CRATAEGUS:

Psylla melanoneura (?) (Homoptera)

CUCUMIS:

Apomecyna saltator (Coleoptera)

Diaphania indica (Lepidoptera)

Melanaethus planifrons (Hemiptera)

CUCURBITA:

Conotelus mexicanus (Coleoptera)

Udea ferrugalis (Lepidoptera)

CUMINUM:

Trogoderma granarium (Coleoptera)

CUPRESSUS:

Diaspis minima (Homoptera)

CURCUMA:

Trogoderma granarium (Coleoptera)

CYAMOPSIS:

Trogoderma granarium (Coleoptera)

CYCAS:

Aonidiella inornata (Homoptera)

Aspidiotus palmarum (Homoptera)

CYCLAMEN:

Frankliniella formosae (Thysanoptera)

CYCNOCHES:

Iridomyrmex iniquus (Hymenoptera)

CYDONIA:

Anastrepha ludens (Diptera)

Ceratitis capitata (Diptera)

Chrysomphalus odontoglossi (Homoptera)

Ectomyelois ceratoniae (Lepidoptera)

Grapholitha packardii (Lepidoptera)

CYMBIDIUM:

Lepidosaphes tuberculata (Homoptera)

CYMBOPOGON:

"Targionia" sacchari (Homoptera)

CYNARA:

Anuraphis apitiifolia (Homoptera)

Gortyna flavago (Lepidoptera)

CYTISUS:

Agonopterix costosa (Lepidoptera)

Bruchidius lividimanus (Coleoptera)

DALBERGIA:

Nasutitermes corniger (Isoptera)

Sinozydon anale (Coleoptera)

S. conigerum (Coleoptera)

DAPHNE:

Lecanium persicae (tentative) (Homoptera)

DENDROBIUM:

Chrysomphalus nulliporus (Homoptera)

DIACHAEA:

Chrysomphalus umboniferus (Homoptera)

DIANTHUS:

Cacoecimorpha pronubana (Lepidoptera)

Frankliniella formosae (Thysanoptera)

- Vinsonia stellifera* (Homoptera)

GOSSYPIUM:

- Ozycaenus hyalinipennis* (Hemiptera)
- Pectinophora gossypiella* (Lepidoptera)

GRAMINEAE:

- Metopoplax ditomoides* (Hemiptera)

HEDERA:

- Foucasia ovata* (Homoptera)

HELICHRYSUM:

- Haplothrips gowdeyi* (Thysanoptera)

HIBISCUS:

- Earias insulana* (Lepidoptera)
- Haplothrips gowdeyi* (Thysanoptera)
- Pectinophora gossypiella* (Lepidoptera)
- Taeniothrips hawaiiensis* (Thysanoptera)

ILEX:

- Rhopobota naevana* (Lepidoptera)

IMPATIENS:

- Helicella caperata* (Mollusca)

IPOMOEAE:

- Cylas formicarius* var. (Coleoptera)
- C. formicarius elegantulus* (Coleoptera)
- C. puncticolis* (Coleoptera)
- Euscapes postfasciatus* (Coleoptera)

IPOMOEAE (?):

- Megacerus alternatus* (Coleoptera)

IRIS:

- Iridothrips iridis* (Thysanoptera)
- Limothrips denticornis* (Thysanoptera)

ISOTOMA:

- Pentalonia nigronervosa* (Homoptera)

IXORA:

- Coccus viridis* (Homoptera)
- Pulvinaria psidii* (Homoptera)

JACARANDA:

- Coptotermes testaceus* (Isoptera)

JASMINUM:

- Dialeurodes kirkaldyi* (Homoptera)
- Palpita unionalis* (Lepidoptera)
- Parlatoria cinerea* (Homoptera)

JUGLANS:

- Ectomyelois ceratoniae* (Lepidoptera)

JUNIPERUS:

- Diaspis juniperi* (Homoptera)
- Limax marginatus* (Mollusca)
- Oligonychus perditus* (Acarina)
- Pentamerismus oregonensis* (Acarina)

KALANCHOE:

- Siphanta acuta* (Homoptera)

KENTIA:

- Aspidiotus destructor* (Homoptera)
- A. palmarum* (Homoptera)

LACTUCA:

- Anuraphis cardui* (Homoptera)
- Arion hortensis* (Mollusca)
- Autographa gamma* (Lepidoptera)
- Helicella itala* (Mollusca)
- Helix aspersa* (Mollusca)
- Limax marginatus* (Mollusca)
- Manisra brassicae* (Lepidoptera)
- Poecilozonites circumscriptus* (Mollusca)
- Theba pisana* (Mollusca)
- Thrips angusticeps* (Thysanoptera)

LAGERSTROEMIA:

- Pulvinaria psidii* (Homoptera)

LATHYRUS:

- Bruchus signaticornis* (Coleoptera)
- B. tristis* (Coleoptera)
- Conotelus mexicanus* (Coleoptera)

Hosts and Insects—Continued

- LATHYRUS**—Continued
Taeniothrips atratus (Thysanoptera)
- LAURUS**:
Aleurothrixus myrtacei (Homoptera)
Chrysomphalus paullist (tentative) (Homoptera)
Helicella conspurcata (Mollusca)
- LENS**:
Acanthoscelides griseolus (Coleoptera)
Bruchus ervi (Coleoptera)
B. lentis (Coleoptera)
B. signaticornis (Coleoptera)
- LEUCAENA**:
Araecerus leipennis (Coleoptera)
- LIGUSTRUM**:
Spanioneura fonscolombei (Homoptera)
- LILIAEAE**:
Trichia hispida (Mollusca)
- LILIUM**:
Otala vermiculata (Mollusca)
- LITOEI**:
Frankliniella formosae (Thysanoptera)
Planococcus dorsopinosus (Homoptera)
Pulvinaria psidii (Homoptera)
- LUPINUS**:
Bruchus tristis (Coleoptera)
- LYCASTE**:
Vinsonia stellifera (Homoptera)
- LYCOPERSICON**:
Gnorimoschema gudmannella (Lepidoptera)
Hemitrochus androsi (Mollusca)
Ligyrocoris aurivilliana (Hemiptera)
Neoleucinodes elegantalis (Lepidoptera)
Plectia plagiata (Diptera)
- LYCORIS**:
Taeniothrips gracilis (Thysanoptera)
- MACROZAMIA**:
Tranes internatus (Coleoptera)
- MALUS**:
Argyresthia conjugella (Lepidoptera)
Arion hortensis (Mollusca)
Blastodaena atra (Lepidoptera)
Carposina niponensis (Lepidoptera)
Ceratitidis capitata (Diptera)
Glycyphagus michaeli (Acarina)
Grapholitha janthiana (Lepidoptera)
Leucoptera scitella (Lepidoptera)
Ostrinia nubilalis (Lepidoptera)
Tetranychus viennensis (Acarina)
Trichia hispida (Mollusca)
- MALVAVISCUS**:
Lepidosaphes crotonis (Homoptera)
- MANGIFERA**:
Adoretus sinicus (Coleoptera)
Anastrepha ludens (Diptera)
A. mombinpraepotans (Diptera)
Aulacaspis tubercularis (Homoptera)
Chrysomphalus personatus (Homoptera)
Dacus dorsalis (Diptera)
Lepidosaphes tubulorum (Homoptera)
Pseudonidia trilobitiformis (Homoptera)
Pseudoschnaspis longissima (Homoptera)
Sternochetus mangiferae (Coleoptera)
- MANIHOT**:
Heterotermes convezinotatus (Isoptera)
- MARANTA**:
Aspidiotus destructor (Homoptera)
- MENTHA**:
Corythaica carinata (Hemiptera)
Psylla pyri (Homoptera)
Teleonemia scrupulosa (Hemiptera)
- MIMOSA**:
Gomocerus insidiator (Hemiptera)
- MIRABILIS**:
Cochlicella barbara (Mollusca)
Helicella maritima (Mollusca)
H. variabilis (Mollusca)
Hygromia cinctella (Mollusca)
- MOLUCELLA**:
Haplothrips gowdeyi (Thysanoptera)
- MONTANO**:
Corythucha mcelfreshi (Hemiptera)
- MURRAYA**:
Dacus dorsalis (Diptera)
- MUSA**:
Bulimulus unicolor (Mollusca)
- Cosmopolites sordidus* (Coleoptera)
Dacus dorsalis (Diptera)
Epilachna borealis var. (Coleoptera)
Metamasius hemipterus sericeus (Coleoptera)
Nasutitermes dendrophilus (Isoptera)
Opogona sacchari (Lepidoptera)
Orthalicus obductus (Mollusca)
Pentalonia nigronervosa (Homoptera)
Pheidole megacephala (Hymenoptera)
Platoeceticus symmicta (Lepidoptera)
Polygyra matermontana (Mollusca)
Porphyrobaphis iostoma (Mollusca)
Purgocorypha sallei (Orthoptera)
Veronicella moreleti (Mollusca)
- MUSCARI**:
Theba pisana (Mollusca)
- MYROTHAMNUS**:
Sculptaria reticulata (Mollusca)
- MYRTILLOCACTUS**:
Opuntiaspis philococcus (Homoptera)
- NARCISSUS**:
Stenotarsonemus laticeps (Acarina)
Taeniothrips gracilis (Thysanoptera)
T. hawaiiensis (Thysanoptera)
- NEOMOOREA**:
Pinnaspis buxi (Homoptera)
- NERINE**:
Haplothrips gowdeyi (Thysanoptera)
- NERIUM**:
Poecilozonites circumfirmatus (Mollusca)
- NOLINA**:
Pseudodiaspis yuccae (Homoptera)
- ODONTOGLOSSUM**:
Asterolecanium epidendri (Homoptera)
- OLEA**:
Dacus oleae (Diptera)
Euphyllura olivina (Homoptera)
Phloeotribus scarabaeoides (Coleoptera)
Prays oleellus (Lepidoptera)
- ONCIDIUM**:
Asterolecanium epidendri (Homoptera)
Capaneus tetricus (Hemiptera)
Pseudoparlaria oreatata (Homoptera)
Tenthecoris vestitus (Hemiptera)
Vinsonia stellifera (Homoptera)
- ONOBRYCHIS**:
Helicella striata (Mollusca)
H. variabilis (Mollusca)
Monacha carthusiana (Mollusca)
- OPERCULINA**:
Dendrothripoides ipomeae (Thysanoptera)
Xystrocerus globosa (Coleoptera)
- OPUNTIA**:
Ceratitidis capitata (Diptera)
Helicella striata (Mollusca)
- ORANIA**:
Morganella longispina (Homoptera)
- ORBIGNYA**:
Asterolecanium simile (Homoptera)
Heterotermes convezinotatus (Isoptera)
- ORCHID**:
Adoretus sinicus (Coleoptera)
Aeolus pictus (Coleoptera)
Antilocoris punctatus (Hemiptera)
Antiteuchus panamensis (Hemiptera)
Asterolecanium epidendri (Homoptera)
Bathydema socia (Hemiptera)
Capaneus tetricus (Hemiptera)
Cecilioides acicula (Mollusca)
Chondropoma picta (?) (Mollusca)
Chrysomphalus umboniferus (Homoptera)
Conchaspis orchidarum (Homoptera)
Cryphula apicata (Hemiptera)
Dendrocoris variegatus (Hemiptera)
Drymaeus alternans (Mollusca)
D. cuernnabensis (Mollusca)
D. heyneimanni (Mollusca)
D. multilineatus (Mollusca)
D. rudis (Mollusca)
Eucalymnatus tessellatus (Homoptera)
Eurytoma orchidearum (Hymenoptera)
Eustrophinus marginatus (Coleoptera)
Exopochioma albomaculata (Hemiptera)
E. confusa (Hemiptera)
Frankliniella williamsi (Thysanoptera)

Hosts and Insects—Continued

Terastris meticulousalis (Lepidoptera)
Vaginulus occidentalis (Mollusca)
Valtissius diversus (Hemiptera)
Vilga dissimilis (Hemiptera)
V. divarigata (Hemiptera)
Vinsonia stellifera (Homoptera)
Zonitoides arboreus (Mollusca)
Zygospila bigenera (Coleoptera)
- ORINTHOALUM:**
Blissus diploperus (Hemiptera)
Diaphone eumela (Lepidoptera)
Epichorista ionephela (Lepidoptera)
Haplothrips gowdeyi (Thysanoptera)
Oryzaenus hyalinipennis (Hemiptera)
- ORYZA:**
Chilo suppressalis (Lepidoptera)
Frankliniella formosae (Thysanoptera)
Taeniothrips hawaiiensis (Thysanoptera)
Trogoderma granarium (Coleoptera)
- PACHYCEREUS:**
Lepidosaphes philococcus (Homoptera)
- PALM:**
Helix aspersa (Mollusca)
Neocyclus dysoni cooki (Mollusca)
Pheidole megacephala (Hymenoptera)
Rumina decollata (Mollusca)
Zonitoides arboreus (Mollusca)

PANDANUS:

- Ceratitis capitata* (?) (Diptera)
Frankliniella formosae (Thysanoptera)
Suidasia medanensis (Acarina)
- PASPALUM:**
Tetraleurodes graminis (Homoptera)
- PELARGONIUM:**
Helix aspersa (Mollusca)
Pseudoparlatoria ostreata (Homoptera)
Udea ferrugalis (Lepidoptera)
- PEPEROMIA:**
Limax marginatus (Mollusca)
Protopulvinaria longivalvata (Homoptera)
- PERSEA:**
Conotrachelus aguacatae (Coleoptera)
C. perseae (Coleoptera)
Stenomacra catenifer (Lepidoptera)
Trialeurodes similis (Homoptera)
Trioxa amepes (Homoptera)
- PETROSELINUM:**
Peritrechus nubilus (Hemiptera)
Plinthius brevipennis (Hemiptera)
Taeniothrips atratus (Thysanoptera)
Theba pisana (Mollusca)
- PHAIUS:**
Siphanta acuta (Homoptera)
- PHASEOLUS:**
Acanthoscelides armitagei (Coleoptera)
A. griseolus (Coleoptera)
Ancylostomia stercora (Lepidoptera)
Apion griseum (Coleoptera)
Callosobruchus analis (Coleoptera)
Cryptophlebia ombrodella (Lepidoptera)
Epinotia aporema (Lepidoptera)
Everes comyntas (Lepidoptera)
Fundella pellucens (Lepidoptera)
Maruca testalis (Lepidoptera)
Matsumuraeas phascoli (Lepidoptera)
Ostrinia nubilalis (Lepidoptera)
Tetranychus cinnabarinus (Acarina)
Trogoderma granarium (Coleoptera)
- PHILADELPHUS:**
Lecanium corni (Homoptera)
- PHILODENDRON:**
Chrysomphalus tenax (Homoptera)
C. umboniferus (Homoptera)
Coryda nemoraloides (Mollusca)
Exptochimera formosa (Hemiptera)
Vaginulus occidentalis (Mollusca)
- PHRAGMITES:**
Nipponaclera biwakoensis (Homoptera)
Scleroconia acutellus (Lepidoptera)

LIST OF INTERCEPTED PLANT PESTS, 1963

(Pests Recorded From July 1, 1962, Through June 30, 1963)

Compiled by
Bessie C. Mumford
Plant Quarantine Aid

INTRODUCTION

This report covers the 50th year of plant quarantine work in the United States. It summarizes records of plant pests found in, on, or with plants, plant products, baggage, cargo, mail, and means of conveyance (1) imported into or entering the United States or the offshore possessions, (2) offered for entry but refused, (3) in quarters or stores of planes and ships, (4) offered for entry for immediate transportation and exportation in bond, (5) in domestic shipments to the mainland from the States of Alaska and Hawaii, the American Virgin Islands, the Commonwealth of Puerto Rico, Guam, and other possessions, or (6) in preclearance inspection in the Bahamas and Bermuda.

The pests listed include insects, mites, snails, bacteria, fungi, nematodes, and viruses of known or potential plant quarantine significance to the United States or of scientific interest. Some common organisms are included if they are new to the country of origin or the host plant.

This list reports identifications received during the fiscal year 1963 and includes many interceptions made during previous years, since determinations are sometimes delayed because of heavy work loads or lack of specialists for certain types of organisms. Most identifications are made by specialists of the Entomology Research Division, the Plant Quarantine Division (both of the U.S. Department of Agriculture), and the Department of Entomology, U.S. National Museum (of the Smithsonian Institution). However, many pests intercepted in California are identified by collaborating State officials. Snail identifications are made largely by taxonomists in the Division of Mollusks of the U.S. National Museum. Some disease determinations and critical studies are made by specialists of the Crops Research Division, U.S. Department of Agriculture. Many host plants are identified by workers in the Department of Botany, Smithsonian Institution.

Scientific names of insects and diseases are reviewed by specialists of the Plant Quarantine Division, who also assist in compiling the list. Nematode names are checked in Nematology Investigations and host names are reviewed in the New Crops Research Branch. Every effort is made to conform to the International Rules of Nomenclature. Family names are shown with the insects in the tabulation and orders are given in the host list. Classes of diseases are shown in the disease host list.

It is often difficult to trace the true origin of stores in planes and ships. Questionable cases are omitted, listed with a question mark, or shown as unknown.

NOTES ON PESTS INTERCEPTED

The total number of interceptions submitted during the fiscal year 1963 was 31,439, as compared with 33,033 the previous year. This does not include certain common pests which are widespread in this country and are no longer recorded. Of the total identified during the year, 12,482 were considered important enough to be reported in this list. That figure includes the incompletely determined pests which were significant. Last year the total in the list was 10,921.

Airborne Material

Interceptions of pests arriving by air totaled 12,700, of which 10,983 were insects, mites, or snails and 1,717 were diseases or nematodes. There were 419 interceptions of significant insects found as stowaways on airplanes. Among the important pests arriving by air were 179 interceptions of the European cherry fruit fly, 207 of the Mediterranean fruit fly, 52 of the Mexican fruit fly, 41 of the olive fruit fly, 36 of the oriental fruit fly, 34 of the pink bollworm, 206 of the West Indian fruit fly, 290 of the yanone scale, 371 of the black spot of citrus, 204 of citrus canker, 130 of the sweet orange scab, and 16 of the golden nematode.

FRUIT FLIES

There were 1433 fruit fly interceptions identified to species. This large number includes many intercepted in previous years which were identified and recorded this year. The species were as follows:

Anastrepha fraterculus(?) (once) in coffee berry in airmail from Brazil.

Anastrepha ludens, the Mexican fruit fly, was intercepted 401 times from Mexico and once from Panama. The hosts were apple, grapefruit, lime, mamey, Mandarin orange, mango, peach, pear, pomegranate, quince, sapote, and sweet orange. *A. ludens*(?) (3 times) in sapote in air stores and mango in baggage from Mexico.

Anastrepha mombinpraeoptans, the West Indian fruit fly (375 times), an adult at large in airplane and larvae in guava, mango, purple mombin, tropical almond, unidentified fruit, and yellow mombin from Brazil, Costa Rica, Cuba, Dominica, Dominican Republic, Ecuador, El Salvador, Guatemala, Haiti, Jamaica, Mexico, Nicaragua, Panama, Puerto Rico, St. Kitts, St. Martin, Tortola, and an unknown origin.

Anastrepha ocrea (once) in sapodilla in air baggage from the Dominican Republic. This is the first authentic collection from sapodilla in the U.S. National Museum.

Anastrepha striata (twice) in guava in air baggage from El Salvador and Nicaragua.

Anastrepha suspensa (3 times) in guava in air baggage and baggage from the Dominican Republic and Puerto Rico.

Ceratitis capitata, the Mediterranean fruit fly (293 times), in apple, apricot, Arabian coffee berry, baggage (with sphagnum moss packing), bell pepper, cactus

fruit, calamondin orange, chili pepper, *Citrus sinensis* var. *shamuti*, in pulp covering common pistache nut, date, *Eugenia* sp. fruit, fig, grapefruit, guava, Indiapoon beauty-leaf fruit, jujube, kaki persimmon, Malay-apple, Mandarin orange, mango, nectarine, papaya, peach, pear, plum, pomegranate, pricklypear, quince, sweet orange, tropical almond, and unidentified fruit. Countries of origin were Africa (country(?)), Argentina, Azores, Brazil, Costa Rica, Cyprus, Europe (country(?)), Federation of Rhodesia and Nyasaland, France, Greece, Hawaii, Israel, Italy, Jordan, Lebanon, Liberia, Malta, Morocco, Peru, Portugal, Republic of South Africa, Senegal, Spain, United Arab Republic, an unknown origin, and Uruguay. *C. capitata*(?) (15 times) in apricot, Arabian coffee berry, English walnut, mango, peach, pepper, sweet orange, and tomato from Argentina, Australia(?), Bermuda(?), Brazil, Canary Islands, Costa Rica, Greece, Hawaii, Israel, Italy, Liberia, and the United Arab Republic.

Ceratitis colae(?) (once) in Sudan colanut in air baggage from Nigeria.

Ceratitis rubivora (once) in *Rubus* sp. seed in mail from Ethiopia.

Dacus cucurbitae, the melon fly (5 times), in balsampear in air baggage from the Philippines, bell pepper in stores from Hawaii, chili pepper in air baggage from Thailand, and cucumber in stores from Hawaii and the Ivory Coast. *D. cucurbitae*(?) (4 times) in cucumber in stores from Hawaii.

Dacus dorsalis, the oriental fruit fly (43 times), an adult in a flight bag and larvae in avocado, carambola, *Eugenia* sp. fruit, guava, Indiapoon beautyleaf fruit, Malay-apple, mango, papaya, pepper, rose-apple, and tropical almond from Hawaii and the Philippines. *D. dorsalis*(?) (10 times) in avocado, candlenut-tree fruit, guava, and mango from Hawaii and India.

Dacus oleae, the olive fruit fly (80 times), an adult in baggage (with lemon) and larvae in common olive, *Olea* sp., and warty olive. Countries of origin were Ethiopia, Europe (country(?)), France, Greece, Israel, Italy, Lebanon, Republic of South Africa, and Spain. *D. oleae*(?) (once) in common olive in air baggage from Italy.

Euleia heraclei (once) in celery in stores from France. *E. heraclei*(?) (3 times) in celery in stores from England and Italy and in parsley in stores from Belgium.

Rhagoletis alternata(?) (once) in rose hip in baggage from Czechoslovakia.

Rhagoletis cerasi, the European cherry fruit fly (186 times), in Mazzard cherry, sour cherry, and cherry from the Azores, Europe (country(?)), France, Germany, Israel, Italy, Poland, Portugal, Spain, and an unknown origin. *R. cerasi*(?) (once) in cherry in stores from Turkey.

Tephritis conura (once) in thistle flower head in air baggage from Sweden.

INSECTS OTHER THAN FRUIT FLIES

Of the serious insect pests intercepted the following are of unusual interest:

Acrolepia assectella (Yponomeutidae) (20 times) in leek in air baggage from France and stores from France, Germany, Italy, and the Netherlands; in onion in air baggage from France; and in stores (with cauliflower) from France.

Adoretus sinicus (Scarabaeidae) as stowaway on airplane, in baggage, on cut flowers in air baggage and aircargo, and on orchid in air baggage from Hawaii; and in mail sack from Guam.

Adoxophyes reticulana (Tortricidae) (8 times) on cut lilac in aircargo from Belgium, Germany, and the Netherlands.

Aleurocanthus woglumi (Aleyrodidae), the citrus blackfly (36 times), on *Citrus* sp. leaf, sour lime leaf, sour orange leaf, sweet orange leaf, and rose leaf from Costa Rica, Ecuador, Jamaica, Mexico, and Nicaragua. *A. woglumi*(?) (4 times) on *Citrus* sp. leaf, coffee leaf, and sour lime leaf from Jamaica and Mexico.

Anthonomus rectirostris (Curculionidae) in black cherry seed in mail from Belgium.

Argyroploce lacunana (Olethreutidae) on birch plant in air baggage from Norway.

Austrotortrix postvittana (Tortricidae) or near, in apple and plum in cargo from New Zealand.

Blastodacna atra (Cosmopterigidae) in apple in air baggage from Germany and Poland.

Brachycerus albidentatus (Curculionidae) in garlic in baggage from Italy.

Brachycerus algirus (Curculionidae) in garlic in air baggage and baggage from Italy and cargo from Italy and Spain.

Brevipalpus chilensis (Tenuipalpidae) on lemon in air stores from an unknown origin.

Bruchus dentipes (Bruchidae) in broadbean in air baggage from Iran and Italy, baggage from Greece and Italy, and mail from Italy.

Bryobia ehari (Tetranychidae) on chrysanthemum cut flower in air baggage from Japan.

Cacoecimorpha pronubana (Tortricidae) on cut carnation in air baggage from Spain and rose plant in air baggage from Italy.

Carposina niponensis (Carposinidae) (10 times) in apple in air stores and stores from Japan.

Ceroplastes rubens (Coccidae) on anthurium leaf in airmail from Hawaii, English ivy leaf in air quarters from an unknown origin, iron tree leaf in air baggage from Hawaii, and leaf of an unidentified plant in air baggage from Australia.

Chilo suppressalis (Crambidae), the Asiatic rice borer (11 times), in rice husks in stores from the Philippines; rice straw in air baggage, aircargo, cargo, mail, and stores from Japan; and rice straw jacket for liquor in air baggage from Spain.

Clysiana ambiguella (Phalonidae) in grape in air baggage from Hungary and air quarters from an unknown origin.

Conotrachelus aguacatae (Curculionidae) in avocado seed in aircargo and in avocado and Mexican avocado fruit in baggage from Mexico.

Coptotermes formosanus (Rhinotermitidae) in mail package of dried shells from Hawaii.

Cryptoblabes gnidiella (Phycitidae) (25 times) in mango, pomegranate, quince, and sweet orange from Cape Verde Islands, Greece, Italy, Portugal, Spain, an unknown origin, Venezuela, and Yugoslavia.

Curculio elephas (Curculionidae) (109 times) in European chestnut and unidentified species of chestnut from France, Greece, Italy, Portugal, Spain, Switzerland, and Yugoslavia.

Cylas formicarius formicarius (Curculionidae) in sweetpotato in air baggage and mail from the Philippines and stores from Hong Kong and Japan.

Cylas puncticollis (Curculionidae) (11 times) in sweetpotato in aircargo (as monkey food) from Kenya, cargo from Nigeria and Sierra Leone, quarters from Liberia, and stores from Sierra Leone.

Dialeurodes kirkaldyi (Aleyrodidae) on Arabian jasmine leaf in aircargo from the Philippines and mail from Hawaii, gardenia leaf in air baggage from Hawaii and Tahiti, and unidentified plant in air baggage from China.

Diaprepes abbreviatus (Curculionidae) as stowaway on airplane from Puerto Rico and on cut flowers and Sierra bladder-nut in aircargo from Haiti. *D. abbreviatus* var. on cut flowers in aircargo from Haiti.

Dichocrocis punctiferalis (Pyraustidae) on 5-needle dwarf pine tree in baggage and cargo from Japan.

Dyspessa ulula (Cossidae) in garlic in baggage from Italy and cargo from Spain and an unknown origin.

Epinotia aporema (Olethreutidae) in stores (with cabbage) from Peru and in string bean in air baggage from Colombia and stores from Chile and Venezuela.

Euproctis similis (Lymantriidae) on hawthorn plant in cargo from Japan.

Euscepes postfasciatus (Curculionidae) in mail (with ti cutting) from Hawaii; and in sweetpotato in air baggage from Jamaica, baggage from Puerto Rico, cargo from Tortola, and stores from Brazil, British Guiana, Panama, and Trinidad.

Evergestis forficalis (Pyraustidae) in cabbage in stores from Belgium, France, and the Netherlands; and in cauliflower in stores from France.

Gnorimoschema ocellatella (Gelechiidae) in beet in stores from Italy and the United Arab Republic; and in stores (with string bean) from Italy.

Gryllotalpa africana (Gryllotalpidae) with cargo (aircraft parts) by air from Japan.

Gryllus bimaculatus (Gryllidae) (8 times) as stowaway in airplane and in air baggage from Morocco.

Haplothrips tritici (Phlaeothripidae) in wheat stalk in air baggage from the Union of Soviet Socialist Republics.

Heterobostrychus brunneus (Bostrichidae) in packing boards on cargo from the Republic of the Congo and West Africa.

Lampides boeticus (Lycaenidae) in mauna loa lei in air baggage, baggage, and mail from Hawaii, pea pod in stores from Japan, sesbania seed in air baggage from Hawaii, and string bean in air baggage from Italy.

Laspeyresia splendana (Olethreutidae) (93 times) in acorn in mail from Switzerland; in air baggage (with apple) from Portugal; in cork oak seed in cargo from Italy; and in European chestnut in air baggage from the Azores, France, Greece, Italy, and Portugal, baggage from Austria, France, Italy, Portugal, Spain, and an unknown origin, and cargo and mail from Italy.

Lema bilineata (Chrysomelidae) in excelsior packing with melon in cargo from Chile.

Leucinodes orbonalis (Pyraustidae) in eggplant in air baggage from Ghana and stores from the Federation of Malaysia(?) and Senegal.

Lobesia botrana (Olethreutidae) in grape in air baggage from Italy.

Mamestra brassicae (Noctuidae) (24 times) on cabbage in stores from Belgium, France, Italy, and the Netherlands; cauliflower in stores from Denmark, France, Italy, and the Netherlands; kale in air baggage from Denmark; lettuce in stores from France and Spain; in quarters (with gladiolus cut flowers) by air from Italy; and on Swiss chard in stores from Italy.

Maruca testulalis (Pyraustidae), a bean pod borer (22 times), in air baggage (with coriander seed) from the Dominican Republic; in lima bean in cargo from Puerto Rico; mauna loa lei in air baggage and baggage from Hawaii; pigeonpea in air baggage from the Dominican Republic, Panama, and Puerto Rico and cargo from Puerto Rico; sesbania seed in air baggage from Hawaii; and string bean in air baggage and cargo from Puerto Rico and stores from Japan, Puerto Rico, Senegal, and Surinam.

Matsumuraes phaseoli (Olethreutidae) in string bean in stores from Japan.

Melolontha melolontha (Scarabaeidae) in quarters of airplane from Switzerland.

Monosteira unicostata (Tingidae) in almond in air baggage from Greece.

Naupactus xanthographus (Curculionidae) in honeydew melon and melon in cargo from Chile.

Nephotettix apicalis (Cicadellidae) with aircargo of silk stoles from India and with dry stores from an unknown origin.

Ostrinia nubilalis (Pyraustidae) in apple in baggage from Italy; bell pepper in air baggage from Italy, air stores from Japan, and stores from Italy and Sweden; burdock stem in stores from Japan; with corn seed in aircargo from Italy and in fresh corn ear in stores from Thailand; in peach in air stores from an unknown origin; and in rice in aircargo from Japan.

Oryctes hyalinipennis (Lygaeidae) in cottonseed in cargo from Pakistan and pomegranate in air baggage from Israel and baggage from Greece.

Pectinophora gossypiella (Gelechiidae), the pink bollworm (56 times), in cotton boll, cotton lint, cottonseed, Hawaiian seed cotton, okra, and seed cotton from Barbados, Brazil, Dominican Republic, Grenada, Haiti, Hawaii, Jamaica, Liberia, Mexico, Pakistan, an unknown origin, and Venezuela.

Phalonia zephyrana (Phaloniidae) in carrot in stores from Italy.

Phlyctinus callosus (Curculionidae) (13 times) in grape in cargo and quarters from the Republic of South Africa.

Pieris brassicae (Pieridae) in cabbage in stores from France and Italy and with military cargo from the Azores and Morocco.

Prays oleellus (Yponomeutidae) in olive in air baggage from Italy and baggage from Greece.

Premnotrypes latithorax (Curculionidae) in potato tuber in air baggage from Bolivia.

Prodenia litura (Noctuidae) in airplane from an unknown origin; in beet and pepper in stores from Israel; and with aircargo from the Philippines.

Sesamia cretica (Noctuidae), the durra stem borer (8 times), in broomcorn in baggage from Italy, cargo from Greece, Italy, and Spain; corn ear in air baggage from Italy and an unknown origin; and corn husk packing in mail from Italy.

Sesamia nonagriodes (Noctuidae) with chestnut in air baggage from Portugal and baggage from Spain.

Spanioneura fonscolombeii (Psyllidae) on carnation and chrysanthemum cut flowers in air quarters from England.

Stephanoderes hampei (Scolytidae) in Arabian coffee berry in air baggage from Brazil; and coffee berry in air baggage from Formosa, cargo from the Republic of South Africa and an unknown origin, and mail from an unknown origin.

Sternonchetus mangiferae (Curculionidae) in mango in air baggage from Hawaii and India and mail and stores from Hawaii.

Taeniothrips eucharis (Thripidae) on *Lycoris* spp. and narcissus bulbs in cargo from Japan.

Tetranychus viennensis (Tetranychidae) on apple in air baggage from Hungary and Japan.

Thrips imaginis (Thripidae) on hyacinth cut flower in air quarters and rose cut flower in baggage from Australia.

Tortrix excessana (Tortricidae) in apple in cargo from New Zealand.

Trogoderma granarium (Dermestidae), the khapra beetle (225 times), with bagging and ballast, in broadbean, with cargo and in cargo hold, in celery seed,

chickpea, cinnamon, coriander seed, cumin seed, with debris, in divi-divi pod, fennel seed, grain, gum arabic, gum tragacanth, gum zedou, guar gum, karaya gum, mung bean, myrobalan, nutmeg, pea, pigeonpea, pistache nut, psyllium seed, *Pyrus* sp. seed, quarters, rice, soybean, stores, string bean, talha gum, and tamarind seed powder. Countries of origin of the infested materials were Ceylon, England, Federation of Malaysia, Formosa, France, Germany, Hong Kong, India, Iran, Japan, Kenya(?), Korea, Kuwait, Lebanon, Netherlands, Pakistan, Seychelles, Sudan, Thailand, and an unknown origin.

Unaspis yanonensis (Coccidae), the yanone scale (427 times), on *Citrus* sp., grapefruit, lemon, lime, Mandarin orange, Marumi kumquat, sour orange, sweet orange, tangelo, and yuzu from Australia, China, Fiji, Hong Kong, Italy, Japan, Philippines, and an unknown origin.

SNAILS

The following snails are of particular interest:

Achatina fulica, the giant African snail, on packing crate of military cargo by air from Formosa.

Arianta arbustorum with air baggage from Germany, on cauliflower and lettuce in stores from the Netherlands, and on violet plant in air baggage from Germany.

Bradybaena similaris (10 times) on anthurium in air baggage and mail from Hawaii, on dasheen plant in air baggage, ti in aircargo, and cut flowers in mail from Hawaii; military cargo from Bermuda; and orchid flowers in aircargo, cargo, and mail from Hawaii.

Cochlicella barbara (31 times) on automobile in cargo from Libya and Morocco, four-o'clock seed in cargo from France, garlic in stores from Morocco, and military cargo from Crete, France, Greece, Morocco, and Spain.

Cochlicella ventrosa (18 times) on automobile in cargo from Libya, cabbage and leek in stores from Portugal, lettuce in stores from Italy, and military cargo from the Azores and Spain by air and by surface cargo from the Azores, Morocco, Spain, and an unknown origin.

Fifteen species of *Helicella* were intercepted a total of 92 times from Crete, Denmark, England, France, Germany, Greece, Italy, Libya, Morocco, Netherlands, Spain, Turkey, and an unknown origin. The hosts were airplane, automobile, cabbage, cauliflower, chicory, cork oak, four-o'clock seed, leek, military cargo, residue in hold, soil with begonia plant, stores, and tassel grapehyacinth.

Helicina neritella on orchid plant in air baggage from Jamaica.

Helix figulina on military cargo by air from Turkey. *H. pomatia* with air baggage from Germany.

Monacha cantiana and *M. carthusiana* on military cargo from France. *M. olivieri* on military cargo from Greece and Turkey, and in soil with plant in baggage from Greece.

Retinella hammonis in soil in air baggage from Ireland, soil with birch shoot in air baggage from Italy, and soil with potted plant in air baggage from Germany.

Rumina decollata on military cargo from Morocco.

Subulina octona on four-o'clock seed in cargo from the Netherlands and orchid plant in aircargo from Peru.

Theba pisana, the Mediterranean land snail (59 times) on airplane, automobile, cork oak, crate, cut flowers, dried plant material, four-o'clock seed, leek, lettuce, Madonna lily, protea flowers, stores, and sweet orange from the Azores, Crete, France, Italy, Libya, Morocco, Netherlands, Portugal, Republic of South Africa, Spain, and an unknown origin.

Other snails of importance were *Ceciloides acicula*, *Helix aspersa*, *Lamellaxis micra*, *Limax marginatus*, *Milax gagates*, *Otala lactea*, *O. vermiculata*, *Oxychilus alliarius*, *Opeas pumilum*, *O. pyrgula*, and *Trichia hispida*.

DISEASES

Elsinoe australis, the sweet orange scab, was intercepted 209 times; 92 from Brazil, 78 from Argentina, 16 from South America (country(?)), 14 from an unknown origin, 7 from Uruguay, and 2 from Paraguay. Hosts were grapefruit, lemon, Mandarin orange, sour lime, and sweet orange.

Guignardia citricarpa (Phoma stage), the black spot of citrus, was intercepted 556 times, 259 from the Republic of South Africa, 104 from Hong Kong, 85 from Japan, 36 from Australia, 35 from an unknown origin, 15 from China, 9 from Formosa, 3 from Brazil, 2 each from Pakistan, Philippines, and Vietnam, and 1 each from India(?), Okinawa, Tahiti(?), and Thailand. Hosts were *Citrus* sp.,

grapefruit, lemon, lime, Mandarin orange, pummelo, sour orange, and sweet orange. *Xanthomonas citri*, citrus canker, was intercepted 377 times; 161 from India, 151 from Japan, 22 from Hong Kong, 13 from China, 11 from an unknown origin, 6 from Formosa, 3 each from Afghanistan, Federation of Malaysia, and Thailand, 2 from Pakistan, and 1 each from the Philippines and Vietnam. Hosts were *Citrus* sp., grapefruit, lemon, lime, Mandarin orange, pummelo, sour orange, sweet orange, and tangelo.

Xanthomonas sp. (Cancrosis B) was intercepted 19 times; 14 from Argentina, 3 from an unknown origin, and 2 from South America (country(?)). Hosts were lemon and sweet orange.

Other diseases of special interest were:

Puccinia buxi on boxwood leaf in air baggage, air quarters, and air stores from England, Europe (country(?)), France, Ireland, Switzerland, and an unknown origin.

Puccinia dochmia(?) on muhly grass packing in baggage from Mexico.

Puccinia erythrops on Chinese silvergrass in stores from Japan.

Puccinia iridis on iris leaf in mail from Austria.

Puccinia longicornis on bamboo leaf in stores from Japan.

Puccinia oncidii on *Oncidium* sp. leaf in aircargo from Ecuador.

Puccinia thaliae on canna leaf in air baggage from Honduras.

Puccinia urbaniana on *Jamacia falsevalerian* leaf in air baggage from the Dominican Republic.

Rhytisma decolorans on lyonia leaf in airmail from Nepal.

Rose mosaic—yellow type on cut roses in air baggage from Haiti.

Sphaceloma poinsettiae on common poinsettia in air baggage from Guatemala.

Sphaceloma spondiadis on "jobo" in air baggage from Barbados, purple mombin in air baggage from the Dominican Republic and El Salvador, *Spondias* sp. in air baggage from Trinidad, and vi-apple in air baggage from Guatemala.

Thecaphora solani on Irish potato in air baggage from Colombia.

Uromycladium tepperianum on graceful-wattle acacia seed in airmail from Australia.

NEMATODES

Nematodes of special interest were:

Aphelenchoides blastophthorus in lily-of-the-valley pips in cargo from Denmark.

Aphelenchoides parietinus in soil on raintree saman log in cargo from Fiji.

Criconema celestem in soil with camellia plant in baggage from Portugal.

Criconema fimbriatum (first interception) in soil with begonia plant in baggage from Mexico.

Criconemoides curvatum in soil with begonia plant in baggage from Argentina, soil with camellia in baggage from Portugal, and soil with mint in baggage from Mexico.

Criconemoides informe in soil with beech and spruce plants in air baggage from Germany.

Criconemoides mutabile in soil with amaryllis bulb, dahlia root, mango seedling, and unidentified plant in baggage from Mexico.

Ditylenchus dipsaci in narcissus bulb in mail from England.

Helicotylenchus nannus (17 times) in crown-of-thorns euphorbia, in soil with begonia, caladium, coleus, dracaena, mango, mint, palm, onion, and unidentified plants. Countries of origin were Argentina, Brazil, Hawaii, Japan, Mexico, and the Philippines.

Hemicriconemoides mangiferae (first interception) in soil with coleus plant in baggage from Mexico.

Heterodera avenae in soil with automobile in cargo from France and soil with dahlia root in air baggage from Germany.

Heterodera rostochiensis, the golden nematode (32 times), in soil with automobile in cargo from England and Germany and soil with the following plant material: Amaryllis bulb in air baggage from an unknown origin, cactus plant in air baggage from England, calla lily plant in air baggage from Germany, carrot in stores from the Netherlands, celery in stores from Norway, dahlia root in air baggage from Ireland, English ivy plant in baggage from Germany, garden sage plant in air baggage from England, garlic in cargo from Peru, grass plant in air baggage from England, heather plant in air baggage from Scotland, potato in stores from Argentina, Canary Islands, and England, primrose plant in baggage and mail from England, *Prunus* sp. cutting in air baggage from Sweden, *Rubus* sp. plant in mail from England, shamrock leaf in mail from Ireland and shamrock

plant in airmail from Northern Ireland, *Solanum* spp. tubers in airmail from South America (country(?)), stonecrop plant in air baggage from England, strawberry plant in air baggage from Germany, and unidentified plant in air baggage from England.

The rootknot nematodes were intercepted a total of 39 times in roots of various bulbs, plants, and vegetables as follows: *Meloidogyne arenaria* (6 times), for the first time from Nicaragua; *M. hapla* (11 times), for the first time from Ireland, Lebanon, and Portugal; *M. incognita* (4 times), *M. incognita acrita* (11 times), for the first time from Senegal; *M. incognita incognita* (once); and *M. javanica* (6 times), for the first time from Nicaragua.

Pratylenchus convallariae in lily-of-the-valley pip in cargo from Denmark.

Pratylenchus penetrans in dahlia root in mail from the Republic of South Africa and in soil with camellia plant in baggage from Portugal.

Radopholus similis in anthurium root in baggage and ginger rhizome in cargo from Hawaii.

Rotylenchus goodeyi in horseradish root in quarters from England.

Rotylenchus robustus in horseradish root in quarters and in soil with Euphorbiaceae in air baggage from England.

Rotylenchus uniformis in soil with camellia in baggage from Portugal and in soil with "shamrock" in mail from Ireland.

Scutellonema brachyurum in liliaceous plant in baggage from Australia, in soil with bulb in baggage and gardenia plant in cargo from Mexico, in soil with liliaceous plant in air baggage from Japan, and in soil with unidentified plant in air baggage from Hawaii and baggage from Mexico.

Tylenchorhynchus capitatus in soil with camellia plant in baggage from Portugal and in soil with chalice vine and unidentified tree in baggage from Mexico.

Tylenchorhynchus crassicaudatus (first interception) in soil with arum plant in air baggage from the Philippines and soil with privet plant in air baggage from Japan.

INCOMPLETELY DETERMINED PESTS

It is not always possible to complete a determination as to species, due to the stage or condition of the insect or pathogen when intercepted or the fact that it may be undescribed. Many of these pests are of potential economic importance, unreported from the country of origin or the United States, or new to the host plant. Some of the more significant ones are included in this writeup, but not in the tabulation except in the summary. This year there were 4,558 insects and mites and 761 diseases and nematodes, or a total of 5,319 incompletely determined interceptions considered important enough to record. Snails not identified to species are not recorded.

INCOMPLETELY DETERMINED FRUIT FLIES

A total of 571 fruit flies not identified to species were as follows:

Anastrepha sp., possibly *distincta* Greene (once), in *Inga* sp. pod in baggage from Mexico.

Anastrepha sp., possibly *fraterculus* (3 times) in Arabian coffee berry in air baggage from Brazil and quince in stores from Peru.

Anastrepha sp., probably *ludens* (24 times), in mango, peach pear, quince, sapote fruit and seed, sweet lime, and sweet orange in baggage from Mexico; and in sweet orange in air baggage from Guatemala and air stores from Mexico.

Anastrepha sp., probably *mombinpraeoptans* (47 times) in mango in air baggage from British Honduras, Costa Rica, Dominican Republic, Ecuador, El Salvador, Haiti, Honduras, Jamaica, Nicaragua, Panama, and Puerto Rico, aircargo from Guatemala, air quarters from Mexico, baggage from British Honduras, Honduras, Mexico, and Trinidad, cargo from the Dominican Republic, quarters from Jamaica, Panama, and an unknown origin, and stores from El Salvador and Haiti; in guava in air baggage from Colombia; in vi-apple in air baggage from Puerto Rico; and in yellow mombin in air baggage from the Dominican Republic and Guatemala and baggage from Puerto Rico.

Anastrepha sp., possibly *ocresia* (once) in sapodilla in air baggage from the Dominican Republic.

Anastrepha sp., possibly *serpentina* (Wied.) (5 times), in mamey in air baggage from Peru; sapodilla in air baggage from Colombia, Mexico, and Nicaragua, and star-apple in air baggage from Panama.

Anastrepha sp., probably *striata* (20 times), in guava in air baggage from Colombia, Costa Rica, Ecuador, Nicaragua, and Panama, baggage from El Salvador and Mexico, and quarters from Mexico.

Anastrepha sp., probably *suspensa* (65 times), in guava in air baggage from the Dominican Republic, Jamaica, and Puerto Rico, and airmail, baggage, and mail from Puerto Rico; in sapodilla in air baggage from the Dominican Republic and Jamaica; and in tropical almond in air baggage from the Dominican Republic, Jamaica, and Puerto Rico.

Anastrepha sp. (303 times) in acerola, apple, Arabian coffee berry, avocado, Barbados-cherry malpighia, broadbean (new host), cherimoya, chupa-chupa, cucurbit, custard-apple, fig, giant granadilla, grapefruit, guava, hawthorn fruit, *Inga* sp. (?) seed pod, lime, loquat, Malay-apple, Mandarin orange, mango, peach, peach palm fruit, pear, plum, pomegranate, ponderosa lemon, quince, red mombin, rose-apple, sapodilla, sapote, soursop, star-apple, sweet orange, tropical almond, vi-apple, white sapote, and yellow mombin. Countries of origin were Argentina (?), Bahamas, Bolivia, Brazil, British Guiana, British Honduras, Chile, Colombia, Costa Rica, Curacao, Dominica, Dominican Republic, Ecuador, El Salvador, Guadeloupe, Guatemala, Haiti, Honduras, Jamaica, Mexico, Nicaragua, Panama, Peru, Puerto Rico, Trinidad, an unknown origin, and Venezuela. *Anastrepha* sp. (?) (7 times) in coffee berry in air baggage from Colombia, *Inga* sp. pod in air baggage from Ecuador, mango in aircargo from Jamaica, baggage from Mexico, and quarters from Venezuela, and in peach and sweet orange in baggage from Mexico.

Ceratitis sp., probably *capitata* (once), in sweet orange in baggage from Italy.

Dacus sp., probably *dorsalis* (once), in mango in air baggage from Hawaii.

Dacus sp. (10 times) in cucumber in stores from Ghana and West Africa, *Cucumis* *heptadactylus* seed in mail from the Republic of South Africa, Cucurbitaceae in air baggage from India, grapefruit in air baggage from Pakistan, mango in air baggage from India and the Philippines, pepper in stores from Angola, and squash in stores from Senegal. *Dacus* sp. (?) (3 times) in cucumber in stores from Liberia, mango in air baggage from the Philippines, and towel-gourd in baggage from Vietnam.

Rhagoletis sp., probably *alternata* (once), in rose hip in baggage from Germany.

Rhagoletis sp., probably *cerasi* (6 times), in cherry in air baggage from Austria, Hungary, and an unknown origin, aircargo from Switzerland, and air stores from France and an unknown origin.

Rhagoletis sp. (37 times) in apple in air baggage and baggage from Mexico, cherry in air baggage from Sweden and air quarters from an unknown origin, and crabapple, hawthorn fruit, and *Lycium* *berlandieri* in baggage from Mexico. *Rhagoletis* sp. (?) (9 times) in apple in baggage from Italy and Mexico and stores from Peru, baggage (with beans) from Italy, *Lycium* *berlandieri* in baggage from Mexico, peach in air baggage from Mexico, and quince in baggage from Mexico.

Tephritidae (23 times) larva and pupa in apple in air stores from Canada and Germany and baggage from Mexico, pupa in celery in stores from France, pupa in chili pepper in air baggage from Thailand, adult with *Chrysanthemoides* sp. seed in aircargo from the Republic of South Africa, pupa with chrysanthemum flower in air baggage from Japan, larva with frangipani flower in mail from Hawaii, larva in grapefruit in stores from Israel(?), pupa with guar gum in cargo from India, larva with heather in air baggage from Scotland, pupa with karaya gum in cargo from India, larva in peach in air stores from Peru, larva in pepper in baggage from Mexico, larva in pomegranate in air baggage from Argentina, larva and pupa in preserved fruit in stores from Algeria(?), larva in star-apple in air baggage from the Philippines, eggs in sweet orange in stores from Venezuela and larva in stores from Costa Rica, pupa in tomato in stores from an unknown origin, larva in tropical almond in air baggage from Hawaii, and larva and pupa in unidentified seed in air baggage from Italy. Tephritidae (?) (4 times) larva in apple in stores from Peru, pupa with banana in cargo from Ecuador, larva in chili pepper in baggage from Mexico, and larva in genip fruit in air baggage from Venezuela.

INCOMPLETELY DETERMINED INSECTS

Of special interest among the incompletely determined insects, other than fruit flies, were the following:

Acheta sp., near *hispanicus* (Gryllidae), evidently a native Moroccan cricket not known to occur in the United States, in the baggage compartment of an airplane from Morocco.

Aleyrodidae, new genus near *Aleurodicus*, n. sp., on *Encyclia* sp. plant in aircargo from Honduras; *Laelia anceps* plant in cargo from Mexico; *Odontoglossum* sp. leaf in aircargo from Guatemala; *Oncidium cebolleta* leaf in cargo from Mexico;

Oncidium sp. leaf in aircargo from Guatemala; and orchid leaf in air baggage from Guatemala, aircargo from El Salvador and Guatemala, and cargo from Mexico. Aleyrodidae, genus and species not recognized, very interesting, on grape leaf in air stores from France.

Anthonomus sp., probably *rectirostris* (Curculionidae), in wild Mazzard cherry seed in cargo from Austria.

Aphidae, genus near *Jacksonia* and *Carolinaia*, species not recognized, on cedar seedling in air baggage from Lebanon.

Apion sp., probably *carduorum* Kirby (Curculionidae), in cardoon in mail from Italy and artichoke in aircargo from France.

Arhopalus sp., possibly *ferus* (Muls.) (Cerambycidae), in coniferous packing board on marble in cargo from Italy.

Baris sp., probably *lepidii* Germ. (Curculionidae), in horseradish roots in air baggage from Yugoslavia.

Bemisia sp., apparently undescribed, near *shinanoensis* (Kuw.) (Aleyrodidae), on carnation and chrysanthemum cut flowers in air baggage and spirea leaf in air quarters from Japan.

Brachyrhinus sp. (Curculionidae) on amaryllis bulb in air baggage from Greece, astilbe roots in cargo from the Netherlands, boxwood leaf in air quarters from an unknown origin, packing material in cargo from the Netherlands, pomegranate in air baggage from Israel, rose in air baggage from Finland, rose and lilac in aircargo and cargo from Germany, and in soil with cactus and stonecrop plants in air baggage from Belgium.

Bruchidius sp., near *dispar* Gyll. (Bruchidae), in *Crotalaria* sp. seed pod in aircargo from the Republic of the Congo.

Bruchidius sp., near *orchesioides* Heyd. (Bruchidae), in guar seed in airmail and mail from India and in cargo from Pakistan,

Bruchus sp., probably *lentis* (Bruchidae), in lentil in stores from Germany.

Ceutorhynchus sp., possibly *contractus* Marsh. (Curculionidae), in turnip in stores from France.

Cnephasia sp., near or *virgaureana* (Treit.) (Tortricidae), on lettuce in air stores from England(?).

Conarthrus sp., near *cylindricus* (Woll.) (Curculionidae), in bamboo support with orchid in baggage from Brazil.

Cylas sp., possibly *puncticollis* (Curculionidae), in sweetpotato in cargo from Nigeria.

Diaprepes sp., probably *abbreviatus* (Curculionidae), in *Dioscorea* sp. tuber in baggage and cargo from Puerto Rico.

Earias sp. (Noctuidae) in okra pod in air baggage from India.

Epicaerus sp., probably *cognatus* Sharp (Curculionidae), in potato in cargo from Mexico.

Gymnandrosoma sp. (Olethreutidae) with akee and pomegranate fruits in aircargo from Colombia; in jujube in air baggage from Honduras; in lime in baggage from Mexico; and in sweet orange in baggage from Mexico, quarters from Venezuela, and stores from Brazil, Ecuador, and Venezuela.

Harmolita sp. (Eurytomidae) (12 times) in esparto needlegrass brooms in cargo from Italy.

Heilipus sp., possibly *trifasciatus* (F.) (Curculionidae), in persea budwood in aircargo from Costa Rica.

Hylobius sp. (Curculionidae) in linganberry in air baggage from Finland.

Hylurgops sp., probably *palliatius* (Gyll.) (Scolytidae), in pine log in dunnage from Finland.

Hypera sp., evidently *brunneipennis* Boh. (Curculionidae), in garlic in cargo from Mexico, lemongrass in baggage from Mexico, rice straw packing in cargo from the United Arab Republic, soil in baggage from Mexico, and tomato in cargo from Mexico.

Lixus sp. (Curculionidae) in beet in stores from the United Arab Republic, bell pepper in cargo from Mexico, corn stalk in cargo from an unknown origin, and turnip in stores from Italy.

Mamestra sp., probably *brassicae* (Noctuidae), in airplane from Japan.

Phyllotreta sp., probably *consobrina* Curtis (Chrysomelidae), in cabbage in stores from France.

Phyllotreta sp., probably *cruciferae* (Goeze) (Chrysomelidae), in cabbage in stores from Italy.

Prays sp., near or *endocarpa* Meyr. (Yponomeutidae), in sweet orange in aircargo from the Philippines.

Premnotrypes sp., probably *solani* Pierce (Curculionidae), in potato in stores from Peru. *Premnotrypes* sp. (31 times) in potato in air baggage from Bolivia, Colombia, and Peru, baggage from Colombia, and stores from Colombia, Ecuador, and Peru; and an adult on cardboard carton of bell pepper in stores from an unknown origin.

Rhynchaenus sp. (Curculionidae) on rose and lilac in aircargo from the Netherlands.

Rhynchites sp. (Curculionidae) in *Berberis* sp. seed in airmail and mail from Nepal, in glandbearing oak seed in mail from Japan, with lichen in baggage from Mexico, on orchid plant in cargo from Mexico, and in wild Mazzard cherry seed in cargo from Austria.

Rhynchotarsonemus n. sp. (Tarsonemidae) on boxwood leaf in air quarters from England.

Selenaspidus sp., probably new (Coccidae), on *Cycas* sp. seed in mail from Nigeria.

Sesamia sp., possibly *nonagriodes* (Noctuidae), on cabbage in stores from Italy.

Strophosoma sp. (Curculionidae) in packing material in cargo from the Netherlands.

Thripidae, undescribed genus and spp., on anthurium cutting in air baggage from Colombia.

Tipula sp., *oleracea* group (Tipulidae), in soil with pine seedling in air quarters from Germany and on strawberry plant in air baggage from Sweden.

Xyleborus sp., near *eurygraphus* Ratz. (Scolytidae), in melon in cargo from Spain.

INCOMPLETELY DETERMINED DISEASES

Of the 382 incompletely determined diseases, the following are of special interest:

Ascochyta sp. on *Epimedium niveum* leaf in aircargo from England. None reported on this host as far as is known.

Cercospora sp., apparently undescribed, on philodendron cutting in cargo from Mexico. No record on this host. *Cercospora* sp. on anthurium leaf in baggage from Mexico.

Pestalotia sp. on *Arachnanthe flos-aeris* var. *insignis* orchid leaf in aircargo from Thailand. No report on this host as far as known.

Phyllosticta sp. on *Vaccinium leucanthemum* leaf in air quarters from Mexico. Does not agree entirely with any reported *Phyllosticta* on this host genus.

Pleurotes sp. on star cactus in cargo from Mexico.

Uromycladium sp., prob. *alpinum* McAlp., on flaxleaf acacia seed in mail from Australia.

INCOMPLETELY DETERMINED NEMATODES

Of the 379 nematode interceptions not completely identified, the following are significant:

Aphelenchoides sp., probably *parietinus* or *chamelocephalus*, in ginger root in cargo from Japan.

Criconemoides sp., near *informe*, in amaryllis and in soil with fern in baggage from Mexico.

Criconemoides sp., probably new species close to *xenoplax* Raski, 1952, in soil with pyramid Chinese juniper in baggage from Japan.

Criconemoides sp. in soil with various unidentified plants in baggage from Mexico.

Ditylenchus sp., probably *dipsaci*, in onion in air baggage from Mexico.

Ditylenchus sp. in lily-of-the-valley pip in cargo from Denmark.

Helicotylenchus sp., close to *digonicus* Perry in Perry, Darling and Thorne, 1959. in soil with mountain heath in mail from Scotland.

Helicotylenchus sp. (35 times) in *Chamaedorea* sp. plant, common portulaca plant, dahlia root, soil, and soil with the following plants: Agave, begonia, bougainvillea, cactus, coffee, fern, gardenia, ginger, lavender, lily, mint, pepper, philodendron, primrose, spiderwort, unidentified, and verben. Countries of origin were England, Finland, Guatemala, Hawaii, Italy, and Mexico.

Heterodera sp., probably *rostochiensis*, in soil with fuchsia plant in air baggage from Ireland.

Heterodera sp., *goettingiana* group (78 times), in soil samples, soil with automobiles and military cargo, and soil with various plants and vegetables from Argentina, Azores, England, France, Germany, Greece, Guatemala, Ireland,

Italy, Japan, Mexico, Netherlands, Poland, Portugal, Scotland, Spain, Sweden, and Yugoslavia.

Heterodera sp., *rostochiensis* group, probably "horsenettle cyst nematode," in soil with bougainvillea plant in baggage from Mexico and ullucus tuber in air baggage from Bolivia. *Heterodera* sp., *rostochiensis* group, in soil with begonia, chili pepper, Chinese hibiscus(?), mango, nasturtium, *Origanum* sp.(?), and treebine plants in baggage from Mexico; and in soil with potato in stores from Germany and Italy.

Heterodera sp., *schachtii* group (111 times), in soil samples, soil with automobiles and van pack skids, and soil with various flower plants and vegetables. Countries of origin were Argentina, Australia, Belgium, Canary Islands, Chile, Czechoslovakia, Denmark, England, Finland, France, Germany, Greece, Guatemala, Ireland, Italy, Lebanon, Netherlands, New Zealand, Norway, Okinawa, Paraguay, Poland, Portugal, Scotland, Sweden, and an unknown origin.

Heterodera sp. (4 times) in soil with cactus plant in air baggage from Germany, soil with potato in air baggage from Ireland, soil with rosemary plant in air baggage from Poland, and soil with shamrock in mail from Northern Ireland.

Hoplotaimus sp. (3 times) in soil with agave, pricklypear, and unidentified plants in baggage from Mexico.

Meloidogyne sp. (33 times) in roots of various flower and ornamental plants from Austria, England, Fiji, Germany, Hawaii, India, Japan, Mexico, Netherlands, Portugal, Republic of South Africa, Spain, and Switzerland.

Paratylenchus sp. in soil with mountain heath plant in mail from Ireland.

Pratylenchus sp. (12 times) in amaryllis bulb, cornflower root, Fortunes plantainlily root, helianthus root, lungwort root, and in soil with coffee, maidenhair fern, mountain heath, and unidentified plants from the Azores, England, India, Ireland, Mexico, Netherlands, and the Republic of South Africa.

Psilenchus sp. in unidentified plant in mail from India.

Rotylenchus sp. in soil with yucca in cargo from Guatemala.

Scutellonema sp. in soil with amaryllis plant, gardenia plant, and lily bulb in baggage and ragweed plant in mail from Mexico.

Trichodorus sp. in soil with camellia plant in baggage from Portugal.

Tylenchorhynchus sp., near *latus* Allen, 1955, in soil with gardenia plant in baggage from Mexico.

Tylenchorhynchus sp. (18 times) in soil with agave, chrysanthemum, coleus, gardenia, hibiscus, orchid, pricklypear, succulent, and unidentified plants in baggage from Mexico, soil with snails in air baggage from the Philippines, soil with unidentified plants in air baggage from England, and in tuberous begonia in air baggage and mail from Belgium.

Tylenchus sp., near *discrepans* Andrassy, 1954, in soil with pine plant in air baggage from Japan.

Tylenchus sp. (5 times) in soil with begonia in baggage from Argentina, soil with coffee, dahlia, and philodendron plants in baggage from Mexico, and in unidentified plants in mail from India.

Xiphinema sp. (5 times) in soil with amaryllis bulb and pepper plant in baggage from Mexico, soil with camellia in baggage from Portugal, and soil with common cassava root in cargo from Guatemala.

CHANGES IN NOMENCLATURE

For reference purposes the following list represents insect name changes which have occurred since the issuance of the previous list. Disease name changes are included in the tabulation.

Aleurotrachelus jelenekii (Frauen.) (= *Frauenfeldiella jelenekii* (Frauen.))

Bruchidius villosus (F.) (= *Sparteus villosus* (F.))

Bruchus rufipes Hbst. (= *B. guttalis* Rey)

Incisitermes repandus (Hill) (= *Kaloterms repandus* Hill)

Lygaeus pulchellus F. (= *Ochrostomus pulchellus* (F.))

Merodon equestris (F.) (= *Lampetia equestris* (F.))

Ovatus crataegarius (Wlk.) (= *Phorodon menthae* (Buckt.))

Taeniothrips eucharis (Whetzel) (= *T. gracilis* Moulton)

Hosts and Insects

ACACIA:

- Acanthoscelides spinipes* (Coleoptera)
- Araecerus levipennis* (Coleoptera)
- Ectomyelois ceratoniae* (Lepidoptera)
- Eryptochiamera formosa* (Hemiptera)
- Pseudopachymerus lallemandi* (Coleoptera)
- Trogoderma granarium* (Coleoptera)

ACER:

- Periphyllus aceris* (Homoptera)

ACHRAS:

- Anastrepha ocerisia* (Diptera)
- Pseudococcus lilacinus* (Homoptera)
- Zamagiria dizolophella* (Lepidoptera)

ADENANTHERA:

- Caryedon gonagra* (Coleoptera)

AECHEMEA:

- Pentalonia nigronervosa* (Homoptera)
- Praticolella berlandieriana* (Mollusca)

AGAVE:

- Batrachedra linaria* (Lepidoptera)
- Pachybrachius albocinctus* (Hemiptera)

AILANTHUS:

- Pentodon punctatus* (Coleoptera)

ALEURITES:

- Dacus dorsalis* (?) (Diptera)

ALLIUM CEPA:

- Aceria tulipae* (Acarina)
- Acrolepia assectella* (Lepidoptera)

ALLIUM PORRUM:

- Acrolepia assectella* (Lepidoptera)
- Cochlicella ventrosa* (Mollusca)
- Helicella virgata* (Mollusca)
- Theba pisana* (Mollusca)

ALLIUM SATIVUM:

- Brachycerus albidentatus* (Coleoptera)
- B. algerius* (Coleoptera)
- Cochlicella barbara* (Mollusca)
- Dyspessa ulula* (Lepidoptera)

ALPINIA:

- Pentalonia nigronervosa* (Homoptera)
- Pheidole megacephala* (Hymenoptera)
- Pulvinaria psidii* (Homoptera)

ALTHAEA:

- Pectinophora malvella* (Lepidoptera)
- Pericopia malvella* (Lepidoptera)

AMPELOPSIS:

- Sitona lineata* (Coleoptera)

ANANAS:

- Araecerus levipennis* (Coleoptera)
- Arphnus melanotylus* (Hemiptera)
- Dysdercus obliquus* (Hemiptera)
- Ethelema sobrina* (Coleoptera)
- Ligyrocoris nitidicollis* (Hemiptera)
- Lygaeus pulchellus* (Hemiptera)
- Metamasius hemipterus sericeus* (Coleoptera)
- Pheidole megacephala* (Hymenoptera)

ANEMONE:

- Taeniothrips atratus* (Thysanoptera)
- Thrips flavus* (Thysanoptera)

ANNONA:

- Bephrata maculicollis* (Hymenoptera)
- Cerconota anonella* (Lepidoptera)
- Pseudococcus neobrevipes* (Homoptera)
- Talponia batesi* (Lepidoptera)
- Vinsonia stellifera* (Homoptera)

ANTHURIUM:

- Bradybaena similaris* (Mollusca)
- Ceroplastes rubens* (Homoptera)
- Sinoxylon conigerum* (Coleoptera)
- Sybra alternans* (Coleoptera)
- Vinsonia stellifera* (Homoptera)
- Xylothrips religiosus* (Coleoptera)

ANTIRRHINUM:

- Haplothrips gowdeyi* (Thysanoptera)
- Thrips flavus* (Thysanoptera)

APIUM:

- Euleia heraclei* (Diptera)
- Sitona humeralis* (Coleoptera)
- Trogoderma granarium* (Coleoptera)
- Udea ferrugalis* (Lepidoptera)

ARABIS:

- Lygus rugulipennis* (Hemiptera)
- Tipula paludosa* (Diptera)

ARACHIS:

- Caryedon gonagra* (Coleoptera)

ARCTIUM:

- Ostrinia nubilalis* (Lepidoptera)

ARECA:

- Aspidiotus palmarum* (Homoptera)

ASPASIA:

- Vinsonia stellifera* (Homoptera)

ASTER:

- Frankliniella intonsa* (Thysanoptera)
- Taeniothrips atratus* (Thysanoptera)
- Thrips flavus* (Thysanoptera)

ASTRAGALUS:

- Bruchidius marginalis* (Coleoptera)
- Trogoderma granarium* (Coleoptera)

AVERRHOA:

- Dacus dorsalis* (Diptera)

BAMBOO:

- Asterolecanium bambusae* (Homoptera)
- Chlorophorus annularis* (Coleoptera)
- Eucalendra setulosa* (Coleoptera)
- Myocalandra elongata* (Coleoptera)
- Oryzichilus alliarius* (Mollusca)
- Pentamerismus oregonensis* (Acarina)
- Trogozylon prostomoides* (Coleoptera)

BAMBUSA:

- Asterolecanium bambusae* (Homoptera)

BARRINGTONIA:

- Ectomyelois ceratoniae* (Lepidoptera)

BELLIS:

- Taeniothrips atratus* (Thysanoptera)
- Thrips major* (Thysanoptera)

BETA:

- Gnorimoschema ocellatella* (Lepidoptera)
- Mamestra brassicae* (Lepidoptera)
- Prodenia litura* (Lepidoptera)

BETULA:

- Aceria rudis* (Acarina)
- Argyroplote lacunana* (Lepidoptera)

BILLBERGIA:

- Aleuroplatus variegatus* (Homoptera)

BIXA:

- Acanthoscelides bixae* (Coleoptera)

BLETTIA:

- Nasutitermes chaquimayensis* (Isoptera)

BRASSAVOLA:

- Pheidole megacephala* (Hymenoptera)

BRASSIA:

- Vinsonia stellifera* (Homoptera)

BRASSICA OLERACEA VAR. ACEPHALA:

- Mamestra brassicae* (Lepidoptera)

BRASSICA OLERACEA VAR. BOTRYTIS:

- Arianita arbutorum* (Mollusca)
- Bibio hortulanus* (Diptera)
- Euregistis forficatus* (Lepidoptera)
- Helicella candidula* (Mollusca)
- Helix aspersa* (Mollusca)
- Mamestra brassicae* (Lepidoptera)
- Phytomyza rufipes* (Diptera)

BRASSICA OLERACEA VAR. CAPITATA:

- Cochlicella ventrosa* (Mollusca)
- Eupelitz cuspidata* (Homoptera)
- Euregistis forficatus* (Lepidoptera)
- Helicella variabilis* (Mollusca)
- Mamestra brassicae* (Lepidoptera)
- Milax gagates* (Mollusca)
- Otala lactea* (Mollusca)
- Phytomyza rufipes* (Diptera)
- Pieris brassicae* (Lepidoptera)
- Udea ferrugalis* (Lepidoptera)

BRASSICA RAPA:

- Helicella undatis* (Lepidoptera)

BROMELIAD:

- Anechura vara* (Dermaptera)
- Arphnus melanotylus* (Hemiptera)
- Chrysomphalus personatus* (Homoptera)
- Conotelus mexicanus* (Coleoptera)
- Cylindrocaptus tetralobus* (?) (Coleoptera)
- Drymaeus hegewischi* (Mollusca)
- Galgapha punctijer* (Hemiptera)
- Iridomyrmex iniquus* (Hymenoptera)
- Limax marginatus* (Mollusca)
- Lygaeus pulchellus* (Hemiptera)
- Metamasius hemipterus hemipterus* (Coleoptera)
- Pallantia macula* (Hemiptera)
- Paracosmia tolteca* (Dermaptera)
- Sisamnes contractus* (Hemiptera)

Hosts and Insects—Continued

SOLANUM MELONGENA:

Hylesia euphemia (Lepidoptera)
Leucinodes orbonalis (Lepidoptera)

SOLANUM TUBEROSUM:

Gnorimoschema plaesiosema (Lepidoptera)
Premnotrypes latithorax (Coleoptera)
Taeniothrips ericae (Thysanoptera)

SORGHUM:

Sesamia cretica (Lepidoptera)

SPARTIUM:

Bruchidius unicolor (Coleoptera)

SPATHOGLOTTIS:

Brevipalpus obovatus (Acarina)

SPONDIAS:

Anastrepha mombinpraeoptans (Diptera)
Chrysomphalus calurus (Homoptera)

STANTHOPEA:

Vinsonia stellifera (Homoptera)

STAPHYLEA:

Diaprepes abbreviatus (Coleoptera)

STERCULIA:

Orydema fusiforme (Coleoptera)
Trogoderma granarium (Coleoptera)

SWIETENIA:

Geotomus pygmaeus (Hemiptera)
Lyctus africanus (Coleoptera)
Sinozylon anale (Coleoptera)

SYRINGA:

Adozophyes reticulana (Lepidoptera)

TAMARINDUS:

Caryedon gonagra (Coleoptera)
Phelomerus aberrans (Coleoptera)
Trogoderma granarium (Coleoptera)

TERMINALIA:

Anastrepha mombinpraeoptans (Diptera)
Ceratitis capitata (Diptera)
Dacus dorsalis (Diptera)
Trogoderma granarium (Coleoptera)

TILLANDSIA:

Reticulitermes tibialis (Isoptera)

TILIA:

Chionaspis salicis (Homoptera)

TRITICUM:

Bruchidius gilvus (Coleoptera)
Haplothrips aculeatus (Thysanoptera)
H. tritici (Thysanoptera)

TULIPA:

Merodon equestris (Diptera)

VANDA:

Araecerus levipennis (Coleoptera)
Bradybaena similis (Mollusca)
Conoderus exsul (Coleoptera)
Conotelus mexicanus (Coleoptera)
Eurytoma orchidearum (Hymenoptera)
Genaparlatoria pseudaspidotus (Homoptera)
Graptostethus manillensis (Hemiptera)
Orchidophilus alerimus (Coleoptera)
Orydema longulum (Coleoptera)
Perkinsiella saccharicida (Homoptera)
Taeniothrips hawaiiensis (Thysanoptera)
Xiphidopsis lita (Orthoptera)

VICIA:

Bruchus azoricus (Coleoptera)
B. dentipes (Coleoptera)
B. lentis (Coleoptera)
